7	Public Representative with construction/design background and/or experience with no conflict of interest	Citizen at large representing demographic diversity of county with construction/design background and/or experience preferred, with no conflict of interest. This seat may be filled with multiple individuals simultaneously in order to provide more flexibility in scheduling.	Initial portion of new definition is from previous policy verbiage. Previous board members, principals, etc. would be beneficial to serve as would be familiar with policy and would also offer different perspective(s). Not necessary to have add'l members with construction experience as staff expertise offers that facet. As currently defined, difficult to fill seat; if add "preferred" allows more flexibility in filling seat and, if obtained, a plus. Add'l flexibility assists in meeting Board's request of full committee of all eight (8) members at PSSC meetings. [Currently filled by one (1) individual, who is employed full time and, as a result, is often difficult to schedule.]
