### **Executive Summary**

The Governor's budget was released January 31, 2017. The Governor's budget contains a statewide enrollment increase of 1.01% and revenue per student increase of 3.03%. This provides for a statewide of 4.04%. The source of the Governor's revenue increase is reliance upon the property school taxable value increase of 6.56%. Last year the Governor's budget was based upon the majority of funding coming from the increase in property values. The Legislature rejected keeping the millage rate the same and decreased the millage rate to offset the increase in taxable value. Other preliminary information for 2017-2018 is for flat funding of K-12 education. The preliminary information is for any increase in funds being available from State General Revenue will be directed to Medicaid and the state universities. For this work session the financial information that is being provided is an update on projected results of operations for the 2016-2017 fiscal year. For the 2017-2018 fiscal year projections based upon the Governor's budget request and a projection based upon the same revenue per student through the Florida Education Finance Program increased for student growth.

The General Fund 2016-2017 projection has been computed based upon the following assumptions:

- A) Revenues have been updated for the latest state data. Tax collections have been forecasted to be at the 97% collection level.
- B) Expenditures have been updated for payment of the negotiated salary settlement. An estimated shortfall of funds needed to fund all federal I.D.E.A. staff. The estimated shortfall is approximately \$750,000 that will be paid from the General Fund. Projecting all expenditures through June 30, 2017, based upon the results of operations through January 31, 2017.

The General Fund 2017-2018 revenues appropriations have been computed based upon the following:

- A) There are two columns for revenues. One based upon the Governor's budget request and one based upon student growth with the same funding per student provided through the Florida Education Finance Program.
- B) Salaries for approximately 90 additional staff have been built into the budget. The increase in positions are as follows: The new STC North Port, 20 positions, custodial positions 29, the custodial positions are for the additional facilities that were opened and no new positions were allocated, restoring the office of the Associate Superintendent of Instruction, 2 positions, and the balance of 39 positions for student growth.
- C) Benefits The group health plan is projected to increase by 12% effective 1/1/18 and the other benefits are increasing based upon the hiring of additional staff, as listed above.
- D) Purchased Services Charter Schools The charter schools flow through payments will increase based upon student enrollment increases and in the Governor's budget the revenue per student increases approximately 4%.
- E) Purchased Services District The computation is based upon the opening of the new STC North Port and increased costs associated with student growth. Purchased services includes the following utilities: telephone, water, sewer, and recycling costs.
- F) Energy Services The computation is based upon the opening of the new STC North Port and related fuel cost increase with transporting additional students.

### **Budget Work Session February 21, 2017**

- G) Materials and Supplies The increase is based upon anticipated student growth.
- H) Capital Outlay The decrease is based upon the one-time expenses being incurred in the 2016-2017 year for the opening of the new STC North Port. These are one time expenditures that do not carry forward into the 2017-2018 fiscal year.
- I) Other Expenses The increase is based upon anticipated student growth.

In the following tables are a comparison between the Governor's budget request 2017-2018 and a level funding of education through the Florida Education Finance Program, increased only for student growth. The voted millage in both computations has been increased by 6%.
