Grant Purpose	The purpose is to increase quality science instruction at my school by using a collaboration between the Florida House Institute and the Suncoast Science Center. The two explorations will create hands-on engaging lessons focusing on the FCAT science standards.
Grant Activities	5th grade would go on a 2 1/2 hour field trip to the Florida House to engage in 7 different learning stations focused on energy and electricity in our daily lives. K-5 would benefit from the Suncoast Science Center coming once a week through our science lab to provide quality instruction and engaging activities focused on energy and electricity.
Grant Budget Items	The grant would provide 5th grade students an opportunity to leave school free of admission and travel to the Florida House Institute. Additionally, the partnership with the Suncoast Science Center would bring their materials, supplies, and equipment to Gocio for all students K-5.
After Grant Plans	Students will continue to talk about the activities and experiences they had at the different locations. The material learned will help students prepare for the FCAT Science 2.0.
