### **Executive Summary**

The Governor's budget was released January 31, 2017. The Governor's budget contains a statewide enrollment increase of 1.01% and revenue per student increase of 3.03%. This provides for a statewide increase of 4.04%. The source of the Governor's revenue increase is reliance upon a school taxable property value increase of 6.56%. Last year, the Governor's budget was based upon the majority of funding coming from the increase in property values. The Legislature rejected keeping the millage rate the same and decreased the millage rate to offset the increase in taxable value. Other preliminary information for 2017-2018 shows flat funding for K-12 education. The preliminary information is any increase in funds from State General Revenue will be directed to Medicaid and post-secondary education.

For this work session, the financial information that is being provided is an update on projected results of operations for the 2016-2017 fiscal year. The 2017-2018 fiscal year projections are based upon the Governor's budget request and a projection based upon the same revenue per student through the Florida Education Finance Program increased only for student growth.

The General Fund 2016-2017 projection has been computed based upon the following assumptions:

- A) Revenues have been updated for the latest state data. Tax collections have been forecasted to be at the 97% collection level.
- B) Expenditures have been updated for payment of the negotiated salary settlement. An estimated shortfall of approximately \$950,000 for federal I.D.E.A. staff that will need to be paid from the General Fund. All expenditures through June 30, 2017 are projected based upon the results of operations through February 28, 2017.

The General Fund 2017-2018 revenues appropriations have been computed based upon the following:

- A) There are two columns for revenues. One based upon the Governor's budget request and one based upon student growth with the same funding per student provided through the Florida Education Finance Program 2016-2017.
- B) Salaries for approximately 164 additional staff have been built into the budget. The increase in positions are as follows: The new STC North Port, 20 positions, custodial positions 29, the custodial positions are for the additional facilities that were opened with no new positions allocated, restoring the office of the Assistant Superintendent Chief Academic Officer, 2 positions, and the balance of 113 positions for student growth and budget priorities.
- C) Benefits The group health plan is projected to increase by 10% effective 1/1/18 and the other benefits are increasing based upon the hiring of additional staff, as listed above.
- D) Purchased Services Charter Schools The charter schools flow through payments will increase based upon student enrollment increases and in the Governor's budget the revenue per student increase of approximately 4%.
- E) Purchased Services District The computation is based upon the opening of the new STC North Port and increased costs associated with student growth. Purchased services includes the following utilities: telephone, water, sewer, and recycling costs.
- F) Energy Services The computation is based upon the opening of the new STC North Port and related fuel cost increase with transporting additional students.

- G) Materials and Supplies The increase is based upon anticipated student growth and textbook purchases.
- H) Capital Outlay These are one time expenditures that do not carry forward into the following fiscal year.
- I) Other Expenses The increase is based upon anticipated student growth.

In the following tables are a comparison between the Governor's budget request 2017-2018 and a level funding of education through the Florida Education Finance Program, increased only for student growth. The voted millage in both computations has been increased by 8%.
