Grant Purpose	I am new to the school district, but already, I do not have access to enough laptops for my students. This is a serious challenge to the transition to common core curriculum and allowing students to perform research based inquiry as the need arises. I need laptops in my classroom and I am aiming high to get 10 ACER laptops to allow my students to partner and work to solve problems using real world resources. I am a bit shocked that we do not have enough laptops to accomplish this .
Grant Activities	I will have electronic research established for a variety of inquiry circles in my classroom, each and everyday. I have already had my instruction hindered by not allowing students to research key concepts to grow thinking. To not have students dynamically using computers throughout the day is a travesty. I am not talking about teaching to the test or FCAT. I am referring to authentic application of laptops to compare accross texts and validating evidence researched.
Grant Budget Items	This is simple, I want 10 ACER laptops from Walmart.com to allow student partnerships to research online. This equipment will be used throughout the year and atleast for the next 5 years to follow.
After Grant Plans	These laptops will be used beyond the year 2014. I could infer that with proper maintaining, these laptops will last atleast 4 years beyond the project date
