Dear Madam Chairman,

We are making progress. However, the task of preparing a plan in compliance with the criteria established in the Resolution of April 17, 2007 is a daunting one. Due to the delay in getting the documentation requested in December it will require more time.

We are requesting an extension of six months. According to our data this will not impede construction at this point on the new facility, but will enable us to respond in better detail to the School Board's concerns.

Your favorable response will be much appreciated.

Yours truly,

Leslie M. Fishman
Chairman-Sarasota Architectural Foundation
