

# ***PIVOT CHARTER SCHOOL*** ***SARASOTA COUNTY APPLICATION***

Pivot Education, Inc.  
Application to open a school in August, 2014  
Submitted to Sarasota County School District  
August 1, 2013

# APPLICATION COVER SHEET

**NAME OF PROPOSED CHARTER SCHOOL:** Pivot Charter School

**NAME OF NONPROFIT ORGANIZATION/MUNICIPALITY**

Pivot Charter School, Inc.

**UNDER WHICH CHARTER WILL BE ORGANIZED OR OPERATED:**

Pivot Charter School

Provide the name of the person who will serve as **the primary contact** for this Application. **The primary contact** should serve as the contact for follow-up, interviews, and notices regarding this Application.

**NAME OF CONTACT PERSON:** Gary Iker

**TITLE/RELATIONSHIP TO NONPROFIT:** Executive Director

**MAILING ADDRESS:** 2675 Winkler Ave., Suite 200, Ft. Myers, FL 333901

**PRIMARY TELEPHONE:** (293) 243-8266

**ALTERNATE TELEPHONE:** (214) 622-1089

**E-MAIL ADDRESS:** giker@pivotcharterschool.com

**NAME OF EDUCATION SERVICE PROVIDER (if any):** None

**NAME OF PARTNER/PARENT ORGANIZATION (if any):** Advanced Academics, Inc.

**Projected School Opening:** 2014

| School Year | Grade Levels                      | Total Projected Student Enrollment | Student Enrollment Capacity (if known) |
|-------------|-----------------------------------|------------------------------------|--|
| First Year  | 6 <sup>th</sup> – 8 <sup>th</sup> | 241 Students                       | 432 Students                           |
| Second Year | Kind – 6 <sup>th</sup>            | 291 Students                       | 432 Students                           |
| Third Year  | Kind – 7 <sup>th</sup>            | 338 Students                       | 432 Students                           |
| Fourth Year | Kind – 8 <sup>th</sup>            | 385 Students                       | 432 Students                           |
| Fifth Year  | Kind – 8 <sup>th</sup>            | 432 Students                       | 432 Students                           |

I certify that I have the authority to submit this application and that all information contained herein is complete and accurate, realizing that any misrepresentation could result in disqualification from the application process or revocation after award. I understand that incomplete applications will not be considered. The person named as the contact person for the application is so authorized to serve as the primary contact for this application on behalf of the applicant.

## *Educational Plan*

## *Section 1:*

# *Mission, Guiding Principles and Purpose*

## *A. Mission Statement*

The mission statement should, in a few concise sentences, indicate what the school intends to do, for whom and to what degree. A school's mission statement provides the foundation for the entire application.

### *The Mission Statement:*

The mission of Pivot Charter Schools is to graduate middle and high school students through a unique, technology rich learning environment. Through our blended learning educational model, Pivot students will evolve into autonomous learners and excel in their goals to achieve post-secondary options.

**Vision:** Creating lifelong learners in a digital world.

### *The Pivot Promise:*

At Pivot we promise to:

1. Respect you as a student and individual.
2. Provide you with support on various levels provided by passionate educators.
3. Provide you with a personalized experience where you will have a one-on-one relationship with your teachers.
4. Help you grow into an autonomous learner where you will gain personal responsibility and self-guided study.
5. Maintain a safe, positive and accepting school culture and environment.
6. Help you achieve your graduation goals as long as you put in the necessary effort.
7. Guide you towards thinking and planning for your future after Pivot and beyond graduation.

As a Pivot student you promise to:

1. Show respect for yourself and all others.
2. Think positive, be positive and contribute positively to our Pivot community!
3. Work SMART!—which means keeping your attendance, academics and behavior in line with Pivot expectations.
4. Be open to evolve as a student and make a change for the better. Be open to interventions to help you excel in your goals.
5. Complete 30 hours of work online each week.

The Pivot mission statement and promises were formed from the belief that a quality blended educational program would allow students to succeed academically and socially while attending Pivot and these positive attributes would allow them to focus on future aspirations.

## *B. Guiding Principles*

---

*In accordance with the law, charter schools shall be guided by the following principles:*

- *Meet high standards of student achievement while providing parents flexibility to choose among diverse educational opportunities within the state’s public school system.*
- *Promote enhanced academic success and financial efficiency by aligning responsibility and accountability.*
- *Provide parents with sufficient information on whether their child is reading at grade level and whether the child gains at least a year’s worth of learning for every year spent in the charter school.*

At Pivot Charter School, we are committed to providing the highest quality education to our students, through a unique learning environment that is customized for individual needs. Our mission is to help our students evolve into autonomous learners who will excel in their goals to achieve success after they leave our school. As such, our program is designed to be a technology rich blended learning environment that allows us to provide a best-in-class educational option to our students.

## *The Blended Learning Environment*

---

The most unique aspect of our educational approach is the blended learning environment. Students who attend Pivot Charter Schools are provided an onsite classroom experience with teachers and tutors available to provide individual support and guidance, but also with a virtual learning environment to deliver the individualized curriculum with online teachers who are able to provide additional assistance and instruction beyond session hours. The Pivot model is a comprehensive package of support and instruction that ensures student success by allowing them to move at their own pace, and take ownership in their academic program. Each student has a calendar that they see each time they log on to their account. This calendar helps them stay on task by going from green to red if the student begins to fall behind, The student is also assigned to an onsite Educational Coordinator (EC) who acts as a mentor and monitors student progress. The student will meet with the Educational Coordinator each week to create goals for the new week and make sure all goals were met for the previous week. Together they will create a goal sheet and educational plan for the student. This information is relayed to the Principal and other staff on the student’s team.

Traditional schools are limited in the number of courses they are able to offer students by the number of students enrolled at the school, and the number of students who are interested in individual topics or sections. The blended learning model overcomes this barrier by providing the curriculum and content electronically with Florida certified teachers online. This allows students to choose from a wide array of accelerated or specialized classes based on their individual learning plan. Students have multiple options for electives and extracurricular activities that address the whole child.

The blended learning environment also breaks down the barriers of the school wall by making the curriculum and online teachers available to the students after school hours. Online teachers who hold current Florida teacher certificates are available 24-hours a day from 8pm on Sunday Evening through 8pm on Friday evening. Students can access their course materials, work, or teachers through any internet enabled device anywhere they can get online, whether it be in the classroom, from home, or from the coffee shop.

Pivot uses multiple testing measures including the Scantron Performance Series to test students throughout the year and is diligent in using these test results to place students in appropriate reading, math and other course tutoring groups . Educational Coordinators work with students in these tutoring groups but also address difficulties or needs as they arise. For example, the ECs may notice several students struggling with a particular concept and are able to pull these students together for a targeted small group instruction, providing just-in-time instruction to the students based on their individual needs. The ECs also work with the students, families, and online teachers to develop the student's individualized learning plan, and to hold students accountable for their learning goals and progress. Each EC advises a group of approximately 20-25 students per session, depending on the level of instruction (i.e. middle or high school). Their role is to oversee the students' progress, communicate with families, and help to develop social experiences and provide feedback to hold students accountable for their academic success. They work with the online teachers and the students to ensure student success.

## *The Individual Learning Plan*

---

We realize that not all students learn in the same way or at the same pace, and believe that is the principle behind the success of Pivot Charter Schools. Through our innovative online blended learning environment we are able to provide individualized, tailored instruction based on the students' needs and interests. The key to making this successful is the Individualized Learning Plan in place for each student.

Each student will have an Individual Learning Plan (see [appendix \\_](#)). These plans are developed collaboratively between the Pivot staff, students, and parents. Students are expected to consider their future goals, academic needs and with guidance from the educational professionals, come up with a plan which will include specific progress goals for what the student hopes to accomplish. We believe that this collaborative approach also helps to allocate the responsibility for the student success equally among the various stakeholders. In traditional settings, often it is the responsibility of the teacher to make sure the students are gaining the educational content required by standards. By collaboratively developing individual plans, students and parents are taught to realize that they must also be accountable for their learning and progress towards achieving both their goals, and the required standards.

## *Reporting Student Progress*

---

An important component of dividing the responsibility for student success among multiple stakeholders (EC, online teachers, students, and parents), is the ability to have up-to-date and accurate assessment information on the progress the student is making. This is another key benefit to the blended learning model. Because the content is provided online, the tracking and progress of each course can be

meticulously calculated and reported, and is available at any time by any of the stakeholders. The online assessment system provides daily feedback on a student’s performance. Current grades, rates of completion, pacing charts, complete and incomplete assignments, and communication from both onsite and online teachers can be viewed through the parent portal. The online system also provides longitudinal measurements of growth in each course, showing where the student began in their understanding of a course and where they are in current time. At any time a parent can log on to their students account and see how many minutes they spend on a subject, their progress, and grades.

The screenshot below provides an example of a student’s progress at any given time.

The screenshot displays a user interface for a student progress report. At the top left, it says "Welcome!". Below that is the "Student Progress Report" section, which includes a link to "Export All Enrollments" and a checked checkbox for "Show Active Enrollments". The main content is a table with the following data:

| Course Code | Course Name                            | Class | Status   | % Complete | Current Grade | Days Remaining |
|-------------|--|-------|----------|------------|---------------|----------------|
| ▼           | Algebra II A                           | AAI   | Approved | 53         | 82%           | 23             |
| ▼           | Chemistry B                            | AAI   | Approved | 67         | 90%           | 23             |
| ▼           | English III B                          | AAI   | Approved | 44         | 73%           | 23             |
| ▼           | Introduction to Graphic Design         | AAI   | Approved | 95         | 85%           | 24             |
| ▼           | Reading Plus                           | AAI   | Approved | 0          | N/A           | 111            |
| ▼           | World History B                        | AAI   | Approved | 79         | 81%           | 23             |
| ▼           | Advanced Academics Student Orientation | AAI   | Finished | 100        | 71%           | 0              |

At the bottom of the table area, it says "Page 1 of 2, items 1 to 10 of 13." On the right side of the interface, there are several menu sections: "Help" with links for Navigation Demo, Grade Viewer Demo, Communication Demo, Instant Help Demo, and Student Drop Box Demo; "System Announcements"; "Switch Applications" with a "Choose Application" dropdown menu listing Classroom, Communication Site, and Home; "Quick Links" with a "Getting Started Guide" link; and "Pop-Up Blocker Notes".

## Utilizing Efficiencies from Partnerships

Through the use of the innovative learning environment, and the multiple partnerships Pivot Charter Schools have formed, we are able to capitalize on efficiencies not available to other schools, allowing our schools to ensure stability. For example, by using a curriculum provider, in alignment with our blended model, the curriculum and online teachers are provided through the virtual curriculum online

system. This allows us to forgo the costly expense of textbooks, as the curricular material is all available online through the virtual provider's online system. The use of the online Florida certified teachers through the virtual provider also allows us to be more flexible with our onsite EC's. All of our EC's are certified in the state of Florida, but due to the innovative blended model, our onsite teachers do not necessarily need to hold all of the certifications required for all of the courses the students are taking, providing flexibility to the school while still providing top-notch certified teachers to the students. Please see sections 3 and 4 for more information on the use of the curriculum provider.

Another example of efficiencies created through partnerships is the use of a back office service provider. While the financial health and accountability rests with our highly qualified Board of Directors, we are able to create efficiencies and ensure strong fiscal procedures by utilizing a back office provider to handle all of our accounting and financial needs. This allows our onsite staff to stay focused on the core purpose of educating students. Please see chapter 18 for more detailed on this partnership and our fiscal policies.

## *C. Prescribed Purpose*

---

### *Improve student learning and academic achievement.*

Our mission is to graduate middle and high school students through a unique, technology rich learning environment. As described above the unique blended learning model we employ offers numerous benefits, but the most significant is that our students will evolve into autonomous learners and excel in their goals to achieve post-secondary options. Central to our mission is ensuring student success and academic achievement.

Students with a broad array of abilities and strengths will be able to experience success with the educational model used at Pivot Charter Schools. This is possible thanks to the individual focus of the learning plans which are customized for each individual student. We are able to provide a custom educational plan designed for each student that will be individually challenging and engaging.

In a traditional school setting, the teachers need to teach to the group. While much effort is put into differentiation and all teachers do their best to challenge all students, realistically there will be students for whom the instruction is either below or above their level. In addition, the regimented bell structure and switching classes is a necessary evil in traditional schools. Some students are simply unable to succeed given these realities. Often the students who attend Pivot are the students who are finding it difficult to succeed in traditional setting. This may be because they are bored with the traditional curriculum and need additional challenges, or because they are distracted or disengaged in the traditional setting. Either way, the individualized instruction support offered at Pivot Charter Schools can improve student learning and academic achievement outcomes.

Within the traditional classroom, teachers are often pressured to ensure "no child is left behind", meaning that a percentage of students will feel as though they are being held back, needing to wait for the rest of the class to understand a concept. At Pivot Charter School, this student can not only access numerous AP and college classes, but can also work at his or her own pace and complete courses at a rate commensurate with his or her abilities. This student can complete their credits faster than s/he normally would be able to in a traditional educational environment because the student can move at his or her own pace. He or she can take extra AP or honors classes or begin his or her life in college or the

work force. In addition, this flexible schedule that allows students to work onsite with staff support and then complete work from any internet equipped setting, gives families and students an opportunity to pursue hobbies, career, or academic interests outside of school.

At the opposite end of the spectrum you may have students who are struggling to keep up in the traditional setting, or may just need more time to devote to an individual topic than a regimented bell schedule may allow. These students may have negative feelings toward learning and consider dropping out, not because they are unable to grasp the materials, but because the traditional structure of school does not meet their needs. The online curriculum and considerable amount of individualized support that Pivot Charter School students receive promotes achievement and improves students' motivation in an academic setting. The instructional component that differentiates Pivot from similar models is the use of two cohorts of teachers (onsite and online). The onsite ECs work to develop individual connections with the student and to tailor their educational program to their needs and abilities.

As a result of our innovative model, we are able to accommodate a wide variety of students, from those seeking to graduate early by accelerating their coursework, to the student seeking to get back on track via credit recovery, or desire to attend the abbreviated school to participate in outside obligations (work, sports, and family responsibilities).

The ability to tailor the instruction and combine the online learning components with the individual support and targeted instruction on site means that we can work with high achieving students, students who are not performing at grade level, students who are non-native English speakers and need additional site-based tutoring and small group instruction as well as those students needing specialized interventions to remediate deficiencies.

The Pivot model also takes into account the varied backgrounds and life experiences our students and families may be experiencing outside of school. The flexible schedule and ability to access teachers twenty four hours a day five days a week means that the program is well suited to working families, or high school students who must work, raise their own families or those who are just seeking a smaller, more individualized, self-paced school setting to prepare them for high school, post-secondary education, and career opportunities.

It is also important to note that the ongoing assessment and continuous online monitoring of students allow us to have a well-informed perspective of each student's progress and abilities. This allows us to ensure that no student is "slipping through the cracks", but allowing us to intervene before an issue becomes overwhelming for students.

### ***Increase learning opportunities for all students, with a special emphasis on low-performing students and reading.***

As mentioned above, Pivot Charter School students who are low-performing have numerous support mechanisms that are individualized to meet the needs of each student. All instructional assistance is one-on-one and includes the oversight of site-based caring, supportive educational coordinator assigned specifically to help students succeed. The school is providing an alternative academic setting and "a second chance" to succeed for those students who are behind in credits and are low performing. Struggling middle school students who want to catch up before entering high school or those who are "bored" with a traditional classroom will choose Pivot Charter School. The online curriculum allows

students to master concepts that may have been too difficult for them previously, either academically or socially.

Literacy is embedded throughout the curriculum with an emphasis on comprehension. Since a significant amount of computer-based work is done through reading (although the curriculum can also be accessed verbally with the use of assistive technology), all courses are specifically written with grade-level reading skills in mind. Reading enrichment is provided through differentiated online reading programs and site-based teacher support. At Pivot Charter School we use the term enrichment to apply to the differentiated approach we provide for both our highest and our lowest achieving student, or what some schools might refer to as remediation. Our view is that these same instructional approaches are of benefit to students at both ends of the spectrum. Ongoing reading assessments are implemented throughout the year to monitor a student's reading progress and to inform the ECs and parents on a regular basis. All students who are scoring at the 1 or 2 on the FCAT (or the equivalent on the PARCC assessment once implemented) in reading are supported through remedial reading courses, Reading Plus, tutoring, and onsite reading instruction. In addition to the Reading Plus program students can utilize online readers, who read text aloud, to help them "hear" the content they are reading, thus improving reading comprehension. To learn more about our reading program and supports, please see section four of this application.

### *Encourage the use of innovative learning methods.*

In a May 2009, study prepared by The Center for American Progress and the Broad Foundation entitled Getting Students More Learning Time Online, it is stated, "Distance education can offer an approach to expanding school learning time that allows for more flexible and individualized learning through the application of new technologies" (Cavanaugh, 2009). Traditional instruction is not always effective for all students. Online curriculum with interactive video and frequent communication from credentialed teachers motivate students, hold their attention and make them accountable. In an era of constant stimulus and a focus on recognizing and adapting to different learning styles, traditional classroom instruction can make learning more of a challenge for students who are tactile (need to touch things) and kinesthetic (need to be moving; e.g. the student who is always tapping his pencil or shaking her leg in class). The online courses meet the needs of not only the students who need to move and touch, but also those who need visual stimulation and many individualized auditory cues, which are provided by the animation and videos of the online courses provided by the online curriculum provider at Pivot Charter School. The onsite Educational Coordinators use modern technologies and differential instruction to work in small group and one-on-one sessions to reach all students learning styles.

### *Require the measurement of learning outcomes.*

Pivot Charter School has developed very clear, measurable, and specific goals for school wide student learning, as well as operational goals, which promote increased learning at the school. The school has developed action steps to meet these goals and a system of monitoring the reasonableness and progress for attaining each goal. Pivot uses the Scantron Performance Series to test students throughout the year and compile ongoing data to meet the student's needs. Each individual Pivot Charter School student also develops, with his or her Educational Coordinator educational, career and life long goals cited in their Individual Education Plan, which is updated at least annually. The assigned Educational Coordinator works with the students and families to ensure that the student meets their individual learning outcomes and ensures that the students have access to, and avail themselves of the significant

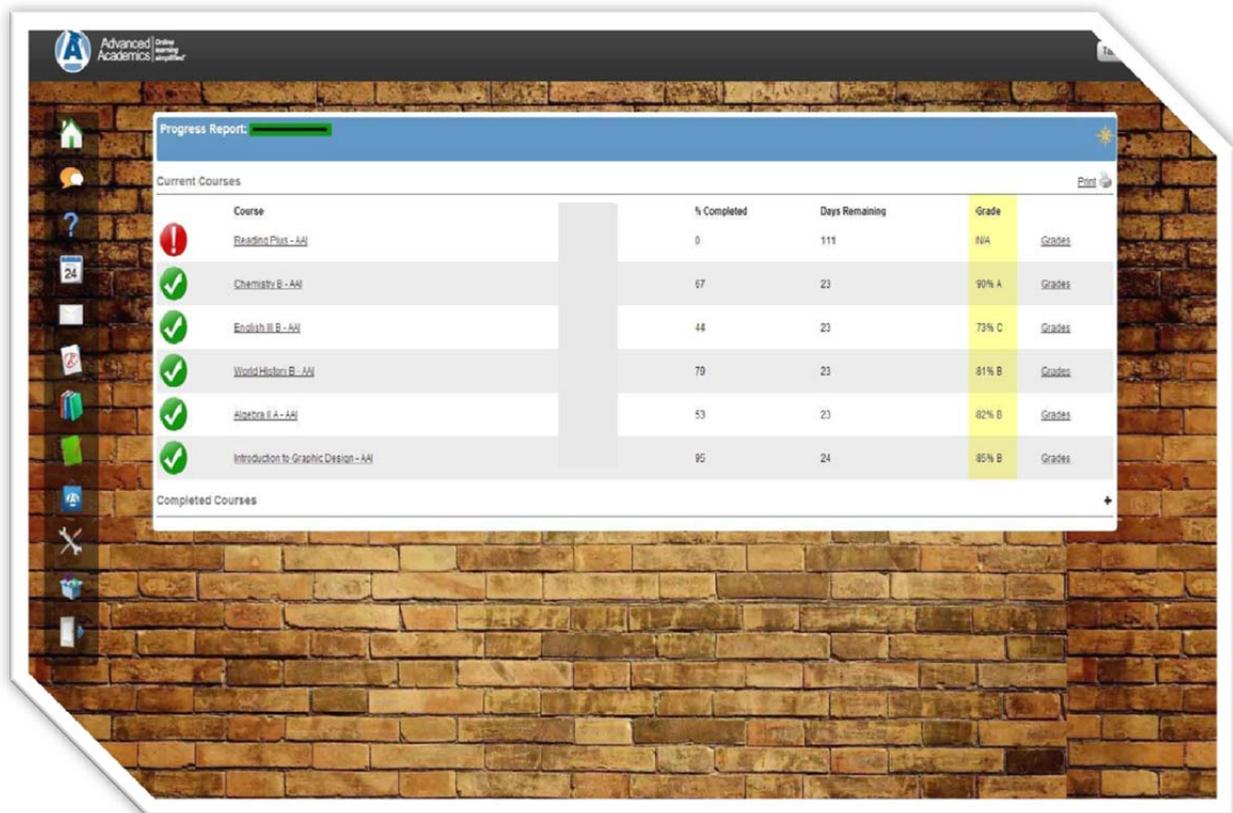

amount of support Pivot Charter School offers to help them meet their goals. The online component has multiple built in tools to assess and monitor student progress.

## *D. Additional Purpose*

In accordance with the law, Pivot Charter School shall fulfill the following optional purposes:

### *Create innovative measurement tools.*

Ongoing assessment occurs in each course daily or weekly, demonstrating acquisition of the Common Core State Standards (CCSS) and the Next Generation Sunshine State Standards (NGSSS). The courses provide instant feedback to every student on his or her individual progress. The screenshot below shows an example of a student's progress.

| Course                              | % Completed | Days Remaining | Grade | Grades |
|-------------------------------------|-------------|----------------|-------|--------|
| Reading Plus - AA                   | 0           | 111            | N/A   | Grades |
| Chemistry B - AA                    | 67          | 23             | 90% A | Grades |
| English III B - AA                  | 44          | 23             | 73% C | Grades |
| World History B - AA                | 79          | 23             | 81% B | Grades |
| Algebra II A - AA                   | 53          | 23             | 82% D | Grades |
| Introduction to Graphic Design - AA | 95          | 24             | 95% B | Grades |

The student can have a teacher reset assessments when he/she are not successful and cannot demonstrate adequate understanding of the CCSS/NGSSS, but prior to doing so, they are given remediation instruction and are required to complete more assignments before they are allowed to retake an assessment. The students will stay in a class until he or she has met required proficiency levels in a course. Thus, unless a student elects to drop a class, the student should not fail any course. Performance and completion data are displayed on the student dashboard, which populates each time

the student turns on the workstation. The ongoing assessment holds the student accountable daily and supports his or her continual progress toward acquiring the objectives of CCSS/NGSSS.

### ***Provide rigorous competition within the public school district to stimulate continual improvement in all public schools.***

The educational program at Pivot Charter School is designed to meet the individual needs of students, allowing us to continually improve students, and to provide a model that could be implemented at other schools. Through the individual learning plan for each student, we are able to focus in on key goals for each student such as providing early college (dual enrollment) courses, strong career guidance and/or a service learning approach applicable to the student's long-term goals. While all of these services may be offered at other schools, we do not know of any school in the county that is able to blend the model together in the way that Pivot Charter Schools does, allowing us to meet our mission of helping students evolve into autonomous learners ready to excel in whatever post-secondary options they partake.

### ***Expand the capacity of the public school system.***

Online learning allows students to take courses they would not normally have access to given the constraints of having to hire site-based classroom teachers for every course provided in a traditional setting such as Art History, Anthropology, Psychology, Graphic Arts, AP Physics and AP Environmental Science (see course descriptions in section four). Most importantly, Pivot Charter School expands the public school system's ability to serve students who need more one-on-one instruction and a very specific individualized academic program while providing unique scheduling opportunities for students in need of alternative time in the classroom.

### ***Pivot Charter School in Sarasota County***

Sarasota has a strong history of providing exceptional educational options to the students residing within the county. This is further evidenced by the number of high quality charter schools that Sarasota has authorized and works with. We are excited to partner with Sarasota County to provide a unique, high quality program to the students of Sarasota County. Pivot Charter School provides a unique and viable alternative through its blended learning program. Pivot Charter School will help to continue to provide a high quality program to the students and to raise the County graduation rate by offering a program that can be individualized to every student, where students can get significant levels of one-on-one support in an environment that many students will find engaging and more stimulating than most traditional classrooms. The unique and customizable program can appeal to the high achieving students who may not be accelerated to their full potential, as well as those students who feel they can never get caught up and graduate and would normally drop out. All students have a second chance at meeting their educational goals at Pivot Charter School.

Pivot will be an asset to the Sarasota community. Pivot Charter School is a site-based school using a unique curriculum that allows students to have an individualized program but also receive onsite support such as tutoring, direct instruction, preparation for state assessments, and numerous social activities. Students can attain a diploma and are even encouraged to earn college credits while in high school.

***Create new professional opportunities for teachers, including ownership of the learning program at the school site.***

The ability to work with students one-on-one in a dynamic environment is a tremendous opportunity for teachers who are seeking something beyond the traditional classroom. The onsite teachers use their educational knowledge to determine what individual students need to succeed and differentiating instruction on a one-on-one level. The onsite teachers work with the Principal to individualize the student by watching them work while online and during the tutoring sessions to determine what each individual student needs to be successful.

## *Section 2:*

# *Target Population and Student Body*

## *A. Serving Target Population*

Pursuant to s.1002.33 (10), (a) and (b), F.S., Pivot Charter School will be open to all students in grades 6-12 (approximately 11 through 18 years of age) residing in the Sarasota County School District, who submits a timely application. If the number exceeds the capacity of the program, class, grade level or building, applicants shall have an equal chance of being admitted through a random selection process.

We seek to serve students and their families who are interested in the blended education model. Our model is best suited for students who:

1. Seek to participate in course offerings not available at their zoned school.
2. Need to recover or complete missing credits required for graduation.
3. Experience scheduling conflicts as a result of non-school related obligations.
4. Require a special instructional setting or an abbreviated school day.

Pivot Charter School will provide a blended learning environment for students who possess academic potential but may not demonstrate it within the traditional enrollment school setting. Potential students will recognize the Pivot performance standard, understand its curricula goals, and voluntarily elect to participate in the program. While the school provides a rigorous academic curriculum, it also recognizes that students with special learning needs in one area may also possess talent and ability in other areas and will enroll such students. Pivot does not intend to target a certain population of students but rather seeks to maintain a diverse student body that is reflective of the community it serves. Therefore, race/ethnicity, gender or other identifying attributes will not be factored in to the application process. Pivot will seek areas where schools are overcrowded and/or scoring lower on state report cards.

As indicated in s.1002.33 (10) (e), admission will not be denied to any eligible applicant based upon sex, race, religion, national origin, ancestry, pregnancy, marital or parental status, sexual orientation or physical, mental, emotional or learning disability. This includes those students with special needs or disabilities, and ELL students. The school will also not discriminate in its pupil admissions policies or practices on the basis of intellectual or athletic ability, measures of achievement or aptitude, or any other basis that would be discriminatory if used by any public school.

In accordance with section 1002.33 (10) (d), F.S., Pivot Charter School will give admission preference to students who are the children of a member of the governing board of the charter school or who are the children of an employee of the charter school. Further preference may be given to siblings of a student enrolled in the school.

## B. Enrollment Projections

*Provide the following projection for each year of proposed operation: the grades that the school will serve, the projected number of students to be served in each grade, the number of students expected in each class, and the total number of students enrolled.*

The following table illustrates Pivot Charter School enrollment projections for the academic years of 2014-2015 through 2018-2019.

### **Anticipated Enrollment**

|                       | <b>Year One<br/>2014-15</b> | <b>Year Two<br/>2015-16</b> | <b>Year Three<br/>2016-17</b> | <b>Year Four<br/>2017-18</b> | <b>Year Five<br/>2018-19</b> |
|-----------------------|-----------------------------|-----------------------------|-------------------------------|------------------------------|------------------------------|
| <b>Sixth Grade</b>    | 22                          | 22                          | 44                            | 44                           | 44                           |
| <b>Seventh Grade</b>  | 22                          | 22                          | 22                            | 44                           | 44                           |
| <b>Eighth Grade</b>   | 22                          | 22                          | 22                            | 22                           | 44                           |
| <b>Ninth Grade</b>    | 50                          | 75                          | 75                            | 75                           | 75                           |
| <b>Tenth Grade</b>    | 50                          | 50                          | 75                            | 75                           | 75                           |
| <b>Eleventh Grade</b> | 50                          | 50                          | 50                            | 75                           | 75                           |
| <b>Twelfth Grade</b>  | 25                          | 50                          | 50                            | 50                           | 75                           |
| <b>Total Students</b> | 241                         | 291                         | 338                           | 385                          | 432                          |

Pivot Charter School will comply with Florida Class Size Reduction requirements and therefore ensures its class size enrollments will not exceed the 25:1 ratio for high school and 22:1 ratio for middle school students. The numbers indicated above are the anticipated enrollment numbers based on the staffing plan described in section 10 of this charter application. However, in order to budget conservatively, we are assuming that only about 94% of our seats will be full. As such, while we are anticipating 241 students during the first year, our budget is based on only 224 students.

We would like to state, however, that given the flexibility afforded by the blended model, the specific numbers in a particular grade level are less important. Our onsite EC's will be staffed at a ratio of at least 1:22 middle school students per session, and 1:25 high school students per session. For example, if we had 32 sixth graders and 12 seventh graders, this would still meet the 1:22 ratio for middle school students. Given that the teachers of record are the Florida certified and credentialed online teachers, the class size calculations would still be met, and the on-site supervision would still meet the ratio as well.

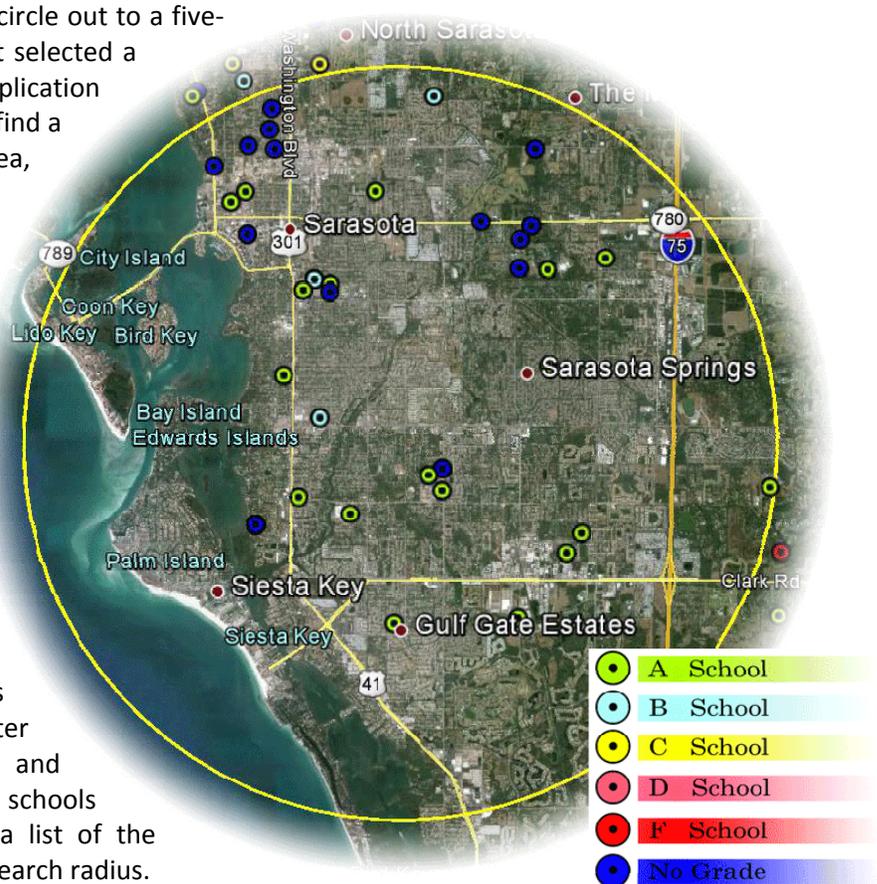

We have carefully considered our growth model to ensure that the school is starting with realistic enrollment numbers and growing at a safe rate to ensure a successful program. Eventually our goal is that students would start in either 6th or 9th grades and then move through the program to graduation. However, during the first few years we have tried to limit the number of classes at each section and then gradually increase the numbers each year, where possible growing our students from our younger grades to the older. Our ideal maximum capacity will be about 432 students as listed in year 5 of the chart above.

## C. How Projections Were Developed

In addition to the growth model explained above, several factors were considered in the development of the student population projections. However, the greatest consideration was given to the district's demographics, school data and census information. We believe that partnering with Sarasota County to open a Pivot Charter School in the county would be an excellent match for both our school and the Sarasota community. We believe there is an enormous benefit to the students thanks to the unique educational program we have to offer the county. Our blended education model is innovation and will help to develop students into global learners. A key feature of the program is that the total curriculum is delivered via the computer and provides both on site and distant learning teacher.

In order to ensure we have a solid understanding of the students who are likely to apply for Pivot Charter School in Sarasota County we spent time examining extensive state data about the schools in Sarasota county as well as the US Census data to find a potential location that would be beneficial to the community as well as support the growth model we hope to incorporate. In order to analyze this data, we narrowed down our search to a general area, and then chose a specific point at which to center our data search. We believe that the most advantageous area of Sarasota County would be somewhere in the vicinity of Southgate. In order to study the demographics we chose to center our search at 3170 Bee Ridge Rd, Sarasota, and extend the circle out to a five-mile radius. While we have not yet selected a facility, we hope that should this application be approved that we will be able to find a location within this search area, illustrated by the included map.

We examined the schools that are within this radius, and deliberately dropped out any school with less than 100 students. Of the schools remaining, there are 14 elementary schools that we could work with to provide options for fifth graders going into sixth graders in addition to five middle schools and seven high schools. In order to best understand the potential students who may enroll at Pivot Charter School, we try to examine and understand the demographics of the schools in the area. The chart below is a list of the middle and high schools within the search radius.

| <b>1School</b>                            | <b>FRL Rate</b> | <b>Minor. Rate</b> | <b>Title 1</b> | <b>Enroll.</b> | <b>2012 Grade</b> | <b>2011 Grade</b> | <b>2010 Grade</b> |
|---|-----------------|--------------------|----------------|----------------|-------------------|-------------------|-------------------|
| <b>Sarasota School Of Arts/sciences</b>   | 38.7%           | 34.8%              | No             | 748            | A                 | A                 | A                 |
| <b>Booker Middle School</b>               | 80.7%           | 74.8%              | Yes            | 810            | C                 | B                 | C                 |
| <b>Brookside Middle School</b>            | 63.3%           | 45.0%              | No             | 844            | B                 | A                 | A                 |
| <b>Mcintosh Middle School</b>             | 53.7%           | 38.8%              | No             | 853            | A                 | A                 | A                 |
| <b>Sarasota Middle School</b>             | 32.7%           | 21.8%              | No             | 1,210          | A                 | A                 | A                 |
| <b>Triad</b>                              | 79.3%           | 47.3%              | No             | 112            |                   |                   |                   |
| <b>Cyesis</b>                             | 0.0%            | 0.0%               | No             | 143            |                   |                   |                   |
| <b>Phoenix Academy</b>                    | 79.0%           | 60.3%              | Yes            | 194            |                   |                   | D                 |
| <b>Suncoast Polytechnical High School</b> | 39.5%           | 28.4%              | No             | 524            | A                 | A                 | B                 |
| <b>Sarasota Military Academy</b>          | 31.9%           | 23.5%              | No             | 967            | A                 | B                 | A                 |
| <b>Sarasota High School</b>               | 43.8%           | 37.3%              | No             | 1,965          | A                 | B                 | B                 |
| <b>Riverview High School</b>              | 36.2%           | 29.8%              | No             | 2,606          | A                 | B                 | B                 |

Our initial projection is for 241 students at Pivot Charter School, and this only represents only about 2.19% of the total middle and high school student population within the five mile search area. We also find it helpful to learn as much about the demographic of the students in areas we are considering opening a school as well. The following data is representative of the state data of all schools within the five mile search radius

### Demographics of All Public Schools within 5 Miles

| Demographic                      | # Population | Percentage |
|----------------------------------|--------------|------------|
| White                            | 11,956       | 59.74%     |
| African American                 | 1,873        | 9.36%      |
| Hispanic/Latino                  | 4,543        | 22.70%     |
| Asian                            | 401          | 2.00%      |
| Native Hawaiian/Pacific Islander | 9            | 0.04%      |
| American Indian / Alaska Native  | 88           | 0.44%      |
| Multiracial                      | 798          | 3.99%      |
|                                  |              |            |
| Male                             | 10,157       | 50.75%     |
| Female                           | 9,511        | 47.52%     |
|                                  |              |            |
| Free/Reduced Lunch               | 9,932        | 49.62%     |
| ESOL Students                    | 1,644        | 8.21%      |

In order to verify the data in comparison to non-public school data, we also analyzed the 2010 US Census data within the same search area. The following tables represent some of the statistics we looked at.

### US 2010 Census Data

| Demographic                      | # Students | Percentage |
|----------------------------------|------------|------------|
| Population Ages 10-14            | 8,358      | 5%         |
| Population Ages 15-19            | 8,548      | 5%         |
|                                  |            |            |
| White                            | 149,328    | 88%        |
| African American                 | 9,138      | 5%         |
| Asian                            | 2,539      | 1%         |
| Native Hawaiian/Pacific Islander | 64         | 0%         |
| American Indian / Alaska Native  | 510        | 0%         |
| Other                            | 5,166      | 3%         |
| Multiracial                      | 3,044      | 2%         |
|                                  |            |            |
| Hispanic or Latino               | 18,943     | 11%        |
| Not Hispanic or Latino           | 150,847    | 89%        |

| <b>Demographic</b>                 | <b>With Children</b> | <b>Without Children</b> | <b>Total</b> |
|------------------------------------|----------------------|-------------------------|--------------|
| <b>2-Parent Families</b>           | 8,978 (20%)          | 24,439 (55%)            | 33,417 (75%) |
| <b>Male Householder Families</b>   | 1,495 (3%)           | 1,589 (4%)              | 3,084 (7%)   |
| <b>Female Householder Families</b> | 4,070 (9%)           | 3,806 (9%)              | 7,876 (18%)  |

The Census data matches relatively closely the demographic makeup of the school district. One piece that we thought was interesting about this data set, however, was that there are currently about 16,906 people between the ages of 10-19 living within the search radius, but only 10,976 students were attending the middle and high schools within the search area. This indicates that there may be many potential Pivot Charter School students who are either attending school at a distance from their home, or that there may be a high percentage of students attending private school. We believe that the unique educational program offered by Pivot Charter School would provide an ideal opportunity to bring additional students back into the public school arena or at least provide them with a school that is closer to their home. If the census data is correct, our initial year target enrollment is only 1.43% of the 10 – 19 year olds represented in the census data.

Based on the data review, we believe we have a relatively prediction of the type of students who will be enrolling at Pivot Charter School in Sarasota county. Based on the school grades we expect that many of the students who will be enrolling will be performing at or above grade level (as evidenced by the grades issued to the schools in the area), that we may need to do additional recruiting to bring in additional minority students and that about half of our students may qualify for free or reduced lunch.

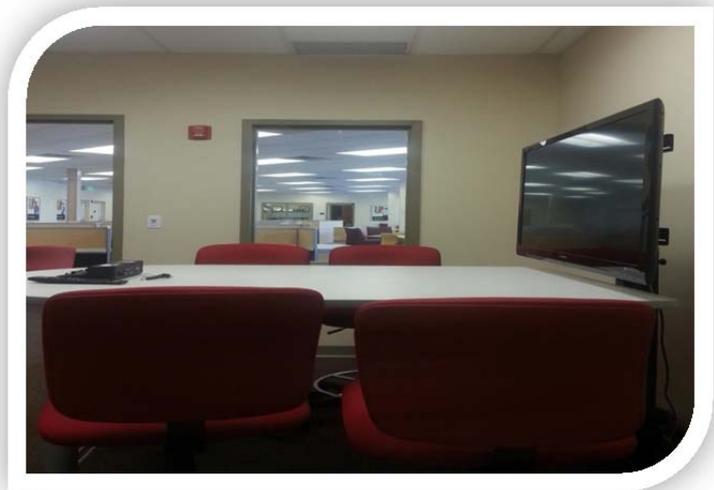

## *Section 3: Educational Program Design*

### *A. School Schedule*

Pivot will format its instructional day and calendar to meet FLDOE requirements for minutes and days for instruction. The school will follow the local district calendar, which encompasses 180 instructional days. The Pivot school day offers 300 minutes daily and 1500 minutes weekly. Students may choose between two concurrent academic sessions, but are required to attend daily.

Session A runs from 8:00 AM to 1:00 PM, while Session B begins at 11:30 AM and concludes at 4:30 PM. Students have the option of morning or afternoon unless the session is already full. Each session offers structured times broken into 45 minute sessions each session. To ensure that all students progress through the curriculum, we recommend that each student complete a minimum of 2 hours outside of their school day. The learning management system tracks each student's active time in the curriculum so we are able to ensure students meet the required number of minutes as described in Florida Statute for obtaining high school credit. The students' hours are monitored by the EC and the documentation is in their online curriculum.

The school environment is nimble and offers students the opportunity to engage in different instructional modalities throughout the day: self-directed online curriculum with teacher support, one on one teacher interaction via the online system or with the onsite teacher, small group direct instruction, or collaborative student learning spaces. Each Pivot student is assessed at the beginning of the year using the Scantron Performance Series Assessment and those test results are used by the Principal and Educational Coordinator to create tutoring groups. Educational Coordinators are the name we give our onsite teachers who work with students, and we will use this term or the acronym EC throughout this document. These tutoring groups will be continuously assessed a minimum of three times a year by retesting the students for comprehension. If a student is performing lower than expected he/she may be in additional tutoring and require more work from home or longer school hours. The school does have laptops that allow the students to work in small groups and if needed they can sign them out for the evening. A student may begin their day working individually from their personal space for the first forty five minutes, take their break and move to an assigned tutoring group or work with a group of peers on a research project. Pivot has both large and small tutoring rooms that allow students the flexibility to collaborate without disturbing other students. Below is a picture of one of our small tutoring rooms in our Fort Lauderdale, Tamarac campus.

This small group learning environment allows our students to help each other, get assistance from a teacher or an onsite math or reading tutor. These tutoring rooms are also used by our tutors who we call Educational Assistants (EA) to tutor our students one on one. The EA's are hired to only tutor in a subject in which they are highly qualified. The students sign up on a board and as the EA reaches the student's name the student gets the one-on-one attention that tends to make all the difference in a student's education. There are no limitations to amount of one-on-one tutoring the student is allowed.

## *B. Educational Program*

---

The most unique aspect of our educational approach is the blended learning environment. Students who attend Pivot Charter Schools are provided an onsite classroom experience based on an AVID (Advancement via Individual Determination) methodologies model with teachers and tutors available to provide individual support and guidance, but also with a virtual learning environment to deliver the individualized curriculum with online teachers who are able to provide additional assistance. In this way, students are provided the best of both worlds between traditional classroom instruction and online virtual instruction.

Educational Coordinators are highly qualified instructional staff members who work on an individual and small group basis with Pivot Students. The ECs serve an instructional, mentoring and case-management role for the students at the school. Each EC advises a group of approximately 22-25 students per session (depending upon the age level, in alignment with Florida class size requirements). ECs receive extensive training each year on their role, support methods, and how to effectively teach individual and small group sessions to maximize the student benefit. The ECs are supported through a statewide curriculum coordinator.

One of the primary roles of the ECs is to hold students accountable for their academic success. They will monitor student progress using the online instructional interface and regularly meet with students to discuss their progress, communicate with families, and develop social experiences for students. Each student has an Individual Learning Plan which provides direction for the student's educational path. The learning plan identifies the student's goals and interests, and then lists specific outcomes that students are anticipating completing. The student works with their EC to develop their plans at the start of the year, and periodically review their check to make sure the students are on track to meet their goals. A copy of the Individual Learning Plan form is included as **Appendix** in this application.

In addition to the Individualized Learning Plans, and to support the plan itself, each week every student will meet with their EC to develop a set of weekly goals about what they plan to accomplish that week, review the goals from the previous meeting, and monitor the progress toward meeting their comprehensive Individualized Learning Plan. During these weekly meetings the student and EC will work together to develop a calendar for the week outlining the objectives and assignments to be completed.

ECs will use a variety of data points to guide the development of each student's individualized learning plan as well as their weekly goal sessions. The online curriculum provides a vast array of data regarding the student's progress and assessment on specific skills. The ECs will be able to monitor all communication students are having with online instructors as well as their general progression through the curriculum. In addition the school uses periodic progress measuring using the Scantron's Performance Series Web-Based Assessment. This CCSS aligned assessment tool can be given every few

weeks to monitor the progress of students and identify needs each student may have so that they can be addressed in the weekly goal setting with each student.

In addition to this advising role, ECs also play an important instructional role. ECs coordinate with the online teachers and regularly monitor student progress to identify needs students may have, and can then provide just-in-time targeted instruction to individuals or small groups of students to address those specific areas. Through the use of the flexible scheduling model employed at the school, we are able to provide as little or as much individual support and instruction that may be required for each student. Students can stay for extended time beyond their typical academic session for additional tutoring or simply additional time on task. In addition, through the use of the online curriculum, each minute that students spend in the course is tracked and we are able to ensure that required class minutes are obtained in addition to the support provided through individual and small group instruction.

In addition to the official courses, the ECs also provide other services and instruction. For example, the ECs provide specific instruction and preparation to help students prepare for the EOCs and other standardized assessments such as PARCC.

At Pivot we believe that involving and keeping parents informed on their student progress is essential to a well-developed educational program, and this is another key aspect of the ECs responsibilities. The EC will regularly be in touch with parents to let them know how their students are progressing and to discuss issues that may need to be addressed. In addition, the school's Principal also maintains strong communication links with families as well, with newsletters and reports prepared daily, weekly, and monthly.

The progress that students and ECs are making is also regularly provided to the Principal of the school who will receive weekly reports on each student's progress through the online data systems.

What makes Pivot truly unique is the application of the blended model of education. The use of the onsite ECs as described above is integral to the overall implementation of the online curriculum. Through our online provider, Advanced Academics, Inc. (AAI) and our onsite staff, we are able to offer a comprehensive student centered educational program that addresses the needs of all students.

AAI was established in 2000 as a subsidiary of DeVry, Inc. to develop online learning solutions to service schools and districts throughout the nation. Their strategy is not to replace or compete with schools, but to enable them to serve more students using their innovative learning platforms. AAI has partnered with Pivot to create a unique learning environment which is able to support students from every angle.

The AAI pedagogy guides all aspects of the instructional system they have developed. Technology, curriculum design, and a strong support network are the three main elements that make up their intuitive, engaging, and supportive learning environment. Revolutionary technology solutions provide the framework in which students interact and connect with content, teachers, their support network, and each other to accomplish their learning goals. Their dynamic learning platform and curriculum are designed in conjunction with each other to ensure a fluid, successful experience for students.

The learning management system or LMS offers students self-directed and self-paced options that can be adapted to guide them along an individualized instructional path toward mastery of course objectives. All AAI courses are aligned to the Common Core State Standards as well as other appropriate national, state, and iNACOL standards. A variety of learning styles and multiple intelligences are accommodated throughout course lessons in order to reach all students. Real-world application of course content is also heavily emphasized. Finally, consistency in course design and the ability to control interactive elements enhance accessibility for all students, including those with special needs. The design of the courses rely heavily on the research bases of: understanding by design, differentiated instruction, Gagné’s Nine Events of Instruction and Bloom’s taxonomy:

**Understanding by Design:** Understanding by Design is a framework for designing standards-based curriculum that ensures student lessons, activities, and assessments are directed toward learning goals. Instructional designers use this “inverted pyramid” design process to translate standards into learning goals, formulate instructional objectives, and develop learning plans to reach those goals.

**Differentiated Instruction:** Given that students vary in their academic abilities, learning styles, personalities, interests, background knowledge and experiences, and levels of motivation, AAI’s online curriculum allows teachers to differentiate instruction, using best practices and strategies. Teachers maximize learning for all students regardless of skill level or background by ensuring that concepts are explained in many different ways and modalities.

In her book, *The Differentiated Classroom: Responding to the Needs of all Learners (1999)*, Dr. Carolyn Ann Tomilson, explains that differentiation is achieved through any one of four ways: 1) through content, 2) process, 3) product, and 4) learning environment based on the individual learner. Pivot responds to each of the modalities. Differentiated Instruction is an instructional concept that maximizes learning for all students regardless of skill level or background.

Differentiated learning is built on the understanding that students vary in their academic abilities, learning styles, personalities, interests, background knowledge, experiences, and levels of motivation for learning. When the online teachers differentiate instruction, they use the best teaching practices and strategies to create different pathways that respond to the needs of the diverse learners served. They work with students online to ensure that concepts are explained in many different ways and modalities.

**Gagné’s Nine Events of Instruction:** The nine conditions of learning identified by Gagné’s Nine Events of Instruction are all required to ensure successful learning. Each lesson in AAI’s online curriculum is designed to meet all of Gagné’s Nine Events of Instruction:

1. **Gain attention:** Opening activities engage students and stimulate prior knowledge and link it to new concepts to be covered in the lesson.
2. **Inform learners of objectives:** Each AAI course, unit, and lesson begins with a list of learning objectives.
3. **Stimulate prior learning:** Pre-requisite skills are reviewed as necessary and new content is linked to previous knowledge where appropriate.
4. **Present learning content:** Lesson content is appropriately chunked and presented using multiple methods, including text, video, animation, interactive multimedia, and audio. Graphic organizers are also incorporated into the content in order to accommodate visual learners.

5. **Provide guidance for learning:** Scaffolding is built into all AAI courses through the use of examples and non-examples, case studies, and analogies. In addition, learning and reading strategies, such as mnemonics, are taught. “Think and Click” activities are also incorporated throughout AAI courses to encourage metacognition and synthesis.
6. **Elicit performance:** AAI courses include a variety of ungraded practice opportunities as well as graded assessments such as homework assignments, discussion threads, oral assignments, papers, and projects. Students are also encouraged to engage in chat and phone conversations with AAI teachers and participate in discussions on class blogs.
7. **Provide constructive feedback:** AAI courses include assessments that provide immediate feedback to students, as well as manually-graded assessments that AAI teachers grade by hand. For these manually graded assessments, AAI teachers provide specific, constructive feedback for students at both the assessment level and the individual question level. Teachers also provide feedback to students through our one-on-one internal chat system and interactive whiteboard.
8. **Assess performance:** Regular assessment throughout each course is offered in the form of homework assignments, vocabulary tests, discussion threads, papers, and projects.
9. **Enhance retention and transfer:** Real-world examples and application of course content to generalized situations are provided throughout AAI courses in order to encourage retention and transfer.

**Bloom’s Taxonomy** - Bloom’s Taxonomy stems from the early research findings of Dr. Benjamin Bloom’s writings *Taxonomy of Educational Objectives* (1956). It is arguably the most widely used framework of instructional design. The hierarchical system of classifying learning objectives and tasks from the basic knowledge level to the highest level, encourages students to become independent thinkers who take an active role in learning. This taxonomy provides teachers with a structured method for planning and implementing classroom instruction that develops “higher order thinkers” instead of rote learners who memorize and cannot transfer knowledge. This taxonomy provides curriculum developers with a structured method for ensuring that students develop higher-order thinking skills. Students are assessed at every level of Bloom's, but the focus is on higher levels to ensure complete comprehension.

One additional significant key to student success is AAI’s strong support network. Students are not confined to the timeframe and structures of a traditional classroom. Certified teachers and teaching assistants are available to help students 24/5, and technical support is available 24/7. Students can “raise their hands” and ask questions through live chat with online teachers, or call in and receive help over the phone. In this expanded learning community, a network of teachers, technical support staff, counselors, and student coaches tracks student progress and works with parents and school districts to implement strategies for student success. Every element of the AAI instructional system is carefully designed and structured to lead students to the successful achievement of their learning goals.

AAI is able to provide Pivot with a best-in-class online learning program which incorporates live, Florida Certified Teachers for each course the students are taking, in addition to their comprehensive online platform. This means that each student is supported by numerous online teachers as well as the onsite ECs. In fact, students have access to Florida Certified teachers around the clock, from 8:00 pm on Sunday through 8:00 pm Friday night. Any time the students need assistance beyond what is offered through the online platform, they can simply click a button to have chat/whiteboard type support from a certified teacher. The wrap around system of supports supported by in class staff, and around the clock online teachers makes us a one-of-a-kind educational opportunity!

The platform that Pivot uses from AAI is referred to as ROADS, which stands for “Robust Online Academic Delivery System.”

## AAI Platform and Content

ROADS is an online learning management system that facilitates student participation and also presents the fully CCSS aligned curriculum. In addition the system also is able to conduct diagnostic testing for most courses. Implementation support and continual training for administrative and education personnel is also included in the program used by Pivot. Joint program planning allows data-sharing between the online teachers and the Pivot onsite ECs helping to ensure student success. All of this is provided to our students in addition to the 24/7 technical support available and 24/5 teachers who are available to assist and support the students.

The following screen shots help to illustrate the power available in the ROADS platform. Initially, when a student logs into the system, they are presented with a program calendar which helps to keep them informed on progress, assignments to complete, assignments that are being graded and if they are behind in their academics.

The screenshot displays the 'Your Calendar' interface in the ROADS platform. At the top, there is a dropdown menu for 'All Courses' and a legend for assignment statuses: Past Due (red), In Progress (orange), Not Taken (blue), Pending (grey), and Graded (green). Below the legend, it shows 'Number of Vacation Days Remaining: 14'. The main calendar grid shows dates from Sunday to Saturday. Each date cell contains a list of assignments with their corresponding status color. For example, on Tuesday, there are assignments for Unit 12 Paper Component: Outline (grey), Unit 7 Discussion: Effects of Radiation on Living Organisms (green), Unit 7 Assignment: Half-life Gizmo (green), and Unit 7 Assignment: Nuclear and Environmental Chemistry (green). On Wednesday, there are assignments for Unit 1 Activity: Where is Math Used Everyday? (orange), Unit 7 Assignment: Nuclear and Environmental Chemistry 2 (blue), Unit 1 Required Chat: The Great American Hall of Wonders (orange), Unit 12 Required Chat: Student-Teacher Conference (grey), and Unit 1 Test: What is Design? (grey). On Thursday, there are assignments for Unit 1 Paper: Short Story Analysis Essay (orange), Unit 5 Activity: Graphing Radical Functions (orange), Unit 12 Paper Component: Rough Draft (orange), Unit 5 Assignment: Realism and Modernism (blue), and Unit 8 Test: Biochemistry and Instrumentation (blue). On Friday, there are assignments for Unit 5 Assignment: Solving Radical Equations and Inequalities (blue), Unit 4 Project Component: Creating a Working Outline (orange), Unit 7 Test: Nuclear and Environmental Chemistry (blue), Unit 3 Paper: Comparing and Contrasting Relationships: Essay (orange), Unit 5 Assignment: Elements of Poetry (blue), Unit 5 Assignment: Analyzing Poems (blue), and Unit 9 Discussion: The Impact of Chemical Products and Technologies (blue). On Saturday, there is an assignment for Unit 9 (blue). The interface also includes a 'Today' button and a scroll bar on the right side.

In addition, the students have a customized homepage which provides them with a brief summary of where they stand in their progress in each class as is demonstrated in the next image.

**Welcome!**

The system also provides a wealth of information to school staff, parents in addition to the students. The following screen is an example of the progress report portal that parents can log into to check on their students' progress:

The screenshot shows a progress report portal for 'Advanced Academics'. The page features a blue header with the school's logo and name. Below the header, there is a 'Progress Report:' section with a green progress bar. The main content area is titled 'Current Courses' and contains a table with the following data:

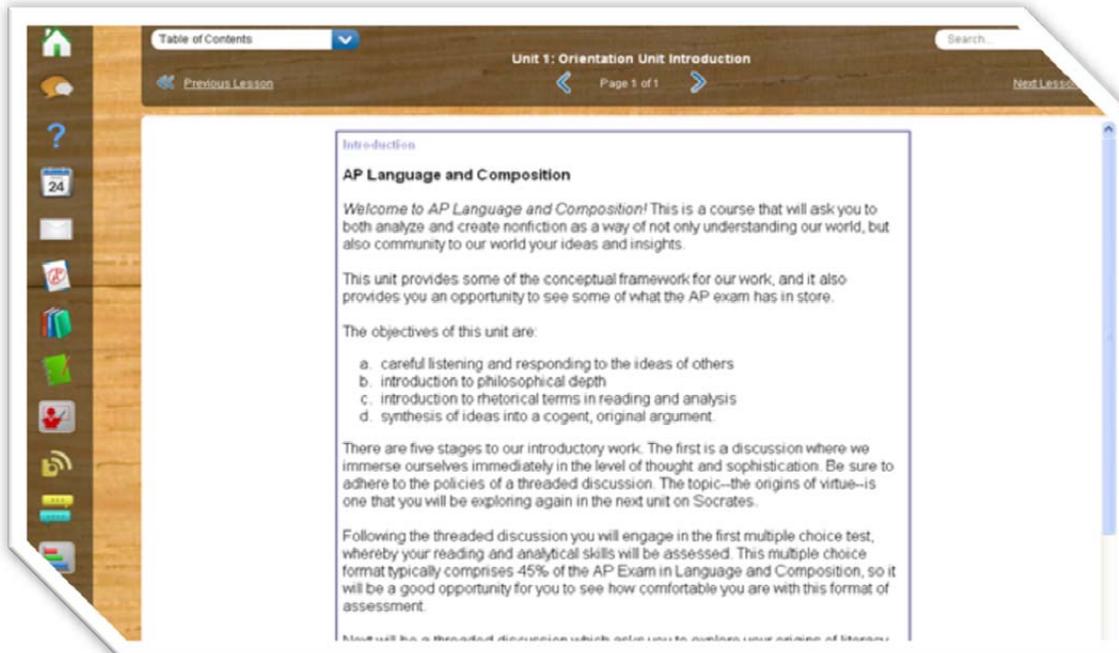

| Course                              | % Completed | Days Remaining | Grade | Grades |
|-------------------------------------|-------------|----------------|-------|--------|
| Reading Plus - AA                   | 0           | 111            | N/A   | Grades |
| Chemistry B - AA                    | 67          | 23             | 90% A | Grades |
| English III B - AA                  | 44          | 23             | 73% C | Grades |
| World History R - AA                | 79          | 23             | 81% B | Grades |
| Algebra II A - AA                   | 53          | 23             | 82% B | Grades |
| Introduction to Graphic Design - AA | 95          | 24             | 85% B | Grades |

Below the table, there is a section for 'Completed Courses' with a plus sign icon. The background of the portal is a brick wall texture, and the left side features a vertical sidebar with various icons including a home button, a calendar showing '24', and a search icon.

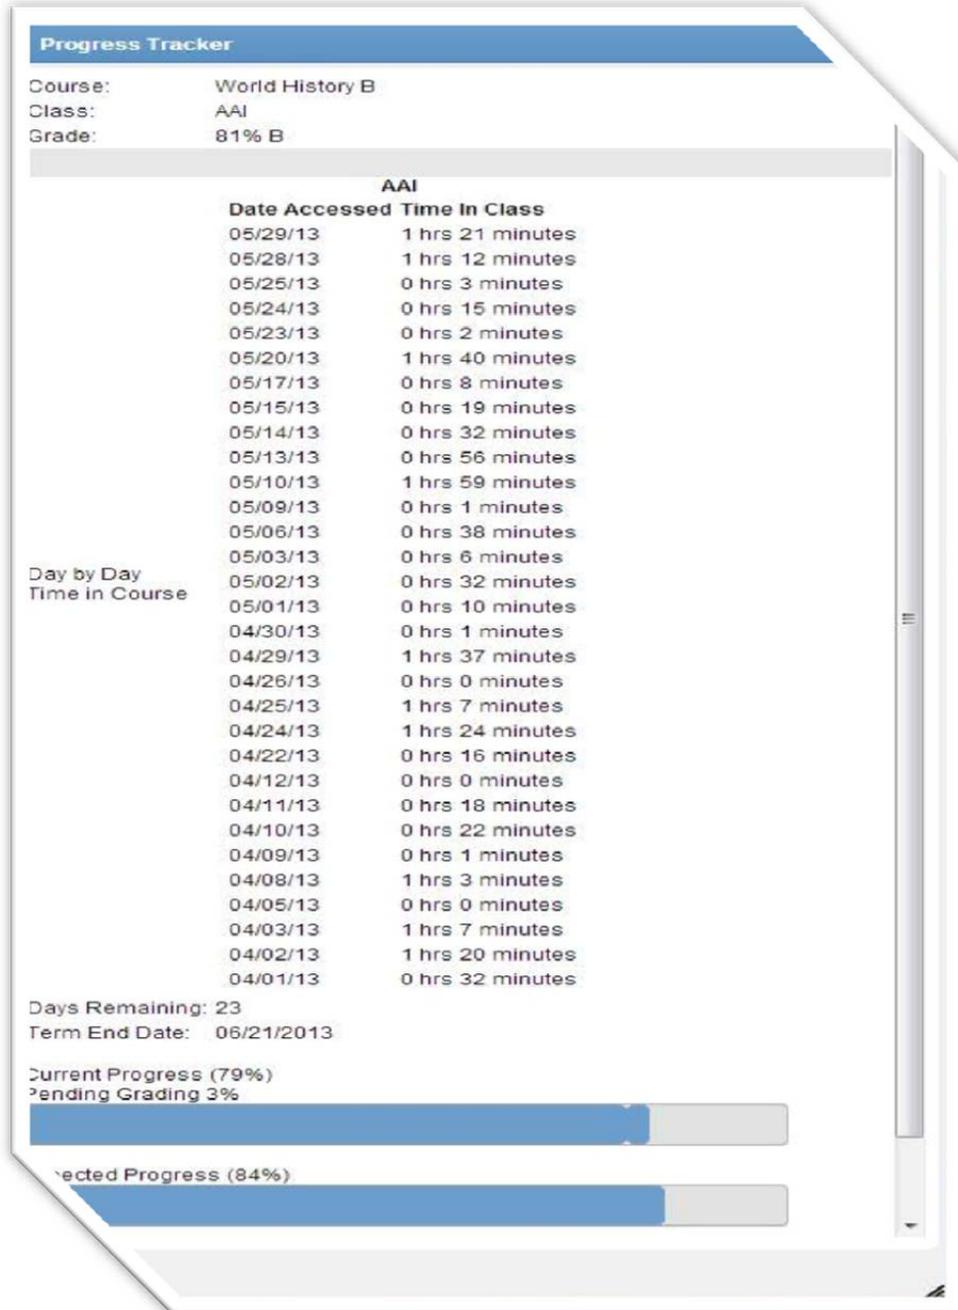

The follow screen shot is a sample of the student’s workspace where they can get information about their classes or get additional help from their online teacher.

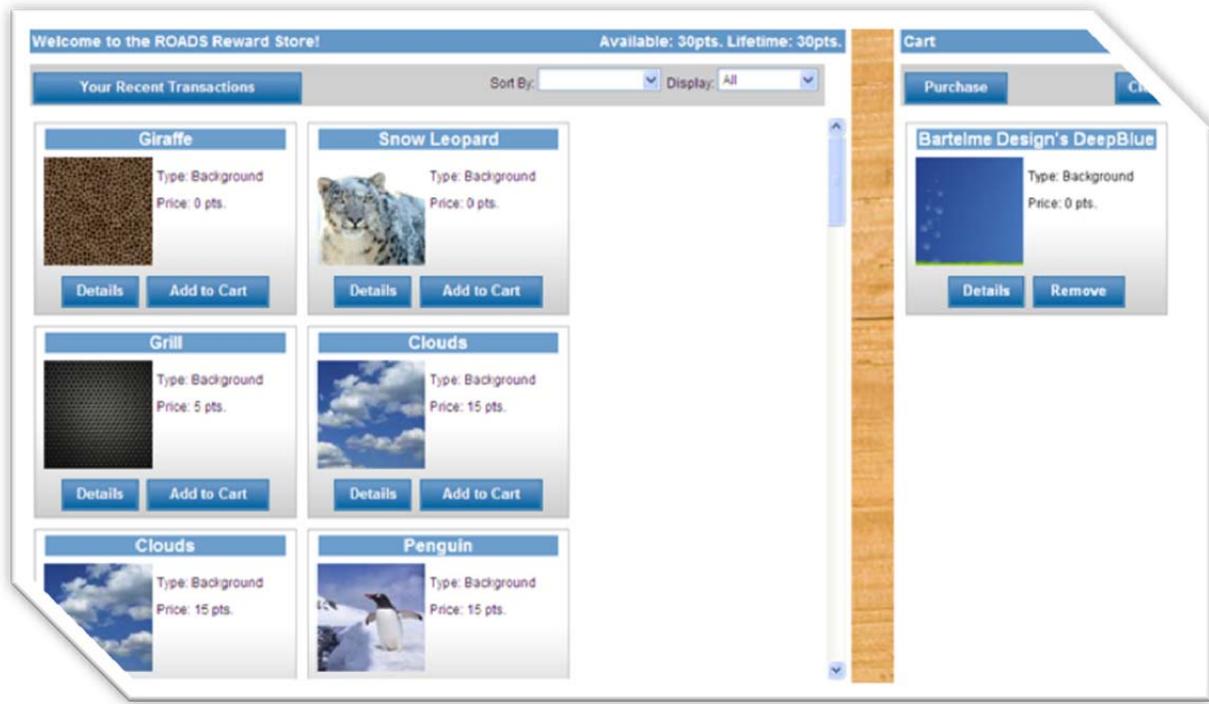

The next screenshot demonstrates how a course syllabus is laid out for students to review. This particular example is the unit introduction to the AP Language and Composition course.

Another strength of the system is that given much of what students will do will be online, the system is able to closely track the amount of time the student puts into the coursework. Below is an example of the progress tracker that can be accessed to see how much time students have been putting into their studies:

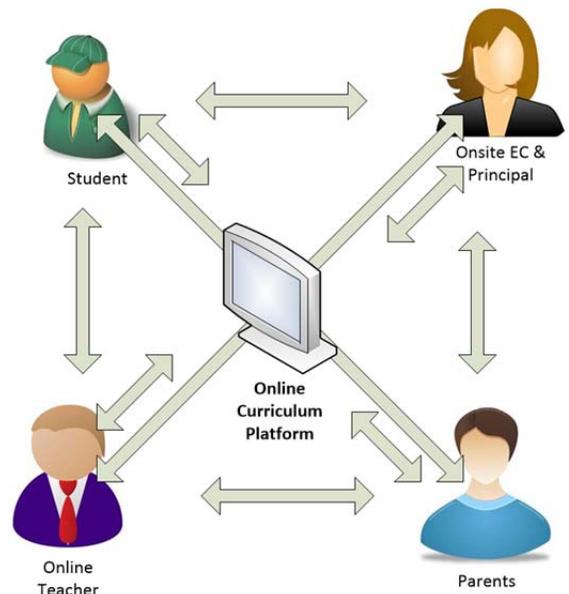

In addition to the academic benefits, ROADS also offers students incentives for their work to make the system more enjoyable to use. Students are able to earn points through their work and purchase items within the ROADS system, such as background images.

The online curriculum is aligned to the CCSS/NGSSS as will be described within the curriculum section of this application. All materials are presented through text and multimedia over the internet eliminating the need for traditional textbooks. Students can access their course materials anywhere they have access to the internet, be it on a computer, smartphone or tablet device, from their classroom, their home or the coffee shop. While the majority of the curriculum is provided through the online platform high school students who are enrolled in AP courses do receive supplemental textbooks to use for their course.

The close integration between the onsite staff members, the online teachers and the parents is what makes the educational program offered by Pivot unique and exceptional. Parents have the ability to log on to the student's account at any time and see how many minutes they have worked, see their grades, and email teachers. This combined with the personal connections built and maintained with the EC ensures that everyone is connected within the educational model. The blended model is so effective because the onsite teachers know academically where each of their mentoring students are at any moment and the students have so much support both in and out of the building.

So what does this mean for the students who are enrolled at Pivot? It means they will have a comprehensive educational program that is supported at multiple levels. A typical day for a Pivot student would include the student coming to school and being greeted by the onsite staff members of the school to check in and build personal connections. The student would then log into their online account to check their calendar for the day and week. Their personalized online calendar will highlight the assignments and upcoming projects the student needs to be aware of. Due to the flexibility and individual nature of the blended model and online learning software, students can prioritize their assignments and tasks individually, and choose what they wish to work on during scheduled class times. This allows students freedom of choice, building the ownership the student has in her or her own learning.

Throughout the entire process, the students' progress are monitored by the EC using their own PC or tablet computer, allowing them to freely move around the educational environment and work with individual students on an as needed basis. The EC is able to easily manage all of their students, even if each student is working on a different course, and the standards alignment mean that the teachers can see which of the standards students may be struggling with in order to provide targeted support and instruction.

While the delivery model utilized at Pivot is truly innovative, the instructional methods used through the delivery model are time tested, research based and highly effective methods focused on student improvement. Through the online curriculum delivery and the small group and individualized instruction many methods are used, but the four that are most heavily relied on in the design of our program are complex questioning in alignment with Bloom's Taxonomy, Differentiated Instruction, meeting students multiple intelligences and a brain-based learning focus:

**Multiple Intelligences** - The theory of multiple intelligences was developed in 1983 by Dr. Howard Gardner, professor of education at Harvard University. It suggests that the traditional notion of intelligence, based on I.Q. testing, is far too limited. Instead, Dr. Gardner proposes eight different intelligences to account for a broader range of human potential in children and adults: Linguistic, Logical-Mathematical, Spatial, Bodily-Kinesthetic, Musical, Interpersonal, Intrapersonal, and Naturalist Intelligence. The curriculum used by Pivot embraces and utilizes the theory of Multiple Intelligences by offering individualized instruction that taps into the unique learning style of each child. The "outside the box" activities students experience through the curriculum engage students in multiple areas of intelligence, paving the way for student success.

**Brain-Based Learning** - The online curriculum employs the theory of Brain-Based learning which is a comprehensive approach to instruction based on, and according to current research in neuroscience, how the brain learns naturally. This theory is based on what we currently know about the actual structure and function of the human brain at varying stages of development. This type of education provides a biologically driven framework for teaching and learning, and helps explain recurring learning behaviors. Instructional techniques stress allowing teachers to connect learning to students' real life experiences. This form of learning also encompasses such educational concepts as: mastery learning, learning styles, multiple intelligences, cooperative learning, practical simulations, experiential learning, problem-based learning, and movement education. In an article published in 2006, *Motivating Students Using Brain-Based Teaching Strategies* S. Heileman described "BRAIN BASED" effective learning strategies as:

**Brain's Time Clock**--Keep rhythm by alternating spatial and verbal tasks.

Repetition--Use previewing and reviewing strategies.  
Active Learning--Increase blood flow with physical movement.  
Images--Enrich the visual learning environment.  
Novelty--Stimulate the brain with new approaches.

Be Colorful--Facilitate retention and motivation by color-coding.  
Automatic Learning--Recognize the influence of nonverbal communication.  
Social Brain--Exploit opportunities for cooperative learning.  
Elicit Emotions--Create opportunities for emotional engagement.  
Developing Thinking Skills--Engage learners in problem-solving.

The AAI materials and the instruction techniques utilized by the ECs at Pivot Charter School use these strategies and other research regarding Brain Based Learning to best match the instructional methods to the students' learning styles.

The Pivot educational model is well developed and has shown success at the other Pivot Schools. We believe that we offer a truly unique learning environment that allows our students to evolve into autonomous learners so that they can excel in their post-secondary goals. We believe we have much to be proud for the current Pivot schools, and expect great things for this school as well. In fact, here are the points of pride that make Pivot a truly unique educational opportunity for students:

- **Personalized Support:** Students learn best when they can have one-on-one dialogue, interaction and instruction with teachers and can receive individualized support in a safe, encouraging environment.
- **Flexible Scheduling:** Historically the nation's schools are failing to meet the needs of many students who do not fit a traditional model. Students, who have to raise their own children, support their families or themselves, or who are engaged in schedule-limiting activities, want and need to receive a high school diploma, but they are constrained by conventional school schedules and opportunities. Additionally, some students cannot handle the traditional burden of six courses at one time all year long or for a semester block; their learning style requires them to focus on fewer courses intensely for a shorter amount of time in order to obtain mastery. At Pivot through the use of online tracking and personalized individual in school support, we are able to ensure students are receiving their required instructional time, while simultaneously offering flexible scheduling to meet student needs.
- **Unique Physical Learning Environment:** Elements such as lighting, use of color, flooring, and furniture matter to teachers and learners. School design should create a space that is inviting and comfortable, as well as professional, high-tech and utilitarian. Workstations should be easily-assembled and movable for individual and group project use. Students and teachers should have access to multiple learning spaces and resources including smart boards, internet, easel white boards, thin client computers and laptops. Pivot students are not contained to rows and desks.
- **Accelerated Course Options:** Raising the academic bar while providing proper guidance and assistance creates students who will exceed traditional expectations and excel in new learning environments, including online college courses and Advanced Placement classes. Pivot students will be able to work independently through an entirely differentiated curriculum. Allowing them to achieve higher academic levels than may be possible in a traditional school.

- **School-to-Career Goal Setting:** Students who focus on their career potential and receive ongoing, relevant information about careers, colleges and personal options will formulate long-term goals and follow through in order to meet those goals. The Individualized Learning Plan plans that students develop with their ECs at Pivot, students learn these essential life and career skills.
- **Service Learning:** Students grow as human beings and lifelong learners when they participate in service learning activities. It is the combination of experiential learning and the personal satisfaction students gain from helping others that makes service learning such an effective teaching and learning tool. All students at Pivot will be expected to participate in some sort of service learning project.

We believe that the personalized support that Pivot students receive as part of our educational program is unparalleled at other public schools. Through the support of the online curriculum, the online teacher, the local EC as well as other support staff who are able to provide targeted support and instruction based on students need, we provide a comprehensive educational system that supports individual students. For example, in addition to the ECs Pivot hires Educational Assistants who meet the traditional requirements of serving as a substitute teacher (having at least 60-hours of hours of college coursework), and have a subject-area expertise. These individuals are able to work 1:1 with students to provide additional support and tutoring based on the student's educational plan. When students are struggling and their EC is not able to provide immediate assistance, the students can sign up for tutoring sessions with the Educational Assistants. These sessions provide additional support for students who may be struggling in academic areas.

The educational program itself is differentiated and based on the student's individual learning abilities and credit / course requirements. Through the online curriculum system we are able to offer a unique schedule to each and every student. Traditional schools are often limited in the number of courses they offer, Pivot is able to overcome this barrier by providing the content electronically, and by using teachers of record who are employed by AAI but who still hold the necessary Florida Teacher certifications to make them highly qualified instructional personnel. This allows us to offer our students a wide array of accelerated or specialized course options based on their individual learning plans.

In addition, students who are struggling can be provided additional support and remedial classes without necessarily slowing their academic progress. Numerous systems are put into place to ensure students are not falling behind, for example, the school uses multiple data points to track and monitor student progress such as the Scantron Performance Series assessment, course diagnostic tests, and the results from state assessments. In addition, we also utilize Reading Plus as an additional assessment measure to monitor students and identify specific areas of need with regards to reading abilities. When students are identified as struggling, the school is able to provide numerous interventions to assist the student prior to the difficulty becoming an overwhelming obstacle for students. If a student scores Level 1 or 2 on the FCAT (or the equivalent on the upcoming PARCC), the student is considered for a remedial reading course. The student will either receive the remedial reading course, or the specific skills demonstrated as possible deficits will be remediated within the content course area through the EC the following year. Thanks to our flexible scheduling model, we are able offer these courses to students and ensure they receive the skills within the context of their individualized course schedule.

We also realize that often student's skills are demonstrated in a variety of ways, and that a traditional multiple choice answer tests may not be the best method of evaluating a student's abilities. Therefore, we offer project based learning for students to demonstrate their mastery of skills as part of our normal

program. However, we realize the importance of students being able to demonstrate their skills on the traditional assessments as well, and as such each student who is in a course that requires an EOC will participate in a test-prep session weekly to help students summarize what they have learned that week and to prepare for the test they will take at the end of the course.

The entire program at Pivot is centered around the student, helping them to succeed in their post-secondary goals. As such, a focus on assisting students to prepare for their post-secondary life is extremely important to us. We do this in many ways, through the career counseling, dual enrollment, and service learning options for students.

Career counseling begins in the middle school program via guidance counselor and intensifies at the high school level with college and career integration. Guest speakers provide additional real life experience to students starting in middle school. Middle school students complete the state required career course, usually in seventh grade. High school students are focused on understanding the application and admission process planning for and preparing to take college admission tests, helping students understand college financing, developing career portfolios, and in some cases students can participate in work placement/job shadowing opportunities, internships, or community-based learning programs.

Pivot also believes strongly in providing advanced courses for students to challenge themselves as well as have the opportunity to earn college credits for their work in high school. As such, our students will have the option of participating in a dual enrollment programs. The credits are awarded as general education, elective, and/or discipline credits. Dual enrollment courses receive the same weighted GPA as AP and International Baccalaureate (IB) courses, per Florida statute. All criteria required for the dual enrollment credit must be satisfied, given college credit awarded becomes part of the student's college transcript. We are currently negotiating with several universities to update our dual enrollment program in light of recent legislative changes at the state level, and are currently in talks with a univeristy who may continue to provide the dual enrollment program at no cost to the school. Previously, Pivot Charter Schools had used Valencia College's Dual Enrollment program. Dual enrollment courses, as well as many College Board AP products, align with the Florida DOE goal to reform high school by increasing rigor and relevance for the purpose of preparing a greater number of high school graduates ready to enter post-secondary educational programs.

Dual Enrollment courses are tuition-free for the students through articulated agreements with online universities and community colleges. Students in grades 11-12 who are maintaining an unweighted GPA of 3.0 and demonstrating college readiness as evidenced by PERT, SAT, and/or ACT scores. Dual enrollment benefits families and students by allowing high school students to not only graduate with their high school diploma, but to enter college with many of their freshman year credits completed. Hence, reducing the financial burden of higher education by saving year one of tuition expenses. For the focused and committed students, the Dual Enrollment option can allow him/her to complete their Associate's Degree while still enrolled in high school.

According to the National Early College Initiative, students who earn college credit while they are enrolled in high school will be more confident in knowing what is required for going on to college. A credit-based transition program is a promising strategy to increase the number of young people getting college degrees, especially those young people at risk of struggling in today's economy. Accelerated learning approaches take seriously what many dropouts and disengaged students say: we are bored, and we will work hard if you expect a lot of us. Most accelerated learning options not only improve

academic performance, but also come at no cost to the student and families who support the proposition. An “early college” experience currently helps thousands of high school students attain college degrees before they finish high school, even if they are the first in their family to attend college and, often, among the most struggling students of their age group.

In addition to the college bound pathway some students may choose, there are other options to assist students prepare for careers after high school. For example, several of the courses we offer prepare students to obtain technical certifications which will give them an advantage in looking for work outside of school.

Another essential component to our preparing students for their post-secondary goals is our service learning program. We believe students grow as human beings and lifelong learners when they participate in service learning activities. We see service learning as a combination of experiential learning. Our students report a sense of personal satisfaction from helping others, and this is what makes our service learning program successful. With the onset of Facebook and other social media platforms has shown us that virtual communities can be built and sustained, but nothing replaces the value of “face-time” with a neighbor or friend. To strength the Pivot school community and culture, Pivot will implement a structured service learning program. Service-learning uses community service as the vehicle for the attainment of students' academic goals and objectives. Service learning provides students opportunities to use newly acquired skills and knowledge in real-life situations. It identifies in advance, and tracks, specific learning objectives and goals. Ultimately, students perform a valuable, significant, and necessary service which has real consequence to the community. Through service learning experiences, Pivot students will identify and collaboratively plan ways to address and resolve issues immediately impacting the local community. These initiatives will allow students to share ideas, problem solve as well as develop high school relationships with like-minded peers.

Community service serves as the vehicle for the achievement of specific academic goals and objectives. It provides structured time for students to reflect on their service and learning experiences through a mix of writing, reading, speaking, listening, and creating in small and large groups as well as individual work. Community service fosters the development of those intangibles including empathy, personal values, beliefs, awareness, self-esteem, self-confidence, social responsibility, and helps to foster a sense of caring for others. It is based on a reciprocal relationship in which the service reinforces and strengthens the learning, and the learning reinforces and strengthens the service.

Pivot aims to create a culture of purpose so that students have multiple opportunities to discover their interests and purpose. As noted by William Damon in *Educational Leadership*, “Only when students discover personal meaning in their work do they apply their efforts with focus and imagination.” To this end, students will be presented with authentic challenges with real world applications that reinforce what they are learning in the classroom.

As described in section four the service learning program is a course students enroll in and receive school credit for. The student will work with his or her EC to brainstorm ideas on potential projects and locations to complete their service learning course. The EC helps to make the necessary arrangements and coordinates with others to ensure the student is meeting expectations. The students will be required to log their time for their service learning projects and will have benchmarks for which they are responsible for in order to earn course credit for the class. A copy of the service learning contract students must complete prior to starting a project is included as **Appendix \_** to this application.

Research supports our approach to service learning. *The National Clearinghouse of Service Learning* reports that students learn best by actively doing an activity that requires them to engage in their learning and by teaching others. There are many benefits to incorporating service learning into a school curriculum. Service learning engages students in problem solving so that students learn how to make changes and become part of the solution. Additionally, students learn civic responsibility, the ability to address societal problems in an informed, committed, and positive manner. According to the National Clearinghouse, service learning:

- Broadens perspectives of diversity issues and enhances critical thinking skills.
- Improves interpersonal skills that are increasingly viewed as important skills in achieving success in professional and personal spheres.
- Develops civic responsibility through active community involvement
- Enriches student learning of course material and “brings books to life and life to books.”
- Engages students in active learning that demonstrates the relevance and importance of academic work for their life experience and career choices.
- Increases awareness of current societal issues as they relate to academic areas of interest

The unique educational program offered at Pivot would not be possible without the support of the highly qualified staff employed by the school. In order to support our students, we believe we must also support our staff. This process begins by selecting the very best educators possible who genuinely care for students, are able to work effectively one-on-one and in small groups, and who love teaching. Pivot believes in rigor, relevance but more importantly the relationship that teachers build with the students. When possible Pivot promotes from within allowing our employees to move through a progressive set of positions toward their leadership goals. Principals meet with staff each week to address concerns, student progress, team building, and future expectations. Our staff communicates with each other through a chat feature on their personal tablet. This chat feature allows them to monitor and assist students on demand and communicate within the school and with other Pivot schools. This allows professional development and ease of communication for lesson plan sharing. Pivot has state wide support for the EC’s including an Instructional Coach, Reading coordinator, Writing coordinator, and a Math coordinator. These coordinators move from school to school offering training through workshops, professional development, and give support to the EC’s where it is needed.

## C. Research Base

As we introduced various topics in section B, such as the educational methods that are most prevalent at our school, we also cited the research regarding the effectiveness of the methods. We will not repeat those citations here, but instead would like to focus on the research supporting the use of online education.

In 2006, Curtis Bonk and Charles Graham published [The Handbook of Blended Learning](#), talking about the vast array of decisions that go into developing an effective blended learning model. At the time, this was mostly being applied to business training models and starting to move into the University level, but not yet thoroughly discussed as a viable option for K-12 educational programs. They indicate that to define blended learning, you cannot simply say that “80% of the education is online, and 20% is in person,” no more than you can say that “20% of the education is online, and 80% is in person.” The concept of blended learning is much more complex than that. They indicated a list of at least 13 different dimensions, each its own continuum that needs to be considered to determine the ingredients of a “blended learning stew”. These dimensions include the importance of retaining information,

participation levels, delivery models, formalized instruction methods, experience, visual components, and more. Throughout their book they talk about the importance of having a strong vision and understanding of what you hope to accomplish with the blended model.

While research is starting to emerge regarding blended model, most is simply describing the process and options available for developing a program. We were unable to find specific peer-reviewed data and research indicating the success of the blended learning approach. Part of the reasons cited in many of the articles we read is that the blended model itself is still being defined. One group revised an official white paper only a few months after its first release just trying to offer a definition of what is meant by blended learning within the educational realm. A recent presentation by Brigham Young University in 2012 studied the official digital dissertations archives for articles related to blended learning, and found that while research is on the increase in this area, it was nearly nonexistent until 2008, and since then, about 77% of the research has focused on higher education, only 8% of the studies address K-12 educational practices.

A recent study that was made available by testing group Kaplan in 2011 supported Bonk and Graham's theory of finding the right balance. The key findings were:

- Effective online and/or blended learning is personalized and adaptive to meet individual learning needs.
- Effective online and/or blended learning supports high levels of cognitive engagement in meeting learning objectives.
- Effective online and/or blended learning balances computer- or teacher-led guidance with learner control.

The philosophy behind charter schools was to provide a testing group for innovative educational approaches, and we believe the lack of empirical, peer-reviewed data on this particular emerging educational approach shows why this innovative new model is perfect for the implementation of a charter school.

While blended learning may not be thoroughly researched at this point, the idea of online learning in general has a more significant research base along with supporting student achievement data. Take for example the two large scale studies conducted in 2009, which indicate research support for online learning is strong and growing.

- A Meta-analysis conducted by the U.S. Department of Education found that of 51 study effects, 44 of which were drawn from research with older learners, the findings indicated that students who took all or part of their class online performed better, on average, than those taking the same course through traditional face to face instruction.
- Through its Summary of Research on the Effectiveness of K-12 Online Learning, iNOCAL concluded that "online learning has the potential to transform teaching and learning" and is promising practice for diverse student groups.

University of Florida researcher, Cathy Cavanaugh, conducted research funded by the Center for American Progress and the Broad Foundation and published in a May 2009 article entitled "Getting Students More Learning Time Online," compared the current research on virtual classes and found that while the movement is still experiencing significant growth and change, the nature of teaching changes

when classes take place online. An online teacher focuses entirely on student accomplishment of course objectives, primarily via individual communication about student work within a mastery framework.”

According to Cavanaugh, common benefits found in schools and programs that utilize online learning include:

- Students in online courses spend significant time working independently with concepts and digital resources. Courses that are designed to require more time actively practicing and applying the course content through writing and speaking generally lead to higher achievement, as do simulations, manipulatives, and tutorials that offer student feedback.
- Online courses increase equitable access to quality educational opportunities by bringing flexibility to the course calendar, expanding the course catalog, and offering individualized instruction.
- Virtual schools have helped students who are performing below basic level on prior state tests to get back on track, moving from basic to proficient or advanced levels.
- Virtual school participation has been seen to narrow the state testing achievement gap for those in economically disadvantaged subgroups.

## *D. Program/Mission Alignment*

---

The mission of Pivot Charter Schools is to graduate middle and high school students through a unique, technology rich learning environment. Through our blended learning educational model, Pivot students will evolve into autonomous learners and excel in their goals to achieve post-secondary options. As we have described in this section, the unique blended model of instruction used at Pivot is a perfect match with our mission. Specific ties include:

- Technology-rich educational environment of teaching/learning
- Direct Instruction approach to onsite small group instruction and one on one instruction
- Access to, and support for, online college classes for high school students
- Instruction guided by individual student mastery rather than seat time
- Career exploration and post-secondary school guidance
- Interactive physical school environment designed for maximum student achievement
- Structured of service learning experiences
- Continuous data driven instruction and program delivery

## *E. Meeting Standards*

---

The Pivot core curriculum is planned in accordance with the requirements of the Common Core State Standards and the Next Generation Sunshine Standards (see the Advanced Academics Inc. standard alignment documents included as [Appendix \\_](#)). The course of study at Pivot is designed to allow all students to meet the requirements for a high school diploma. The AAI courses are aligned with the NGSSS and they are constantly improving, part of which include their current complete redesign of their course elements to completely align with the Common Core State Standards. We anticipate that this alignment will be complete in time for the opening of this school, however, should it not be completed

by then the ECs and local educational staff members supplement the online curriculum to ensure that the standards are completely met for all courses.

In order to provide evidence of the alignment of their program, AAI engages an external firm to verify course content. Leading firms, such as Six Things, also provide alignment data and correlation services to a number of nationally recognized publishers including McGraw Hill, Scholastic, and Houghton Mifflin. As courses are added, Six Things or another successful third party organization will be contracted to review additional courses. All supplemental Service Learning projects or project-based units created by the Pivot Charter School teachers or counselors will be reviewed for standards alignment by the Principal. These checks and balances help us to ensure that standards are being met. We would contend that this alignment is more explicit using the online delivery model because once the courses are designed, aligned and verified they are presented in the same manner consistently and not able to be changed or sections skipped as a result of lack of time or teacher error.

Students will not only be instructed through an innovative state-of-the-art curriculum, but will also be well supported by both the online and site-based teachers. A significant amount of teacher/student “face time” occurs with the chosen online curriculum. The availability of online and local teachers reinforces the commitment to dual accountability for student outcomes and academic success. Students will be encouraged to exercise personal responsibility in their growing maturity as individuals, and learners. Regardless of academic or socioeconomic background, the goal is for all Pivot students to perceive themselves as capable of achieving a college degree and/or being successful in a career of their choice after high school.

## *F. Replication Effectiveness*

---

Pivot Florida, Inc. currently operates two charter schools, one in Hillsborough County and the other in Lee County. Each school site serves approximately 300 students in year 3. Both schools opened their doors in August 2011 with a modest number of students. Student enrollment as well as the number of faculty has increased over the academic year. We also are opening the doors to our third school in Broward County in August, 2013.

While enrollment increased significantly since both sites opened, neither school’s enrollment was large enough to receive a FLDOE school grade however, we are anticipating a school grade for the 2012-13 school year. Being aware that school grades are often not received until the following school year, our staff undertook the ambitious goal of earning SACS-CASI district accreditation. Accreditation indicates that a school demonstrates proficiency on seven indicators. District accreditation implies the total school model is worthy of replication across the district. Pivot Florida was able to earn the distinction of SACS-CASI Accreditation in its first year of operation. We believe this to be a STRONG indication that the Pivot model is extremely worthy of continuing replication.

## *G. Applicant’s Capacity to Replicate*

---

Having opened two schools, and ready to open our third, Pivot Florida has a good understanding of the realities of opening a new school. The leadership throughout the state is supportive of one another in developing the plans, building, and recruiting students to successfully open a new school. We understand that Facility readiness is key to establishing the school environment with a sense of security

and readiness to learn. Students are more apt to enroll in the school, teachers are more assured of the school's sustainability, and the district is more confident the terms of the application will be satisfied. We have experience with student recruitment, teacher recruitment, and implementing our blended model effectively at new sites. The state's Executive Director plays a very hands-on role in developing the new school sites and will work closely with the district to ensure a successful start to the new school.

Given that Pivot was able to obtain the prestigious SACS district accreditation within our first year is a testament to our educational program, and our ability to replicate the program effectively. Another key set of evidence supporting our ability to effectively replicate our schools are the audits we have received indicating no areas of concern regarding the fiscal operation of our schools. The leadership provided by our Board of Directors, Executive Director and local leaders is top notch, and will ensure a successful opening to the new school.

## *Section 4: Curriculum Plan*

### *A. Core Academic Curriculum*

The mission of Pivot Charter Schools is to advance middle and high school students through a unique, technology rich learning environment. Through our blended learning educational model, Pivot students will evolve into autonomous learners and excel in their goals to achieve post-secondary options. The most important part of this mission and our educational design is the concept of blended learning. Described more in depth in section three of this application, our definition of blended learning is one in which the online curriculum provider provides an around-the-clock online teacher, online content, supported by our in house teachers known as Educational Coordinators (ECs). This multi-faceted approach to serving our students allows us to provide best-in-class support to our students helping them to succeed in a truly differentiated and autonomous learning environment.

As a result, the online curriculum provided by our curriculum partner, Advanced Academics, Inc. (AAI) consists of the majority of the educational content used to instruct our students. While our on-site ECs do use additional educational resources to provide targeted support and instruction to our students, the vast majority of the materials are presented through the completely reviewed and aligned content provided by AAI. This content is independently verified by an outside party to ensure alignment with the CCSS/NGSSS and the use of the online platform ensures the content is presented with fidelity to each and every student at the student's own pace.

The flexibility of the system allows students to either read materials themselves, or enlist computer assisted reading for comprehensive and further engagement. They can read (or listen to) selections as often as they need in order to fully understand the selection. The online curriculum allows the student to get help from an online teacher by clicking a talk to a teacher button. They have many options for which teacher they would like to work with and all conversations are recorded for quality control. The online courses include text, animations, streaming video and audio, educational games, and other engaging content. Performance is measured through demonstration of standards-based competency, not by "seat time" (hours spent in classrooms), although this is accurately measured.

This presentation model coupled with the highly qualified on site staff members helps to ensure that the Pivot model is strictly aligned to the CCSS/NGSSS. The opening of this school, in 2014, will mean that from the start our students will be measured against the CCSS, and our content has been and will continue to be refined to closely align with the more stringent and in depth understanding required by the CCSS as measured by the PARCC.

One of the significant benefits to our blended model of instruction is the opportunity to offer more flexibility to students with regards to which courses we are able to offer. Traditional schools are often limited in the number of classes they are able to offer based on enrollment of students at the school. However, using the blended model we are able to create truly individual schedules for each student which match with the students individualized learning plan. Using the online teachers who are certified and highly qualified by the state of Florida as the teachers of record, we are able to offer a broader array of courses while still meeting the No Child Left Behind and class size amendment mandates. This

broader array of classes means we can offer both advanced/accelerated courses as well as intensive courses without needing to worry as much about class size requirements and empty seats in classrooms.

We realize that not all students learn in the same way or at the same pace, and believe that is the principle behind the success of Pivot Charter Schools. Through our innovative online blended learning environment we are able to provide individualized, tailored instruction based on the students' needs and interests. The key to making this successful is the Individualized Learning Plan created for each student. These plans are developed collaboratively between the Pivot staff, students, and parents. Students are expected to consider their future goals, academic needs, and with guidance from the educational professionals, come up with a plan. We believe that this collaborative approach also helps to allocate the responsibility for the student success equally among the various stakeholders. In traditional settings, often it is the responsibility of the teacher to make sure the students are gaining the educational content required by standards. By collaboratively developing individual plans, students, and parents are taught to realize that they must also be accountable for their learning and progress towards achieving both their goals, and the required standards. These Individualized Learning Plans guide the student's course selection as well as their weekly goals and progress through their weekly meetings with their EC.

Another important aspect of the Pivot program is our desire to offer accelerated programs to our students who qualify and are prepared for college level courses. AAI has already established partnerships with two third-party providers in order to offer the following high-quality, College Board-approved AP® courses:

| <b>Rec. Grade</b> | <b>Title</b>  | <b>Course Code</b> | <b>Length</b> | <b>AAI Online Curriculum Course Name</b>   |
|-------------------|---|--------------------|---------------|--|
|                   | Advanced Placement Biology                            | 2000340            | Year          | AP® Biology - Sem 1<br>AP® Biology - Sem 2   |

Pivot, in conjunction with our online partner, intend to offer the following courses through the online platform as described in section three:

## *English Language Arts*

---

AAI provides a full offering of core and elective English Language Arts courses for middle and high school. Course content deepens students’ skills in literacy, writing, reading fiction and nonfiction, research, oral communication, and technology. The courses teach students to think critically through analysis, synthesis, and problem-solving in the areas of reading, writing, speaking/listening, and language development. The courses are aligned with the CCSS and meet the requirements of the state course descriptions as described below. In fact, the online courses were recently revamped and significant additions were made in the areas of assessing, speaking and listening, reading for information, and writing in order to better conform to the more stringent requirements of the CCSS.

Some examples of how AAI’s content meets the English Common Core State Standards include:

- Discussion threads requiring research, citing evidence, collaborating with peers, asking questions
- Required chats with teachers requiring research, citing evidence, asking and answering questions
- Multimedia projects incorporating technology, research, synthesizing of multiple sources and mediums
- Additional fiction and nonfiction texts providing range, quality, and complexity (see more below)
- Speeches incorporating speaking and listening presentation standards
- Analysis and use of argument including claims, evidence, counter argument, and rebuttal

In these courses, students read and analyze a broad range of fiction and nonfiction, including technical and self-selected readings. These readings were carefully selected to allow for meeting of the CCSS and in some cases, came directly from the CCSS Text Exemplar Reading List. Using standards-based, scaffolded instruction to equip next-generation students, the courses continuously develop reading comprehension, vocabulary, and literary and media analysis. In cases where copyright allows for it, the readings are provided within the courses. The majority of the other required readings are found online. Some, such as the novels, may be found at the public library or are available for purchase online.

Courses to be offered at Pivot include:

| Rec. Grade | Title                       | Course Code | Length | AAI Online Curriculum Course Name |
|------------|-----------------------------|-------------|--------|-----------------------------------|
| 6th        | Language Arts 1             | 1001010     | Year   | MS Language Arts 6 A              |
| 6th        | Language Arts 1<br>Advanced | 1001020     | Year   | MS Language Arts 6 B              |

The purpose of this course is to provide students integrated language arts study in reading, writing, speaking, listening, language, and literature in preparation for college and career readiness.

The content will include, but not be limited to, the following:

- constructing meaning and analyzing and evaluating the logic and rhetorical strategies used in a variety of grade-level print and digital informational texts
- reading and analyzing grade-level print and digital literary texts that represent a variety of genres across cultures and historical periods
- using recursive process writing strategies to craft various forms of writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context
- listening purposefully to a variety of speakers and messages in both formal and informal contexts
- speaking with clarity for a variety of purposes, audiences, and contexts, including formal and informal modes of discourse
- understanding and making effective language choices to successfully craft the meaning, style, and tone of oral and written communication at grade-level and/or higher complexity
- acquiring an extensive vocabulary through reading, discussion, listening, and directed word study
- learning and employing an inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Advanced / Honors Course (1001020) – The school’s curriculum maps and documents will outline additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for the advanced courses. This will include additional trade books and reading materials above and beyond what will be used in the traditional level course.

|     |                             |         |      |                      |
|-----|-----------------------------|---------|------|----------------------|
| 7th | Language Arts 2             | 1001040 | Year | MS Language Arts 7 A |
| 7th | Language Arts 2<br>Advanced | 1001050 | Year | MS Language Arts 7 B |

The purpose of this course is to provide students integrated language arts study in reading, writing, speaking, listening, language, and literature in preparation for college and career readiness.

The content will include, but not be limited to, the following:

- constructing meaning and analyzing and evaluating the logic and rhetorical strategies used in a variety of grade-level print and digital informational texts
- reading and analyzing grade-level print and digital literary texts that represent a variety of genres across cultures and historical periods
- using recursive process writing strategies to craft various forms of writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context
- listening purposefully to a variety of speakers and messages in both formal and informal contexts
- speaking with clarity for a variety of purposes, audiences, and contexts, including formal and informal modes of discourse
- understanding and making effective language choices to successfully craft the meaning, style, and tone of oral and written communication at grade-level and/or higher complexity
- acquiring an extensive vocabulary through reading, discussion, listening, and directed word study
- learning and employing an inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Advanced / Honors Course (1001050) – The school’s curriculum maps and documents will outline additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for the advanced courses. This will include additional trade books and reading materials above and beyond what will be used in the traditional level course.

| Rec. Grade | Title                       | Course Code | Length | AAI Online Curriculum Course Name |
|------------|-----------------------------|-------------|--------|-----------------------------------|
| 8th        | Language Arts 3             | 1001070     | Year   | MS Language Arts 8 A              |
| 8th        | Language Arts 3<br>Advanced | 1001080     | Year   | MS Language Arts 8 B              |

The purpose of this course is to provide students integrated language arts study in reading, writing, speaking, listening, language, and literature in preparation for college and career readiness.

The content will include, but not be limited to, the following:

- constructing meaning and analyzing and evaluating the logic and rhetorical strategies used in a variety of grade-level print and digital informational texts
- reading and analyzing grade-level print and digital literary texts that represent a variety of genres across cultures and historical periods
- using recursive process writing strategies to craft various forms of writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context
- listening purposefully to a variety of speakers and messages in both formal and informal contexts
- speaking with clarity for a variety of purposes, audiences, and contexts, including formal and informal modes of discourse
- understanding and making effective language choices to successfully craft the meaning, style, and tone of oral and written communication at grade-level and/or higher complexity
- acquiring an extensive vocabulary through reading, discussion, listening, and directed word study
- learning and employing an inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Advanced / Honors Course (1001080) – The school’s curriculum maps and documents will outline additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for the advanced courses. This will include additional trade books and reading materials above and beyond what will be used in the traditional level course.

ESOL Course (1002020) – This course will incorporate learning objectives and goals of the traditional language arts course but will also focus on additional instructional strategies to assist students who qualify for ESOL services (see section 7 of this application).

|             |                         |         |      |                    |
|-------------|-------------------------|---------|------|--------------------|
| 6th/7th/8th | Intensive Language Arts | 1000000 | Year | Using Reading Plus |
|-------------|-------------------------|---------|------|--------------------|

The purpose of this course is to provide instruction that enables students to develop and strengthen reading skills and develop independent reading endurance. Students who score a level 1 or 2 on FCAT (or the equivalent PARCC score) may be required to take this course as described in the school’s student progression plan.

The content will include, but not be limited to, the following:

- reading instruction in phonemic awareness, phonics (advanced phonics instruction that includes an explicit, systematic approach to orthography, structural analysis, and morphemic analysis), fluency, vocabulary and comprehension as necessary. The relative balance of instruction in these areas will be determined by screening, group diagnostic, progress monitoring and individual diagnostic measures of each student. Each student’s instructional goals will be specified in his/her Academic Improvement Plan (AIP)
- critical thinking, problem-solving, and test-taking skills and strategies
- reading for meaning through varied reading materials at appropriate independent and instructional reading levels representing a minimum balance of 70% /30% informational to narrative text
- integration of reading with student written responses to text
- high frequency content area vocabulary

Course student performance standards must be adopted by the district, and they must reflect appropriate Sunshine State Standards benchmarks.

## High School Language Arts

| Rec. Grade | Title                       | Course Code | Length | AAI Online Curriculum Course Name |
|------------|-----------------------------|-------------|--------|-----------------------------------|
| 9th        | English 1                   | 1001310     | Year   | English I A                       |
| 9th        | English Honors 1            | 1001320     | Year   | English I B                       |
| 10th       | English 1 / Credit Recovery | 1001315     | C.Rec. |                                   |

The purpose of this course is to provide students integrated language arts study in reading, writing, speaking, listening, language, and literature in preparation for college and career readiness.

The content will include, but not be limited to, the following:

- constructing meaning and analyzing and evaluating the logic and rhetorical strategies used in a variety of grade-level print and digital informational texts
- reading and analyzing grade-level print and digital literary texts that represent a variety of genres across cultures and historical periods
- using recursive process writing strategies to craft various forms of writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context
- listening purposefully to a variety of speakers and messages in both formal and informal contexts
- speaking with clarity for a variety of purposes, audiences, and contexts, including formal and informal modes of discourse
- understanding and making effective language choices to successfully craft the meaning, style, and tone of oral and written communication at grade-level and/or higher complexity
- acquiring an extensive vocabulary through reading, discussion, listening, and directed word study, as well as an understanding of the ways that historical events, culture, and setting influence language.
- employing a detailed inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Honors Course (1001320) – The school’s curriculum maps and documents will outline additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for the advanced courses. This will include additional trade books and reading materials above and beyond what will be used in the traditional level course.

Credit Recovery (1001315) – The online ROADS system offers personalized scaffolding for students based on their needs. Students requiring credit recovery can use the same system to customize the instructional delivery to meet the needs and pacing necessary for credit recovery.

|      |                               |         |        |              |
|------|-------------------------------|---------|--------|--------------|
| 10th | English 2                     | 1001340 | Year   | English II A |
| 10th | English 2 Honors              | 1001350 | Year   | English II B |
| 11th | English 2 for Credit Recovery | 1001345 | C.Rec. |              |

The purpose of this course is to provide students integrated language arts study in reading, writing, speaking, listening, language, and literature in preparation for college and career readiness.

The content will include, but not be limited to, the following:

- constructing meaning and analyzing and evaluating the logic and rhetorical strategies used in a variety of grade-level print and digital informational texts
- reading and analyzing grade-level print and digital literary texts that represent a variety of genres across cultures and historical periods
- using recursive process writing strategies to craft various forms of writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context
- listening purposefully to a variety of speakers and messages in both formal and informal contexts
- speaking with clarity for a variety of purposes, audiences, and contexts, including formal and informal modes of discourse understanding and making effective language choices to successfully craft the meaning, style, and tone of oral and written communication at grade-level and/or higher complexity
- acquiring an extensive vocabulary through reading, discussion, listening, and directed word study, as well as an understanding of the ways that historical events, culture, and setting influence language.
- employing a detailed inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Special Note: As students progress from one grade-level course to the next, increases should occur in the complexity of

materials and tasks and in the students' independence in their application and use. Scaffolded learning opportunities are to be provided for students to develop and apply the critical skills of discourse analysis, synthesis, and evaluation.

Honors Course (1001350) – The school shall develop a description of additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for honors-level achievement and learning.

Credit Recovery (1001345) – The online ROADS system offers personalized scaffolding for students based on their needs. Students requiring credit recovery can use the same system to customize the instructional delivery to meet the needs and pacing necessary for credit recovery.

- employing a detailed inquiry-based research process, and selecting and using information and communication technologies (ICT) effectively.

Special Note: As students progress from one grade-level course to the next, increases should occur in the complexity of materials and tasks and in the students' independence in their application and use. Scaffolded learning opportunities are to be provided for students to develop and apply the critical skills of discourse analysis, synthesis, and evaluation.

Honors Course (1001410) – The school shall develop a description of additional requirements and more rigorous expectations, along with a description of higher text complexity to be used for honors-level achievement and learning.

Credit Recovery (1001401) – The online ROADS system offers personalized scaffolding for students based on their needs. Students requiring credit recovery can use the same system to customize the instructional delivery to meet the needs and pacing necessary for credit recovery.

Student placement into individual courses will be based on the student's previous courses, the student's individualized learning plan, and course prerequisites. As described below in part C regarding the Reading curriculum, if a student scores the equivalent of an FCAT 2.0 level 1 or 2 on the PARCC the student will either be placed into an intensive reading course the following year, or will have specific instruction in the deficit areas within their content course the following year.

## Mathematics

AAI provides a full offering of mathematics courses for middle and high school. Course content deepens students' understandings of numbers and quantities, algebra, functions, geometry, statistics, and probability. Courses provide students with grade-level appropriate opportunities to apply mathematical practices to their learning. Students will make sense of problems, reason abstractly and quantitatively, construct viable arguments and critique the reasoning of others, model with mathematics, strategically use appropriate tools, attend to precision, look for and make use of structure, and look for and express regularity in repeated reasoning. Pivot also offers My Math Lab which is a math program that allows remediation and support for struggling math students.

As was the case with English and Language Arts, AAI has recently completed major improvements to the content on its platform in order to align to the more real-world and in depth requirements of the CCSS. The Mathematics Common Core Standards contain six strands that are interwoven throughout all high school math courses: Number and Quantity, Algebra, Functions, Modeling, Geometry, and Statistics and Probability. The majority of improvements to the math courses were related to the Modeling strand, which deals with linking math to real-world situations and decision-making. Many lessons were enhanced with a technology component; students learn how to use graphing calculators and spreadsheet software to solve problems that would be tedious to solve without the use of the technology. In addition, each course has new application lessons, which allow students to see the connections between math and the real world.

Courses to be offered at Pivot include:

| Rec. Grade   | Title         | Course Code | Length | AAI Online Curriculum Course Name |
|--|---------------|-------------|--------|-----------------------------------|
| 6th  | Mathematics 1 | 1205010     | Year   | MS Fundamentals of Math 6 A       |
| <p>In Grade 6, instructional time should focus on four critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; and (4) developing understanding of statistical thinking.</p> <p>(1) Students use reasoning about multiplication and division to solve ratio and rate problems about quantities. By viewing equivalent ratios and rates as deriving from, and extending, pairs of rows (or columns) in the multiplication table, and by analyzing simple drawings that indicate the relative size of quantities, students connect their understanding of multiplication and division with ratios and rates. Thus students expand the scope of problems for which they can use multiplication and division to solve problems, and they connect ratios and fractions. Students solve a wide variety of problems involving ratios and rates.</p> <p>(2) Students use the meaning of fractions, the meanings of multiplication and division, and the relationship between multiplication and division to understand and explain why the procedures for dividing fractions make sense. Students use these operations to solve problems. Students extend their previous understandings of number and the ordering of numbers to the full system of rational numbers, which includes negative rational numbers, and in particular negative integers. They reason about the order and absolute value of rational numbers and about the location of points in all four quadrants of the coordinate plane.</p> <p>(3) Students understand the use of variables in mathematical expressions. They write expressions and equations that correspond to given situations, evaluate expressions, and use expressions and formulas to solve problems. Students understand that expressions in different forms can be equivalent, and they use the properties of operations to rewrite expressions in equivalent forms. Students know that the solutions of an equation are the values of the variables that make the equation true. Students use properties of operations and the idea of maintaining the equality of both sides of an equation to solve simple one-step equations. Students construct and analyze tables, such as tables of quantities that are equivalent ratios, and they use equations (such as <math>3x = y</math>) to describe relationships between quantities.</p> |               |             |        |                                   |

(4) Building on and reinforcing their understanding of number, students begin to develop their ability to think statistically. Students recognize that a data distribution may not have a definite center and that different ways to measure center yield different values. The median measures center in the sense that it is roughly the middle value. The mean measures center in the sense that it is the value that each data point would take on if the total of the data values were redistributed equally, and also in the sense that it is a balance point. Students recognize that a measure of variability (interquartile range or mean absolute deviation) can also be useful for summarizing data because two very different set of data can have the same mean and median yet be distinguished by their variability. Students learn to describe and summarize numerical data sets, identifying clusters, peaks, gaps, and symmetry, considering the context in which the data were collected.

Students in Grade 6 also build on their work with area in elementary school by reasoning about relationships among shapes to determine area, surface area, and volume. They find areas of right triangles, other triangles, and special quadrilaterals by decomposing these shapes, rearranging or removing pieces, and relating the shapes to rectangles. Using these methods, students discuss, develop, and justify formulas for areas of triangles and parallelograms. Students find areas of polygons and surface areas of prisms and pyramids by decomposing them into pieces whose area they can determine. They reason about right rectangular prisms with fractional side lengths to extend formulas for the volume of a right rectangular prism to fractional side lengths. They prepare for work on scale drawings and constructions in Grade 7 by drawing polygons in the coordinate plane.

|            |                                   |                |             |                                    |
|------------|-----------------------------------|----------------|-------------|------------------------------------|
| <b>6th</b> | <b>Mathematics 1<br/>Advanced</b> | <b>1205020</b> | <b>Year</b> | <b>MS Fundamentals of Math 6 B</b> |
|------------|-----------------------------------|----------------|-------------|------------------------------------|

In this Grade 6 Advanced Mathematics course, instructional time should focus on six critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; (4) developing understanding of statistical thinking; (5) developing understanding of and applying proportional relationships; and (6) developing understanding of operations with rational numbers and working with expressions and linear equations.

(1) Students use reasoning about multiplication and division to solve ratio and rate problems about quantities. By viewing equivalent ratios and rates as deriving from, and extending, pairs of rows (or columns) in the multiplication table, and by analyzing simple drawings that indicate the relative size of quantities, students connect their understanding of multiplication and division with ratios and rates. Thus students expand the scope of problems for which they can use multiplication and division to solve problems, and they connect ratios and fractions. Students solve a wide variety of problems involving ratios and rates.

(2) Students use the meaning of fractions, the meanings of multiplication and division, and the relationship between multiplication and division to understand and explain why the procedures for dividing fractions make sense. Students use these operations to solve problems. Students extend their previous understandings of number and the ordering of numbers to the full system of rational numbers, which includes negative rational numbers, and in particular negative integers. They reason about the order and absolute value of rational numbers and about the location of points in all four quadrants of the coordinate plane.

(3) Students understand the use of variables in mathematical expressions. They write expressions and equations that correspond to given situations, evaluate expressions, and use expressions and formulas to solve problems. Students understand that expressions in different forms can be equivalent, and they use the properties of operations to rewrite expressions in equivalent forms. Students know that the solutions of an equation are the values of the variables that make the equation true. Students use properties of operations and the idea of maintaining the equality of both sides of an equation to solve simple one-step equations. Students construct and analyze tables, such as tables of quantities that are equivalent ratios, and they use equations (such as  $3x = y$ ) to describe relationships between quantities.

(4) Building on and reinforcing their understanding of number, students begin to develop their ability to think statistically. Students recognize that a data distribution may not have a definite center and that different ways to measure center yield different values. The median measures center in the sense that it is roughly the middle value. The mean measures center in the sense that it is the value that each data point would take on if the total of the data values were redistributed equally, and also in the sense that it is a balance point. Students recognize that a measure of variability (interquartile range or mean absolute deviation) can also be useful for summarizing data because two very different set of data can have the same mean and median yet be distinguished by their variability. Students learn to describe and summarize numerical data sets, identifying clusters, peaks, gaps, and symmetry, considering the context in which the data were collected.

(5) Students extend their understanding of ratios and develop understanding of proportionality to solve single- and multi-step problems. Students use their understanding of ratios and proportionality to solve a wide variety of percent problems, including those involving discounts, interest, taxes, tips, and percent increase or decrease. Students solve problems about scale drawings by relating corresponding lengths between the objects or by using the fact that relationships of lengths within an object are preserved in similar objects. Students graph proportional relationships and understand the unit rate informally as a measure of the steepness of the related line, called the slope. They distinguish proportional relationships from other relationships.

(6) Students develop a unified understanding of number, recognizing fractions, decimals (that have a finite or a repeating decimal representation), and percents as different representations of rational numbers. Students extend addition, subtraction, multiplication, and division to all rational numbers, maintaining the properties of operations and the relationships between addition and subtraction, and multiplication and division. By applying these properties, and by viewing negative numbers in terms of everyday contexts (e.g., amounts owed or temperatures below zero), students explain and interpret the rules for adding, subtracting, multiplying, and dividing with negative numbers. They use the arithmetic of rational numbers as they formulate expressions and equations in one variable and use these equations to solve problems.

Students in Grade 6 also build on their work with area in elementary school by reasoning about relationships among shapes to determine area, surface area, and volume. They find areas of right triangles, other triangles, and special quadrilaterals by decomposing these shapes, rearranging or removing pieces, and relating the shapes to rectangles. Using these methods, students discuss, develop, and justify formulas for areas of triangles and parallelograms. Students find areas of polygons and surface areas of prisms and pyramids by decomposing them into pieces whose area they can determine. They reason about right rectangular prisms with fractional side lengths to extend formulas for the volume of a right rectangular prism to fractional side lengths. They prepare for work on scale drawings and constructions in Grade 7 by drawing polygons in the coordinate plane.

|            |                      |                |             |                                   |
|------------|----------------------|----------------|-------------|-----------------------------------|
| <b>7th</b> | <b>Mathematics 2</b> | <b>1205040</b> | <b>Year</b> | <b>S Fundamentals of Math 7 A</b> |
|------------|----------------------|----------------|-------------|-----------------------------------|

In Grade 7, instructional time should focus on four critical areas: (1) developing understanding of and applying proportional relationships; (2) developing understanding of operations with rational numbers and working with expressions and linear equations; (3) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; and (4) drawing inferences about populations based on samples.

(1) Students extend their understanding of ratios and develop understanding of proportionality to solve single- and multi-step problems. Students use their understanding of ratios and proportionality to solve a wide variety of percent problems, including those involving discounts, interest, taxes, tips, and percent increase or decrease. Students solve problems about scale drawings by relating corresponding lengths between the objects or by using the fact that relationships of lengths within an object are preserved in similar objects. Students graph proportional relationships and understand the unit rate informally as a measure of the steepness of the related line, called the slope. They distinguish proportional relationships from other relationships.

(2) Students develop a unified understanding of number, recognizing fractions, decimals (that have a finite or a repeating decimal representation), and percents as different representations of rational numbers. Students extend addition, subtraction, multiplication, and division to all rational numbers, maintaining the properties of operations and the relationships between addition and subtraction, and multiplication and division. By applying these properties, and by viewing negative numbers in terms of everyday contexts (e.g., amounts owed or temperatures below zero), students explain and interpret the rules for adding, subtracting, multiplying, and dividing with negative numbers. They use the arithmetic of rational numbers as they formulate expressions and equations in one variable and use these equations to solve problems.

(3) Students continue their work with area from Grade 6, solving problems involving area and circumference of a circle and surface area of three-dimensional objects. In preparation for work on congruence and similarity in Grade 8 they reason about relationships among two-dimensional figures using scale drawings and informal geometric constructions, and they gain familiarity with the relationship between angles formed by intersecting lines. Students work with three-dimensional figures, relating them to two-dimensional figures by examining cross-sections. They solve real-world and mathematical problems involving area, surface area, and volume of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes and right prisms.

(4) Students build on their previous work with single data distributions to compare two data distributions and address questions about difference between populations. They begin informal work with random sampling to generate data sets and learn about the importance of representative samples for drawing inferences.

| Rec. Grade | Title                  | Course Code | Length | AAI Online Curriculum Course Name |
|------------|------------------------|-------------|--------|-----------------------------------|
| 7th        | Mathematics 2 Advanced | 1205050     | Year   | MS Fundamentals of Math 7 B       |

In this Grade 7 Advanced Mathematics course, instructional time should focus on five critical area: (1) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; (2) drawing inferences about populations based on samples; (3) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (4) grasping the concept of a function and using functions to describe quantitative relationships; and (5) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem..

(1) Students continue their work with area from Grade 6, solving problems involving area and circumference of a circle and surface area of three-dimensional objects. In preparation for work on congruence and similarity in Grade 8 they reason about relationships among two-dimensional figures using scale drawings and informal geometric constructions, and they gain familiarity with the relationship between angles formed by intersecting lines. Students work with three-dimensional figures, relating them to two-dimensional figures by examining cross-sections. They solve real-world and mathematical problems involving area, surface area, and volume of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes and right prisms.

(2) Students build on their previous work with single data distributions to compare two data distributions and address questions about difference between populations. They begin informal work with random sampling to generate data sets and learn about the importance of representative samples for drawing inferences.

(3) Students use linear equations and systems of linear equations to represent, analyze, and solve a variety of problems. Students recognize equations for proportions ( $y/x = m$  or  $y = mx$ ) as special linear equations ( $y = mx + b$ ), understanding that the constant of proportionality ( $m$ ) is the slope, and the graphs are lines through the origin. They understand that the slope ( $m$ ) of a line is a constant rate of change, so that if the input or  $x$ -coordinate changes by an amount  $A$ , the output or  $y$ -coordinate changes by the amount  $m(A)$ . Students also use a linear equation to describe the association between two quantities in bivariate data (such as arm span vs. height for students in a classroom). At this grade, fitting the model, and assessing its fit to the data are done informally. Interpreting the model in the context of the data requires students to express a relationship between the two quantities in question and to interpret components of the relationship (such as slope and  $y$ -intercept) in terms of the situation.

Students strategically choose and efficiently implement procedures to solve linear equations in one variable, understanding that when they use the properties of equality and concept of logical equivalence, they maintain the solutions of the original equation. Students solve systems of two linear equations in two variables and relate the systems to pairs of lines in the plane; these intersect, are parallel, or are the same line. Students use linear equations, systems of linear equations, linear functions, and their understanding of slope of a line to analyze situations and solve problems.

(4) Students grasp the concept of a function as a rule that assigns to each input exactly one output. They understand that functions describe situations where one quantity determines another. They can translate among representations and partial representations of functions (noting that tabular and graphical representations may be partial representations), and they describe how aspects of the function are reflected in the different representations.

(5) Students use ideas about distance and angles, how they behave under translations, rotations, reflections, and dilations, and ideas about congruence and similarity to describe and analyze two-dimensional figures and to solve problems. Students show that the sum of the angles in a triangle is the angle formed by a straight line, and that various configurations of lines give rise to similar triangles because of the angles created when a transversal cuts parallel lines. Students understand the statement of the Pythagorean Theorem and its converse, and can explain why the Pythagorean Theorem holds, for example, by decomposing a square in two different ways. They apply the Pythagorean Theorem to find distances between points on the coordinate plane, to find lengths, and to analyze polygons. Students complete their work on volume by solving problems involving cones, cylinders, and spheres.

|           |             |         |      |                      |
|-----------|-------------|---------|------|----------------------|
| 7th / 8th | Pre-Algebra | 1205070 | Year | MS Pre-Algebra A & B |
|-----------|-------------|---------|------|----------------------|

In Grade 8, instructional time should focus on three critical areas: (1) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (2) grasping the concept of a function and using functions to describe quantitative relationships; (3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem.

(1) Students use linear equations and systems of linear equations to represent, analyze, and solve a variety of problems. Students recognize equations for proportions ( $y/x = m$  or  $y = mx$ ) as special linear equations ( $y = mx + b$ ), understanding that the constant of proportionality ( $m$ ) is the slope, and the graphs are lines through the origin. They understand that the slope ( $m$ ) of a line is a constant rate of change, so that if the input or  $x$ -coordinate changes by an amount  $A$ , the output or  $y$ -coordinate changes by the amount  $m(A)$ . Students also use a linear equation to describe the association between two quantities in bivariate data (such as arm span vs. height for students in a classroom). At this grade, fitting the model, and assessing its fit to the data are done informally. Interpreting the model in the context of the data requires students to express a relationship between the two quantities in question and to interpret components of the relationship (such as slope and  $y$ -intercept) in terms of the situation.

Students strategically choose and efficiently implement procedures to solve linear equations in one variable, understanding that when they use the properties of equality and concept of logical equivalence, they maintain the solutions of the original equation. Students solve systems of two linear equations in two variables and relate the systems to pairs of lines in the plane; these intersect, are parallel, or are the same line. Students use linear equations, systems of linear equations, linear functions, and their understanding of slope of a line to analyze situations and solve problems.

(2) Students grasp the concept of a function as a rule that assigns to each input exactly one output. They understand that functions describe situations where one quantity determines another. They can translate among representations and partial representations of functions (noting that tabular and graphical representations may be partial representations), and they describe how aspects of the function are reflected in the different representations.

(3) Students use ideas about distance and angles, how they behave under translations, rotations, reflections, and dilations, and ideas about congruence and similarity to describe and analyze two-dimensional figures and to solve problems. Students show that the sum of the angles in a triangle is the angle formed by a straight line, and that various configurations of lines give rise to similar triangles because of the angles created when a transversal cuts parallel lines. Students understand the statement of the Pythagorean Theorem and its converse, and can explain why the Pythagorean Theorem holds, for example, by decomposing a square in two different ways. They apply the Pythagorean Theorem to find distances between points on the coordinate plane, to find lengths, and to analyze polygons. Students complete their work on volume by solving problems involving cones, cylinders, and spheres.

The fundamental purpose of this course is to formalize and extend the mathematics that students learned in the middle grades. The critical areas, called units, deepen and extend understanding of linear and exponential relationships by contrasting them with each other and by applying linear models to data that exhibit a linear trend, and students engage in methods for analyzing, solving, and using quadratic functions. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

#### Algebra 1A (Year 1)

**Unit 1- Relationships Between Quantities and Reasoning with Equations:** By the end of eighth grade, students have learned to solve linear equations in one variable and have applied graphical and algebraic methods to analyze and solve systems of linear equations in two variables. Now, students analyze and explain the process of solving an equation. Students develop fluency writing, interpreting, and translating between various forms of linear equations and inequalities, and using them to solve problems. They master the solution of linear equations and apply related solution techniques and the laws of exponents to the creation and solution of simple exponential equations.

**Unit 2- Linear and Exponential Relationships:** In earlier grades, students define, evaluate, and compare functions, and use them to model relationships between quantities. In this unit, students will learn function notation and develop the concepts of domain and range. They explore many examples of functions, including sequences; they interpret functions given graphically, numerically, symbolically, and verbally, translate between representations, and understand the limitations of various representations. Students build on and informally extend their understanding of integer exponents to consider exponential functions. They compare and contrast linear and exponential functions, distinguishing between additive and multiplicative change. Students explore systems of equations and inequalities, and they find and interpret their solutions. They interpret arithmetic sequences as linear functions and geometric sequences as exponential functions.

Building on their work with linear, quadratic, and exponential functions, students extend their repertoire of functions to include polynomial, rational, and radical functions.<sup>2</sup> Students work closely with the expressions that define the functions, and continue to expand and hone their abilities to model situations and to solve equations, including solving quadratic equations over the set of complex numbers and solving exponential equations using the properties of logarithms. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. The critical areas for this course, organized into four units, are as follows:

Unit 1- Relationships Between Quantities and Reasoning with Equations: This unit develops the structural similarities between the system of polynomials and the system of integers. Students draw on analogies between polynomial arithmetic and base-ten computation, focusing on properties of operations, particularly the distributive property. Students connect multiplication of polynomials with multiplication of multi-digit integers, and division of polynomials with long division of integers. Students identify zeros of polynomials, including complex zeros of quadratic polynomials, and make connections between zeros of polynomials and solutions of polynomial equations. The unit culminates with the fundamental theorem of algebra. A central theme of this unit is that the arithmetic of rational expressions is governed by the same rules as the arithmetic of rational numbers.

Unit 2- Linear and Exponential Relationships: Building on their previous work with functions, and on their work with trigonometric ratios and circles in Geometry, students now use the coordinate plane to extend trigonometry to model periodic phenomena.

Unit 3- Descriptive Statistics: In this unit students synthesize and generalize what they have learned about a variety of function families. They extend their work with exponential functions to include solving exponential equations with logarithms. They explore the effects of transformations on graphs of diverse functions, including functions arising in an application, in order to abstract the general principle that transformations on a graph always have the same effect regardless of the type of the underlying function. They identify appropriate types of functions to model a situation, they adjust parameters to improve the model, and they compare models by analyzing appropriateness of fit and making judgments about the domain over which a model is a good fit. The description of modeling as “the process of choosing and using mathematics and statistics to analyze empirical situations, to understand them better, and to make decisions” is at the heart of this unit. The narrative discussion and diagram of the modeling cycle should be considered when knowledge of functions, statistics, and geometry is applied in a modeling context.

Unit 4- Expressions and Equations:

Unit 4- Expressions and Equations: In this unit, students see how the visual displays and summary statistics they learned in earlier grades relate to different types of data and to probability distributions. They identify different ways of collecting data— including sample surveys, experiments, and simulations—and the role that randomness and careful design play in the conclusions that can be drawn.

The fundamental purpose of the course in Geometry is to formalize and extend students' geometric experiences from the middle grades. Students explore more complex geometric situations and deepen their explanations of geometric relationships, moving towards formal mathematical arguments. Important differences exist between this Geometry course and the historical approach taken in Geometry classes. For example, transformations are emphasized early in this course. Close attention should be paid to the introductory content for the Geometry conceptual category found in the high school CCSS. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations. The critical areas, organized into five units are as follows.

**Unit 1- Congruence, Proof, and Constructions:** In previous grades, students were asked to draw triangles based on given measurements. They also have prior experience with rigid motions: translations, reflections, and rotations and have used these to develop notions about what it means for two objects to be congruent. In this unit, students establish triangle congruence criteria, based on analyses of rigid motions and formal constructions. They use triangle congruence as a familiar foundation for the development of formal proof. Students prove theorems—using a variety of formats—and solve problems about triangles, quadrilaterals, and other polygons. They apply reasoning to complete geometric constructions and explain why they work.

**Unit 2- Similarity, Proof, and Trigonometry:** Students apply their earlier experience with dilations and proportional reasoning to build a formal understanding of similarity. They identify criteria for similarity of triangles, use similarity to solve problems, and apply similarity in right triangles to understand right triangle trigonometry, with particular attention to special right triangles and the Pythagorean theorem. Students develop the Laws of Sines and Cosines in order to find missing measures of general (not necessarily right) triangles, building on students' work with quadratic equations done in the first course. They are able to distinguish whether three given measures (angles or sides) define 0, 1, 2, or infinitely many triangles.

**Unit 3- Extending to Three Dimensions:** Students' experience with two-dimensional and three-dimensional objects is extended to include informal explanations of circumference, area and volume formulas. Additionally, students apply their knowledge of two-dimensional shapes to consider the shapes of cross-sections and the result of rotating a two-dimensional object about a line.

**Unit 4- Connecting Algebra and Geometry Through Coordinates:** Building on their work with the Pythagorean theorem in 8th grade to find distances, students use a rectangular coordinate system to verify geometric relationships, including properties of special triangles and quadrilaterals and slopes of parallel and perpendicular lines, which relates back to work done in the first course. Students continue their study of quadratics by connecting the geometric and algebraic definitions of the parabola.

**Unit 5 Circles With and Without Coordinates:** In this unit students prove basic theorems about circles, such as a tangent line is perpendicular to a radius, inscribed angle theorem, and theorems about chords, secants, and tangents dealing with segment lengths and angle measures. They study relationships among segments on chords, secants, and tangents as an application of similarity. In the Cartesian coordinate system, students use the distance formula to write the equation of a circle when given the radius and the coordinates of its center. Given an equation of a circle, they draw the graph in the coordinate plane, and apply techniques for solving quadratic equations, which relates back to work done in the first course, to determine intersections between lines and circles or parabolas and between two circles.

State Description not yet available.

AAI Course Description: Trigonometry, a one-semester course, prepares students for further study of mathematical topics in calculus and physics. The course begins with a review of right-triangle trigonometry. Students then study the unit circle and the graphs of basic trigonometric functions, sine, cosine, and tangent, and their inverses, as well as the relationships of these functions to chords and right triangles. In addition, students apply their study of trigonometric functions and identities to find angles of elevation and depression and solve right triangles. The course concludes with the complex number plane and the polar coordinate system. Prerequisites: Algebra I, Geometry, Algebra II

| <p>This course is targeted for grade 12 students, whose test scores on the Postsecondary Educational Readiness Test (P.E.R.T.) are below the established cut scores for mathematics, indicating that they are not yet “college ready” in mathematics. This course incorporates the Common Core Standards for Mathematical Practices as well as the following Common Core Standards for Mathematical Content: Expressions and Equations, The Number System, Ratios and Proportional Relationships, Functions, Algebra, Geometry, Number and Quantity, Statistics and Probability, and the Common Core Standards for High School Modeling. The standards align with the Mathematics Postsecondary Readiness Competencies deemed necessary for entry-level college courses.</p>   |                              |             |        |  |

Once again, student placement for courses is based on the student’s previous courses, the student’s individualized learning plan and the course prerequisites. If a student scores the equivalent of an FCAT 2.0 Level 1 or 2 on the PARCC Mathematics assessment the following year the student will either be placed into an intensive mathematics course or will receive intensive instruction in the areas of deficit within the content area course the following year.

Pivot Charter School understand the necessity of complying with all state regulations regarding the Florida Assessment Program, including that students in some courses are required to take the End of Course Exams, such as in Algebra I, Algebra II and Geometry, Statistics and any subsequent assessments released by the state of Florida. We will follow the state’s requirements for how these scores are supposed to be used, such as passage of the Algebra I EOC being a graduation requirement, and that the Geometry assessment is to count for 30% of a student’s final grade in the Geometry course, and that the Algebra II exam must be passed by any student wishing to obtain a Scholar Designation on their high school diploma.

## Science

Advanced Academics offers a variety of core and elective science courses for middle and high school. Course content introduces students to the fields of science, qualitative and quantitative analysis, the scientific method, research methods for scientific reports, and the relationship between science and technology. The courses teach students to use logic, reasoning, and critical thinking when analyzing experimental results and scientific concepts, and draw conclusions from data in the various branches of science.

### AAI Course Description:

MS Earth Science A, the first course of a two-semester series, introduces students to scientific investigation and experimentation and describes the methods and tools scientists use to study the Earth. Students learn to read geologic maps, topographic maps, and various types of graphs for information. Concepts of density, heat, heat transfer, and types of energy are explored, and students examine the role of these concepts in Earth processes. The course concludes by examining Earth’s layered structure and the transfer of heat from Earth’s interior through its layers.

MS Earth Science B, the second course of a two-semester series, shows students how direct and indirect evidence is used to learn about Earth’s structures and functions. Students learn the evidence for plate tectonics and relate plate movement to geological events such as earthquakes, mountain building, and volcanic eruptions. The rock cycle is described, and students learn how weathering and erosion shape the Earth’s surface. Students explore nonrenewable and renewable resources and investigate the resources in their states. The geologic time scale is used to describe Earth’s history. Basic ecological concepts are introduced, including interactions in ecosystems, matter and energy flow, and populations. Earth’s biomes are surveyed. The course concludes with an introduction to space science. Students explore the origin and structure of the universe, characteristics of the solar system, and motions of the planets and other celestial objects. The prerequisite for this course is successful completion of MS Earth Science A.

| AAI Course Description:<br>Biology A, the first course of a two-semester series, introduces students to the nature of science, the scientific method, and inquiry processes. The course explains proper lab techniques and safety procedures and methods for conducting scientific experiments and communicating their results. The course also provides students with an overview of what constitutes a living organism, followed by an in-depth study of the components that make up a healthy cell. Students will examine the structures and processes that occur in different types of cells. Other topics in this course include biochemistry, cellular activities, Mendelian and modern genetics, human heredity, evolution, and genetic engineering. Prerequisites for this course are Physical Science and Algebra I.<br>Biology B, the second course of a two-semester series, provides students with an overview of classifying organisms and examining human body systems. The course introduces students to the dynamics within ecosystems and how the classification of organisms was developed. Students will analyze organisms in the six kingdoms by examining their anatomical and physiological characteristics. Students will also learn about the major systems of the human body and how bacteria and viruses cause disease. Prerequisites for this course are Physical Science and Algebra I. |                               |             |        |                                   |

| <p>AAI Course Description:</p> <p>Physical Science A is first in a series of two courses designed to introduce students to the study of the nature of science. The course introduces students to how science works, the scientific method, and inquiry processes. The course explains methods of conducting scientific experiments and communicating the results. The course leads students to an understanding of the atomic nature of matter, the elements, and the periodic table. Students will examine the properties of matter, explore the composition and behavior of acids and bases, and explain the difference between solutions and mixtures. The course concludes with a description of force, velocity, acceleration, and Newton's laws of motion. Students should have taken or be concurrently enrolled in Algebra I.</p> <p>Physical Science B, the second course in a two-semester series, continues with a study of work and power. The course leads students to design simple machines based on the basic principles of physics. The course continues with a study of the generation of electricity and magnetism. The course goes on to cover the forms and properties of waves and the electromagnetic spectrum. Students will also study nuclear reactions and the composition and structure of the universe. The course concludes with an examination of the life cycle of a star and the past achievements and future goals of space exploration. Students should have taken or be concurrently enrolled in Algebra I.</p> |                            |             |        |  |

**AAI Course Description:**

Chemistry A, the first course of a two-semester series, introduces students to the basic concepts of observation, the history of chemistry, and the use of reason and the scientific method. The course also emphasizes the study of matter and energy, with a focus on identifying differences between states of matter and physical and chemical properties.

Fundamental properties of measurement and the use of scientific notation in chemistry will be introduced early in the course and reinforced throughout the remaining units. The relation between atomic models and the periodic table will be explained, along with ways to use these concepts as tools in the study of chemistry. The remaining units of the course will focus on ions and ionic compounds, molecular compounds, acids and bases, the mole concept, chemical masses, and chemical equations. Prerequisites for this course are Algebra I, Geometry, and Biology. Students should have taken or be concurrently enrolled in Algebra II.

Chemistry B, the second course of a two-semester series, focuses on chemical bonding, molecular geometry and symmetry, Lewis structures, valence shell electron pair repulsion (VSEPR) theory, and resonance structures. In addition, this course introduces thermochemistry, chemical kinetics, and electrochemistry. Calculation methodology, concepts, and definitions for pH, pOH, and buffering are also provided. Key concepts of organic chemistry, nuclear and environmental chemistry, biochemistry, and analytical chemistry are explained. The course ends with a discussion of industrial processes, energy, and careers related to chemistry. Prerequisites for this course are Algebra I, Geometry, and Biology. Students should have taken or be concurrently enrolled in Algebra II.

**AAI Course Description:**

Physics A is the first course of a two-semester series that introduces students to concepts in classical and modern physics. The course discusses topics in Newtonian mechanics, gravitation, oscillatory motion, gases, fluids, and heat. This course combines the conceptual understanding of basic physics principles with problem solving. Students will learn to analyze situations, apply expressions and principles, and understand various concepts and principles. Prerequisites for this course are Algebra I, Algebra II, Geometry, Pre-Calculus, Physical Science, and Chemistry. Students should have taken or be concurrently enrolled in Calculus.

Physics B is the second course of a two-semester series that introduces students to concepts in classical and modern physics. The course discusses the topics of static and current electricity, magnetism, electric circuits, sound, geometrical optics, waves, and modern physics. Prerequisites for this course are Algebra I, Algebra II, Geometry, Pre-Calculus, Physical Science, and Chemistry. Students should have taken or be concurrently enrolled in Calculus.

As with other subjects course placement will be based on previous courses, the students individualized learning plan and the course prerequisites. We also acknowledge the requirements to administer the EOC for Biology and that the test must account for 30% of the students' final grade, unless the student is planning to obtain the Scholar Designation on their high school diploma, in which case they must pass the exam.

## Social Studies

Advanced Academics provides a broad spectrum of core, elective, and state-specific social studies courses for middle and high school. Course content improves students' skills in literacy, writing, research, and technology. The courses teach students to think critically through analysis, synthesis, and problem solving in the areas of anthropology, civics, economics, geography, and history.

| <b>7th</b> | Career Research and Decision Making | 1700060 | Year | MS Career Exploration |
|------------|-------------------------------------|---------|------|-----------------------|

The purpose of this course is to enable students to explore careers/career clusters and make informed career choices. Activities enable students to increase self-awareness and develop the skills needed to successfully plan for postsecondary education and the workplace. Career assessment should include interests, aptitudes, and basic skills. Work-based learning strategies appropriate for this course include job shadowing, field trips, and mentors. Work-based activities allow students to evaluate their career choices as they relate to actual careers at the worksite.

The content should include, but not be limited to, the following:

- Self-awareness to include interests, values, skills, learning styles, etc.
- Goal-setting and decision-making processes
- Exploring careers/career clusters and educational requirements
- Postsecondary education and training opportunities
- Workplace skills such as communication, teamwork, problem-solving, time management, computer, etc.
- Career and education planning

Special Note: This course must include career exploration using CHOICES or a comparable cost-effective program and educational planning using the online student advising system known as Florida Academic Counseling and Tracking for Students at the Internet website FACTS.org; and shall result in the completion of a personalized academic and career plan. (Section 1003.4156, Florida Statutes).

#### Understanding the Workplace

- 1.0 Describe how work relates to the needs and functions of the economy, society, and personal fulfillment.
- 2.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 3.0 Describe the need for career planning, changing careers, and the concept of lifelong learning and how they relate to personal fulfillment.
- 4.0 Describe how legislation such as the Americans with Disabilities Act and Child Labor Laws regulates employee rights.

#### Self-Awareness

- 5.0 Use results of an interest assessment to describe their top interest areas and relate to careers/career clusters.
- 6.0 Identify five values that they consider important in making a career choice.
- 7.0 Identify skills needed for career choices and match to personal abilities.
- 8.0 Demonstrate the ability to apply skills of self-advocacy and self-determination throughout the career planning process.
- 9.0 Identify strengths and areas in which assistance is needed at school.
- 10.0 Apply results of all assessments to personal abilities in order to make realistic career choices.

#### Exploring Careers

- 11.0 Demonstrate the ability to locate, understand, and use career information.
- 12.0 Use the Internet to access career and education planning information.
- 13.0 Identify skills that are transferable from one occupation to another.
- 14.0 Demonstrate use of career resources to identify occupational clusters, career opportunities within each

cluster, employment outlook, and education/ training requirements.

15.0 Explain the relationship between educational achievement and career success.

**Goal Setting and Decision-Making**

16.0 Identify and demonstrate use of steps to make career decisions.

17.0 Identify and demonstrate processes for making short and long term goals.

**Workplace Skills**

18.0 Demonstrate personal qualities (e.g. dependability, punctuality, responsibility, integrity, getting along with others) that are needed to be successful in the workplace.

19.0 Demonstrate skills to interact positively with others.

20.0 Demonstrate employability skills such as working on a team, problem-solving and organizational skills.

**Career and Education Planning**

21.0 Identify secondary and postsecondary school courses and electives that meet tentative career plans.

22.0 Identify advantages and disadvantages of entering various secondary and postsecondary programs for the attainment of career goals.

23.0 Demonstrate knowledge of varied types and sources of financial aid to obtain assistance for postsecondary education.

24.0 Identify inappropriate discriminatory behaviors that may limit opportunities in the workplace.

25.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/work goals.

26.0 Describe how extracurricular programs can be incorporated in career and education planning.

27.0 Demonstrate knowledge of high school exit options (e.g., standard diploma, certificate of completion, special diploma, GED, etc.) and impact on post-school opportunities.

28.0 Describe high school credits and explain how GPAs are calculated.

**Job Search**

29.0 Demonstrate skills to complete a job application.

30.0 Demonstrate skills essential for a job interview.

United States History (U.S. History) 9-12 Course – The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

**Special Notes:**

Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed

at [http://www.nagb.org/publications/frameworks/history\\_06.pdf](http://www.nagb.org/publications/frameworks/history_06.pdf)

Honors/Advanced courses offer scaffolded learning opportunities for students to develop the critical skills of analysis, synthesis, and evaluation in a more rigorous and reflective academic setting. Students are empowered to perform at higher levels as they engage in the following: analyzing historical documents and supplementary readings, working in the context of thematically categorized information, becoming proficient in note-taking, participating in Socratic seminars/discussions, emphasizing free-response and document-based writing, contrasting opposing viewpoints, solving problems, etc. Students will develop and demonstrate their skills through participation in a capstone and/or extended research-based paper/project (e.g., history fair, participatory citizenship project, mock congressional hearing, projects for competitive evaluation, investment portfolio contests, or other teacher-directed projects).

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Common Core State Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

World History 9-12 Course – The grade 9-12 World History course consists of the following content area strands: World History, Geography and Humanities. This course is a continued in-depth study of the history of civilizations and societies from the middle school course, and includes the history of civilizations and societies of North and South America. Students will be exposed to historical periods leading to the beginning of the 21st Century. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events from ancient and classical civilizations.

Honors/Advanced courses offer scaffolded learning opportunities for students to develop the critical skills of analysis, synthesis, and evaluation in a more rigorous and reflective academic setting. Students are empowered to perform at higher levels as they engage in the following: analyzing historical documents and supplementary readings, working in the context of thematically categorized information, becoming proficient in note-taking, participating in Socratic seminars/discussions, emphasizing free-response and document-based writing, contrasting opposing viewpoints, solving problems, etc. Students will develop and demonstrate their skills through participation in a capstone and/or extended research-based paper/project (e.g., history fair, participatory citizenship project, mock congressional hearing, projects for competitive evaluation, investment portfolio contests, or other teacher-directed projects).

Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

|------------|--|-------------|--------|-----------------------------------|
|            | United States Government                     | 2106310     | Sem    | U.S. Government                   |
|            | United States Government for Credit Recovery | 2106315     | C.Rec. | Honors U.S. Government            |
|            | United States Government Honors              | 2106320     | Sem    |                                   |

United States Government– The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

**Special Notes:**

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at

<http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Honors/Advanced courses offer scaffolded learning opportunities for students to develop the critical skills of analysis, synthesis, and evaluation in a more rigorous and reflective academic setting. Students are empowered to perform at higher levels as they engage in the following: analyzing historical documents and supplementary readings, working in the context of thematically categorized information, becoming proficient in note-taking, participating in Socratic seminars/discussions, emphasizing free-response and document-based writing, contrasting opposing viewpoints, solving problems, etc. Students will develop and demonstrate their skills through participation in a capstone and/or extended research-based paper/project (e.g., history fair, participatory citizenship project, mock congressional hearing, projects for competitive evaluation, investment portfolio contests, or other teacher-directed projects).

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Common Core State Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

| Rec. Grade  | Title                         | Course Code | Length | AAI Online Curriculum Course Name |
|---|-------------------------------|-------------|--------|-----------------------------------|

| <p>Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Common Core State Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.</p>   |                               |             |        |                                   |

Once again, we acknowledge that we must administer the Civics and US History EOC exams, each of which will account for 30% of the students' final grade.

## **B. Curriculum Research Base**

---

Central to the Pivot curriculum design is the blended learning format, which allows for online curriculum delivered in a brick and mortar setting. Blended education is an emerging curriculum delivery format that stems from the growing trend of online and distance learning models. Researcher Heather Staker (2011) defines blended learning as:

*Blended learning is any time a student learns at least in part at a supervised brick-and-mortar location away from home and at least in part through online delivery with some element of student control over time, place, path, and/or pace (p.5).*

The definition highlights two significant program features: 1) supervised brick-and-mortar location and 2) online delivery that are departures from traditional educational models. Brick and mortar can be defined in a number of ways and has been operationalized to include school classrooms and computer labs. Online delivery gives students a control over their learning and is not dependent on the teacher's use of other electronic devices.

Staker (2011) research profiles six models of blended education as a means of developing a typology of blended-learning models and profiling school models operating across the county. The six models include:

1. The face-to-face driver model utilizes onsite teachers to deliver most of the online curricular as a supplementary or remediation program.
2. The rotation model allows students to participate in online curriculum during a selected period of a fixed learning schedule. The teacher retains oversight of the online program.
3. Flex model features an online platform that delivers most of the curricula with an onsite teacher providing as needed help or small face-to-face group sessions.
4. The online lab is offered in a brick and mortar environment but fully delivered via the online learning platform. Generally, the teacher is online and the onsite staff serves as a paraprofessional or teaching aide.
5. The self-blend model allows students to select any course from a menu of a larger course selection. Adult supervision is remote and accessed by the student as needed.
6. The online driver model utilizes both an online platform and remote teacher to deliver the curriculum. There may be required check-in or scheduled meetings/activities at brick and mortar facility.

The Pivot model can be described as the flex model and is well aligned with many aspects of the programs profiled in the report.

One of the schools highlighted in the report was Edison Learning Labs which has served 500,000 learners and share similar values of the Education model. The following table depicts parallels between Pivot's and the Edison model:

| Edison  | Pivot  |
|---|--|
| <b>Recruit top talent</b>                           | Hire only highly qualified teacher             |
| <b>Culture of Engagement and Aspiration</b>         | High Expectations for Learning and Environment |
| <b>Demanding content and customized instruction</b> | Rigorous and Relevant Learning                 |
| <b>Achievement-driven management</b>                | Data driven instructional program              |

The Edison Learning’s Provost Academy serves a 60% minority achieving positive outcomes: 74% course completion rates and 92% passing rate. The school also reports that its student’s performance on the SAT is as high or higher than state and national averages.

By partnering with AAI, Pivot is able to capitalize on some of the most effective parts of the AAI curriculum, which is often offered as an independent virtual program as opposed to a blended model. By providing the blended model we believe are expanding upon the educational offerings that they have to offer, and will show better than their typical results. AAI recently published three case studies highlighting the results of their program:

- TriCounty Technology Center (OK) serves 600 full time students during the 2009-2010 academic year and demonstrated a 89.4% completion rate and of those students a 93% passing rate.
- The Mansfield Independent School District increased its completion rate by 21% from the fall of 2009 (72%) to summer of 2010 (93%).
- The Clark County, Nevada program at Valley High School demonstrated a positive trend in its performance outcomes for the period between 2005-2006 and 2009-2010. The number of dropouts decreased from 10.9% to 5.5%, a difference of 5.5%, while the graduation rate improved from 42.1% to 60% during the period.

The 2009 US Department of Education’s meta-analysis of 51 online learning studies found that limited research on the effectiveness of online learning for K-12 students is available. The limited case study data that was presented demonstrates that online curriculum offered a blended format yields positive results for the learners.

## *C. Reading Curriculum*

Reading is a critical component of the Florida education system and the law requires it to be a primary focus on the overall school curriculum. Pivot Charter School will implement Just Read, Florida! initiatives to assist in the process for students to become successful, independent readers.

The School will develop and implement a school-wide Comprehensive Research-based Reading Plan (CRRP) prior to the opening of school to provide a framework for instruction integrating across curricular areas while aligning subject area standards. The School CRRP will be designed to meet specified requirements outlined in the Just Read Florida objectives:

- Leadership at the school level is guiding and supporting the CRRP initiative. The School will assure that school administrators will be curriculum leaders and resources. A statewide reading coordinator assists the school's staff ensure that the reading plan is being effectively carried out, and that the resources available to the ECs and students are being effectively utilized.
- The analysis of data drives all decision-making. Student data will be collected, organized and analyzed for review. The use of the online platform through AAI and the Reading Plus system described below in addition to the assessments utilized by Pivot Charter School as described in section five provide the educational team a vast wealth of information that can be used to make informed decisions about student needs, and the ECs are able to work individually or in small groups with students to meet those identified needs.
- Professional Development for on-site staff is systemic and targeted at individual teacher needs as determined by analysis of student performance data. Professional Development will be coordinated through the decisions of the Principal and Executive Director with input from the state directors. The professional development plan will make provisions to target specific areas of need based on assessment data and reflect the goals in teachers' Individual Professional Development Plans (IPDP). Professional development will be differentiated and will intensify for teachers based on progress monitoring data. It will be up to the administration to organize Professional Development opportunities and/or to assist the teachers to find opportunities offered by the district if they are available to charter schools.
- Measurable student achievement goals are established and clearly described. Student data from a variety of assessments will be monitored on a regular schedule and reviewed for ongoing progress in reading as well as writing, math, and science. Through this process, individual student scores, classroom progress, and school-wide progress and objectives will be reviewed and evaluated by the school stakeholders. The school will organize data in a central location, via the school's Student Information System. The School will use the collected information to create an annual plan for improvement and to assist in planning Professional Development to train and support on-site staff in identifying classroom strategies and instructional delivery strategies.
- The curriculum provided by AAI is appropriate to the students and research-based. The program incorporates the six components of reading (oral language, phonemic awareness, phonics, fluency, vocabulary, and comprehension) delivered through a coherent instructional design. The educational program has been carefully designed to align with the CCSS and meet the age appropriate needs of the students.

In addition to the English Language Arts program delivered through AAI's ROADS platform, Pivot Charter Schools also uses an additional reading program to help accelerate the reading skills of all of our students, for this we use Reading Plus.

## *Reading Plus*

---

Reading Plus® is a computer-based reading intervention system that uses innovative technology and engaging content to provide individualized silent reading practice for students in second through twelfth grades. In addition to providing effective, scaffolded reading instruction, Reading Plus also ensures efficient development of foundational visual, perceptual, and information-processing skills, the "unseen and unheard" skills required for silent reading proficiency. The program assesses students' reading ability and remediates reading comprehension, vocabulary, and fluency through scripted teacher lessons, talking software, and print reinforcement exercises. Intensive scaffolds and controlled, age-

appropriate texts enable students to build the confidence and foundational language skills essential for further learning.

All Pivot students who score low on FCAT (or PARCC when implemented) or have a special need for reading assistance utilize this program in 45 minute blocks two to three times a week in order to improve their reading skills. Students work with an Educational Coordinator who is trained by Pivot to make sure the program is being utilized to its max capacity. For the at-risk student, they first will learn to read and then they will read to learn. A struggling reader's intervention will consist of improving their basic reading skills, hands-on interaction which will motivate the student to read effectively and comprehend every sentence read. Studies show that within fifteen (15) weeks at 45 minutes three times a week the student has already gained the confidence needed to advance themselves and achieve at grade level course and to perform well in State testing. For the advanced Pivot Charter School student the rigorous fundamental reading will enhance the student to establish a lifelong learning pattern, as well as to achieve their High School Diploma, proceed to read college reading material and for the workforce at a faster pace.

The continuous assessment provided by Reading Plus is monitored very closely and reports are distributed on a weekly basis to the students' parents/Guardians. Parent involvement is important and motivational to the student's well-being. The Pivot Charter School goal is to prepare the student to acquire the knowledge to read and comprehend from the very first day of entrance as a Pivot Charter School student. The uniqueness of the Reading Plus Program is that it is tailored to each individual Pivot Charter Student as they work at their own pace. Compare to the traditional learning environment, many students will benefit and advance from the lesson plan. By utilizing systematic data analysis we can ensure that no students "fall through the learning cracks," because they are too timid to ask for help and because they don't want their peers to see or hear that they need help.

In addition to the computerized support from the Reading Plus program, Pivot is able to offer daily tutoring for reading through the use of our EC's and EA's on site, for those students who need additional support. The EC's and EA's can provide personalized or small group support and instruction to students based on the needs identified through Reading Plus and the multitude of other assessment and data points Pivot has available regarding student progress.

Pivot Charter School will use Scantron Performance Assessment to monitor progress. Scantron starts with a Broad Screening test online (paper and pencil screenings are available). Students will be tested and a minimum of three times throughout the year and the results will be used to create tutoring groups. These groups will be continuously monitored and each student will get individualize needs addressed. Data from Scantron will be uploaded for teachers and school leaders to analyze and create goal sheets. Students who are struggling with reading skills can take the assessment more often (at least once per month) so that more detailed and up-to-date data will be available to more accurately focus the instructional needs and planning for that student. The information will be available and offer guidance and best practice support for our teachers as they prepare lessons for student learning. School personnel will receive training to ensure successful implementation.

## *Students Reading at Grade Level or Higher*

---

The reading curriculum provided both in the AAI ROADS platform and the Reading Plus system provides the means to be differentiated at all grades for students reading at grade level or higher. The AAI online

curriculum allows students to complete courses ahead of schedule if they are motivated to do so and able to demonstrate mastery of the content, allowing them to complete more credits more quickly and move on to accelerated level courses prior to graduation should they so desire.

## *Students Reading Below Grade Level*

---

For those students who are not making adequate progress or are demonstrating below grade level abilities, the Individual Learning Plan will take on the role of the more traditional Progress Monitoring Plan (PMP) to recognize and address those specific strategies to be implemented in order to remediate learning deficiencies. PMP's will be created by the student's EC, who in most cases will hold a Reading Endorsement, but if the EC is not reading endorsed one of the other on-site ECs with an endorsement will also be involved, an administrator(s), ESE teacher, parent, and student, if applicable. This team will review the PMP as often as necessary, but at a minimum midway through the marking period and again at the end of each nine week marking period.

Given the differentiation which occurs at Pivot Schools, the Multi-Tiered System of Supports is built into the way we operate; please see below, in Part D, for a more detailed description of how MTSS is utilized at Pivot.

Pursuant to Section 1003.4156, F.S., it states that if a student FCAT Reading scores is Level 1, the student will be required to either complete an Intensive reading course or will have instruction in the areas of deficit within their core area of instruction. More often than not, the student will receive the intensive reading course. Intervention may consist, but not limited to, reading before and after school with teacher support, and if a student is behind more than two (2) years below grade level, a double block of reading is foundational to accelerate reading skills. School monitoring is based on teacher's recommendation and the three (3) times a year testing: Baseline, Mid-Year and End of Year Assessments.

The End of Year Assessment will determine specific areas of reading difficulty. If needed, and as per Rule 6A-1.09441, F.A.C., states that classes from the Course Code Directory must be introduced to the schedule. In other words, extra classes will be added to the student schedule in the attempt to move forward and gain those lost reading years. At the same time the student may or will lose complete interest in the subject, because they will be overwhelmed. At the High School level and Pursuant to Section 1003.428, F.S., the regulations are similar to those in middle school.

Pivot Charter School is committed to delivering a comprehensive core reading plan (CCRP) that is established through planning based on student needs, School-wide consistency in the delivery of the plan, assessment of results, review and revision of the plan as needed, and ongoing commitment to maintain the process. A successful implementation of a CRRP will result in enhanced and ongoing student achievement.

## *D. Curriculum for Exceptional Students*

---

*Explain how students who enter the school below grade level will be engaged in and benefit from the curriculum.*

The AAI curriculum being used at Pivot Charter School meets the needs of exceptional students and all students who enter below grade level, as the online curriculum. Although we want 100% of class completion and a “C” or better it is sometimes more realistic for an 80% completion. This goal is more realistic based on prior evidence:

- Proceeds at the student's pace adjusting to IEP goals
- Builds on existing reading, writing, and math skills
- Allows placing the child at different levels for math and language arts
- Encourages students to become active learners through exploration and discovery
- Introduces new learning opportunities in a safe, supportive environment
- Balances learning with fun

The levels for language arts and math programs are individualized for each student. Children progress at their own rates using multisensory learning that helps each learning style. The computer is very engaging for some children. Some children, when faced with textbooks or non-interactive environments, exhibit ADD/ADHD-like behavior, but when faced with an interactive system, are often successful in focusing and learning. The computer is impersonal so children on the Autism spectrum (specifically children with Asperger’s Syndrome and high-functioning Autism) learn without the distraction of interpersonal relations.

Some of the other key strategies that are used at Pivot which would assist exceptional students include:

- Small Group Instruction: Onsite teachers pre-teach material and re-teach material in core courses.
- Tutoring: Credentialed teachers as well as local community members who have undergone the appropriate background checks will provide tutoring to PCS students during their designated time on campus.
- Modification to Assignments: While the system tracks all assignments and provides a pacing, assignments can be altered. For both ESE and regular education students, a credentialed teacher onsite can work with the Principal and modify a student’s workthrough what is called ROAD TRIPS, the amount of work expected of a student can be altered. ROAD TRIPS are a way to create accommodations based on student needs and/or their IEP.
- The curriculum/calendar goes home with them so there is no need for a student to have to remember to write down homework or upcoming test dates.
- The curriculum offers the student the option to have the material read to them.

#### Socioeconomically Disadvantaged Students

Pivot will provide the same individualized, supportive, standards-based curriculum where students may progress at a rate commensurate with their abilities to socioeconomically disadvantaged students as they do to all Pivot students. Pivot allows students without internet access at home to attend a second session or stay a longer period of time in ensure they have adequate time to be successful in their curriculum.

In order to monitor student progress and ensure they are progressing as needed, and to ensure support is provided to those students who need it, Pivot Charter School utilizes a Multi-Tiered System of Support (MTSS) model.

In June of 2008, the Florida Department of Education released the Statewide Response to Instruction/Intervention (RtI) Implementation Plan with the intent that RtI would "promote school-wide practices that align with and accelerate our collective efforts to ensure the highest possible student achievement in both academic and behavioral pursuits." In addition, following the 2004 reauthorization of the federal "Individuals with Disabilities Education Act," Florida began requiring RtI to be used as the process for determining eligibility for students with learning disabilities on July 1, 2010. With that in mind, RtI became the framework that guides the delivery of the instruction in Florida. In 2011, the first phase of the implementation ended and a new framework known as the Multi-Tiered System of Supports emerged.

MTSS is a concept that is inclusive of the RtI process, as well as several other processes which the state has been supporting in an attempt to create common language and a unified educational model. This model is a data-based problem-solving approach to providing instruction and interventions in varying intensities based on student needs. The idea is that immediately as a student begins to falter, the school is ready and has a system in place to provide interventions to put them back on, and keep them on track for success. At Pivot Charter School we will implement the MTSS through our instructional team, who will fill the role of the School Based Leadership Team in a traditional MTSS/RtI model.

The MTSS model will use a multi-tiered approach to provide high-quality instruction and intervention matched to student needs and utilizes learning rates across time to inform important instructional decisions. MTSS requires the effective use of data for the following purposes:

- Screening data identifies students who are already in need of or likely will need Tier 2 interventions.
- Diagnostic data specifies core instructional focus and core differentiated instruction focus, and specifies Tier 2 and Tier 3 intervention focus.
- Progress monitoring measures rate of learning across time for groups or individuals and is used to maximize instruction and intervention outcomes. Progress monitoring helps determine adjustments to the level (Tier) of support needed for students.

The MTSS approach to problem solving is based on a four-step process:

- **Step 1:** Define, in objective and measurable terms, the goal(s) to be attained (what is it we want students/educators/systems to know and be able to do).
- **Step 2:** Identify possible reasons why the desired goal(s) is not being attained.
- **Step 3:** Develop and implement a well-supported plan involving evidence-based strategies to attain the goal(s) (based on data that verified the reasons identified in Step 2).
- **Step 4:** Evaluate the effectiveness of the plan in relation to stated goals.

MTSS follows the premise that all students need to progress at a rate that corresponds to at least one year's growth for every year of instruction, and regular review of student evaluation data should demonstrate progress towards meeting these expectations. When this does not occur, the school will begin the problem solving process. At Pivot Charter School this process begins through the individualized education plan where the individual goals will be established for the student. If those goals are not being met, as measured by the teacher through the use of a variety of data points and the through the weekly meetings with the student, the EC will begin the problem solving process trying to identify where the breakdown is occurring and what could be causing it. The teacher may call upon the

instructional team at the school to assist with brainstorming and developing possible reasons for the difficulty, and then brainstorming methods of addressing the issue to help the student move forward. The team will also identify specific data points which will help to monitor the students' progress, and this data will be collected and documented by the student's EC.

In order to implement the plans that are developed during the problem solving phase of the process, MTSS uses a tiered level of support ranging from tier one through three. The first tier is inclusive of the typical activities that happen within the learning center. These are interventions which could be given to any student within the school and are based on effective, research-based instructional strategies, such as the use of an instructional focus calendar or in class small-group differentiated instruction to meet the students' varied needs.

For those students who may be falling behind and who require additional (supplemental) intervention to achieve "catch up growth," it is imperative to provide that support as early as possible, in order to help those students to eventually meet expectations. Therefore, Tier 2 includes interventions which are research-based and usually delivered in small groups, outside of core instruction, that provides additional time engaged in mastering specific skills. Successful Tier 2 interventions should allow most students who receive these interventions to progress at a rate that allows for catch up growth. These interventions are varied and based on the needs of the students, but may include the direct instruction of specific skills sets, the use of supplemental curricular programs (such as Reading Plus), or other strategies the team deems necessary. At Pivot, these small group interventions happen for nearly all students through the small group instruction and tutoring lead by the ECs, but will be required for students who seem to be struggling with content mastery.

For a small number of students, effective Tier 1 and Tier 2 supports are insufficient to allow them to catch up and meet expectations. For those students, intensive research-based, individualized intervention plans are developed, implemented, monitored, and revised as needed. Because there are many reasons why students might fail to respond to Tier 2 interventions, the level of problem solving needed to determine the particular barrier to the child being successful may be rigorous and time intensive. For some children receiving these Tier 3 interventions, the process of developing and monitoring an intervention might lead to a determination that they require special education. For all students that require Tier 3 interventions, the MTSS process of monitoring and revising intervention as needed, continues until it is no longer needed. Tier 3 interventions will often include individualized tutoring or the use of a custom designed learning lesson to target the specific areas of concern identified during the problem solving phase. At Pivot these types of interventions are done 1:1 by the EC in coordination with the student, to assist the student in getting back on track.

Throughout this entire process, the team of teachers facilitated by the instructional team will continue to reevaluate the problem solving process to continually revisit why the student is struggling and what can be done to help the student improve. Data will be collected so as to support any future evaluations that may be necessary. Also important to the success program is open communication with the students' family. Throughout the process, the facilitator will ensure that the parents are aware of and invited to the meetings regarding their child, as well as made aware of the interventions which are being attempted through the process.

During this process it is possible that student may be referred for evaluation of special education, or a non-qualifying condition may be present which may entitle the student for accommodations under Section 504 of the Federal Rehabilitation Act of 1973. If this is the case, the school will work closely with

the sponsor and agrees to follow the procedures the district has in place for the evaluation, determination and delivery of accommodations under a 504 plan. The school will use the district forms to document the process and accommodations so that if the student ever leaves Pivot Charter School to go to another school within the district, the receiving school will be able to quickly implement the accommodations the student may need. A member of the instructional team will be assigned the responsibility of coordinating 504 needs for the school and will work closely with the district representative to make sure all of the requirements are met.

## *E. Non-Core Academic Curriculum*

In addition to the proposed core curriculum Pivot will provide a battery of elective courses for both middle and high school students. The courses are developed by AAI and provided on the ROADS 3.0 platform.

## *Course Descriptions*

---

### ***CAREER AND TECHNOLOGY ELECTIVES***

#### **Electives**

Advanced Academics provides a variety of elective courses for middle school and high school. The courses provide opportunities for students to acquire additional knowledge and skills in the areas of communications, careers and technology, fine arts, music, world languages, social sciences, and life skills. Elective courses allow students to explore their interests and develop specific skills.

#### **World Language Courses**

In order to offer some of the highest-quality online courses on the market, AAI forms strategic partnerships with third-party companies to expand our suite of curriculum products to include a wide variety of world language courses. These licensed courses, in combination with proprietary Spanish courses developed by our in-house teaching and curriculum experts, allow us to offer the following courses: Spanish, French, German, Mandarin, and Latin for high school; Spanish, French, German, and Mandarin for middle school.

#### **Elective Courses**

AAI offers a wide variety of elective courses in the areas of career and technology, fine arts, physical education, health, communication, life skills, and social sciences.

#### **Career and Technology Skills A**

Career and Technology A is the first part of a two-semester course that covers skills to prepare students for workplace success. Students will explore their interests, aptitudes, and skills plus their individual learning styles in order to find possible career matches. Students will also consider their values and expectations as they learn and practice the skill of goal setting. Students will apply their knowledge of learning styles and memory techniques to enhance their study skills. The course also presents an overview of basic technology skills, including the use of word processing, spreadsheet, presentation, and

database software, that are so vital to success in the workplace. Practice opportunities help students master the use of such software. The course provides open source software programs to the students. Students will explore a variety of career options plus use the steps in the decision-making process to develop their own career plan. To help achieve career goals, students research a variety of post- high school opportunities. Students will create and evaluate job application materials, learn to search for job opportunities, and conduct a successful job interview. Finally, the course presents the role of government in business; global, national, and local economic trends; and how these factors affect working people.

### **Career and Technology Skills B**

Career and Technology B is the second part of a two-semester course that covers problem- solving, decision-making, and communication skills necessary to succeed in the workplace. Students will learn about workplace policies and procedures, growth and promotion opportunities, and the social and technological systems of any business. They will also understand legal and ethical issues related to their personal rights as workers. Students will prepare presentations and communications scenarios for different purposes and audiences, employing a variety of technology skills. The course explains effective leadership skills and provides examples of critical assessment, evaluation, and negotiation. Students will learn the steps of the problem-solving process to identify causes and seek effective resolutions. Students will also learn to plan a project and respond to problems and risks.

Finally, students will learn skills for time management, financial responsibility, and methods to deal with stress.

### **Computer Literacy A**

This one-semester course develops students' overall understanding of computers and enhances technical skills in both basic computer functions and in the use of various types of software. By providing technical instruction and several practice opportunities, this course offers a strong foundation in basic computer literacy. After completing this course, students will be able to recognize computer hardware and use Windows XP and Mac OS operating systems. Students also will learn to use various software applications (word processing, spreadsheet, and presentation software), which are based on OpenOffice.org unless otherwise noted.

### **Computer Literacy B**

This one-semester course builds on basic computer skills to teach students real-world problem solving methods. The course content includes a review unit from the introductory course before covering advanced features of spreadsheets and databases. The course further develops students' understanding of key issues in computing technology, including additional information about the use of spreadsheets and databases as well as an introduction to HTML. It ends with a unit covering careers in technology.

### **Fundamentals of Web Development**

There's more to creating a Website than writing HTML code and uploading files. A good Website must be designed before it's created. This one-semester course introduces students to both Website design and development. The course introduces students to the basic Website design principles, which can be used to both design and evaluate their own sites and to evaluate other sites. Students will learn development languages such HTML and CSS. In addition, students will be introduced to two software programs: GIMP, an image-editing program, and Nvu, a Web development program.

*Recommended Prerequisites: Computer Literacy A, Computer Literacy B*

## ***SOCIAL SCIENCE ELECTIVES***

### **Introduction to Anthropology**

Anthropology aims to use a broad approach to gain an understanding of our past, present, and future to address the problems humans face in biological, social, and cultural life. This course will explore the evolution, similarities, and diversity of humankind through time. The course will look at how we have evolved from a biologically and culturally weak species to one that has the ability to cause catastrophic change. Exciting, online videos lead students through journeys to different areas of the world throughout the course.

### **Introduction to Psychology**

Introduction to Psychology is a one-semester course that challenges students to decide whether psychology is a true science. It discusses research methods used in the field and delves into specific areas of psychology, such as developmental psychology, learning, memory, and psychological disorders, in order to help students answer that question for themselves.

### **Honors Introduction to Psychology**

Honors Introduction to Psychology is a one-semester course that challenges students to decide whether psychology is a true science and then gives them the tools to help answer that question for themselves. It discusses research methods used in the field and delves into specific areas of psychology, such as developmental psychology, learning, memory, and psychological disorders. Through additional research and discussion, students explore the ways in which technology affects various aspects of the field of psychology.

### **Introduction to Sociology**

The world is becoming more complex. How do your beliefs, values, and behavior affect the people around you and the world we live in? In this increasingly connected world, students will examine problems in our society and learn how human relationships can influence the life of the student. This course presents exciting, online video journeys to different areas of the world.

### **Current Events**

Current Events is a one-semester, elective course structured to increase students' understanding of current issues in areas of politics, society, and economics. The course emphasizes student research; the topics chosen are broad in nature to allow for fluctuation in media coverage on common topics. Upon completing this course, students will have a greater understanding of some of the political, social, and economic issues that have dominated the news in recent years. Students will be able to find Web sites and other sources that cover these issues, and students will learn to make educated decisions as to whether the Web sites or sources present biased or unbiased coverage. For each content unit, students will write essays that demonstrate their research efforts. Students will complete a research-based essay at the end of the course.

## ***LIFE SKILL ELECTIVES***

### **Life Skills**

Life Skills, a one-semester course, presents high school students with helpful information in the form of entertaining and interactive games, activities, and quizzes in order to assist them in preparation to exit high school. Whether their choice is college, technical school, the military, or a full-time career, this course teaches basic skills needed in every avenue. In addition to providing strategies for taking the ACT and SAT tests, this course provides an informative time line to help students stay on schedule with required tasks for graduating from high school and entering the outside world. Consumer protection, establishing credit, managing money, buying a car, and renting an apartment for the first time are a few of the topics covered throughout this course.

## ***COMMUNICATION ELECTIVES***

### **Fundamentals of English Composition**

Fundamentals of English Composition is a one-semester course designed to give beginning writers the tools to write effectively for school and life. Course lessons and activities will engage students in practical and accessible discussions of how to write and why. Throughout the course, emphasis is placed on the principle that effective writing achieves its purpose. Students will identify characteristics of effective writing. Students will identify different purposes for writing and learn strategies to achieve those purposes. The course further addresses the writing process through in-depth instruction on prewriting and revision. Along with this, the course explains writing context and issues of audience and intended audience. Students will learn how to achieve purpose through style, form, and rhetorical mode. In the last part of the course, students will evaluate their own work through the lenses of reader expectations and constructive criticism. Upon completion of this course, students will have demonstrated success at various prewriting activities, outlined their work extensively, and written an analytical essay, a persuasive cover letter, and a personal narrative. Students will also have been exposed to peer review practices as well as guidelines for accepting and offering constructive criticism.

### **Journalism A**

Journalism A is the first of a two-part series that introduces secondary school students to the world of journalism. They will see how their strengths and interests compare with those associated with careers in journalism. In this course, students will gain a basic knowledge of journalism, its early history, and its importance in our culture. Students will be introduced to different types of news stories and learn about the reporting and writing skills involved with each.

### **Journalism B**

Journalism B is the second of a two-part series that introduces secondary school students to the world of journalism. Students will explore the changing role of journalism in today's society. They will gain a basic knowledge of radio, television, newspaper, and Internet journalism. This knowledge will include how each medium is relevant today, how it may adapt to economic changes and audience preferences, and how writing for each medium has its own characteristics.

## ***FINE ART ELECTIVES***

### **Fundamentals of Art**

Fundamentals of Art, a one-semester course, introduces high school students to the theory and practice of art. In this course, the elements of art (line, color, shape/form, space, value, and texture) and the principles of art (balance, harmony, unity, emphasis, repetition, rhythm, contrast, and composition) are discussed and demonstrated through the incorporation of famous works of art as well as with the use of interactive graphics and activities.

### **Fundamentals of Art Appreciation**

Fundamentals of Art Appreciation is a one-semester course that explores various aspects of art in an effort to intrigue students and encourage them to develop an understanding of fine art. As students begin to examine the elements and principles of art, they will study important works selected from various types of media, including painting, sculpture, architecture, and photography. Students will explore various types of art media and techniques as they investigate the question of what compels artists to create works of art. This course will provide students with a working knowledge of concepts and an enriched vocabulary so that they can become more critical observers of art.

### **Fundamentals of Art History**

This one-semester course is designed to develop students' understanding and appreciation for the visual arts. This course explores the arts, artists, and their cultures from prehistoric times through the present. Students will begin to explore important works of art, selected from various types of media, including painting, sculpture, architecture, and photography. As the course presents works of different periods, students will receive the historical and geo-graphic context necessary for gaining a deeper appreciation of the pieces. This course will provide students with a working knowledge of concepts and an enriched vocabulary so that they can become more critical observers of art.

### **Introduction to Drawing**

Introduction to Drawing is a one-semester course that allows students to practice application of artistic processes and skills. Students learn the basics of line, contour, shading, texture, perspective, composition, and action drawing. They will create several original works of art and compile portfolios of their artwork.

### **Introduction to Graphic Design**

This one-semester course is designed to develop students' understanding and appreciation for design. By raising students' awareness of design, this course will serve as a strong foundation in the basic principles of graphic design. Students will learn to communicate visually; they will present their own ideas and information graphically by applying graphic design principles in their own work as well as interpret visual representations presented to them. The course will introduce students to problem-solving scenarios that can be solved graphically. Students will apply creativity techniques to create innovative and effective design solutions. Students will also learn about the history of design, how various design movements have contributed to the field of design today, what role design plays in society, and how the field of design relates to other facets of society. Though the course is structured around computer-assisted graphic design, other types of design are discussed as well. Students will learn to use Inkscape, an image-editing program that will be provided for them and will be required to create several design compositions using this program.

### **Independent Art Credit A**

Independent Art Credit A is a one-semester course asks students to assess their artistic ability, set goals for what they'd like to learn from their art lessons, and make a plan for achieving those goals. Designed for students who are actively participating in formal art activities, such as drawing lessons, this course offers a way for students to receive credit for this experience. In addition to logs, students earn credit through self-assessment and reflective essays and a final art project.

### **Independent Art Credit B**

Independent Art Credit B is a one-semester course asks students to assess their artistic ability, set goals for what they'd like to learn from their art lessons, and make a plan for achieving those goals. Designed for students who are actively participating in formal art activities, such as drawing lessons, this course offers a way for students to receive credit for this experience. In addition to logs, students earn credit through self-assessment and reflective essays and a final art project.

## ***MUSIC ELECTIVES***

### **Music Theory A**

Music provides a way for students to express themselves artistically, but music also enhances intelligence and creativity. Music Theory A is a semester-long, elective course designed to develop students' visual and aural understanding of the structure of music. In this course, students will study the language and symbols of music. Not only will students learn to read various musical elements, such as scales, chords, pitch notations, and time signatures, they will also learn to construct these elements themselves. The course also teaches students to understand basic forms in music compositions, including the skill of notation. As students learn these various aspects of music theory, they will undergo ear training to teach them to recognize these elements aurally as well.

### **Music Theory B**

This course will expand on skills learned in Music Theory A. Students will explore rhythm, chords, scales, key signatures, time signatures, pitch notations, ear training, and music formats in order to create an original piece of musical composition.

### **Independent Music Credit A**

Independent Music Credit A is a one-semester course asks students to assess their musical ability, set goals for what they'd like to learn from their music lessons, and make a plan for achieving those goals. Designed for students who are actively participating in musical performance activities, such as piano lessons, band, orchestra, and/or choir, this course offers a way for students to receive credit for this experience. In addition to logs, students earn credit through self-assessment and reflective essays and a final performance project.

### **Independent Music Credit B**

Independent Music Credit B is a one-semester course asks students to assess their musical ability, set goals for what they'd like to learn from their music lessons, and make a plan for achieving those goals. Designed for students who are actively participating in musical performance activities, such as piano lessons, band, orchestra, and/or choir, this course offers a way for students to receive credit for this experience. In addition to logs, students earn credit through self-assessment and reflective essays and a final performance project.

## *ALTERNATIVE CREDIT ELECTIVES*

### **Job Skills and Experience A**

Job Skills and Experience A is a one-semester course that provides the ultimate authentic learning experience as it encourages students to apply newly learned job skills to their actual jobs in real time. Designed for working students, this course offers a way for students to receive credit for working as long as they are able to demonstrate the application of certain job skills through regular quizzes and reflective essays. Students are encouraged to develop actual career goals as well as learn communication, public speaking, and problem-solving skills as they implement these skills in an authentic work environment.

### **Job Skills and Experience B**

Job Skills and Experience B is the second in a two semester series of courses. The course provides the ultimate authentic learning experience as it encourages students to apply newly learned job skills to their actual jobs in real time. Designed for working students, this course offers a way for students to receive credit for working as long as they are able to demonstrate the application of certain job skills through quizzes and reflective essays. Students learn leadership, project management, time management, and stress management skills as they implement these skills in an authentic work environment.

### **Service Learning Project I A**

The Service Learning Project I A course introduces students to the idea of serving their local communities. Students are asked to identify needs in their communities and then design projects around solutions for those needs. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project I B**

The Service Learning Project I B course requires students to either continue their service learning project from the Service Learning Project I A course or design a new project around a solution for a local community need. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project II A**

The Service Learning Project II A course introduces students to the idea of serving their local communities. Students are asked to identify needs in their communities and then design projects around solutions for those needs. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project II B**

The Service Learning Project II B course requires students to either continue their service learning project from the Service Learning Project II A course or design a new project around a solution for a local community need. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project III A**

The Service Learning Project III A course introduces students to the idea of serving their local communities. Students are asked to identify needs in their communities and then design projects around solutions for those needs. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project III B**

The Service Learning Project III B course requires students to either continue their service learning project from the Service Learning Project III A course or design a new project around a solution for a local community need. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project IV A**

The Service Learning Project IV A course introduces students to the idea of serving their local communities. Students are asked to identify needs in their communities and then design projects around solutions for those needs. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

### **Service Learning Project IV B**

The Service Learning Project IV B course requires students to either continue their service learning project from the Service Learning Project IV A course or design a new project around a solution for a local community need. Students will participate in community service, volunteer work, or another service learning experience of their choice in order to address the needs they identified. They are encouraged to explore possible career paths as well as assess their own strengths and weaknesses in a variety of areas. Finally, students will reflect on their experiences and discover how to apply them to other areas of their lives, including their academics.

To get credit for this course, students must participate in community service, volunteer work, or other service learning activity for a total of 40 hours.

## ***F. Evaluating Curriculum***

---

Florida Charter schools, are public schools and are subject to student performance and school grading as required by the Florida Accountability System. Therefore, per legislation, Pivot will be compared to similar schools located in the State of Florida as well as the Sponsor's schools annually.

Pivot Charter School will identify student populations within district schools, which are comparable to the charter school mission and targeted population. It is anticipated that students participating in district's high schools and/or virtual school programs and those attending Pivot will produce comparable outcomes. Performance indicators may include, but are not limited to, AP exam scores, PSAT/NMQST scores, SAT scores, National Merit designations, grade point averages, graduation rates, scholarship attainment, and college attendance.

Pivot Charter School staff will work with the county's evaluation division to develop both a calendar and acceptable procedures for administering standardized testing within the district's and state's stated guidelines. This alignment will include, but not be limited to, the FCAT, PARCC, EOCs, Florida Writes, PERT, Scantron, and any other required assessments (see section five of this application).

Educational Coordinators are responsible for monitoring and documenting progress of student proficiency in meeting the CCSS/NGSSS. The online curriculum automatically tracks student proficiency and progress on each assignment. Assessment reports of student progress are aligned to the CCSS/NGSSS and reflect which standards students are performing well on, as well as standards which

students need to focus more attention. Standards-based reports can be generated by student, by teacher, by course, or school wide.

Students are graded on weekly assignments, papers, end-of-chapter tests, midterms and final exams for most courses. Reporting and posting of graded assignments and tests is immediate and can be accessed online by students, parents, teachers, counselors and administrators. Students and parents receive written progress and/or grade reports at least twice a semester.

The compilation of all of this data will allow the school staff to develop accurate understandings of both how individual students are performing and how the school is performing as a whole. The Principal at the school site will lead the staff through disaggregation of the data to determine the effectiveness of the curriculum and determine what areas the school needs to focus more intensely through the small group instruction provided by the ECs.

## Section 5: Student Performance, Assessment and Evaluation

### A. Educational Goals

Pivot Charter School is committed to providing the highest quality educational program possible to our students. As part of our focus on continuous improvement and to maintain our SACS Accreditation, Pivot will focus on the ten initial goals found below for our new school. We anticipate demonstrating 3-5% growth over each year beginning in year two.

- GOAL #1:** 100% of enrolled students will engage in their assigned courses weekly as measured by the online curriculum and Educational Coordinators reporting data.
- GOAL #2:** On a daily basis, 80% of students enrolled in Pivot Charter School will meet grade level content standards as demonstrated by meeting or exceeding the expected percent complete in courses assigned as measured by the online curriculum and Educational Coordinators reporting data.
- GOAL #3:** On any given school day, 80% of students will be meeting grade level content standards as demonstrated by receiving an average of a “C” or better in their assigned course as measured by the online curriculum’s reporting data.

| Evaluation Means  | Evaluation & Follow Up Process   |
|---|--|
| Online Curriculum data and reports.   | On a weekly basis if students are not meeting these targets, the Principal will work with staff to implement intervention programs and develop policies that will ensure student success and completion rates. |
| Action Steps  | Responsible Parties  |
| <ol style="list-style-type: none"> <li>All online curricula will be formally aligned to the CCSS/NGSSS.</li> <li>Students will engage in weekly course assessments and attend tutoring groups.</li> <li>Students who are determined to need additional assistance will participate in remediation courses and additional tutoring hours.</li> <li>ECs will run online data reports daily and work with students to ensure success. They will meet with the students once a week to prepare goal sheets and look at progress.</li> </ol> | Principal, onsite ECs, online ECs, EA’s  |

**GOAL #4: The percentage of Pivot Charter School students who meet or exceed grade level expectations will be greater than the percentage of students at the district who do the same on the PARCC assessments in English Language Arts and Mathematics.**

| Evaluation Means   | Evaluation & Follow Up Process   |
|--|--|
| <p>PARCC Assessment for final determination.</p> <p>Ongoing progress monitoring through Reading Plus, AAI standards-based assessment results and the Scantron Performance Series.</p>  | <p>After three years of operation, if the school is achieving 59% or less, the Board of Directors and administration will evaluate methods to improve the program’s effectiveness. If, after careful analysis, it is felt that the program is optimally effective, then they will reevaluate attainability of the original goal.</p> |
| Action Steps   | Responsible Parties  |
| <ol style="list-style-type: none"> <li>All online curricula will be formally aligned to the CCSS/NGSSS.</li> <li>Students will engage in weekly course assessments.</li> <li>Students who are at an “approaches the standard” (60 - 69%) level in two or more courses will meet with their EC, parent and possibly administration, to create a goal sheet for remediation.</li> <li>The Individual Learning Plan (ILP) will be evaluated as needed and modifications and interventions altered as necessary.</li> <li>Students with a PEP will participate in remediation courses and tutoring.</li> <li>Students will participate in PARCC testing annually.</li> </ol> | <p>Principal, onsite ECs, online teachers.</p>   |

**GOAL #5: 20% of eligible Pivot Charter School juniors and seniors students will be participating in at least one online college course, honors course, or AP course each semester.**

| Evaluation Means  | Evaluation & Follow Up Process   |
|---|--|
| <p>Enrollment information indicating the number of student enrolled in honors, AP and college classes.</p>  | <p>Pivot Charter School will work in collaboration with colleges and support students with courses in which it is realistic for high school students to succeed. If students are not availing themselves in their honors, AP or online college classes, Pivot Charter School and colleges will confer to evaluate the causes and adjust program offerings accordingly.</p> |
| Action Steps  | Responsible Parties  |
| <ol style="list-style-type: none"> <li>The Principal will work with Pivot Charter School ECs, data processor, and online teachers to analyze and promote appropriate courses for Pivot Charter School students.</li> <li>Students attaining an A/B average overall in online courses and also meeting or exceeding the standards for college entrance will be encouraged to enroll in college classes.</li> <li>Students enrolled in honors, AP, and college courses will receive ongoing monitoring of progress by Pivot Charter School counselors and ECs.</li> <li>Academic support will be provided to students attaining a C or lower in advanced classes</li> </ol> | <p>Principal, ECs, online teachers, college liaisons.</p>  |

**GOAL #6: Pivot Charter School will have created a high tech multimedia learning studio that will meet**

| <b>the needs of students and ECs engaged in multiple learning environments from online courses on laptops and thin client computers to small group and individual counseling and tutoring.</b>   |   |
|--|---|
| Evaluation Means   | Evaluation & Follow Up Process  |
| Pivot Charter School is a replicating model and each school is design to the same standard. Our technology is updated as technology advances.  | While appropriate facilities will be utilized when school opens, the Board of Directors and staff seek to create a unique learning environment suited to the school's programs. Pivot will look to create a space that models our schools in Fort Myers, Tampa, and Broward.  |
| Action Steps   | Responsible Parties   |
| <ol style="list-style-type: none"> <li>1. Pivot Charter School Board of Directors will secure facilities capable of renovation. Pivots Director and Board will look carefully at building that fit the criteria for a successful facility.</li> <li>2. Pivot Charter School will collaborate with constituents on construction and implementation of design.</li> </ol>  | Pivot Charter School Board of Directors, Executive Director and Deputy Director.  |
| <b>GOAL #7: 100% of Pivot Charter School students will complete a career interest inventory and establish at least three personal goals toward post-secondary plans in their Post-Secondary Educational Plan. At least two annual action steps will be created per goal that supports the student in meeting post-secondary goals. Goals and action steps will be revised annually in the Post-Secondary Education Plan.</b>   |   |
| Evaluation Means   | Evaluation & Follow Up Process  |
| Each Individualized Education Plan will contain career and/or postsecondary goals based on career inventory results. Principal and Educational Coordinators will review each portfolio annually.   | Educational Coordinators and the Principal will review goals annually with students and their parents at student conferences. Plans will be made to ensure student is on track to meet goals. If student interests change, the goals should be updated. If a system is not established for the Post-Secondary Education Plan review, Pivot Charter School should develop effective method of refining student career goals. |
| Action Steps   | Responsible Parties   |
| <ol style="list-style-type: none"> <li>1. Educational Coordinators will choose and implement online career inventory.</li> <li>2. Pivot Charter School will establish inventory assessment schedules for each student and administer inventory.</li> <li>3. Students will meet with Educational Coordinators to review and discuss results.</li> <li>4. Students will establish post-secondary goals.</li> <li>5. Students will set at least two actions that need to be taken in the current school year to enable student to accomplish post-secondary goals.</li> <li>6. Goals will be updated in portfolio at least annually or as students' ideas change due to ongoing career counseling.</li> </ol> | Principal, EC's, Parents, and Students  |

**GOAL #8: 80% of Pivot Charter School students will meet or exceed the annual Service Learning requirement.**

| Evaluation Means  | Evaluation & Follow Up Process   |
|---|--|
| Tracking of service learning projects, participants and hours.  | If Pivot Charter School is not providing ample opportunities for participation in Service Learning; the program should be revised to reflect higher expectations. If students are not participating in Service Learning, consequences and incentives should be created to promote participation. |
| Action Steps  | Responsible Parties  |
| <ol style="list-style-type: none"> <li>1. The Principal, Data Processor, and ECs will reach out to community-based organizations to develop Service Learning projects throughout the community.</li> <li>2. Staff will develop, coordinate and promote at least three Service Learning projects a semester.</li> <li>3. Pivot Charter School will establish criteria and goals of Service Learning at Pivot Charter School.</li> <li>4. Students will attend a two-hour Service Learning Seminar to discuss program goals, protocol and decorum.</li> <li>5. Students will sign up for scheduled Service Learning projects or develop and have approved their own project that meets the goals of the program.</li> </ol> | ECs, students, community-based organizations.  |

**GOAL #9: At least 85% of parents, ECs and students will report an overall “meets” or “exceeds expectations” satisfaction level of Pivot Charter School programs on the annual school wide surveys.**

| Evaluation Means  | Evaluation & Follow Up Process   |
|---|--|
| Annual school wide satisfaction survey to be conducted and scored by Pivot staff.   | If Pivot Charter School is not receiving a “meets” or “exceeds expectations” as an overall approval rating of the school by parents, ECs and students annually, the Board of Directors will engage in a strategic planning workshop to analyze causes and establish actions for improvement. This goal should not be changed or revised. |
| Action Steps  | Responsible Parties  |
| <ul style="list-style-type: none"> <li>● Pivot Charter School to develop separate surveys for ECs, students, and parents that analyze the schools effectiveness.</li> <li>● Pivot Charter School will conduct surveys by May 15 of each school year</li> <li>● Survey results to be aggregated and presented to the Board of Directors</li> </ul> | Board of Directors, Executive Director, Deputy Director, Principal, ECs, online teachers.  |

**GOAL #10: 90% of Pivot Charter School students who enter as freshmen will receive a high school diploma within four years.**

| Evaluation Means   | Evaluation & Follow Up Process   |
|--|--|
| Graduation rates   | Pivot Charter School will focus on ensuring all students who enter high school receive a diploma. The Principal and Educational Coordinators will monitor student progress to ensure all students are on track. The Board of Directors will engage in a strategic planning workshop to analyze causes and establish actions for improvement. |
| Action Steps   | Responsible Parties  |
| <ol style="list-style-type: none"> <li>1. Student transcripts will be evaluated and the students' Individualized Education Plan will specifically address graduation for each student.</li> <li>2. Students will be assessed monthly in all core content courses to ensure acquisition of the CCSS/NGSSS.</li> <li>3. Students who are not acquiring standards will receive remediation and intervention.</li> <li>4. The Principal and ECs will monitor student course completion rates as well as timeline for graduation.</li> <li>5. Students' plans for graduation will be altered based on student course completion rates.</li> </ol> | Principal, ECs, online teachers.   |

## *B. Student Placement/Promotion*

### *Student Placement*

Students who enroll or transfer into Pivot Charter School shall be evaluated on a case by case basis to determine the appropriate grade level to be enrolled into. In the vast majority of cases, students will be accepted into the same grade level they would have been in at their previous school. However, consistent with the sponsor's student progression policies, the school's Principal reserves the right to determine the placement of all new students. In order to make this decision, the Principal will analyze the student's transcripts to determine which credits the student needs and any available assessment data in order to place the student appropriately.

### *Middle School Promotion and Retention*

As described below, course completion in middle school is essential in order to be promoted to high school. As such, middle school students are required to pass each of their core academic courses. If they do not pass a course during a year, it can be remediated in the future year. However, if too many courses are needed to be remediated, it is not possible to schedule the student effectively. As such, if the student fails any two courses during a school year, the student will be retained in that grade the following year in order to repeat the opportunity to demonstrate proficiency with the standards. Any student who fails any course or scores a level 1 or 2 on the FCAT (or the equivalent on the PARCC) assessment will be required to have a review of their Individualized Education Plan to ensure the

components typically contained within a Progress Monitoring Plan [PMP] are included in the plan. The plan will identify specific areas the student is struggling in and provide intervention strategies which will be attempted. These areas of deficits will be addressed in either an intensive reading or mathematics course, or integrated into the content area course as is required by state law.

Consistent with Florida Statutes, promotion to high school requires that the student successfully complete the following academic courses:

- 3 English Language Arts courses
- 3 Mathematics courses
  - We understand schools are required to offer at least one high school level course, however, we will offer more than this based on student need through the personalized approach used at Pivot. For those students participating in a course that requires an EOC, it will be implemented as required by state law (i.e. Algebra 1 passage required, Geometry counting as 30% of final grade, etc.).
- 3 Social Studies courses
  - 1 semester must focus on state/federal government & civics (which must include an EOC, of which will account for 30% of the student’s final grade).
- 3 Science courses
  - The school will offer high school level science courses (i.e. Biology), in which case the EOC will account for 30% of the final grade.
- 1 career and education planning course.

### *High School Promotion*

Promotion requirements for high school students will be based upon the credits the student has earned by the end of the previous year. The school will ensure students are aware of the requirement for promotion as are described below:

| <b>End of Grade</b> | <b>Promotion Requirements</b>  |
|---------------------|--|
| <b>9th</b>          | 4 Credits (One must be English, and another must be Math)  |
| <b>10th</b>         | 9 Credits (Option 1: Must consist of at least two English credits, one math credit and one science credit... Option 2: Must consist of at least one English credit, two math credits, and one science credit)            |
| <b>11th</b>         | 16 Credits (Option 1: Must consist of at least three English credits, two math credits, and two science credits... Option 2: Must consist of at least two English credits, three math credits, and two science credits). |
| <b>12th</b>         | 24 Credits (Must meet all graduation requirements)   |

## C. High Schools: Graduation Requirements

Pivot Charter School will comply with all state requirements regarding graduation requirements. According to the newly revised Florida Statute 1003.4282, the graduation requirements as we understand them are:

- **Successful completion of 24 credits**
  - **4 English Language Arts credits**
    - 4 credits, must be ELA I, II, III, and IV.
    - Must pass 10th grade FCAT 2.0 Reading or equivalent
  - **4 Mathematics credits**
    - Algebra I (EOC 30% of grade and must pass test)
    - Geometry (EOC 30% of grade)
    - Algebra II not required, however, 30% of the grade must be EOC when it is released
    - (Industry certification courses that lead to college credit may substitute credits)
  - **3 Science credits**
    - 2 of the credits must have a laboratory component
    - Biology I (EOC 30% of grade)
    - (Industry certification courses that lead to college credit may substitute credits)
  - **3 Social Studies credits**
    - United States History (EOC 30% of grade)
    - World History
    - ½ credit – Economics (must include financial literacy)
    - ½ credit – United States Government
  - **1 Fine or Performing Arts credit**
  - **1 Physical Education credit**
    - Must include integration of health (subject to 1003.328(2)(a)6)
  - **8 Elective Credits**
    - Must include opportunities for students to earn college credit, including industry-certified career education programs or series of career-themed courses resulting in industry certification.
  - **At least one credit must be completed online (which can be done in middle school), and cannot be Drivers Education**

In addition to the above requirements for the standard diploma, students will have the option of earning a scholar designation or a merit designation on their diploma; the requirements for each are as follows:

- **Scholar Designation Additional Requirements**
  - **English Language Arts**
    - Pass 11th grade ELA Common Core Assessment
  - **Mathematics**
    - Algebra II – 1 credit (Must pass the Algebra II common core assessment)
    - Statistics – 1 credit
  - **Science**
    - Must pass the Biology I EOC

- *Chemistry or Physics – 1 credit (or equally rigorous course)*
  - **Social Studies**
    - *Pass the US History EOC*
  - **Foreign Language**
    - *2 credits in the same foreign language*
  - **Electives**
    - *1 credit from an advanced placement, IB, AICE or dual enrollment course*
- **Merit Designation Additional Requirements**
  - **Complete one or more industry certification**

In addition to the above requirements, this statute also identifies other requirements for specific students, which Pivot Charter School also expressly acknowledges and agrees to abide by, such as:

- Students who score at a level 1 or 2 on state assessments in reading must either have intensive reading course or content area course that includes remediation of skills the following year
- Students who score at a level 1 or 2 on the EOC for Algebra I, must be in remedial course or content area course that includes remediation of skills the following year
- The school will develop a grade forgiveness policy to allow students to retake courses in order to replace grades of D or F with a higher grade (Students who take a high school course as part of their middle grades years can also replace a C grade).
- In order to be eligible for graduation, students must have cumulative GPA of 2.0 on a 4.0 scale

The school will utilize the district’s computer systems for recording course completion and final grades. Pivot Charter School staff will transfer the data from the systems used by Pivot into the district system on a timely basis, and the official transcripts and GPAs will be retrieved from the district’s system in order to demonstrated eligibility for promotion and graduation.

The school will also abide by Florida statute and administrative rule with regards to the issuance of a Special Diploma for any student who possesses a qualifying disability and for whom an IEP team has determined that this is the most appropriate course for the individual student.

## *D. Baseline Data*

One of the many benefits of the blended curriculum model is the ability to closely track student progress in courses and towards meeting the CCSS/NGSSS. This ongoing assessment data provides us with numerous data points allowing us to track student progress over the course of the year. However, we also feel it is important to obtain ongoing progress monitoring data using more formalized assessments throughout the year. As such, the school will utilize the Scantron’s Performance Series Web-Based Assessment. This assessment provides an adaptive testing environment and will be administered at a minimum of three times during the school year. The initial administration of this assessment will provide valuable baseline data regarding the students’ progress at the start of the year, which can be analyzed to guide each student’s individualized education plan, as well as the provide evidence of student growth throughout the year. In addition, Performance Series allows EC’s to provide students with individualized lessons to support their reading and math needs.

In addition to the assessments we offer, we also believe it is important to look at assessment data from prior years to determine the baseline abilities of our students and ensure appropriate course selection and programming for students. A thorough review of records, especially for incoming students, will be conducted to better understand the student's progress, and to determine if the student has an IEP, LEP, 504 Plan, EP or any other important information that could impact the educational program for that student.

## *E. Student Performance Assessment*

The school will follow all state and federal requirements with regards to student assessment. We wish to acknowledge that we understand the state is currently transitioning to the PARCC system for reading and mathematics assessment, and that there is movement towards offering EOCs for more courses. We understand we are required to meet the requirements of the state assessment program, and that it is possible in some places in this application we may have generically used the term "FCAT" but wish to explain that this was only for ease of writing, and we understand that this will mean PARCC for some subjects, it may mean Florida Alternative Assessments for some students, as well as EOCs for state identified courses.

The statutes and administrative rules have changed frequently over the last several years, and we are aware that continued changes are possible moving forward. Therefore, the following list is subject to change and the school agrees to follow whatever the most current requirements area. This would also include participation in federal assessments such as the National Assessment of Educational Progress [NAEP] should the school be selected to participate.

As a progress monitoring tool the school uses the Scantron Performance Series Assessment. The Scantron assessment is standards based assessment that provides teachers with real time data on their student's attainment of the CCSS. Assessments are available in Reading, Language Arts, Math and Life Science and Inquiry. The reports provide teachers with individual and class performance results which can be used to identify specific students who may be struggle as well as specifics standards individual students may be struggling with. The online web-based assessment is easy to use can be used as often as the teachers feel appropriate. We intend to use the assessment at least three times per year, and more often with struggling students.

The school will administer the PERT assessment to all students in 11th grade who scored a Level 1 or 2 on FCAT Reading or score a Level 2, 3 or 4 on FCAT Mathematics (or the subsequent replacements), and have not otherwise demonstrated college readiness (such as through the SAT or ACT). This assessment is a computer based test to determine whether or not a student is ready for college credit courses in math and English. The PERT has been aligned with the Postsecondary Readiness Competencies that Florida's faculty have identified as necessary for success in entry-level college credit coursework. Students who do not meet the state established cut scores must complete postsecondary preparatory instruction in their senior year. The Higher Level Developmental Education courses in reading, writing and mathematics are the basis for the postsecondary preparatory instruction in high schools – Reading for College Success (course # 1008350), Writing for College Success (course # 1009370) and Mathematics for College Success (course # 1200410). In addition to the .5 elective credit courses, Mathematics for College Readiness (course # 1200700) and English 4: Florida College Prep (course # 1001405) are aligned to the Postsecondary Readiness Competencies and count as a full credit toward graduation requirements in the subject area. The purpose of aligning the high school and college "remediation" is to

reduce the number of high school graduates needing additional preparatory instruction before enrolling in college-level courses. Students will only be allowed to take the PERT twice during their high school career. Students will be encouraged to take the ACT and / or the SAT prior to administration of the PERT in order to demonstrate their college readiness in that way.

The following table represents our anticipated formal assessment schedules.

| <b>Approximate Timeline</b>                  | <b>Assessment</b>                      | <b>Purpose</b>   |
|--|--|--|
| <b>August/September</b>                      | Scantron Performance Series Assessment | Provide baseline data on student and class performances  |
| <b>October/November</b>                      | Scantron Performance Series Assessment | To verify baseline data, measure growth and establish tutoring/small group needs                             |
| <b>February</b>                              | FCAT 2.0 Writing                       | To assess the writing skills of students as part of the FSAP   |
| <b>February</b>                              | PERT                                   | To determine post-secondary readiness  |
| <b>Spring (as determined by state)</b>       | Florida Alternative Assessment         | To assess the progress of students with special needs unable to participate in the FCAT 2.0 / PARCC          |
| <b>February/March</b>                        | Scantron Achievement Series            | To verify student growth and re-establish tutoring/small group needs   |
| <b>March/April</b>                           | CELLA                                  | To assess the progress and language abilities of ELL students (See section seven of this application)        |
| <b>April</b>                                 | FCAT 2.0 / PARCC / State Assessments   | To determine the students' proficiency with state standards  |
| <b>April - June (as determined by state)</b> | End of Course Exams                    | To demonstrate student mastery of the standards for each course.   |
| <b>May/June</b>                              | Scantron Achievement Series            | Provide end of year data to compare to the initial baseline data to demonstrate student growth over the year |

Just as important as standardized assessments, if not more so, to our overall understanding of student abilities and their progress towards meeting the CCSS/NGSSS will be the data collected through AAI's ROADS platform indicating student progress in courses and towards specific standards. Given that the system is electronic, student progress data is constantly monitored and recorded providing a wealth of data and information for ECs to review and evaluate to ensure student progress. Given the close-knit collegial atmosphere amongst Pivot Staff, frequent conversation occur amongst ECs about how to best support individual students who may be struggling in specific areas, and support is provided based on student need.

Students will receive quarterly report cards documenting their progress towards meeting the standards of each course. Pivot Charter School will use a traditional grading scale of A-F on a 4.0 GPA scale.

| Letter Grade | Calculated Score | Description            | GPA |
|--------------|------------------|------------------------|-----|
| A            | 90-100           | Outstanding progress   | 4   |
| B            | 80-89            | Above average progress | 3   |
| C            | 70-79            | Average progress       | 2   |
| D            | 60-69            | Below average progress | 1   |
| F            | 0-59             | Failure                | 0   |
| I            | 0                | Incomplete             | 0   |

## *F. Evaluating Assessment Data*

The collection and organization of the student performance data described within this section is only the first step to effectively using the assessments to guide instruction towards ensuring student mastery of the CCSS/NGSSS.

Given the small nature of the on-site Pivot staff, all of the school's ECs come together along with the Principal to form the instructional team at the school. As a team, the school will regularly review data along with state coordinators to identify patterns and address any potential concerns or trends indicated by the student progress data. They will use the data to identify professional development needs for the school and to identify specific groups of students who may be struggling, and what interventions to put into place to assist those students. In some cases, a specific class, online teacher or EC may be identified, which will allow the Principal to focus on providing additional assistance to that staff member, or to work with AAI regarding the concerns, to assist the students to gain mastery.

Furthermore, the establishment of annual goals will ensure school-wide student assessment and that performance data can be shared with parents, students and other stakeholders. The school's leadership team will work with stakeholders and the instructional team to develop appropriate annual goals based on the baseline data collected at the start of each year. Attainment of specific learning objectives, with supporting documentation, will be detailed in the School's Annual Report, and copies will be made available to the charter school constituents on an annual basis.

## *G. Sharing Assessment Data*

Sharing assessment data with students and parents is another area that is greatly benefited by the blended model utilized by Pivot Charter School. Both students and parents have 24/7 access to the system to review grades and progress on individual courses. This not only benefits the curious parents, but research clearly shows that providing students with timely and detailed feedback on their progress can result in significant academic gains. If an assessment has been automatically graded by the computer, the results are posted to the My Grades section of the ROADS system automatically. The student can then view the assessment in the My Grades section. If the assessment must be manually graded, they are posted to My Grades as soon as the teacher records the grade. Teachers are able to track a student's progress through the Learning Management System, as are students and parents.

Several examples of the screens available to parents, students and the EC from the ROADS system were included in section three of this application and highlight some of the data that is available to demonstrate student progress.

In addition to the online access to grades and progress, a major component of the ECs responsibilities is to regularly reach out to the parents of his/her students to ensure the parents are onboard with the progress students are making. Progress reports are created at the mid-grading period, as are report cards at the end of the grading period to send home so that parents who have not logged in are also able to see the grades students are earning in the system.

## *Section 6: Exceptional Students*

### *A. ESE Service Model*

- ✓ ● **The school will serve students with disabilities whose needs can be met in a regular classroom environment (at least 80% of instruction occurring in a class with non-disabled peers) with the provision of reasonable supplementary supports and services and/or modifications and accommodations.**
- The school will serve students with disabilities whose needs can be met in a regular classroom and resource room combination (between 40%-80% of instruction occurring in a class with non-disabled peers) with the provision of reasonable supplementary supports and services and/or modifications and accommodations.
- The school will serve students with disabilities whose needs can be met in a separate classroom (less than 40% of instruction occurring in a class with non-disabled peers).

### *B. ESE Equal Opportunity*

The School will not discriminate on the basis of race, religion, ethnic origin, or exceptionality in any circumstance. Any student wishing to enroll will be required to follow the application procedures and timelines as described in section 13 of this application. A lottery will be conducted to select which students will be accepted to the School unless less applications are received than seats available, in which case all eligible students would be accepted. The lottery process is described in section 13. The process will be conducted in such a way as to ensure that no possibility of discrimination of students who may have disabilities can occur, nor can the discrimination of any other protected class. Through this system of admissions, all students wishing to enroll have a fair and equal chance of doing so. If the number of applications falls short of the established capacity, supplemental registration periods may be held for the purpose of reaching student capacity. In accordance with Federal and State anti-discrimination laws and in accordance with the Florida educational Equity Act, Section 1000.05(2)(a) Pivot Charter School will not discriminate on the basis of ethnicity, national origin, gender, disability, or marital status against a student in its school admission process.

### *C. Ensuring Appropriate Placements*

Working with the sponsor effectively will be very important to the success of Pivot Charter School, and this is especially true in the area of Exceptional Student Education. Given that the district serves as the Local Education Agency in regards to ESE matters, we understand the importance of following the districts policies and working closely with the district staff who are assigned to assist our school with compliance issues related to ESE services. It is our intention that as soon as our contract is approved, that we will work closely with district staff to ensure our policies and procedures align with the districts to ensure the procedural safeguards and requirements for ESE students are strictly adhered to. What follows throughout this section of the application is our understanding of the school district's process, but we wish to expressly acknowledge that if something should be misstated here, or if the rules and regulations regarding ESE services change, we will work closely with the district to ensure compliance on these issues.

It is the intention of Pivot Charter School to accept all students who apply and are properly chosen through the lottery system in place if needed. The lottery system as administered through the sponsor or a third party will be setup in such a way that will not allow for the prioritization or de-prioritization of individual students, and will be independent of the student's status as having special needs. We believe that the unique blended educational program being offered at Pivot Charter School will be particularly beneficial for many students for whom a traditional educational setting was not successful. The blended model allows us to differentiate the instruction significantly more than is possible in a traditional classroom allowing students to work at their own appropriate pace. In addition, the individual and small group support from the ECs and EAs will help students to achieve more than might be possible in other settings. That said, we realize there are those very rare and unique circumstances where the significant needs of an individual student may create an undue financial hardship on the school. As is well documented within the IDEA, school districts are allowed to create centers for these students, which enables district's to utilize the economy of scale. Given that our school will be an independently run single school in the county, this would not be possible for us. If a situation were to arise that a student applied to the School who may create an undue financial hardship, we will request that our contract include the option for us to ask the district to convene an IEP meeting and invite a representative of the School to attend as a member of the team. The IEP team can then discuss the individualized needs of that particular student, the strengths and limitations that Pivot Charter School offers as a school, and the team shall then determine the appropriate special education and related services, accommodations, and placement for the student. We acknowledge that the decision of the IEP team will be binding upon both the School and Sponsor, except to the extent it can be appealed using the due process procedures under federal and state law. It is important to note, however, that in addition to the decision of the IEP team, the student must be duly selected by the independent student lottery system as described elsewhere in this application. We believe that by working in collaboration with the district we will be able to ensure the appropriate placement of students with disabilities within the full continuum of services that are offered by the LEA.

Pivot Charter School looks forward to working with the district through the services as described in Florida Statute 1002.33(20) through the provision of a staffing specialist and a school psychologist to support IEP meetings as necessary, and access for school staff to training opportunities sponsored by the district. We anticipate that specific administrative services will be negotiated through the charter contract process. The School plans to work closely with the school district's staff members assigned to our school to ensure compliance with applicable state and federal guidelines regarding ESE services. We acknowledge that the sponsor will serve as the Local Education Agency (LEA), and that we will do everything possible to support the district in that role.

Once a student is enrolled at Pivot Charter School and has been identified as an ESE student and has an Individualized Education Plan (IEP), the specific details of those plans will be followed completely, including the services to be offered, accommodations and modifications which may be outlined therein. Students will be educated in the least restrictive environment possible, in accordance with their individual plan.

If a student is enrolled in Pivot Charter School and the need arises for additional interventions or the possible evaluation for special education services, the student will be offered numerous interventions to attempt to support the student through the MTSS as described in section 4. If even the most intensive and individualized supports and interventions (tier 3) are ineffective, the School will work with the district to recommend the student for evaluation for special education services. Throughout the MTSS

process and as is typical within the blended environment, extensive documentation will be kept on the student's progress, the interventions attempted, and the results of those interventions. This data will be extremely helpful through the ESE evaluation process.

For impairment disabilities such as vision, speech, deaf and hard of hearing, occupational therapy, etc., the School intends to contract with outside agencies to provide certified individuals to administer direct services, assessments and progress monitoring for these students. Progress monitoring of each student's IEP will be case managed by a certified staff member employed by Pivot Charter Schools who holds the appropriate ESE certifications through collaboration with the contracted service provider.

## *D. Adapting Facilities and Services for ESE Students*

The regular school facility will be accessible to the needs of exceptional students to the maximum extent appropriate. Physical access to the educational setting will include a barrier-free environment, as required by law. Our School building will be in compliance with the accessibility standards included in the Americans with Disabilities Act (ADA) that specify requirements for facilities, such as exterior routes, entries into buildings and rooms, alarms, drinking fountains, and restrooms. Students will be able to use all parts of the building, including classrooms, restrooms, and media center and access rooms or spaces on the school grounds.

Supplementary aids and services will be determined by each student's IEP team and provided to each eligible student to enable the child:

- to advance appropriately toward attaining the annual goals stated on the IEP;
- to be involved in and make progress in the general education curriculum;
- to participate in extracurricular and other nonacademic activities; and
- to be educated and participate with other children with disabilities and nondisabled children.

Supplementary aids and services may include, but are not limited to:

- environmental adaptations such as preferential seating, specialized lighting, or acoustical treatments to minimize noise;
- specialized instructional strategies such as graphic organizers, alternate presentation of content or response, or planning guides;
- peer supports such as pairing a student with a disability with a same age classmate who does not have a disability in order to provide reciprocal benefits to students through peer modeling; relationship building; academic support; and expanded opportunities to socialize, communicate, and demonstrate learning competencies;
- curricular adaptations or modifications such as clarification of key concepts or balancing teacher assigned and student-selected tasks and collaborative teaching with both the general education and ESE teachers.

The AAI online platform also includes numerous adaptations which will be especially beneficial for ESE students, such as self-pacing, text to audio, modification of the total number of assignments, and use of an built in dictionary.

## *E. Evaluating ESE Effectiveness*

Pivot Charter School's effectiveness in serving ESE students will be evaluated based on each student's success in meeting the goals on his/her IEP, grade promotion, credit accumulation, graduation, and successful postsecondary transition. It is important to note that ESE and gifted students will be assessed on an ongoing basis along with their nondisabled and non-gifted peers. Each AAI online course is specifically designed to include numerous regular assessments to determine student mastery. If a student does not exhibit mastery, an EC with ESE certification will work closely with the student to provide accommodations to the curriculum and/or pace of delivery within the general learning environment, or may provide additional support through specialized pull-out programs, if identified on the student's IEP (similar to the individualized instruction available to all students, but customized to meet the requirements of the student's IEP). All online teachers will be provided with the appropriate information concerning modifications and accommodations included in the student's IEP. Pivot Charter School will evaluate its effectiveness in serving exceptional education students on a regular basis through the following reviews:

- Quarterly updates and record keeping of each student's IEP goal progress and attainment on the appropriate document insert within the IEP
- Annual IEP meetings with parents/guardians and/or adult students
- Analysis of the number of ESE students who meet graduation requirements for standard diploma and graduate each year
- Annual compliance review meetings conducted by Pivot Charter School
- Annual feedback from students, parents, and staff on the School Climate Survey
- Annual feedback on the Florida Department of Education (FLDOE) survey for parents or guardians of students with disabilities, when applicable

Pivot Charter School will also evaluate its effectiveness in serving exceptional education students by analyzing student achievement data on the following assessments in an effort to address deficiencies and apply instructional strategies to raise student performance:

- End-of-course exams
- Module course grades in the core academic areas.
- PARCC/FCAT and other standardized test data (as described in section 5)
- Baseline and growth performance in reading, writing and mathematics
- Teacher observation and evaluation of individual student progress

These regular status reports and evaluations will indicate whether the measurable goals and objectives for ESE students are being met at the same rate as those for general education students. Where students with disabilities are included in general education classes, it may be necessary to delineate an explanation of the grading criteria and an explanation about the necessary curriculum modification on the IEP.

To support continuous improvement for the School and all students, Pivot Charter School will disaggregate the various data points discussed above for review on a regular basis. This information will be documented and used as a planning tool for improving teaching and learning. The school's instructional team will regularly analyze whole group data, address overall trends, and review the instructional focus. The administration and state coordinators will coordinate to disaggregate data,

determine the direction that needs to be taken with instruction using their curriculum maps as guides, and inform parents as to academic progress. The results of data reviews will also allow teachers to see where instruction has been effective and where gaps exist, leading to adjustments in instructional delivery.

## *F. Below Grade Level Engagement*

The entire academic program at Pivot Charter School is specifically built upon the ideals of differentiated instruction to meet students where they are and bring them up-to and beyond the CCSS/NGSSS. Through the use of our small group and individualized instruction provided by the on-site ECs, the school is able to meet a wide array of student needs and help the students who are below grade level as well as those who are above grade level be appropriately challenged in order to meet the standards. Our academic program has demonstrated that students who enter the school below grade level will receive sufficient support to bring them back to grade level expectations, or at very least make more than a year's worth of growth during each school year.

## *G. ESE Projections*

In order to determine our projections in regard to the student population, we looked at the Florida Department of Education data regarding the ESE prevalence in the county. The chart below summarizes the data.

|                                 |      |                              |              |
|---------------------------------|------|------------------------------|--------------|
| Autism Spectrum Disorder        | 0.9% | Orthopedically Impaired      | 0.1%         |
| Developmentally Delayed         | 0.7% | Speech Impaired              | 0.5%         |
| Deaf or Hard of Hearing         | 0.2% | Specific Learning Disability | 5.4%         |
| Dual Sensory Impaired           | 0.0% | Traumatic Brain Injury       | 0.0%         |
| Emotional/Behavioral Disability | 0.4% | Visually Impaired            | 0.0%         |
| Established Conditions          | 0.0% |                              |              |
| Hospital Homebound              | 0.1% | <b>Total Disabled</b>        | <b>11.4%</b> |
| Intellectual Disabilities       | 1.0% |                              |              |
| Language Impaired               | 1.0% | Gifted                       | 6.1%         |
| Other Health Impaired           | 1.0% |                              |              |

Using the available data, we are able to make projections regarding the demographics of the students who will be applying at Pivot Charter School. In addition to the available data, we have applied a few general assumptions in developing our projections. First, we assume that our ESE percentages may be slightly higher than that of the general public given the online nature of our program and the appeal of the differentiated and individualized instructional model. However, we also wish to be conservative in our budgeting so as to not expect additional revenue from additional ESE students during our initial planning. We would prefer to underestimate the numbers and then add to the program later, rather than needing to eliminate parts of the program after finding our enrollment is less than expected. Therefore we are assuming that 12% of our students will qualify for ESE services, and that 4% of our

students will be considered Gifted. Given these assumptions, we are assuming the following numbers of students will qualify each year:

|                             | Year 1    | Year 2    | Year 3    | Year 4    | Year 5    |
|-----------------------------|-----------|-----------|-----------|-----------|-----------|
| 6th Grade                   | 2         | 2         | 4         | 4         | 4         |
| 7th Grade                   | 2         | 2         | 2         | 4         | 4         |
| 8th Grade                   | 2         | 2         | 2         | 2         | 4         |
| 9th Grade                   | 5         | 7         | 7         | 7         | 7         |
| 10th Grade                  | 5         | 5         | 7         | 7         | 7         |
| 11th Grade                  | 5         | 5         | 5         | 7         | 7         |
| 12th Grade                  | 2         | 5         | 5         | 5         | 7         |
| <b>Total ESE Enrollment</b> | <b>23</b> | <b>28</b> | <b>32</b> | <b>36</b> | <b>40</b> |

## H. ESE Staffing Plan

The staffing of our ESE students is another unique element of the Pivot design. Given the small number of students our on-site ECs are advising, at our other schools we have found that we are able to meet the needs of our ESE students within the our educational model without needing to hire numerous additional staff people. We encourage all of our Educational Coordinators to obtain an ESE teaching certificate, and give preference to those teachers who apply to our school who already have the certification. We find that ESE teachers are already familiar with the educational support role our ECs take on in the classroom and are able to conceptually understand the need for the small group and individualized support the ECs provide students at Pivot Charter School. We incentivize those ECs who receive their ESE endorsement by providing stipends to cover the additional time for documentation and meetings that they must put into service the ESE students. We provide each EC a stipend of an extra \$5,000 per year for working with ESE students. In addition to the on-site ECs, Pivot Charter Schools also employs a statewide ESE Coordinator who provides support to the ECs in meeting the needs of ESE students, and who usually takes on the coordination of paperwork and compliance issues for ESE students. As Pivot Charter Schools grows and the number of ESE students we serve increases, we realize we may eventually have the need to hire additional ESE Coordinators and are prepared to do so when necessary.

When reviewing the budget, you will see that the \$5,000 stipends are included in 5200-130; however, the ESE coordinator is not included in this school’s budget. This is an expense covered by the state network, and is part of the fees the school pays to the state organization.

## I. Gifted and Talented Plan

Students who are gifted also fall under the umbrella of Exceptional Student Education in Florida. Any teacher or parent may refer a student for evaluation for gifted services. Parental consent will be obtained and procedural safeguards will be provided and adhered to. After a formal evaluation has been conducted, a multidisciplinary team will meet to determine eligibility. Eligibility criteria are determined by the state.

If a student is deemed eligible for gifted services (the process would begin with the MTSS system, and culminate in an evaluation in alignment with the sponsor's policies), an Education Plan (EP) will be developed by the team. The EP will prescribe the services that will be provided to the student along with a statement regarding why the student is in need of services. Delivery of services may range from a variety of modalities such as inclusion, co teaching, support facilitation, learning labs, and consultation. The EP will also include:

- Present levels of educational performance
- Measurable Goals and Benchmarks or Short Term Objectives
- A description of the specially designed instruction to be provided
- A description of how progress will be measured and how the parent will be informed of the student's progress
- Initiation, duration, frequency, and location of services

Services for students who are gifted will be aligned with Florida's Frameworks for K -12 Gifted Learners, which provides guidelines for supporting a challenging and rigorous curriculum that enhances the state standards. The goals of the Frameworks are defined by expected outcomes for gifted students. Each goal specifies the mastery expected by the time the student graduates. Some of the instructional strategies that will be used at Pivot Charter School include:

- **Curriculum Compacting** – to provide curriculum that is adapted to the learning needs, rates, and interests of students
- **Research and Independent Study**
- **Content Acceleration** - the practice of presenting curriculum content earlier or at a faster pace.

Enrichment can also be provided to students through:

- **Problem-based Learning** – allowing students the opportunity to solve authentic problem situations.
- **Open-ended Tasks** - students guide activities in various directions and receive diverse outcomes.
- **Service Learning/Enrichment Clusters** - combines learning with service to the community.

The School will meet the special needs based on the student's Educational Plan (EP) through one of the following delivery model as applicable:

- **Gifted Program through the content areas (9-12) / Gifted Courses** -The School will offer gifted content area courses and/or State-approved high school elective courses. All of the students in the gifted course will be eligible for gifted services. Teachers of gifted students will be certified in the appropriate content field endorsed to teach gifted or on an approved waiver to complete the gifted endorsement and do so within three years. Given the small numbers of gifted students in the initial years, we have not included these courses throughout this application, but will add them as necessary based on the needs of the student body as we grow.
- **Consultation Model: Gifted Services** - Some Gifted students who may not take gifted courses (due to scheduling conflicts or other issues) may use the consultation model. Teachers of the gifted meet regularly with the gifted consultation model student to discuss their progress and set realistic goals. The teacher of the gifted may also contact the administration, counselors, general education teacher(s), social worker, parent, and/or the respective students, if he/she

deems appropriate, to discuss and/or monitor instructional alternatives designed to ensure that the gifted students achieve successful accomplishment of gifted goals in their courses. In addition the teacher of the gifted student will maintain a monitoring log to document meetings with and about the student's progress. Gifted students are not assigned to a gifted course, rather receive consultation services from a teacher who is endorsed to teach gifted or on an approved waiver to complete the gifted endorsement.

## *Section 7:*

# *English Language Learners*

### *A. ELL Plans and Procedures*

Pivot Charter School will adhere to all applicable provisions of federal and state laws relating to students who are limited English proficient, including Title VI of the Civil Rights Act of 1964 and the Equal Educational Opportunities Act of 1974 and the LULAC et. al. v. State Board of Education Consent Decree. In order to accomplish this we will agree to adopt and implement the district's state approved state-approved plan for English Language Learners (ELL). What follows below is our understanding of the requirements related to the plan, however, we wish to expressly state that if we have misstated any of the details within this description, we will align our operations with the district's state approved plan. It is our intention that once this application is approved and our Principal hired, that the Principal will meet with the district's coordinator to ensure our procedures are setup to ensure students receive the services they are entitled to under the plan. We will work closely with the district, utilizing the districts forms and procedures to ensure that the students are serviced in accordance with all applicable federal, state and district rules and regulations.

When a student is accepted to attend Pivot Charter School, one of the required documents the family must complete will be the district's Home Language Survey. This form is available in English, Spanish, Ukrainian, Haitian Creole and Vietnamese. The form will ask the family three questions:

- Is a language other than English used in the home?
- Did the student have a first language other than English?
- Does the student most frequently speak a language other than English?

If the family answers yes to any of these questions, the school will assess the student within 20 days to determine if the student qualifies for English for Speakers of Other Languages (ESOL) services. The school will utilize the assessments utilized by the district to assess the students' oral / aural language abilities. We understand that the current assessment is IPT I or II Oral assessment. We will utilize the publisher's cut scores to determine which students fall within the Limited English Proficiency (LEP) range, and thereby making the student eligible for ESOL services. For those students who do not qualify for ESOL services based on the oral language assessment, they will also be administered a reading and writing proficiency assessment within 10 days of their oral language assessment. The current reading and writing proficiency assessment is the Reading and Writing battery of the IPT. Once again, the publishers' cut scores will be used to interpret the results of the assessment, and for those students who score at or below the 32nd percentile will be eligible for ESOL services. If a student does not score within the lowest 32nd percentile, but there is still a concern regarding the student's English proficiency, the school staff or student's parent can refer the student to the ELL committee. The committee shall take into consideration the parent's preferences, the assessment results, the extent and nature of the student's prior experiences, a written recommendation and observation of school staff, the level of mastery on state or national assessments, and the student's previous academic history. The committee shall then determine if the student is an ELL, and the written evaluation shall be included in the student's ESOL File along with the student's ELL Plan.

Once a student is determined to be an ELL student, the school will convene an ELL Committee meeting to establish the student's ELL plan. The school will also send home written notification (in the parent's native language) of the student's placement. The ELL Committee shall be made up of the school's ESOL Coordinator, the administrator (or designee); the student's Educational Coordinator and the student's parent will also be invited to attend. The plan will address the instructional method to be utilized by the school in addressing the needs of the student. According to the Consent Agreement referred to above, the written plan must include: the student name, instruction by program, including programs other than ESOL provided, amount of instructional time or schedule, date of ELL identification, and assessment data used to classify or reclassify as ELL, date of exit and assessment data used to exit student as English proficient (see below).

The specific instructional model(s) which we will use will be determined, in large part, by the number of ESOL students who enroll at the school, and the number of students within individual languages. The primary instructional method to be used will be mainstreamed / Basic ESOL instruction. However if the students who enroll at the school require more intensive services, or if enough students enroll who enable it to be economically feasible, the school will also offer sheltered instruction, especially within English Language Arts courses.

- **Mainstream / Basic ESOL** serves all students who have been classified as limited English proficient based on state and district requirements. In elementary schools with insufficient numbers of ELL students, ESOL may be offered in the mainstream classroom with an ESOL certified teacher.
- **Sheltered Instruction** serves students who either speak the same language or different languages in the same grade level. This model is an integral component of the Bilingual Education Model. In the elementary Sheltered Instruction Model the students are grouped together in each grade. The grade level curriculum is instructed in English only at the students' level of second language acquisition. Sheltered Instruction ensures that grade level content area material is made comprehensible to students acquiring a second language. It provides for the simultaneous development of content area skills and English Language Proficiency.

All ELL students will annually be administered the state's Comprehensive English Language Learning Assessment (CELLA) assessment to assess the student's progress towards proficiency in the English language. This assessment will be administered by an ESOL endorsed educator each year according to the state's timeline/testing window.

The criteria for a student to exit the ESOL program are:

- **3rd - 9th Grades:** Proficient in all areas of CELLA and FCAT Reading Level 3 or above (or the equivalent in the PARCC)
- **10th - 12th Grades:** Proficient in all areas of CELLA and the 10th grade FCAT Reading score (or PARCC equivalent) to meet graduation requirements or an equivalent concordant.

Once a student qualifies to exit the program, the ELL Committee shall meet to discuss the individual student and decide if it is appropriate to exit the student from the program based on the relevant assessment and performance data available for the student. Once again, as always, the parent will be invited to the ELL Committee meeting, and be part of the decision making process. The student's parents will be provided copies of the forms either in person or through the mail, in the parent's native language of the decisions of the ELL Committee.

Once a student is exited from the program, the student will be closely monitored for two years following the exit decision. This monitoring will include reviewing the student's academic and assessment data periodically to ensure the student is not falling behind the progress being made by his or her peers. This monitoring shall be done by the school's ESOL coordinator, who will document such reviews in the student's ESOL File as well as on the district's Student Information System. These reviews will take place at each report card and at least semi-annually, and at the end of the second year after exiting. If the student is making satisfactory gains, at the end of the second year, the student will no longer need to be monitored for ESOL services. If, however, a student is not making adequate progress during this monitoring, the student shall be referred to the ELL Committee who shall discuss the student's performance and determine whether or not to reclassify a student as ELL and restart ESOL services, in which case a new ELL plan will be developed, and the parents again notified of the committee's decision.

It is our intention to use the district's computerized student information system to maintain all of the relevant ESOL data as described in the plan above and in the district's state-approved plan. We assume that this system has queries and safeguards put into place to generate reports on students who are missing their home language surveys, or who are due for assessment or reassessment, and monitoring as part of the ESOL plan. However, if these systems, reports and flags are not in place within the district's system, the school will develop systems to track, monitor and alert administration if a particular student is close to the point of putting the school out of compliance so that it can be proactively handled before the deadlines expire.

The school will also establish a Parent Leadership Council (PLC) the makeup of which shall be a majority of parents of ELL students at the school. This PLC will meet at least once a semester, and will provide information to parents regarding the ESOL program at the school, techniques they can use with students outside of school, and opportunities the parents have to get involved in the leadership and operations of the school (see section 13 of this application regarding Parent Involvement). The school will work with the district to see if there are additional opportunities for members of the school's PLC to participate in activities provided by the district for their school's PLC members.

## *B. ELL Staffing Plan*

It is the school's intention to give priority to applicants applying to work at Pivot who hold Florida ESOL endorsement. It is our understanding that most recent college graduates have had the required ESOL courses and already have this endorsement. This will not, however, be a requirement for being hired at the school. If an EC is hired who does not have the ESOL endorsement, they will be strongly encouraged to seek such endorsement within their first year of employment. If the EC has a student on his or her caseload who is ELL, this will be a requirement for their continued employment. The Principal will work with the teacher to seek out and find appropriate opportunities, such as those provided by the district to obtain this endorsement to their certificate. The requirements of the Consent Decree will be followed regarding the requirement of at least 60-inservice points being obtained by the following September 15 if it is a basic core class as described by the Consent Decree, or 18-inservice points for non-core subject areas. At least one EC at each grade level will be required to hold the endorsement, so that services such as assessment and coordination of the ELL plan can be accomplished by that professional.

In addition, the school's administrator shall either hire or designate a staff person as the ESOL coordinator. The final determination as to whether a separate position for ESOL Coordinator will exist

will need to be made once the actual enrollment can be examined to determine the number of ELL students who have applied to the school. It is our hope that this responsibility can be assigned to a current staff member without needing to hire an additional person, however, should the population be large enough that this will not be possible, the Board is prepared to allocate necessary resources to hire an additional staff person to oversee the needs of the ELL students.

In addition, the school understands the requirement to hire a staff person fluent in any language for which at least fifteen students enroll who speak said language as their primary language. Most likely this person will be one of the educational assistants described in the staffing plan, and one of the main responsibilities assigned to this person will working with students who speak that language, providing assistance and interpretation as necessary in conjunction with the students' teachers.

ELL students will receive instruction which is comprehensible, equal and comparable in amount, scope, sequence and quality to the instruction provided to English proficient students. Instruction is aligned with the appropriate CCSS/NGSSS, benchmarks and course descriptions. Instructional materials used with ELL students will be the same as those used with non-ELL students in the same grade. The school's administrator will be responsible for ensuring that ELL strategies are being effectively utilized within the school. This will be documented in the lesson plans for all ECs who are working with ELL students, and need to specifically identify the ELL strategies that are being used to provide assistance to ELL students in the class. Evidence can be observed during classroom visits, through lesson plans, through use of materials and audiovisuals, and through grade book notations. Some of the ELL Strategies that will be used during small group and individual instruction of ELLs include but are not limited to Marzano's High Yield Strategies, and as follows:

- **Identifying Similarities and Differences** - Mind mapping, Venn diagrams, T Charts, Cause and Effect Organizers, Word Sorts
- **Cooperative Learning** - Group Projects, Language Experience Approach, Shared Reading and Writing, Book Pass, Dramatizations
- **Nonlinguistic Representations** – Pictures, Manipulatives, Concept Maps, Student Drawings Mnemonic Clues, Visualization, 5 Senses Organizer
- **Questions-Cues-Advanced Organizers** - Activate background knowledge, Frontload key vocabulary, Predicting, inference, concluding, Reciprocal teaching and modeling, Think alouds and guided questions, KWL
- **Home learning and Practice** - Lesson opening with review and preview, Metacognition of strengths and weaknesses. Reflective journals, Sharing goals and objectives with parents, Praise efforts to use English, Hold high expectations, Honor individual learning styles, Use authentic assessment.
- **Resources:** Word-to-Word dictionaries in the students' heritage language/English language will be available in the ESOL and content-specific classrooms throughout the year, as well as, for all district and state assessments.

Furthermore, the Principal will commit to provide instruction to ELL students in equal amount, sequence and scope, as to non-ELL students, by ensuring:

- The same program goals and objectives for ELL students as non-ELL students exist (content of basic subject area courses is the same in scope, sequence and quality as the instruction provided to non-ELL students)
- Classroom goals and objectives are for mastery of CCSS/NGSSS

- ELL students have access to honors, college preparatory, and advanced placement courses, as appropriate and regardless of language proficiency
- Instructional delivery, not content, is modified to meet the needs of ELL students
- Content area specialists receive appropriate ESOL training, and utilize appropriate ELL strategies when ELL students are enrolled in their classes
- All ELL students participate in statewide assessments – and FCAT/PARCC accommodations are provided in accordance with State and District mandates and guidelines, which may include:
  - English to heritage language dictionary;
  - Flexible setting (parent must be notified prior to testing);
  - Flexible scheduling;
  - Assistance in the heritage language (as specified in testing manual for each respective section of test to determine level of assistance).
  - ESOL Department and Testing Chair attend all required District Professional Development opportunities

### *C. ELL Below Grade Level Engagement*

The unique online learning environment utilized by Pivot which guarantees a personalized and complete differentiated instructional program for each student will help to ensure that ELL students who enter the program below grade level be actively engaged and benefit from Pivot’s curriculum. As described above AAI’s ROADS curriculum is self-paced and also has tools such as a “read aloud” button where the text can be spoken aloud for the students.

In addition to the accommodations provided within the online curriculum, Pivot students benefit from the on-site educational coordinators who can assist them with mastery. As described above, effort will be put into ensuring that all ECs are ESOL endorsed or seek out that endorsement as soon as possible. The ECs will then be able to provide the targeted support and instruction outlined within the student’s ELL plan within a small group or individual one-on-one environment as may be necessary for each individual student. The ECs will document the specific support they provide students and in their lesson plans will include the ESOL strategies being implemented for further documentation of compliance. This will be overseen by the Principal.

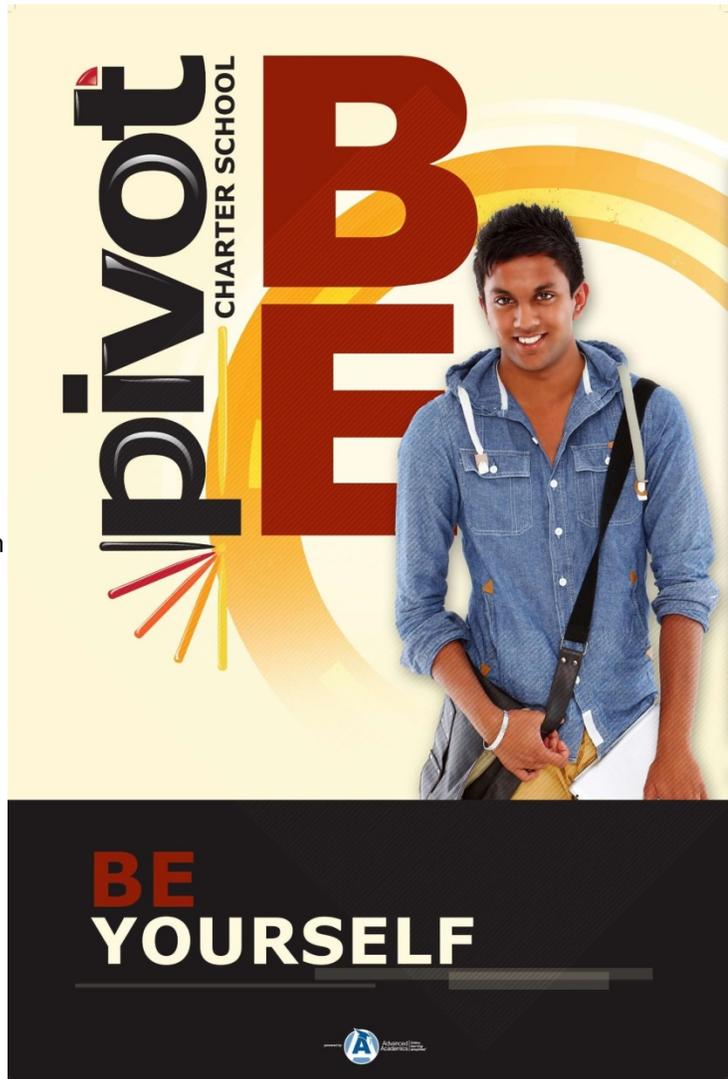

## *Section 8:*

# *School Climate and Discipline*

## *A. Student Management Plan*

Pivot Charter School faculty and staff promote the value of respect for self and others. Pivot focuses on creating a culture of learning and creating positive relationships. Pivot employees will model behavior and address issues quickly to keep a positive school culture. Pivot has adopted a BE policy in which students are reminded to BE determined, BE enthusiastic, BE amazing, and to BE yourself. These images are replicated throughout the learning environment.

In general, students do not engage in whole group instruction in the same way as they would in the traditional classroom setting. The curriculum is self-paced, differentiated, and individualized which creates an environment where students can form a sense of belonging. The open learning environment creates a student centered approach which allows the Educational Coordinators and Educational Assistants to move freely around the room meeting the needs of all students. This open space also allows Educational Coordinators to monitor behavior with ease. The school is designed with tutoring rooms that allow space for group, one-on-one tutoring and other activities. During these tutoring sessions Educational Coordinators model anticipated behavior. Pivot expects positive relationships to be maintained between the students and follows a code of conduct that is given to and orally verbalized with each student. Students who do not follow school policy are put on a behavior contract. This contract is discussed, documented, and agreed upon with the student, Educational Coordinator, Principal, and Parents. In line with the sponsor's code of conduct, students are expected to behave appropriately at all times. School staff members will not tolerate violence and chronically disruptive behavior.

## ***B. Code of Conduct***

---

The Pivot student handbook will detail student behavior and its alignment with the sponsor's code of conduct but may include amendments that better fit our learning environment. The expectations are detailed so that all stakeholders share the same vision of success. Pivot commits to providing a safe and orderly learning environment for all students and staff. All Pivot students will be required to conduct themselves in an appropriate and acceptable manner at all times when present in classrooms, on campus, and at school-sponsored activities. This responsible, mature citizenship will ensure a positive and productive campus environment.

Students will be expected to:

1. Treat others with consideration, dignity, and respect
2. Respect the authority of adults on campus
3. Come to school prepared to learn

As presented in the student handbook, Pivot will employ a zero-tolerance policy for drugs, weapons or harassment.

Pivot will be a drug free zone and any student, staff member, or other individual found to have drugs in their possession will be dismissed immediately.

Firearms, knives or other objects that may be used, with intent, to harm a Pivot student or employee will be strictly prohibited from campus.

Harassment (sexual, racial, physical or emotional harassment) by any student, teacher, administrator or other Pivot employee, who creates an intimidating, hostile or offensive environment, will not be tolerated.

Noncompliance with these safety rules will result in the immediate removal of a student as well as employment termination for the offending staff member. Additionally, legal charges may be brought against the offender.

An intercom, telephone, or appropriate and accessible means of communication will be installed throughout the school facility and in each classroom. Each teacher will have a tablet with a chat feature that allows two way communication.

Administrators will have two-way communication devices which include but are not limited to walkie talkies, cell phones, and tablets with chat features.

Safety training will be provided to all administrators and employees at the start of each school year. The administration will review emergency procedures with all staff periodically throughout the year.

## ***Student Conduct and Discipline***

---

Due to the unique nature of the online curriculum environment, Pivot Charter School has developed its own code of student conduct but is amenable to adopting that of the sponsor if this is a requirement.

Student behavior should be based on the respect of others. Students who choose to violate the rules and policies set forth by AAI will be subject to disciplinary action. The below list includes, but is not limited to, the areas of misconduct to be considered grounds for disciplinary action:

## *Offenses and Correction Actions*

### **Class I – Minor Offenses**

- Annoying classmates
- Classroom disruption
- Electronic devices
- Encouraging a student to violate the code of conduct
- Excessive mischief/horseplay/safety hazard
- Excessive or loud talking
- Excessive tardiness/excessive early dismissals
- Failure to attend detentions
- Food/drink/gum violations
- Inappropriate language
- Inappropriate public displays of affection
- Not participating
- Tobacco: possession, use or distribution

### *Possible Corrective Actions for Class I*

- Counseling
- Detention
- Disciplinary probation
- ISS (In-School Suspension)
- Loss of privileges
- Restitution
- Response to Intervention referral
- Other at the discretion of the administrator

### *Class II – Intermediate Offenses*

- Inappropriate web sites, data or files
- Misuse of computer password/access
- Abusive language
- Altering records
- Bullying
- Cheating
- Damage to property
- Disrespect for authority
- Driving violation
- Extortion

- Gambling/Possession of gambling devices
- Harassment
- In unauthorized area
- Inappropriate materials
- Indecent exposure
- Insubordination
- Leaving class/school campus without permission
- Persistent or Severe Violation of Class I offenses
- Physical aggression
- Providing false information to school officials
- Skipping class/school
- Stealing/theft
- Tampering with school equipment
- Transmission of material, information, or software in violation of any local, state, or federal law (*such as copyrighted materials, software piracy, etc.*).
- Verbal altercation
- Verbal Assault of another student
- Chronic referrals to the office
- Computer trespass
- Dangerous instruments
- Disciplinary probation violation
- Disorderly conduct
- Disruption of school
- Fireworks – possession or use
- Gang related activity
- Physical assault
- Physical assault of an employee
- Robbery
- Sexual Harassment/sexual battery/sex offenses
- Terroristic threats
- Threat/Intimidation

### ***Possible Corrective Actions for Class II***

- Loss of privileges
- Response to Intervention referral
- ISS (In-School Suspension)
- Refer to Law Enforcement - charges filed
- Work with the district to seek expulsion
- Other at the discretion of the administrator

## *Discipline of Special Education Students*

---

PCS will adhere to the regulations set forth in the Individuals With Disabilities Education Act (20 USC §1400 et. seq.), relevant Florida statutes, and applicable Federal and State case law in disciplining students who qualify for special education services. No student of PCS will be discriminated against because of a disability nor disciplined for behavior that is a result or manifestation of the student's disability.

Pursuant to Florida Statute 1006.07, students are responsible for following the school's dress code and showing respect for self and others. Students are responsible for displaying how appropriate dress and respect for self and others affects an orderly learning environment. Students, while on the campus of Pivot Charter School during the day, are prohibited from wearing clothes that expose underwear or body parts in an indecent or vulgar manner or that disrupt the orderly learning environment. Students who violate this code will, as a first offense, be given a verbal warning and the principal will call the student's parent or guardian. Students who violate this code as a second offense will be ineligible to participate in extracurricular student activities, which are defined as "any school-authorized or educational related activity occurring during or outside the regular instructional school day." Students who violate this code a third time will receive an in-school suspension pursuant to s. 1003.01(5) for a period not to exceed 3 days. In addition, the student will not be able to participate in any extracurricular activities for 30 days, and the principal will call the student's parent or guardian followed by a written letter regarding the in-school suspension and ineligibility to participate in extracurricular activities.

## *SUSPENSION OF STUDENTS*

---

A. Suspension normally should be applied only after counseling and parent conference and other interventions have failed to effect a change in the student's behavior, unless the offense is grievous enough to warrant immediate action.

B. Due Process: In the event of suspension, a parent conference may be requested. Whether or not such a conference is arranged, written notice stating the cause and duration of the suspension shall be sent to the student's parents or guardian within twenty-four (24) hours, unless the event of suspension occurs on a Friday or other day preceding a holiday wherein notice shall be mailed immediately the following work day. Oral or written notice of the charges must be provided to the student. If s/he denies the charges, an explanation of the evidence against him/her and an opportunity to present his/her side of the story must be provided by the Principal or designee. The length of the suspension shall be in direct proportion to the severity of the infraction.

1. A Principal is authorized to suspend a student for not more than ten (10) days per incident for a single infraction as identified in the Code of Student Conduct.
2. Carrying a firearm or deadly weapon on the school grounds shall result in immediate suspension and the suspension shall require the Principal contact the district to discuss the possibility of expulsion for the student.
3. A committee shall be convened to determine the educational programs of any student who is formally charged with a felony by the State Attorney's Office.
4. Any student convicted by a court of competent jurisdiction of the sale, possession, use or transfer of any drug with abuse potential, narcotic, hallucinogen or similar items shall be

immediately suspended by the principal and the Principal shall be required to contact the district regarding the possible expulsion of the student.

5. No student who is required by law to attend school shall be suspended from school for unexcused absence or truancy.
6. These procedures shall work in concert with the due process procedures delineated in the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act.

## *Organization Plan*

## *Section 9: Governance*

### *A. Not-Profit Organization*

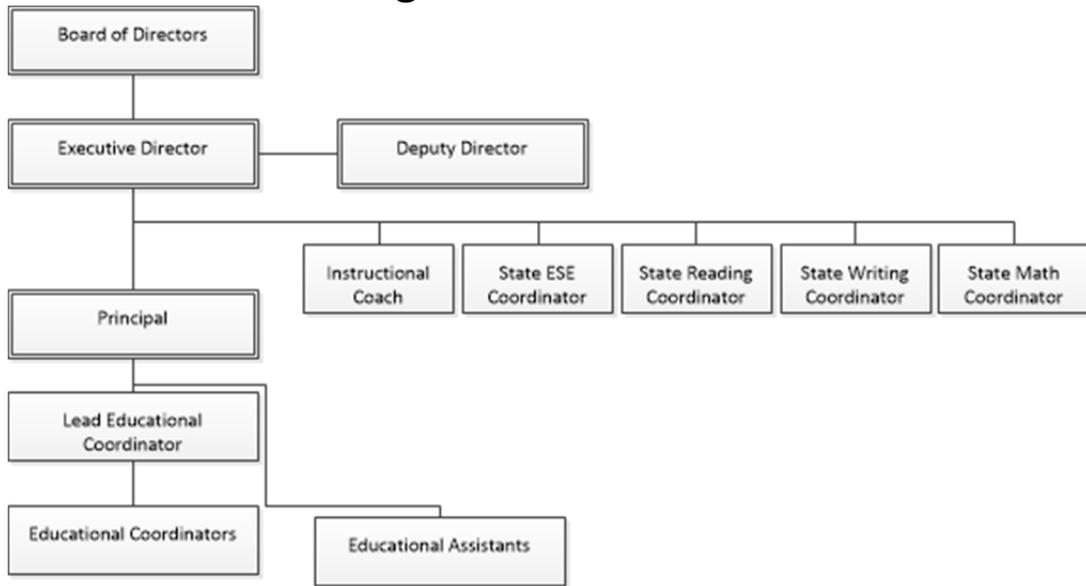

Pivot Charter School will be governed by Pivot Education, Inc., a not-for-profit organization organized under the laws of the State of Florida. The Pivot Education, Inc. Board of Directors will serve as the Governing Board of Pivot Charter School.

Pivot Education, Inc. was incorporated in September, 2009 for the purpose of operating innovative, blended model charter schools throughout the state of Florida. The corporation is operated exclusively for educational and charitable purposes pursuant to and within the meaning of Section 501(c)(3) of the Internal Revenue Code. We have submitted an application for 501(c)(3) status from the IRS, and are currently waiting on a ruling to our application. While the board retains the right to delegate the management of the corporation's activities to any person(s), company or committees it feels appropriate, the oversight and ultimate accountability shall always be the responsibility of the Board of Directors.

### *B. Organizational Chart*

As required by Florida statute, Pivot Education, Inc. is a not-for-profit organization and is governed by an elected Board of Directors. The Board of Directors ultimately retains authority over the responsibility for all matters associated with the school. We strive to ensure members of the Board of Directors hold a wide selection of skills and expertise ranging from education, finance, law, public relations and leadership. As is indicated by the organizational chart in the diagram, Pivot Education, Inc. is managed and led by our Executive Director. Pivot Education, Inc. currently operates two Florida based schools, one in Hillsborough County and another in Lee County. In August, 2013 we will open another school in Broward County.

## Organizational Chart

The Deputy Director is below the Executive Director and is responsible for school development. Pivot has statewide coordinators who train in their area. These position include Instructional, ESE, Reading, Writing, and Math/Science State Coordinators. These coordinators train all teachers in their field, monitor their progress, meet with them weekly, and visit all the schools on a regular basis. These coordinators are specialist in their fields and provide all schools with consistency. The building level Principal of Pivot Charter School retains authority over school based operations. The administrative team includes the Principal, Lead Educational Coordinator 3 and a Lead Educational Coordinator 2 whose jobs are to ensure a safe and productive learning environment. The Educational Coordinator (EC) roles are uniquely defined to suit our school’s configuration. The Lead EC 3 acts as the Assistant Principal and takes on the role of the Principal when the Principal is out of the building. The Lead EC 2 functions similarly to a department head of a traditional school by supporting all teachers in the program, which may involve reviewing student progress with an individual teacher, recommending instructional supplements, or directing an individual teacher toward well-suited professional development opportunities. The ECs are Florida certified teachers who work directly with students in addition to supporting other teachers. Each EC is assigned a caseload of students and monitors those students’ online class participation and performance. The online teachers are able to assist the students in the virtual environment while the onsite EC’s discuss issues and assist them in the school environment. The EC not only monitors student progress, but represents small learning group instruction and runs individualized tutoring sessions as needed. The function of the EC is to ensure that each students needs are addressed and that they are successful academically and have a sense of belonging. The EC also communicates with the parents and Principal on a weekly basis to discuss student success, needs, and future goals.

As student enrollment increases new administrative and/or instructional roles will be added as appropriate and needed. The Executive Director and Deputy Director have hiring and evaluation responsibilities for administrative team members. While the Principal is authorized to hire and evaluate instructional staff, the Board of Directors reviews and approves hiring of all school personnel. As such, the chain of command is that staff at the school report directly to the Principal. The Principal reports to the Executive Director, who reports to the Board of Directors. Pivot Charter School has written policies

and procedures for addressing all areas of operational functions; a copy of the current manual is included as **Appendix \_** as a reference.

## *C. Governing Board*

---

The Board of Directors holds the ultimate oversight and responsibility of Pivot Charter School, including all operational and fiscal affairs. The following list is a majority, but not necessarily an inclusive list, of the Board's responsibilities:

- Approval of the annual school budget, calendar, salary schedules, major fundraising events, and grant writing;
- Negotiation and approval of any contracts or Memorandums of Understanding (MOU) with the State or District;
- Approval of all contracts, contract renewals, and personnel actions (e.g., hiring, discipline, dismissal);
- Approval of bylaws, resolutions, and policies and procedures of school operation;
- Approval of all changes to the charter to be submitted to the State and District as necessary in accordance with applicable law;
- Long-term strategic planning for Pivot Education, Inc.;
- Participation as necessary in dispute resolution;
- Monitoring overall student performance;
- Hiring, supervising and evaluating the Executive Director;
- Monitoring the performance of Pivot Charter School and taking necessary action to ensure that the school remains true to its mission and charter;
- Monitoring the fiscal solvency of Pivot Charter School;
- Monitoring the performance of and contracted service providers;
- Participation in Pivot Charter School's independent fiscal audit;
- Fundraising efforts; and
- Any other governance issues pertaining to the contract, law or circumstance.

The Board of Directors shall meet at least eight times per year, and at least two of the meetings shall be held in each county in which it has a school, in compliance with Florida Statute §1002.33(7)(d)(2). The board shall follow the Bylaws of the organization (included as **Appendix \_**), and the policies and procedures (included as **Appendix \_**), as amended from time to time as necessary. The Board of Directors agrees it will comply with all Government in the Sunshine rules and regulations, conflict of interest laws, and any other state or federal law which applies to the operation of a not-for-profit corporation and public charter school.

Each year the Board of Directors will establish a meeting schedule and make this available to all parents. All meetings will be adequately posted on our website and on community bulletin boards at each individual school site. Meetings will be available either through a phone conference call in line or another online platform, so that if the meeting is being held in another county at another one of the Pivot Education, Inc. schools, parents from the school in this county would still be able to easily participate without the need to travel. Minutes from each meeting will be kept, and approved by the Board. These minutes will be available to any individual upon request.

At each meeting of the Board of Directors the Board shall be presented a detailed analysis of the progress of the organization and of each individual school. These reports will include complete financial reports, academic progress, Principal reports and a report from the Executive Director. These reports will allow the Board to stay up-to-date and informed about the progress and alignment of programs with the organization's goals. The Board may from time to time request specific information is included in these reports. The Board will also annually set a budget in conjunction with the third-party provider who provides back-office support services to the Board for fiscal management (see section 18).

Pivot Charter School's Board of Directors may initiate and carry out any program or activity that is not in conflict with or inconsistent with any law and which is not in conflict with the purposes for which charter schools are established.

## *D. Policies and Procedures*

Pivot Education, Inc. has a strong set of policies and corporate documents which lead the operation of the organization. The volunteer Board regularly review these documents to ensure the operational guidelines remain appropriate and adjust as necessary to ensure compliance with ever-changing laws and the realities of operating a charter school. The entire current Policy Manual is also included as **Appendix \_** to this application. Below is a summary of the highlights as they relate to the information requested within the Model Charter Application.

**Board Powers and Duties** - General Board powers are defined starting in section 2.2 of our policy manual, which state:

*All affairs of the Organization shall be overseen by the Board of Directors. The Board of Directors primary duties include but are not limited to the hiring and evaluation of the Executive Director, setting of Policies and Procedures, strategic planning and assessment of the organization in accomplishing the missions of the organization as well as the oversight of the public trust.*

**Board Member Selection** - Section 2.3 and 2.4 of our corporate by laws layout the general process for the selection of new board members:

**Section 2.3 Nomination of Directors.** *Not less than one month prior to a regular meeting, the Board may appoint a nomination committee to consist of no fewer than two (2) Board members. The nomination committee will compile and submit to the Board a slate of candidates for directorships and offices to be filled at the upcoming meeting. These submissions shall be deemed to be nominations of each person named.*

**Section 2.4 Election of Directors.** *Directors shall be elected by the Board at any meeting when there is an expiring term from a slate of nominees.*

**Section 2.6 Resignation or Removal of Directors.** *A Director of the Corporation may resign at any time by tendering his resignation in writing to the Corporation, which resignation shall become effective upon the date specified therein, or if no date is specified, upon receipt by the Corporation at its principal place of business. Any elected Director may be removed at any time, with or without cause, by a majority vote of the other Directors. A Director who is an officer that has been removed as set forth in Section 4.7. is automatically removed as a committee member.*

**Code of Ethics** - Employees are held to the Florida Code of Ethics as described by Rule 6B-1.001, and this is clearly described within our Policy 3.8.2.1 (please see appendix due to length).

**Conflict of Interest** - Our policy 2.7 provides detailed information regarding Board Member conflict of interest (please see appendix due to length). The policy complies with current Florida Statute and federal recommendations for schools that are eligible for the Charter School Planning Grant. The purpose of the policy is stated as:

*The purpose of the conflict of interest policy is to protect the interest of the organization when it is contemplating entering into a transaction or arrangement that might benefit the private interest of an officer or director of the organization or might result in a possible excess benefit transaction. This policy is intended to supplement but not replace any applicable state and federal laws governing conflict of interest applicable to nonprofit and charitable organizations generally and public charter schools specifically.*

To comply with legal requirements Board members are expected to clearly identify potential conflicts of interests, including contractual, employment, and personal or familial financial interests, Board members are required to file a Statement of Financial Interest annually with the Commission on Ethics, even if they hold no financial interests requiring disclosure. Each Board member files their Statement of Financial Interest form annually with the Clerk of the Court. The Board Recording Secretary will maintain a copy of the forms filed with the Clerk for reference, should a voting issue arise.

Members of the Board may not participate in any matter that comes before the Board that has the potential to create a private gain or loss for the member, the member's organization, or a relative or business associate without disclosing the nature of their interest in the matter. Whenever any of the areas described in the "Statement of Financial Interest" form are discussed by the Board, the involved Board member recuses him- or herself from participating in the discussion or voting on the issue.

Board members will be informed of the State of Florida's conflict of interest policies when appointed to the Board and provided with the form "Board Disclosure Information to Determine Possible Areas of Ethical Conflict" to complete. Upon appointment to the Board of Directors, each new member will receive a personal orientation session with the President or Executive Director and a comprehensive manual covering their roles, responsibilities, and ethical obligations.

**Frequency of Meetings** - Policy 2.5 specifically deals with meetings of the Board of Directors, as do ByLaws sections 2.8 through 2.11 (all included within the appendix). Regularly the documents spell out that meetings must occur at least quarterly, however, in order to meet the requirements of §1002.33(7)(d)(2), the Board will meet more often. Members of the Board of Directors receive notices and general agendas 14 days prior to regular meetings, and at least 40% of the Board members must be present in order to be considered a quorum. Special rules exist for both a special meeting if it becomes necessary, and an annual meeting.

**Officers** - According to our Bylaws sections 3.5 through 3.10, and our Policy Manual policy 2.4.4, the Board shall annually elect from among its membership at least the following four officer positions:

- **President.** The President shall preside at all meetings of the Board. He or she shall act as a duly authorized representative of the Board and the corporation in all matters in which the Board has not formally designated some other person to act. He or she shall report as directed to the Board at each meeting. He or she may sign, with the Secretary or any other proper officer of the corporation authorized by the Board, deeds, mortgages, bonds, contracts or other instruments which the Board has authority to execute, except in cases where the signing and execution thereof shall be expressly delegated by the Board or by the bylaws to some other officer or

agent of the corporation, or shall be required by law to be otherwise signed or executed; and in general, shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board from time to time.

- **Vice-President.** The Vice-President shall act in the place and stead of the President in the event of his or her absence as well as complete other duties as required by the Board.
- **Secretary.** The Secretary shall keep or cause to be kept all of the records of the corporation, record or cause to be recorded the minutes of the meetings of the Board, send out or cause to be sent out all notices of meetings of the Board and all Committees, attest to the seal of the corporation where necessary or required, authenticate records of the corporation and keep or cause to be kept a register of the names and addresses of each Director. The Secretary shall perform such other duties as may be prescribed by the Board.
- **Treasurer.** The Treasurer shall insure or cause to be insured that a true and accurate accounting of the financial transactions of the Corporation is made and that such accounting is made available to the Board. The Treasurer will also perform other duties as prescribed by the Board.

Also clearly stated throughout the corporate documents is the concept that Pivot Charter School is governed by a Board of Directors, not individual members of that Board. While understanding their separate roles, the Board of Directors and the Executive Director along with the Principal work together as a governance team in operating the Pivot Charter School. The governance team assumes collective responsibility for building unity and creating a positive organizational culture in order to govern effectively. No individual Board Member shall have authority to act outside of the approval of the Board of Directors.

## *E. Transitioning to Governing Board*

Given that Pivot Education, Inc. incorporated in 2009, it has a solid history of operating successfully as a Charter School governing Board, and the transition from a founding to a governing board will not be a concern. As testament to the successes the Board has enjoyed, we encourage you to review the annual audits of our Hillsborough and Fort Myers schools which are available on the Auditor General’s website ([http://www.myflorida.com/audgen/pages/chschools\\_file%20i-r.htm](http://www.myflorida.com/audgen/pages/chschools_file%20i-r.htm)) and show no concerns regarding the operation of the organization nor the financial operations of the schools.

## *F. Board Member Development*

The Pivot Education, Inc. Board of Directors is currently planning a broad recruitment effort in Florida for appropriate and experienced Board members. The Board of Directors of Pivot Education Inc. is comprised of volunteer persons committed to the mission and philosophy held by Pivot Education, Inc. In order to allow for local representation and access, the Board composition will include a minimum of one person from each county in which Pivot Education Inc. has been awarded a charter. The Board will nominate and approve a local representative from a sponsoring county within 60 days of approval of the charter by the District. The process that we are using to recruit additional board members is:

### **Governing Board Recruitment and Development - Steps in Recruitment.**

1. Identify strengths of the interested Board member and highlight potential “gaps” in expertise needed to serve the school.
2. Develop criteria for new members by listing characteristics needed in new Board members.

3. Brainstorm names of potential candidates. All Board members should contribute at least one name. Seek input and suggestions from PCS parents and staff as well.
4. Compare candidate strengths with criteria for additional members.
5. Determine whether candidates suggested meet the qualifications for open positions.
6. Conduct interviews.

### **Recruiting Potential Nominees**

1. Reinforce the importance of serving on the Board.
2. Provide a brief explanation of the responsibilities and mission.
3. Stress the number of meetings Board members are expected to attend.
4. Note the importance of participating in Board meetings.
5. Determine each candidate's ability and desire to fulfill the responsibilities.
6. Confirm each nomination. Complete Consent to be Nominated Form.
7. Complete Nominee Information Form.

When a new member joins the Board of Directors, they undergo an orientation with the Executive Director to review the important corporate documents and ensure they understand the roles and responsibilities of serving on the Board. In addition, each board member is expected to complete the state-approved and required four-hour Board Member training. Board members who have been on the board for three years are also required to take the state-approved and required two-hour refresher training. From time to time, as is necessary, the Board of Directors also plans retreats and other development opportunities for itself to stay focused on the mission of Pivot Education, Inc.

Board members will be encouraged to also attend specific charter and public school workshops and conferences such as the Florida Charter School Conference, the National Charter Schools Conference and those conducted by the Florida School Boards Association to gain a better understanding of charter school operations and public school accountability.

## ***G. Board Members***

---

Current members of the Board of Directors include:

**Chris Card** holds a Bachelor's Degree in Economics from Oakland University. He received his Masters in Social Work from Wayne State University and his Doctorate of Social Work at the University of South Florida. Chris is a Leadership Florida graduate. Chris has extensive experience in many arenas of social services including five years as a Child Welfare Case Manager and Supervisor in Houston, Texas, five years managing an inpatient treatment center for children and adolescents, five years as a statewide advocate and association director for the Florida Network of Youth and Family Services, nearly a decade as a Community Based Care Lead Agency Executive Director, and six years as the South Regional Vice President for Providence Service Corporation. Chris was a founder of Florida's child welfare reform called, Community Based Care and has been appointed by Governors Lawton Chiles and Jeb Bush to a variety of positions of state leadership for children and families. Chris was the primary Architect and Advocate for the system of care that has reformed Florida's child welfare system. Chris was the first executive of the pilot project in Sarasota County, Florida, that has been duplicated throughout the entire state of Florida. This reform included systemic redesign, data system development and implementation,

transition from a state service delivery system to a community service delivery system, and significant policy and procedure reform. This reform has resulted in dramatic improvement in performance for all child welfare services including tripling the number of adoptions each year, a 40% reduction in the children in out of home care placements, over 25% reduction in caseloads, along with many other accomplishments. Currently, Chris serves as the Chief Operating Officer for Lutheran Services Florida overseeing over \$130 million in revenue and responsible for a wide range of social service programs throughout Florida. Chris has served as a gubernatorial appointee to the board of the Healthy Kids Corporation (the Florida CHIP program), and currently serves as a member of the Board of Directors of the Florida Children's Forum, Intervention Services Inc., Pivot Charter School (Florida), and Everyday Blessings Inc. Chris lives in Tampa, Florida with his wife and has two adult sons.

**Carolyn Eads** enjoys her career of 16 years as President of GCE Services, Inc. Carolyn and her husband Gary, decided to become entrepreneurs back in 1995, with Carolyn running the company on her own, for one year before Gary came on board. Carolyn started her career working as a Business Manager for dental and medical offices until 1995 when they started GCE Services, Inc. GCE Services, Inc. provides erosion control, seeding and sodding installation for commercial jobs as well as harvesting sod. Carolyn's main focus is the financial concerns of GCE, but is also very involved in the day to day operations. GCE has one of the highest credit scores obtainable and is very proud of long term employee retention. Carolyn takes great pride in maintaining a reputation of honesty and integrity with both her customers, employees and vendors. On a personal level, Gary and Carolyn have been married for 29 years and have one high-school aged old son. Carolyn was born and lived in Wichita Falls, Texas until her family moved to Louisiana 1979. Carolyn and Gary have lived in the SW Florida Area for 26 years and love this area. Carolyn enjoys the beach, her dogs, reading and traveling.

**Mike Puleski** was born in Connecticut where he lived until age 11. At age 11, Mike moved with his family to Florida where continues to reside in Fort Myers. Mike has always had a passion for education and has passed it on to his daughters. Both of his daughters have done well educationally. One of his daughters is also a teacher at the college level. Mike has been married to his wife Michele for seven years. Michele grew up in Bronx, New York and transplanted to Florida. In as much, Michele equally shares Mike's passion for education and awareness. In his spare time, Mike loves to build, play and collect guitars as well as kayaking. Both Mike and Michele work in the Fort Myers community and participate locally in the community. Michele operates a Decorative Painting Company.

Mike works as a Project Manager for a local remodeling company and owns and operates a Home Inspection business. Mike sees Pivot as a vehicle to recapture and bring forth the potential in a student that may have been lost in the tradition setting.

**Peter Balitsaris** brings a wealth of knowledge and experience to the Pivot board, as an Advocate, Attorney, and Businessman. He has spent the last part of his career working to improve the lives of children in Palm Beach County. Prior to his retirement this year, he was the President of ChildNet, the not-for-profit agency that provides child welfare services to children in Palm Beach County under contract with the Florida Department of Children and Families. He also acted as a longtime volunteer Guardian Ad Litem while working on ChildNet's application to provide child welfare services, which was helped by his business and real estate background. From 1997-2001, Mr. Balitsaris served as Senior Vice President with Liberty Property Trust (the successor of Rouse and Associates), and prior to this he was the President of Legg Mason Real Estate

Services, Vice President of DKM Properties, and a former partner at Rouse and Associates. Trained as an attorney, Mr. Balitsaris acted as the Associate Legislative Council for the National Association of Homebuilders and was an attorney advisor for the US Department of Housing and Urban Development. He earned a Master's Degree in City Planning from the University of Pennsylvania, a Juris Doctor from Georgetown University, and a Bachelor's Degree from Duke University.

## *H. Dispute Resolution*

---

Each school will have an individual designated as a parent liaison to the Board as is required by Florida statute. This person will be available to parents to listen to concerns and present them to the Board of Directors. The individual representative is listed on the website and is distributed to each parent each year.

All internal disputes involving Pivot Charter School shall be resolved by the Charter School according to the Charter School's own internal policies. We expect that all complaints about Pivot Charter School received by the District will immediately be forwarded to Pivot Charter School to be properly addressed.

This dispute resolution process provides parents, students, and volunteers who have a grievance concerning the school with a procedure to follow to have the grievance heard by the Principal or his or her designee and, if it cannot be resolved at this level, the complaint is then handled by the Executive Director and if not resolved it will be heard by the Governing Board at a regularly scheduled Board meeting.

Misunderstandings and problems arise from time to time in any situation. Differences of opinion will exist. Pivot Charter School intends for the school environment to be a safe and supportive environment for students, teachers, staff, and parents. The school is committed to creating an honest and open atmosphere in which any problem, complaint, suggestion, or question will receive a timely and respectful response. It is expected that all parties will conduct themselves in a congenial manner and communicate with each other with mutual respect at all times. A complaint may include any feeling of dissatisfaction or injustice in connection with any matter related to the educational program, Pivot Charter School, or staffing. The following steps should be taken to resolve a dispute:

- Any complaint should be brought to the attention of the respective party as soon as possible with the intention to resolve the issue. If it cannot be resolved at this level, then an appointment should be made with the Principal to attempt further resolution.
- The complaint shall be made in writing by the complainant and submitted to the Principal. The complainant should specify the problem to the fullest extent possible and any remedies sought.
- Following any necessary investigation, and a meeting with the complainant(s), the Principal shall prepare a written response to the complainant no later than ten (10) working days from the date of receipt of the written complaint statement, unless for good cause, and upon notice given, additional time is required for the response.
- If the matter cannot be resolved at the Principal level, the principal will notify the Executive Director for a level two meeting with all information properly forwarded. The Executive Director will then review all information and make recommendations to all parties involved. If the matter cannot be resolved at the second level, the complainant may request to have the matter properly placed upon the agenda for the next regularly scheduled Board meeting.

- The Governing Board and the Executive Director will notify the principal of the date and time for the hearing of any evidence to be presented concerning the complaint. At the hearing, the complainant and a representative of Pivot Charter School shall have the opportunity to present evidence, both oral and documentary. Within three (3) working days from the date of the hearing, the Board and Principal shall make a decision on the complaint in writing. This decision will serve as the final decision of Pivot Charter School. An administrative panel of less than a quorum of board members appointed by the Board may be used for a hearing purposes in lieu of a full Board, however if more than one Board member is present, the meeting will still be posted as a public meeting as is required by Florida’s sunshine requirements.

If a parent or staff person disagrees with the established rules on conduct, policies, procedures, or practice, he/she can express this concern directly to the Principal. No parent or staff person will be penalized, formally or informally, for voicing a complaint with Pivot Charter School in a reasonable, business-like manner, or for using this dispute resolution process. The Principal is an official representative between parents and staff and the Governing Board. Any administrator is accessible and ready to hear suggestions, concerns, and complaints. Pivot Charter School cannot act on any problem unless it is aware of it, so we request that complaints be brought to the appropriate party as soon as possible.

While not every problem may be resolved to all parties’ complete satisfaction, effort will be made on the behalf of Pivot Charter School, and its staff, to bring resolution to any problem. This will only be possible through both parties’ willingness to listen, attempt toward understanding, and exploration of all aspects of the issue at hand. Through this process, parents, teachers, and management will be able to develop confidence in each other. This confidence is important to the smooth, effective operation of Pivot Charter School and will directly benefit the students. Pivot Charter School will strive to provide such an atmosphere at all times. Parents are encouraged to offer positive and constructive criticism.

## *I. Name of the partner organization.*

---

Advanced Academics, Inc.

## *J. Contact Person*

---

John Wehde  
Director, Advanced Academics, Inc.  
(405) 512-6460  
[jwehde@advancedacademics.com](mailto:jwehde@advancedacademics.com)

## *K. Partnership Relationship*

---

Advanced Academics, Inc. is the primary curriculum provider to Pivot Charter Schools. They also provide some consulting services such as project management and assist with facilities acquisition and build out. In addition, for each Pivot Charter School they have offered a below-market rate loan to cover start-up

costs of the new school. The Board of Directors of Pivot Education, Inc., along with our own independent legal counsel, negotiates all agreements and contracts with Advanced Academics, Inc.

## L. Partner Organization Governance *Involvement*

---

Advanced Academics, Inc. is not involved in the governance of the school.

## *Section 10: Management*

### *A. Management Structure*

Operating efficiently is a key element to the success of Pivot Charter School of meeting our mission to graduate middle and high school students in a unique, technology rich learning environment. We believe that the structure we have developed provides for a high degree of local control and responsiveness to students and families, while maintaining a well-run “corporate structure” with cost effective and appropriate internal controls.

Pivot Charter School will be led by a local Principal. The Principal will be in charge of the day to day operations of the school, its staff and students and is the instructional leader of the school. The Principal is in charge of the direct supervision and evaluation of all of the staff members at the school, and ensuring that the policies and procedures set by the Board are carried out. A full list of the Principal’s responsibilities is included in the Principal’s job description which is included in [Appendix \\_](#).

The Principal will be hired and supervised by the Executive Director of Pivot Education, Inc., and the appointment will be confirmed by the Board of Directors. The Executive Director oversees all of the schools in the Pivot Education, Inc. family and carries out the policies and directives of the Board of Directors. The Executive Director is responsible for the overall performance of the schools and their operations. This is done by supporting, working with, supervising and guiding the Principal in his or her role. The Executive Director is also responsible for ensuring financial expenditures are in compliance with the approved budget, ensuring the Board of Directors has the information they need to make informed decisions, overseeing all contracts and third party services utilized by Pivot Education, Inc., etc. The Executive Director’s job description is also included in [Appendix \\_](#).

School based staff members report directly to the school’s Principal and work with the Principal to ensure the continued success of Pivot Education. A job description for all employees is in [Appendix \\_](#) to this application for reference. We are proud that our staff has a voice in the overall operations of our schools. It is the Principal’s responsibility to ensure an effective balance between site-based decision making and efficient school operations. Our goal is that by allowing staff to have a say in the operation, we can ensure continued buy in and success to the school’s mission.

### *B. School Leader Selection*

Selecting an effective Principal is one of the most important decisions to ensuring the success of Pivot Charter School, and this ultimately the responsibility of the Executive Director, who will seek out input from other staff members and board members of the school. The Executive Director will post and review applications for the Principal position, however, the process involves many other people to help to ensure the best quality applicant is found. Once applications are received and screened, an interview committee is formed to interview the candidates, and the team provides feedback to the Executive Director in hopes of finding the candidate who the most team members feel will be the best fit for the

school's mission and vision. This committee could potentially be made up of Board members, administrators from other schools, and instructional staff members from the Pivot Education, Inc. team. While the job description (see [Appendix \\_](#)) lays out the specific duties and requirements for the job, the key traits that the team will be looking for in a Principal will be:

- The ability to communicate effectively
- The ability to collaborate and work and lead a team
- A strong foundation in assessment and evaluation for both staff and students
- A thorough understanding, and preferably experience in, a blended learning environment
- Excellent organization skills
- Excellent planning skills
- An understanding of Florida statutes and political atmosphere
- Strong problem solving abilities
- The ability to think in innovative ways
- The ability to manage, use, and teach using technology
- A strong foundation in school organization and management
- Strong financial management and leadership abilities
- A strong sense of professional responsibility
- A proven leader with human resources / managerial experience

## *C. Staffing Plan*

The unique blended education model at Pivot Charter School provides the school with a great deal of flexibility in regards to the school staffing model that we employ. Given the blend of on-site educational coordinators and the online teachers available to students through the curriculum provider, we are able to minimize the staffing costs at the school site while maximizing student achievement thanks to the slightly increased costs in the curricular materials, which incorporates additional certified teachers.

In addition to the online teachers, the partnership with AAI has additional staffing benefits to Pivot Charter School as well. For example, AAI has a team of experts who are able to serve as guidance counselors, assisting the onsite ECs and students make appropriate course choices based on the student's individualized learning plan and career goals. This partnership eliminates the need for an onsite guidance counselor during the initial years. As part of our model we will provide an onsite Guidance Counselor part time starting in the second year and full time thereafter, based on our current enrollment projections.

An additional benefit in the area of staffing is our ability to capitalize on the network effect of having multiple schools operating in the state of Florida. As described in section six of this application, we have a statewide ESE coordinator who is able to work with all of our schools to provide support and case management for our ESE students, helping to offset the costs to the individual school, and allowing us to reduce the number of ESE Teachers on the school's budget, by allowing this additional support person to be provided from Pivot Education, Inc. This allows us to provide stipends to our on-site ECs to provide the direct support to students through the differentiated and blended model, but also allows an additional person from the state network who is able to assist with ensuring compliance with district, state and federal regulations, making the school as cost effective as possible.

One other way we are able to maximize efficiency in regards to staffing is by leveraging the power and use of third party providers. For example, through the use of a back office financial provider, we are able to ensure we have both a separation of duties with regards to financial tasks, as well as ensure highly accurate financial reports, records and budgeting forecasts by financial experts, without paying for additional staff members. Again thanks to the networked effect of using these third party providers, we are able to minimize the costs associated with them at the individual school level.

Based on the savings above, and the educational model employed by Pivot Education, below is the staffing model based on the current enrollment projections:

|                                | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|--------------------------------|--------|--------|--------|--------|--------|
| <b>Educational Coordinator</b> | 6      | 7      | 7      | 9      | 9      |
| <b>Principal</b>               | 1      | 1      | 1      | 1      | 1      |
| <b>Guidance Counselor</b>      |        | 0.5    | 1      | 1      | 1      |
| <b>Lead EC 3</b>               |        |        | 1      | 1      | 1      |
| <b>Secretary/Registrar</b>     | 1      | 1      | 1      | 1      | 1      |
| <b>Office Assistant</b>        | 0.5    | 1      | 1      | 1      | 1      |
| <b>Educational Assistant</b>   | 2      | 2      | 4      | 4      | 4      |
| <b>Total Employees</b>         | 10.5   | 12.5   | 16     | 18     | 18     |

As we reach the above listed numbers our staffing grows according to the table. The stipend positions are also counted as Educational Coordinators because those positions are above and beyond normal duties. One year two or at 200 students the Lead Educational Coordinator 3 becomes an assistant Principal type position and floats from middle to high school. At first glance, one might question how we are able to meet class size requirements with the staffing numbers listed above. We would like to specifically address the math even though the concepts have been addressed earlier in this application. Pivot Charter School offers two sessions and students attend either morning or the afternoon. This cuts the number of students approximately in half for any one time. Therefore we are able to service up to 44 middle school students or 50 high school students with one onsite educational coordinator. Thanks to the utilization of the online teachers who also hold Florida Teaching Certifications, teacher certification is guaranteed for individual courses based on the online instructor, allowing us to ensure both class size requirements and teacher certification requirements. The online teachers are employed by the online provider (AAI) and while not necessarily located in the state, are required to hold the appropriate Florida state teaching credentials and be NCLB Highly Qualified in their content area. All AAI teachers hold either a bachelor's or master's degree and typically hold certifications in four to six different states. Given that they are employed by, they are also supervised and paid for by the online provider.

## *D. Recruitment Plan*

In order for Pivot Charter School to meet its mission of evolving autonomous learners that excel in their goals both at Pivot and beyond, having the best teachers and staff to work with our students is essential.

Recruiting, screening, interviewing and hiring the instructional staff will be the first and most essential task assigned to the Principal once hired. All staff recruitment will be conducted through nationwide searches through recruitment websites such as EdJoin, teachers-teachers.com, floridaeducationjobs.com, and jobhunt.org/Florida. We have already been putting out feelers for the Principal position, and will run a formal application period as soon as this application is approved. It is our hope to select the Principal in January, 2014 and to have the Principal start on June 1st. We expect to begin posting teaching positions in either March or April, with the hope of having most of the positions filled by the end of May, 2014. All candidates who are seriously considered for employment as an instructional staff member by Pivot Charter School will be required to hold a teaching certificate from the state of Florida as is required by state statute.

The process for selecting the Principal was discussed in part B of this section of this application. Once hired the Principal will begin the selection process for instructional staff. Hiring for site-based staff will be conducted through hiring committees made up of the Principal and other interested parties which could potentially include: Board members, hired consultants staff from other Pivot Charter Schools and others. Per the detailed Start up Plan Schedule, all hiring of instructional staff will be as complete as possible by July 15, 2014.

AAI Inc., and not Pivot Charter School, is responsible for all hiring of AAI online staff.

Once hired, keeping our effective and qualified staff members will be of the utmost importance. We believe that staff satisfaction at Pivot Charter School will be high given the unique nature of teaching within the blended environment. Teachers take on a very different role within this educational model, being able to make personal connections with their students and providing more individualized and targeted support to students than is possible in traditional educational settings. This leads to a higher feeling of satisfaction in the work that they do and increase student achievement rates. Given the small size of our school, staff is also an integral part in the operation and decision making process of the school, increasing staff buy in and moral. Other steps we take to retain our effective staff members include:

- Ample professional development - allowing staff to attend conferences, district trainings, and providing in-house targeted professional development
- Providing competitive salaries and benefits
- Frequent feedback on their performance and collegial atmosphere

Site-based staff members are supervised by the school's Principal who is responsible for conducting evaluations, review student performance data with staff, and writing their annual evaluations. The evaluation process encompasses both a formal and informal processes that includes regular observations by the Principal during classroom instruction, working with students to support their online learning and meeting with families, and during professional development sessions. The Principal will conduct regular discussions with teachers about their progress and conduct a formal assessment and evaluation, in which teachers must meet the Standards of the Teaching Profession.

Pivot Charter School complies with all legal requirements with regards to evaluation and supervision of staff. Please see section 12 of this application for a more complete description of the evaluation process that will be employed at the school.

Teachers who are determined not to meet the Pivot Charter School high standards through the evaluation process will receive targeted support to improve in the areas they are struggling in. However,

if after receiving intensive support in accordance with school policy, employees will be let go if they are not demonstrating effective student achievement.

Pivot Charter School will annually distribute a list of all teachers' qualifications to parents through a newsletter as well as online on the school's staff web page. Communication regarding teachers' qualifications will be translated in students' native languages.

# *Section 11:*

## *Education Service Providers*

### *A. Services*

Integral to the success of Pivot Charter School are the partnerships and relationships we have formed with organizations to ensure the effective operation of a successful school. By utilizing the professional services of a variety of organizations and service providers we are able to stay focused on our core mission of graduating students prepared for their futures.

Pivot Charter School's Board of Directors is the ultimate decision making and governance authority of the organization, and does not view the relationships we have with outside vendors and service providers as what would be considered as a typical "Educational Service Provider" or management company for charter schools. Instead, we leverage the strengths of experts in their fields while maintaining all management and administration control within the Board of Directors and the administrative structure described in section 10 of this application.

An example of the types of services we contract with outside vendors include the following:

**Online Curriculum Provider** - Pivot Charter School currently contracts with Advanced Academics, Inc. as the online curriculum provider for the school. During the initial founding of Pivot Education, Inc. a variety of online service providers were examined, and AAI was determined to be the most comprehensive and highest quality provider in the field. Their ability to provide live teachers 24 hours a day during the school week was unparalleled. Pivot Education, Inc. has a strong relationship with AAI and we work in partnership to provide the highest quality educational content to students possible. However, AAI in no way has any control over the management or decision making processes of Pivot Education, Inc. With regards to curriculum they only provide the online learning platform and teachers to meet the needs of students.

**Financial Services** - Pivot Education, Inc. currently contracts with Charter School Services Corporation (a wholly owned subsidiary of Building Hope, a not for profit agency dedicated to supporting high quality charter schools), to provide back office financial support to the organization. CSSC ensures that our accounting is in order and assists with human resources management and budgeting to ensure the school is properly operated. While CSSC process all payments, they have no authority to approve or sign off on any financial transactions or activities, that responsibility stays with the Pivot Education Board of directors and administrative staff.

**Payroll Services** - Pivot Charter School utilizes a professional employee leasing / payroll company to assist with processing the payroll for our employees. This allows us to pay a minimal fee and outsource our basic HR needs by not needing to hire an in house payroll expert to ensure compliance with wage and hour requirements and tax filings. The payroll company is also able to manage all of the employee benefits, including being able to provide us more reasonable health insurance rates for our employees thanks to the larger employee pool leveraged by the company. We currently use Oasis

Outsourcing to fill this role, they were selected after an extensive RFP process was conducted of several similar companies and the price and services provided by Oasis were the best option available.

**Other Service Providers** - Pivot utilizes other professionals and services as needed to ensure the successful operation of the school. For example, we have a contract with an educational consultant who assists the school ensuring compliance with special education services, we have outside legal counsel who advises the Board of Directors, we annually hire an auditor, etc. These services are contracted on an as needed basis to meet the needs of the students and organization.

## *B. Draft Contract*

---

The Online Curriculum Provider contract is individual to each school within the Pivot Education, Inc. network, and as such a contract has not yet been signed for the \_\_\_ County Pivot Charter School. A sample contract is included as Appendix \_\_\_ which is the contract held between AAI and Pivot \_\_\_ (County). We assume the contract will be similar to this. Once this application has been approved, the Board of Director's independent attorney will assist with negotiating a contract appropriate for Pivot Charter School in \_\_\_ County.

The contract with our Financial Services provider is held by the corporate entity, and a copy of the contract is included as Appendix \_\_\_.

If the district would like to review any additional contracts held by Pivot Education, Inc. or any individual school within the network, they will be made available upon request.

## *C. Why Selected*

---

The initial founders of Pivot Education, Inc. conducted research by contacted several online curriculum providers to find a program that best matched the mission of the founders in developing the organization. They were looking for a system that provided a comprehensive online learning platform coupled with online instructors to provide around-the-clock assistance to students, allowing the students to access assistance whenever they needed it. AAI was (and to the best of our knowledge, is) the only approved online curriculum provider who offered such a comprehensive service. When approached with the possibility of the charter school AAI was eager to build the relationship and to utilize Pivot as a test case for a truly blended model of instruction that incorporated the best of both the online learning environment and the physical classroom educational experiences.

The relationship with Charter School Services Corporation began in 2011 when the previous service provider was unable to meet the needs of the organization. We reached out to several back office service providers and requested proposals. CSSC provided the most comprehensive service along with the most competitive price, and was chosen.

## *D. Roles and Responsibilities*

---

AAI holds no role or responsibility with the financial decisions made at Pivot Education. They do provide some initial financing (loans and grants) to assist with the startup of our new schools, but do not have a say in the fiscal operations of Pivot Education, Inc.

CSSC has no decision making abilities with regards to the financial decisions made at Pivot Education, however, they do play an advisory role to the Board of Directors. CSSC staff assists with the development of a charter school budget to be presented to the Board of Directors for discussion. CSSC also manages our payable accounts, by writing checks. They provide a portal to Pivot where we enter our bills and approve transactions, and CSSC ensure that all transactions are appropriately coded according to the Florida Financial and Program Cost Accounting and Reporting guidelines. The checks are then returned to Pivot for signature and to be sent out to the vendors. This not only ensures appropriate accounting of Pivot funds, but provides an additional layer of separation of duties between our accounting systems and the school's decision makers.

## *E. Arm's Length*

---

Pivot Education, Inc.'s Board of Directors is the ultimate decision making body of the school. The Board has retained the services of an attorney versed in charter school law to assist with ensuring that contracts keep the best interests of the schools in mind. No service provider is given any decision making ability over the organization, ensuring that the school's Board and administrative staff have the ability to make all of the necessary decisions for the school.

## *F. ESP History*

---

Given that we do not feel the relationships we have risen to the level of a charter school management or "Educational Service Provider" we could answer this question as not-applicable, however, to show the success of the online curriculum provided by AAI we have included a summary of their academic results as Appendix \_.

## *G. Other Schools*

---

Pivot Education has successfully run two other schools within the state of Florida using the educational model described within this application, using the curriculum and services providers described within this section. In addition to working with Pivot, AAI has had numerous other success stories, a document from AAI titled "Demonstrated Effectiveness - Examples of Successful Programs" is included as Appendix \_.

## *Section 12:*

# *Human Resources and Employment*

## *A. Compensation Plan*

The mission of Pivot Charter School is to grow our students into autonomous learners within a technology rich environment. The idea of the unique learning environment we have to offer is very attractive to staff who are considering working for Pivot Charter Schools. In addition to the unique teaching opportunity, Pivot Charter School will offer a competitive salary and benefits package to our employees.

Through the use of a larger payroll company we are able to offer competitive group benefits to our employees even though we are a relatively small organization. This allows us to offer full health insurance to our employees, and reasonable rates for other insurance packages if the employee elects to select them, such as dental, disability, vision, life, etc.

Pivot Charter School will competitively compensate its staff and teachers. The Principal's salary is budgeted at \$85,000 for the first year with growth potential beyond that. The Principal will be responsible for managing the staff, coordinating the implementation of the online educational program at the school, and ensuring that the students are tapping into the resources necessary to meet their educational goals. The teachers are budgeted in the first year to average \$42,000 based on a 196-day contract. This assumes a mix of younger teachers with a handful of more senior mentor teachers. Non-teaching staff such as office manager and other support staff are based on a comparison with the district's pay rates.

## *B. Personnel Policies and Procedures*

Pivot Charter School has adopted a comprehensive set of policies, which include specific policies on the personnel matters. A copy of the Policy Manual is included as **Appendix \_** to this application. The purpose of the personnel policies and procedures are to provide guidelines for the varied range of personnel related employment, evaluation, discipline, dismissal, benefits and code of conduct issues that may arise in the operation of Pivot Charter School. The policies are clearly set forth and communicated in accordance with principles of fairness and due process and in full compliance with all applicable laws and regulations. The policies are comprehensive, but here is a summary of the types of information included therein:

- I. Employment Manual
  - a. EEOC Statement
  - b. Non Discrimination Policies
  - c. Personnel Issues - *i.e. records, compensation, benefits*
  - d. Leaves

- e. Employee Behavior - *Standards, discipline, conflicts, etc.*
- f. School Rights
- g. Employee Rights
- h. Teams

The school will not hire an individual to provide instructional services or to serve as a teacher's assistant if the individual's certificate or licensure as an educator is suspended or revoked by this or any other state. The school will require all employees to undergo a background check and fingerprinting in collaboration with the Sponsor as required by §1002.33 (12)(g), Florida statutes prior to that employee reporting to the classroom. The School will not violate the anti-discrimination provisions of Federal or State law in its hiring and employment practices.

All staff members will be expected to adhere to the highest standards of conduct and behavior and set a positive example for all students. As such it is the policy of Pivot Charter School that all employees will comply with the state of Florida's Code of Ethics of the Education Profession, as defined in Administrative Code 6B-1.006 (also see Policy Manual, policy 3.8.2 - Professional Conduct).

Pivot Charter School will be a drug-free workplace and all personnel may be subject to random drug testing. Testing procedures and guidelines will be communicated to employees prior to implementation and are defined in the attached draft policy manual in Policy 3.10.6.3.

## *Evaluation of Staff*

---

An essential part of operating effectively to meet our mission is to ensure our staff is meeting the high level of expectation Pivot Charter School will have for its staff. This will be done through a comprehensive evaluation system. Pivot Charter School sees the professional development and evaluation of staff as two integral pieces that must work in collaboration in order to provide the most effective staff possible. It will be our goal to hire a Principal who shares the value that the evaluation process must be seen as a way to not only provide an annual written evaluation, but be seen as a process through which the school can undertake continuous improvement.

Each staff member will be asked to do an honest assessment of their own abilities and to develop a professional development plan which will include specific measurable goals they will hold themselves to during the year with regards to improving their craft. These goals will be reviewed with their administrator and will be used as a measure for their progress over the course of the year.

Staff will be supervised and "evaluated" at several times throughout the school year. All teachers will have a formal observation conducted within the first forty-five days of their start at Pivot Charter School using the formal professional evaluation form to be developed by the school.

The evaluation process to be used by Pivot Charter School will comply with current legal requirements as they may change from time to time by the state of Florida. Currently Pivot Charter Schools has an approved staff evaluation plan which has been approved in both Lee and Hillsborough counties. This plan will be submitted to Sarasota County School District once it becomes necessary to demonstrate compliance with state requirements. Below are the requirements of SB736 for which our evaluation method is in compliance.

- Must use student performance data
- Use continuous quality improvement models
- Performance data from multiple sources, including parental input
- Identify fields where special procedures/criteria are necessary
- Use the specific 4 levels of performance identified by the state
  - Highly Effective
  - Effective
  - Needs Improvement (or developing for new employees)
  - Unsatisfactory
- Train administrators in proper use
- Monitor / evaluate proposed use of system by evaluator
- Monitor / evaluate the effectiveness of the system to improve student learning

In addition, given that the school will be opening in 2014, we will be required to implement the new compensation requirements of SB736 as well. The salary schedule structure has not yet been developed, but will be developed within the next few months. We understand that the requirements for the compensation plan include:

- **Compensation Plan Elements:**
  - Teacher salary schedules may not be based on advanced degrees, but salary supplements based on degrees are permitted
  - Cost of living adjustments may not exceed 50% of the amounts given as annual adjustments
  - Annual adjustments for those who are rated “Effective” must be 50-75% of the value of raises given to those rated “Highly Effective”
  - Those scoring Needs Improvement, Developing, or Unsatisfactory shall not be eligible for annual adjustments.

For budgeting purposes, we have included in the budget a 3% annual increase in salary amounts, however, we realize that this 3% cannot be applied evenly over all staff members, and must be used to develop adjustments based upon the requirements of SB736 as listed above. This will mean that some employees, if they are in need of improvement, developing or unsatisfactory, may not receive annual adjustments.

## *Professional Development*

---

Teachers will be required to attend weekly staff meetings, four full-day professional development trainings throughout the year, and four preparation and staff development days before the school year starts.

The Principal and all PCS staff will be trained in the use of the AAI curriculum, LMS and assessment system by the AAI training staff. Onsite teachers, counselors, registrar, and administrators will learn how to run appropriate reports on student learning and assessment. Teachers and counselors will be able to log in as a student, parent, or educator and utilize all aspects of the AAI programs. AAI will also train teachers on the alignment of the curriculum to the CCSS/NGSS as teachers review the scope and

sequence of the courses and review course objectives. Pivot Charter School teachers will begin formulating additional group and individual projects that students can complete on site to supplement the curriculum. As projects are created they will be added to the AAI curriculum.

Teachers will engage in pre-school opening trainings for a period of five days. These sessions will be held between May and August, 2013. Three of these days will be conducted by AAI and will cover curriculum, systems and assessment topics. In addition to curriculum and systems training, onsite teachers will receive two days of personnel (child abuse reporting, sexual harassment training, labor practices, fire drills, health issues, etc.) training and team building activities.

In addition to training on the AAI system and curriculum, onsite teachers will be trained in serving students in a learning lab or learning studio environments with students working primarily on computers. Additional professional development trainings for onsite teachers will be conducted once a month (there are staff meetings weekly, but once a month, these meetings will be professional development-related rather than covering school operations and student issues). These trainings will occur in some of the topics listed below. In some cases, outside resources will be hired to present the topics in their areas of expertise. The Principal will conduct other trainings and work with the teachers to establish the agenda so that it meets the needs of the teachers. This is not a comprehensive list and may be revised based on teacher and student needs.

**Potential Professional Development Topics:**

- Serving students with special needs;
- 504 accommodations;
- Supporting students in virtual learning;
- Using assessment Data to inform instruction and developing educational programs;
- Student Goal Setting;
- Service Learning;
- Teaching Writing Strategies & Comprehension;
- FCAT HS test taking strategies;
- Student Led Conferences;
- Reflection on the first-year strategic planning;
- ELD;
- Project-Based Learning;
- End-of-year closeout.

Teachers will also be encouraged to suggest additional topics for professional development based on their needs throughout the year. Teachers are encouraged to read professional journals, attend webinars, and join professional teaching organizations like the National Science Teachers Association (NSTA). Other professional development opportunities include Advanced Placement workshops and attendance at conferences such as the annual International Council for Online Learning (iNACOL). Both onsite teachers and AAI teachers are afforded the opportunity to attend conferences in core academic subject areas in which they teach.

## *Section 13: Student Recruitment and Enrollment*

### *A. Recruitment Plan*

Marketing this new, innovative option for students and parents is essential to ensure widespread student participation and community support of such a pioneering endeavor. As part of its service contract, Advanced Academics' Inc.'s marketing communications team will work with the Pivot Charter School staff throughout the year to develop a turn-key marketing plan to reach the target student population.

Our marketing efforts will be to determine the right integrated marketing campaign to effectively generate the desired enrollment goals. Mediums of communication available to Pivot Charter School may include:

- TV advertising
- Radio advertising
- Newspaper advertising
- Website advertising
- Parent/Student informational sessions
- Email marketing campaigns
- Posters
- Custom website- (see <http://www.pivotcharterschool.com/index.html>)
- Custom brochures
- Education fairs where Pivot Charter School representative can hang signs, use tablecloths and distribute promotional materials and oversized postcards
- Corporate sponsorships

Pivot recognizes that students are often the best source of advertising and have the broadest reach. As such, the school may utilize social networking to spread the word about the school. Other Pivot schools have generated interest in the school by posting information on social networks such as Facebook. Pivot Florida also has an informational video created by students on its website, which is referenced above.

In addition to the use of the Internet, Pivot will set up table tents at food court tables in malls as well as mall advertisements, as this venue provides excellent exposure to the target audience. Prior to the start and throughout the school year, Pivot will also host for families open houses to highlight the unique learning lab environment. At these information sessions, parents and students will have the opportunity to learn more about the curriculum, schedule, service learning, and dual enrollment opportunities. Current staff and students will share success stories and answer any questions about the school. Marketing efforts may be adapted to best match the needs and interests of the local community.

## *B. Ensuring Reflective Balance*

---

Pivot Charter School will make efforts to recruit students of various racial and ethnic groups so as to achieve a balance that is reflective of the general population residing within the territorial jurisdiction of the district. Pivot Charter School will make available promotional materials in English as well as any other commonly spoken language in the area of the school, and make these available in a variety of locations such as libraries, places of worship, community and recreation centers.

The Pivot Charter School recruitment strategy includes the following:

- An enrollment timeline and process that allows a broad-based recruiting and application process.
- Distribution of promotional and informational materials to community groups and agencies that serve various racial, ethnic, and interest groups in the community.
- The appropriate development of promotional and informational materials in languages other than English to appeal to limited-English proficient populations.
- Submission of press releases to a variety of local media.
- Outreach meetings in several areas of the district to reach prospective students and parents.

Pivot Charter School is committed to serving all children, including those likely to “slip through the cracks” for lack of adequate support at home or school. We believe that our marketing efforts will adequately reach into the community to draw in a student body representative of the community and to meet our targeted enrollment. However, should these not be the case, the school will evaluate the marketing processes and adjust as necessary to ensure we are meeting our targets and that the student population is representative of the community.

## *C. Enrollment Policies and Procedures*

---

Pivot Charter School will be open on a first-come, first-served basis to any student residing within Sarasota County School District. There will not be any specific requirements for admission beyond age-appropriateness to enter 6th grade or higher.

Pivot Charter School will not charge tuition or registration fees, except those fees normally charged by other public schools.

In compliance with Section 1002.33(17)(a)(4) of the Florida Statutes, enrollment will not be denied to any eligible applicants on the basis of sex, race, religion, national origin, ancestry, pregnancy, marital or parental status, sexual orientation, or physical, mental, emotional or learning disability. Pivot Charter School will also not discriminate in its pupil admissions policies or practices whether on the basis of intellectual or athletic ability, measures of achievement or aptitude, or any other basis that would be illegal if used by any public school.

Admission preferences may only be given to existing students, siblings of existing students, children of a member of the governing board, or children of an employee of Pivot Charter School.

## *Enrollment*

---

Students may complete an enrollment form online or may submit one to the main school office. In conjunction with their application, students will be required to undertake a series of assessments and provide responses to questions that will be used to determine their academic levels in math and reading in order to assist the school in determining appropriate placement. Open enrollment packets will be accepted from January 1st to March 1st of each year.

The student and at least one legal parent or guardian must attend an orientation meeting (offered once a week) prior to beginning the program. At this meeting, a teacher will review the nature of the program, the student's responsibilities, student conduct, dress code, behavior, attendance, academic expectations, off-line and online curriculum, graduation requirements, schedules and career and continuing education options.

## *Enrollment Requirements*

---

Requirements for registration are listed below. Students under 18 years of age must be accompanied by a parent or guardian at registration and bring the required documentation. If coming from a public school within Florida, the following are required:

- transcript from the last school attended; the School's Admissions Coordinator will send for permanent record;
- verification of address or parents' address by one of the following:
  - current utility bill;
  - tax receipt;
  - contract for purchase of home
- authenticated birth date
- immunization records showing proof of proper immunization

If student is coming from a public school outside Florida or from any private school, the following are required:

- physical examination by a private physician or the County Health Department, within twelve months prior to entry of Florida Schools;
- report card or transcript from the last school attended; the school's Admissions Coordinator will send for permanent record;
- verification of address of parents' address by one of the following: current utility bill; tax receipt or homestead exemption card; contract for purchase of home;

Authenticated birth date can be verified by one of the following:

- Certified copy of birth certificate/State of Florida Birth Registration Card;
- Baptismal certificate showing date of birth, place of baptism, accompanied by parents' sworn affidavit;
- Insurance policy on the student in force for at least two years;
- Bible record of child's birth accompanied by parents' sworn affidavit;
- Passport or certificate of arrival in the United States showing age of child (view only)

- School record at least four years prior, showing date of birth;
- Parents' sworn affidavit accompanied by a certificate of examination from a health officer or physician verifying the student's age.
- Immunization records showing proof of proper immunization.

All students seeking attendance in the school must reside in the district where their parents or legal guardians reside.

If applications exceed the number of available seats, a public lottery will be held. The lottery process will follow the districts guidelines for the lottery and will be conducted in such a way so as to ensure that no possibility of discrimination against any type of student can exist. The successful applicants and their parent or guardian, if applicable, will be notified within 10 days of the completion of the lottery to confirm their acceptance.

## *D. Parent Contracts*

---

Pivot Charter School will not utilize a parent or family contract as a requisite for enrollment in the school.

## *E. Parental Involvement*

---

The Board of Directors of Pivot Charter School promotes ongoing and open communication between the Board and parents. Board Meetings will be open to the public and held in an effort to afford participation by as wide a spectrum of parents as possible. Governing Board meetings will include a standing agenda item for a report and/or comment opportunity for public comment.

As mentioned earlier, a Parent Teacher Advisory Board will also be established. Parents will be encouraged to attend back-to-school nights, parent workshops and meetings and parent conferences that provide parents and guardians the opportunity to tour the school, meet with teachers to discuss student progress and learn tips on how to support student learning and attendance.

While Pivot Charter School will create and distribute a Parent/Student Handbook, the school will not utilize a parent contract in its first year.

Parents and students will be required to participate in one of several frequently offered Webinars about Pivot Charter School. These Webinars are designed to promote an online community but mostly to review the program and describe the expectations and processes of the school and the online curriculum.

## *Business Plan*

# Section 14: Facilities

Pivot has not located a site yet.

## F. Facility Needs

*Explain the school's facility needs, including desired location, size, and layout of space.*

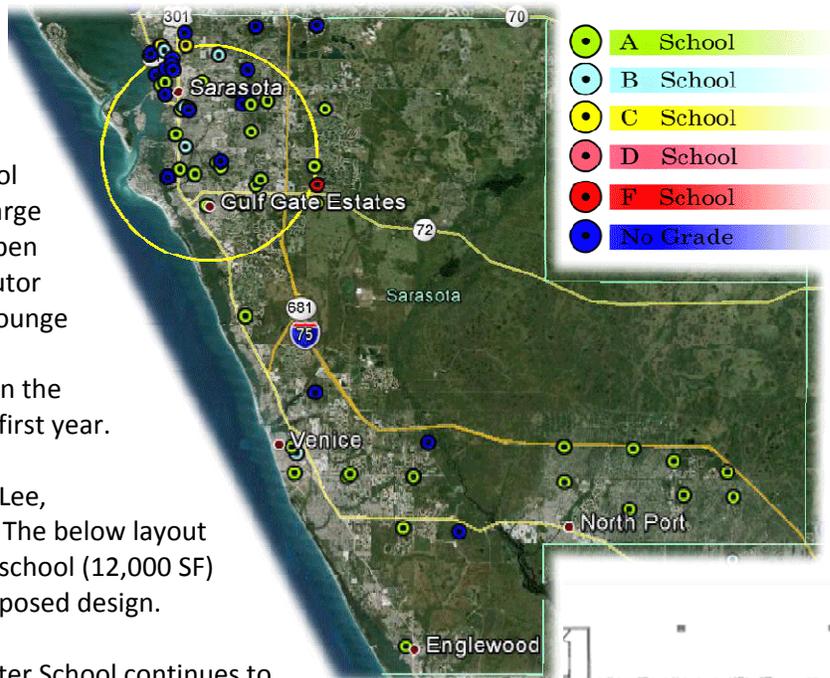

Pivot Charter School has completed a needs analysis of the Sarasota County. Based on that analysis, Pivot Charter School believes that locating Pivot Charter School in the Deltona area would be the most advantageous to the District and Pivot Charter School. As indicated in section two of this application, we used a search area with a five mile radius centered at the Southgate area (3170 Bee Ridge Rd, Sarasota). It is our intention to attempt to find a site within this search radius to open Pivot Charter School.

Pivot Charter School's proposed model is best supported with a school site with approximately 15,000 SF, large enough to accommodate multiple open Student Learning Centers, custom Tutor Rooms, Student Collaboration and Lounge areas, as well as administrative and registration areas. Our goal is to open the school with 12,000 to 15,000 SF the first year.

Pivot Charter Schools has schools in Lee, Hillsborough and Broward Counties. The below layout drawing of our Hillsborough/Tampa school (12,000 SF) provides a good overview of our proposed design.

As mentioned previously, Pivot Charter School continues to work with a Florida State Licensed Architect who specializes in the design and construction of public charter schools in Florida. His years of experience have provided us with great confidence in making sure all Pivot Charter School schools are compliant with all local, state and federal laws and that our schools provide a safe and welcoming environment for our students, staff and guests.

PCS facilities will comply with all applicable health codes, ADA requirements and all other Florida Building Codes pursuant to

chapter 553. The facilities will also comply with the Florida Fire Prevention Code, pursuant to chapter 633. In addition:

- The facility will receive a Type 'E' Certificate of Occupancy before the building is occupied as a School.
- In conjunction with zoning, permitting and occupancy, the facility will have an approved traffic and parking plan in place.
- The facility will be in compliance with Health Department requirements concerning general health and sanitation. These standards include food service, drinking water, sewer and sanitary facilities.
- The facility will be inspected for asbestos if applicable; radon tested if applicable, and meets any other requirements that may be relevant to the school site and the purpose.

## *G. Cost Estimate*

---

There are three primary costs associated with having the facility ready for the first day of school; Facility Design and Build-Out, Furniture and Computers & Equipment.

- Facility Design & Build-Out- Pivot Charter School has been working with a Florida-based school architect who has already completed three schools for PCS. After identifying a site that fits our requirements, we try hard to negotiate a majority of this cost into a tenant allowance in the building lease.
- Furniture- Pivot Charter School is working with a Michigan-based educational furniture manufacturer who has designed furniture specifically for our school's technology and design needs. The vendor is an FDOE approved provider. We estimate the cost of ALL furnishing the entire school, including furniture for students, staff and tutor areas will cost \$355 per student, a total of \$142,000.
- Computers & Equipment- In our two current schools, we are providing a PC at each student Learning Center desk, lap-tops for all teachers and administrators, additional laptops allowing students to be mobile in and out of school, as well as multiple printers. In addition, the school will be outfitted with various panel monitors, projectors and SMART Boards for individual and group tutoring. We estimate total cost for school technology for a full capacity school to be approximately \$185,000.

## *H. Acquisition Plan*

---

Once the Charter is approved by the District, Pivot Charter School will work with a local commercial real estate broker to further analyze the above mentioned area. Along with market and ROI analysis, PCS and the local broker will work to identify a final site location and finalize a lease approximately six months prior to the opening of school. Once the lease is signed, design and work schedule s will be finalized with the goal of a facility CO being obtained 4 weeks prior to the first day of school. Below is our estimated timeline:

- November 1, 2013 - Make decision on final property options
- November 5, 2013 – Begin due diligence on building-out of the facility

- December 15, 2013 – January, 2014 – Finalize building configuration with owner
- February, 2014 – April, 2014 – Begin construction and build-out and
- May 15, 2014 - Identify and order FF&E needs for July arrival
- May, 2014 – July, 2014 – Complete build-out, Inspections completed, Certificate of Occupancy and Operational process in place
- August, 2014 - School Opening

## *I. Back-Up Plan*

---

The design and build process is managed directly by a PCS Project Manager who oversees facility acquisition. With the project timeline well defined, PCS will have a tight handle on time milestones and will be able to react to any adverse issues that may affect the ability for the site to open as scheduled. In a case where the timeline creates an issue with opening on time, PCS will work closely with the District, keeping them apprised of the situation and working together to make sure an adequate solution to the problem is found.

Pivot Education Inc. has assembled a Strategic Planning Committee (SPC) made up of principals, a project manager, deputy director, executive director and at least one board member. The SPC meets at least quarterly and when needed to address pressing issues. As part of the committee's duties, they set short-term, mid-range and long-term planning goals and objectives.

The committee's responsiveness was tested when we opened our Ft. Myers schools, when Lee County zoning requirements threatened our ability to start school by August 8, 2011. Through the committee's quick response we were able to find an alternative site to open school until our permanent site was completed. The technology focus of school affords us the opportunity to provide instructional and curricular services as an on-demand product giving us more versatility to handle emergencies. An added benefit is that, students who experience personal emergencies have access to our curriculum and are able to continue their education while dealing with personal crisis.

## *J. Class Size Requirements*

---

The school understands the requirements for class size reduction and will meet class size in person with the EC's and the students, and the teachers of records will include AAI teacher to ensure that certification and class size requirements are met.

## *Section 15: Transportation Service*

### *A. Transportation Plan*

Pivot Charter school will ensure that transportation is not a barrier to equal access for all students residing within a reasonable distance of the charter school, as required by section 1002.33, F.S.

Pivot Charter School has contracted with A & S Transportation Services and provides bus transportation to our Hillsborough and Lee county campuses. A&S Transportation was founded in 1996 as a privately owned school bus company. Located in Naples, Florida, A&S

Transportation initially catered to parochial and private schools but has grown steadily since its inception and the company has expanded its domain to also transporting charter schools throughout the state of Florida. The full service school bus company allows school systems throughout Florida to focus on their educational programs rather than the distractions of transportation management.

In our two pilot districts, service is provided for students attending both the morning and afternoon sessions. Through a hub type service model, students are picked up at safe locations throughout the school's attendance areas. For students attending the morning session, service is available for both the AM and PM route. Transportation will be provided for the afternoon session once the afternoon session builds in capacity. Parents are responsible for transporting students home following the afternoon session until such time. Rider participation is good in each of the current districts.

Pivot Charter School will be responsible for all insurances, student behavior and discipline issues. All services will comply with the requirements of Subpart (I)(e) of Chapter 1006. Transportation service will be provided by the school to a student whose Individual Education Plan (IEP) stipulates so; in which case, all necessary arrangements will be made to ensure that transportation is not a barrier to equal access.

We also encourage our students to utilize a parent carpool. Once students are enrolled a scatter plot of addresses will be developed to determine the proximity of students to one another and the school. Cluster patterns will be defined and communicated to the President of the Parent Advisory Council (PAC) as a means of assisting in the organization of a parent carpooling system that can be mutually beneficial for families and the school.

## *Section 16:*

### *Food Service*

#### *A. Food Service Plan*

---

The school will not be providing meal service to its students as most students are not on campus for a meal time. Students will be offered nutritional snacks and beverages. Vending machine services with nutritious snacks will be provided to students in a dedicated vending area of the facility.

PCS does not plan on receiving state or federal lunch program monies. However, if the Sponsor deems it necessary to provide lunch services for students who qualify for free and reduced price meals during a lunchtime learning lab session, PCS will contract with a state approved lunch program service and partner with another NSLP provider as a satellite site.

# Section 17: Budget

## A. Operating Budget

Below is a chart indicating the budget summary for the first five years of operation. This is a complete estimate of our budget and we believe it is extremely conservative, as will be described below. The budget shows healthy net revenue each year and demonstrates the financial viability of Pivot Charter School. This summary below is broken down by general categories to provide a general overview, and show the complete financial structure. Attached as **Appendix C** is the complete operational budget.

|  | Planning<br>Year  | Year<br>One         | Year<br>Two         | Year<br>Three       | Year<br>Four        | Year<br>Five        |
|--|-------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| <b>Revenue</b>                             |                   |                     |                     |                     |                     |                     |
| Florida Educational Finance Program (FEFP) | \$ -              | \$ 1,248,484        | \$ 1,532,047        | \$ 1,805,843        | \$ 2,087,379        | \$ 2,376,826        |
| Capital Outlay                             | \$ -              | \$ 138,600          | \$ 144,776          | \$ 141,332          | \$ 135,663          | \$ 128,515          |
| Transportation Funds                       | \$ -              | \$ 30,188           | \$ 36,628           | \$ 42,818           | \$ 49,144           | \$ 55,610           |
| Interest from Loans                        | \$ 450,000        | \$ -                | \$ -                | \$ -                | \$ -                | \$ -                |
| <b>Total Revenue</b>                       | <b>\$ 450,000</b> | <b>\$ 1,417,272</b> | <b>\$ 1,713,451</b> | <b>\$ 1,989,993</b> | <b>\$ 2,272,186</b> | <b>\$ 2,560,951</b> |
| <b>Expenses</b>                            |                   |                     |                     |                     |                     |                     |
| <b>Academic Expenses</b>                   |                   |                     |                     |                     |                     |                     |

## B. Start Up Budget

Pivot Charter Schools is fortunate to have an extremely strong relationship with Advanced Academics, Inc. which provides the online curriculum to the school. AAI also has agreed to assist Pivot with the startup costs for our new schools. Through the agreement, AAI will loan the school \$450,000 to establish new schools. This loan is provided to the school at the federal prime rate when issued (currently 3.25 percent as of this writing). In order to budget conservatively, we have set the rate at 4 percent in our budget. This loan will be paid back over the course of six years, so that the entire balance will be paid at the end of the fifth year of operation. The debt service payments for these loans are included within our five-year budget.

The startup expenses during the planning year will mainly revolve around setting up our new school space, hiring the Principal to get started with interviewing, marketing, and setting the learning spaces at the school. We anticipate hiring the principal for about 3 months, and will also purchase equipment and materials to support this person in their role during the planning year.

The blended learning environment of Pivot requires a unique learning environment for the students. See section 14 to learn more about the facilities and how we setup our space. We plan to purchase the computers with these startup funds to outfit the space as well. This budget will allow us to purchase the furniture as well as 250 learning stations with computers, and an additional 50 laptop computers and tablets which can be used throughout the facility and by staff. We also will purchase several interactive whiteboards to facilitate the small group instruction essential to our instructional model.

The planning-year budget provides a realistic expectation regarding expenses to allow us to get the highest quality school open with plenty of time to spare for the first day of school.

| Func   | Obj  | Description                         | Planning Year Total |

## C. Assumptions

Pivot Charter School has developed our budget in as conservative way as possible to ensure the financial viability of this high quality charter school. We place high value on the prudent use of public funds, and believe our budget reflects this. At several key points during the development of this budget we have made decisions which we believe either underestimated our revenue or over-estimated our expenses to help ensure that we will be able to operate with a positive cash flow during the year. For example, while we anticipate being able to open our doors with a waiting list and all 241 seats filled, we have chosen to develop the budget assuming we will only be at 94% capacity. Therefore, the budget is developed on 224 students for the first year (and the same logic of 94% capacity is used throughout years two through five). We utilized the budget template tool developed by the Charter Support Unit in order to develop this budget.

Another example of our conservative budgeting is our assumptions regarding employee health insurance. We will offer each employee up to \$275 per month for health insurance premiums. We expect that not all staff members will want the school’s insurance, and while we could have rounded the number down to try to assume how many staff members would, we decided to budget based on all staff members utilizing this benefit. Therefore, we anticipate that there will be additional revenue saved within this account, but it is not demonstrated within the five-year budget, as we have reserved those funds just in case. There are several items within the budget that we believe we have overestimated our expenses in this way so as to provide us with a “cushion” to help with unexpected expenses throughout the year. We have included a reserve fund payment of 5% of our FEFP funding each year in case of unexpected expenses. We anticipate being able to carry over a 5% reserve.

## Revenue

We have made the assumption that there will 1.5% increases in FEFP funding from the State of Florida throughout the five year budget. Correspondingly, we have increased most of our expenses 1-2%, with the exception of salaries which we increased at a rate of 3% so that if revenues are less than expected we can reduce the increases in some of these areas. To illustrate the assumed per-student FEFP rate, the chart below indicates the rates we used for each student over the course of the five year budget.

### 4th – 8<sup>th</sup> Grade Revenue Estimates

|                           | Year 1           | Year 2           | Year 3           | Year 4           | Year 5           |
|---------------------------|------------------|------------------|------------------|------------------|------------------|
| <b>Base FEFP</b>          | \$3,629          | \$3,684          | \$3,739          | \$3,795          | \$3,852          |
| <b>Other Categoricals</b> | \$1,782          | \$1,809          | \$1,836          | \$1,863          | \$1,891          |
| <b>ESE Guarantee</b>      | \$4,155          | \$4,218          | \$4,281          | \$4,345          | \$4,410          |
| <b>Total Per Student</b>  | \$5,411          | \$5,492          | \$5,575          | \$5,658          | \$5,743          |
| <b>Budgeted Students</b>  | <b>60</b>        | <b>60</b>        | <b>81</b>        | <b>102</b>       | <b>123</b>       |
| <b>Total 4-8 Revenue</b>  | <b>\$336,138</b> | <b>\$341,032</b> | <b>\$465,267</b> | <b>\$593,089</b> | <b>\$724,578</b> |

### 9<sup>th</sup> – 12<sup>th</sup> Grade Revenue Estimates

|                           | Year 1           | Year 2             | Year 3             | Year 4             | Year 5             |
|---------------------------|------------------|--------------------|--------------------|--------------------|--------------------|
| <b>Base FEFP</b>          | \$3,669          | \$3,724            | \$3,780            | \$3,837            | \$3,894            |
| <b>Other Categoricals</b> | \$1,782          | \$1,809            | \$1,836            | \$1,863            | \$1,891            |
| <b>ESE Guarantee</b>      | \$4,155          | \$4,218            | \$4,281            | \$4,345            | \$4,410            |
| <b>Total Per Student</b>  | \$5,451          | \$5,533            | \$5,616            | \$5,700            | \$5,786            |
| <b>Budgeted Students</b>  | <b>184</b>       | <b>231</b>         | <b>254</b>         | <b>277</b>         | <b>321</b>         |
| <b>Total 9-12 Revenue</b> | <b>\$912,346</b> | <b>\$1,191,015</b> | <b>\$1,340,576</b> | <b>\$1,494,289</b> | <b>\$1,652,248</b> |

### Fiscal Year Revenue Estimates

|   | Planning Year  | Year One         | Year Two         | Year Three       | Year Four        | Year Five        |
|---|----------------|------------------|------------------|------------------|------------------|------------------|
| <b>Florida Ed. Finance Program (FEFP)</b> |                | 1,248,484        | 1,532,047        | 1,805,843        | 2,087,379        | 2,376,826        |
| <b>Capital Outlay</b>                     |                | 138,600          | 144,776          | 141,332          | 135,663          | 128,515          |
| <b>Transportation Funds</b>               |                | 30,188           | 36,628           | 42,818           | 49,144           | 55,610           |
| <b>Interest from Loans</b>                | 450,000        |                  |                  |                  |                  |                  |
| <b>Total Revenue</b>                      | <b>450,000</b> | <b>1,417,272</b> | <b>1,713,451</b> | <b>1,989,993</b> | <b>2,272,186</b> | <b>2,560,951</b> |

**Capital Outlay** – Pivot Schools, Inc. has received district accredited from SACS as a result of our operations in Hillsborough and Lee counties. As a result, Pivot Charter School will be eligible for capital outlay during the first year of operation. Given the legislature has dramatically increased the capital outlay for the 2013-14, we are assuming the capital outlay rates will be 50% higher next year, and then have assumed a decrease of 15% for each year thereafter.

**Transportation** - Given that we will be providing transportation to students, as described in section 15, we are assuming that approximately 25% of our students will utilize transportation. We intend to contract with an outside busing company to provide this service and have budgeted for a single bus in year one and multiple buses in the years thereafter. If fewer students utilize the transportation and this income item goes down, we will adjust the bussing contract accordingly and also reduce those expenses within the budget.

**Other/Loan-** As indicated above, AAI, our educational partner at Pivot has agreed to help offset the cost of opening the school by providing a \$450,000 loan to support the planning year and startup costs.

We have not included any type of fund raising nor grants in our budget assumptions, even though we do intend to seek out both sources of funding. Should we be successful in obtaining such funds they will be used to purchase additional supplies and materials above and beyond what is provided for within the approved operating budget.

## Expenses

Below is an explanation of the major expenses within the budget, and how we arrived at the assumptions. We have tried to explain any individual budget item that is over \$10,000 on the overall budget.

**Staff** - We put a strong emphasis on high quality on-site staff that is able to provide direct services and one-on-one and small group support to our students. As such, paying our staff adequate salaries is important. We have set our starting salary at \$42,000 and included an annual 3% increase in salary rates. Employees are also offered up to \$275 per month in health insurance benefits and we have set aside 3% of salaries for employee retirement plan deposits (we intend to use a 401(k) or 403(b) plan. The budget also includes paying for federal income tax, Medicare tax, workers compensation insurance and unemployment insurance for each employee. Employee costs also include a 1.7% administrative fee to cover the costs of the employee leasing company.

We also want to reiterate what has been stated earlier in this application regarding our system of utilizing stipends to pay for additional positions. For example, we have included in our budget two \$5,000 stipends for teachers who are endorsed and work with ESE students, who will be supported by the statewide ESE coordinator (which is paid for from the state's budget, not the schools). In addition, numerous staff members are provided by AAI as part of the blended model of instruction. For example, AAI agrees to provide a guidance counselor to work with the students on academic advising until the school reaches 300 students, allowing us to postpone hiring a guidance counselor until year two or three. The ESOL teacher is also a position support by a stipend.

|                                | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|--------------------------------|--------|--------|--------|--------|--------|
| <b>Educational Coordinator</b> | 6      | 7      | 7      | 9      | 9      |
| <b>Principal</b>               | 1      | 1      | 1      | 1      | 1      |
| <b>Guidance Counselor</b>      |        | 0.5    | 1      | 1      | 1      |
| <b>Lead EC 3</b>               |        |        | 1      | 1      | 1      |
| <b>Secretary/Registrar</b>     | 1      | 1      | 1      | 1      | 1      |
| <b>Office Assistant</b>        | 0.5    | 1      | 1      | 1      | 1      |
| <b>Educational Assistant</b>   | 2      | 2      | 4      | 4      | 4      |
| <b>Total Employees</b>         | 10.5   | 12.5   | 16     | 18     | 18     |

**Instructional Materials / Online Content Provider** – The largest expense related to our students is the innovative and all-inclusive online services from Advanced Academics, Inc. which includes not only the standards-aligned content and course offerings, but also access to certified teachers around the clock and the online services and content management system. This is at the heart of what makes Pivot charter schools successful. The first year this system has been budgeted at \$1,100 per student for the first year, followed by a 6% increase each year thereafter. This service is in place of any textbooks or other traditional classroom materials that traditional schools would need to purchase.

**Computer Equipment** – In order for students to successfully interact with their online lessons, adequate computer facilities are essential. We will purchase enough computers for all students who are in a

session to utilize their own machine, along with extras in case of technical difficulties or for students who need to take a machine off campus. Our plan is to purchase 250 thin client computers for \$600 and 50 laptops for \$750 during the planning year. It is our intention to purchase warranties on these machines to last for three years, and then in year three we will begin purchasing additional computers as replacements.

**Furniture** – As described within this application we expect to utilize individual student stations. We have set aside \$57,500 for furniture as part of our initial planning costs.

**Marketing / Printing** – We have included a significant amount of funds for printing and marketing to assist us in meeting our enrollment targets and getting the word out about the innovative new educational opportunity be started in the county.

**Facilities** – We are anticipating finding a space for Pivot school with about 15,000 square foot as a turn-key lease at a rate of about \$17 per square foot. We have also budgeted for an annual increase of 2.5% in this lease. We have been successful in obtaining similar leases in three other counties and are confident in our cost assumptions for the facility. The lease will include the custodial services and basic utilities (excluding electricity, which we calculated based on a \$1.00 per square foot rate plus an additional 2% annual rate increases).

**Supplies** - Our supply costs have been calculated on a per student basis based on the recommendations from the Charter Support Unit and our past experience. For example, 5100-510, academic supplies, was calculated by assuming \$50 per student for academic supplies.

**Support To The State Corporation** - Many of the services described throughout this document (i.e. executive director, ESE Coordinator, Reading Coordinator, etc.) are provided by the state organization. To offset the costs associated with this, the school will contribute \$100 per student during the first year, and \$200 each year thereafter to support the work of the state organization.

**Back Office Support** – We will be utilizing a third-party back office provider to ensure our accounting and financial needs are well met. This is represented in our budget at an estimated rate of about \$100 per student.

**District Administrative Fees** - We have assumed the district will keep a 5% administrative fee for up to 250 students during all five years of this budget.

## *D. Board Monitoring*

---

This budget has been developed with the assistance of charter school experts familiar with funding and costs associated with the successful operation of a charter school. The Board of Directors presents this as a sample projection based on the assumptions we are currently making about the operation of the school. It is our intention that by the spring of 2014 many of the assumptions that were made will be more clear (i.e. exact lease rates, legislative FEFP updates, etc.), at which time the Principal and the Board of Directors will develop a more comprehensive and complete budget for the first operating year. Once approved, the school will be required to operate within the parameters of the budget. Prior to spending anything outside of an approved budget amount, the Principal will be required to receive the approval of the Board of Directors.

Regularly throughout the year, the Board of Directors shall receive monthly financial reports. These reports will be prepared by the contracted 3rd party company providing back-office support to the school and will clearly delineate the financial performance of the school by providing up-to-date balance sheets, profit and loss statements and a comparison of actual spending in comparison to budgeted amounts. The board shall be presented a financial report at each Board of Directors meeting with the opportunity to get additional information about the financial status of the school and the progress towards meeting the budget.

The process we have used to develop this budget is, to the biggest extent possible, on per student expenditures, so that as student enrollment goes down, so does spending throughout the budget. The Board of Directors will be able to closely monitor spending and revenues to ensure the budget benchmarks are met, and if necessary spending can be addressed to find places to limit spending. As the final budget is developed there are key points within the budget that can be reduced if necessary to balance the budget, such as cutting down on the number of educational assistants for example.

## *E. Cash Flow Projections*

---

Cash flow projects based on the anticipated operating budget for the planning year and first year of operation are included in Appendix C.e and C.f to this application.

## *F. Fundraising Plan*

---

The school will conduct fundraising activities to supplement FTE funding. Examples of fundraising activities include Book Fairs, Yearbook Sales, School Pictures, and other such activities. The school will also seek grants from local and national sources to enrich the academic program. No fundraising amounts were assumed in the budget presented.

## *Section 18: Financial Management and Oversight*

### *A. Financial Manager*

The Board understands that it has the ultimate responsibility for the financial viability of each of the Pivot schools. The board takes this fiduciary responsibility seriously and has put policies and safeguards in place to ensure that the school's resources are accurately tracked and monitored. The day-to-day operations of the organization are delegated to the Executive Director and Principal of each school. The Board has also hired a back-office services provider to manage the financial processes and provide for extensive division of responsibilities to ensure proper checks and balances on the financial processes of the school.

The Principal will manage the day-to-day operations and site-based finances, including expenditures and receivables. The board has adopted policies whereby the Principal is able to approve purchases up to \$1,500, so long as it is in alignment with the budget. Purchases over \$1,500 require the permission of the Executive Director. Purchases over \$25,000 require the approval of a Governing Board member. The Board will oversee the Executive Director and Principal and will remain responsible for all financial matters delegated thereto. The process used to manage payables and accounting needs are as follows:

- When invoices are received by the school they are opened and scanned by the school's Secretary. The secretary then uploads them into the online system utilized by our back office provider. This then flags the transaction for the Principal, Executive Director and/or Board member to approve based on the amount of the transaction.
- The principal may only approve expenditures which are within the limits set by the Board of Directors through the budget. If an expenditure is more than \$500 over what the budget has allowed for, the Principal will be required approval from the Board of Directors prior to approving the purchase.
- The back office services provider will ensure that the invoice is properly coded using an industry standard accounting system in alignment with the Financial and Program Cost Accounting and Reporting for Florida Schools guidelines (Redbook). The checks will be returned to the school for signatures.
- Once signed, checks will be mailed to the vendor along with a copy of the invoice.
- When purchase orders are used they shall be prepared by the secretary and sent to the Principal for approval prior to being sent to the vendor. Once invoices are received, the PO and the invoice are combined and follow the above process.
- The back office service provider's online system allows us to issue POs and automatically encumber the funds against the annual budgeted amount so as to ensure proper tracking of school expenses.
- To the greatest extent possible, we will try to minimize cash receipts at the school. We will encourage parents to pay with checks, money order, or work with the back office service provider to establish some type of a credit card payment system so that as little cash as possible is received by the school.
- A detailed receipt system exists to provide receipts to the parents or families making payments and to account for money coming into the school.

- The Secretary shall prepare deposits, and have them verified by another staff member before depositing them at the bank. Deposits will be reported to the back office service provider so that they can enter them into the accounting system and ensure reconciliation with the school's accounts.
- The back office services provider will conduct monthly reconciliations on the school's accounts and provide reconciliation reports back to the Principal following each month.
- The back office services provider will prepare all necessary financial reports as described in the school's contract and supply them to the school district by the deadlines outlined in the contract.
- The back office services provider will prepare monthly financial reports for the Board of Directors which will at a minimum include a balance sheet, profit and loss statement, budget vs. actual spending and a detailed description of any discrepancies or potential shortfalls or overruns. This report will be shared with the Principal in advance of all Board meetings, who will ensure the Board receives a copy of the reports. It is expected that the service provider will also be available to answer questions and work with the board.
- Annually the Board of Directors will select an auditing firm to conduct that annual audit of the school's records. The back office services provider will assist with providing any necessary schedules and documents requested by the Auditor. The audit will be provided to the Board of Directors and sponsor by the timelines outlined in the school's contract.

## *Budgeting Process*

One of the most important tasks of the Board of Directors is establishing the annual budget. The budget will provide the Executive Director and Principal with the parameters in which spending and the academic program can be carried out. Part of the evaluation of both the Executive Director and the Principal is their ability to keep spending within the budget parameters.

The budgeting process will begin the April or May before each fiscal year begins. Once the school has reliable estimates of FEFP numbers from the state, the treasurer and/or the finance committee will work with the back office services provider and the Principal to develop a budget model based on the projected number of students. Once the model has been prepared it will be presented to the Board of Directors for discussion and approval. This budget will then provide the Principal with a framework for hiring and purchasing over the summer. In October or November, once the FTE counts have been completed the Board again reexamines the budget to adjust and modify the budget as necessary based on the updated student numbers. This process will occur again after the February counts. The Board can also reexamine the budget at any time it feels necessary based on the realities the school may be facing throughout the year.

By looking at the budget as an ongoing process, we believe we can manage the unexpected expenses which may arise from time to time, and ensure that the school maintains a healthy financial course into the future.

## *Monitoring the School's Financial Position*

The Board will work diligently to find ways to increase the efficiency of management systems to reduce costs while maintaining the high quality of services provided. One of the primary ways the Board does

this is through the use of the Back Office services provider. This vendor prepares all financial reports for the school and submits them to the Board of Directors for review and is available to answer any questions that arise from those reports. The Board reviews these reports at every board meeting, and often more frequently than meeting to monitor the financial stability of the school. These reports will include the following:

- **Cash-flow projection worksheet.** Covers a 12-month period and shows all anticipated financial obligations and expected cash revenues based on the existing work plan and budget. This worksheet helps to reveal if there will be any periods when funds will be insufficient to cover expenses. The worksheet should be updated each month to reflect any changes in cash projections.
- **Balance sheet.** This report shows the financial position of the charter school at a particular point in time. It summarizes the school's assets, liabilities (debts or payables) and reserves (equity or fund balance), which the board can use to assess the financial stability of the organization and to see whether its liabilities can be met.
- **Income statement.** Also known as a profit and loss statement, this report presents an analysis of the net income or deficit of the charter school over a defined period of time. The Board can use this report to assess the overall financial performance of the charter school by comparing actual income and expenditures with the budget. It can also be used to compare current income and expenditures with those of the previous year. Using this information, the board can advise the charter school administrator to revise budgets or work plans or to take actions to reduce costs and/or seek additional revenue.
- **Budget vs. Actuals.** This report is similar to the Profit and Loss statement but compares the actual expenditures and revenues for the year to the annual budget so that it can be determined whether spending is in alignment with the budget with one quick glance.

Capital investments also will be reviewed by the board. Capital investments accounts will be scrutinized to determine whether they are consistent with the organization's mission and strategic plan, and whether they are financially sound.

## *B. Financial Controls*

---

Pivot Charter School utilizes accepted state coding of accounts pursuant to the Financial and Program Cost Accounting and Reporting for Florida Schools in all transactions pertaining to its operations. The School will work with the back office service provider to ensure that financial statements are prepared monthly to present to the district and the School Board, and annual audited financial reports per state requirements that include a statement of revenues and expenditures will be prepared in accordance with generally accepted accounting principles.

A financial report will be given to the School Board of Directors at each of their meetings, as described in part A. This will allow the Board to closely monitor the financial health of the school. The Principal and the Governing Board Representative of the network will work together to create a quarterly report based on the criteria the Governing Board establishes, which will include key financial indicators to ensure the health and viability of the school.

## Auditor Selection

Pursuant to Florida Statutes §218.391, the Governing Board will establish an RFP process for selecting an auditor to conduct the annual audit. The RFP will include such factors as the ability of personnel, experience, and the ability to furnish the required services in a timely matter. While the cost of the service will be a factor, it will not be the sole or predominant factor used to evaluate the proposals which are received. We will be sure to publically announce the RFP process and to send the request to several accounting firms, especially those that deal specifically with charter schools. A deadline will be provided, and once the deadline has passed an ad hoc committee will review the proposals and recommend an auditor to the Board of Directors for selection. The Principal and back office service provider will work closely with the auditor during the process to ensure s/he has all of the information needed to complete the audit by the deadlines designated within the charter contract. We also will include as part of the RFP having the auditor prepare the required annual IRS form 990.

## *C. Accounting Maintenance*

Pivot Charter Schools utilizes the expertise of the back office service provider to ensure the appropriate filing and maintenance the school's accounting records. As described above, once invoices and payments are approved and ready, they will be sent to the provider. The provider then will ensure that all accounts are properly coded and recorded. The provider will maintain copies of all checks and backup documentation related to each transaction. The provider maintains digital copies of all of these materials, and has multiple on- and off-site backup systems in place to prevent against the possibility of loss of data.

## *D. Student Records*

Pivot Charter School will comply with the provisions of the Family Educational Rights and Privacy Act (FERPA) and IDEA in the establishment, maintenance, correction, and disposal of student records. The right to inspect and review educational records and the release of information, or instructional materials will be consistent with federal and state law.

In as much as practicable all student records will be protected and stored on-site in a secure fireproof and waterproof cabinet. In addition, backup copies of all electronic records will be stored on servers with additional off-site, secure backups. Student records are official and confidential documents protected by Florida Statute 1002.22 and the Federal Family Educational Rights and Privacy Act (FERPA) and will be treated as such.

## *E. Insurance Coverage*

The School will comply with requirements for insurance coverages as described within the negotiated charter contract. The School understands the need to maintain, and pay for, appropriate Commercial General Liability Insurance, Automobile Liability Insurance, Workers' Compensation Insurance and Professional Liability Insurance. The school intends to use a company that has an AM Best rating of an "A-" or better and a financial size category of "IV" or better. Evidence of insurance will be provided by the School to the Sponsor before the initial opening day of classes. Limitations on policies will comply

with state statute and the Charter School Agreement, the following is what we assume the requirements will be:

- **School Leaders Errors and Omission Insurance** - \$1M per claim/annual aggregate. Maximum of \$25K deductible.
- **Commercial General Liability Insurance** - \$1M per occurrence/\$3M annual aggregate. Maximum deductible for property damage will be \$1,000.
- **Automobile Liability Insurance** - \$1M per occurrence/\$3M aggregate. This policy will cover non-owned and hired autos as well.
- **Workers' Compensation Insurance** - As required by Florida statutes.
- **Property Coverage** - To cover all owned real property, furniture, fixtures and equipment.
- **Fidelity Bond** - Not less than \$1M.
- **Employees Liability Insurance** - \$1M per disease, accident and employee.

Where applicable, the school district will be named as an additional insured.

In addition to the insurance policies that cover the school itself, the school will also work with the payroll company to secure appropriate group policies for employees such as health insurance, dental, life, short- and long-term disability, etc.

# Section 19: Action Plan

## A. Timetable

### **Application Process**

|   |                   |

# STATEMENT OF ASSURANCES

This form must be signed by a duly authorized representative of the applicant group and submitted with the application for a charter school.

As the authorized representative of the applicant group, I hereby certify that the information submitted in this application for a charter for **Pivot Charter School** is accurate and true to the best of my knowledge and belief; and further, I certify that, if awarded a charter, the school:

- Will be nonsectarian in its programs, admission policies, employment practices and operations.
- Will enroll any eligible student who submits a timely application, unless the school receives a greater number of applications than there are spaces for students, in which case students will be admitted through a random selection process.
- Will adhere to the antidiscrimination provisions of section 1000.05, F.S.
- Will adhere to all applicable provision of state and federal law relating to the education of students with disabilities, including the Individuals with Disabilities Education Act; section 504 of the Rehabilitation Act of 1974; and Title II of the Americans with Disabilities Act of 1990.
- Will adhere to all applicable provisions of federal law relating to students who are limited English proficient, including Title VI of the Civil Rights Act of 1964 and the Equal Educational Opportunities Act of 1974.
- Will participate in the statewide assessment program created under section 1008.22, F.S.
- Will comply with Florida statutes relating to public records and public meetings, including Chapter 119, Florida Statutes, and section 286.011, F.S., which are applicable to applicants even prior to being granted a charter.
- Will obtain and keep current all necessary permits, licenses and certifications related to fire, health and safety within the building and on school property.
- Will provide for an annual financial audit in accordance with section 218.39, F.S.

The governing board, at its discretion, allows **Chris Card, Board Member** to sign as the legal correspondent for the school.

*Appendix A: Current Articles of Incorporation*

**ARTICLES OF INCORPORATION  
OF  
PIVOT EDUCATION, INC.  
(A Not Florida Corporation)**

THE UNDERSIGNED, as Incorporator and on behalf of a not-for-profit, non-stock corporation under the laws of the State of Florida, here by adopts the following Articles of Incorporation:

**ARTICLE I  
NAME**

**Section 1.1.** The name of the corporation is Pivot Education, Inc., (the "Corporation").

**ARTICLE II  
DURATION**

**Section 2.1.** The Corporation shall have perpetual existence unless dissolved pursuant to law.

**ARTICLE III  
NON-STOCK CORPORATION**

**Section 3.1.** The Corporation shall be organized on a non-stock basis under the Florida Not for Profit Corporation Act and may Issue of Certificates of Membership.

**ARTICLE IV  
PURPOSE**

**Section 4.1.** The purposes for which the Corporation is organized is for transacting any all lawful business for which corporations may be incorporated under the Florida Not for Profit Corporation Act and to distribute the whole of any part of the income therefrom and the principal thereof exclusively for charitable, religious, scientific, literary or educational purposes, either directly or by contributions to organizations that qualify as exempt organizations under Section 501(c)(3) of the Internal Revenue Code and Regulations issued pursuant thereto, as they now exist or as they may hereafter be amended.

**Section 4.2.** The Corporation shall have the power, either directly or indirectly, either alone or in conjunction or cooperation with others, to do any and all lawful acts and things and to engage in any and all lawful activities which may be necessary, useful, suitable, desirable or proper for the furtherance, accomplishment, fostering or attainment of any or all of the purposes for which a Corporation is organized, and to aid or assist other organizations whose activities are such as to further accomplish, foster or attain any of such purposes. Notwithstanding anything herein to the contrary, the Corporation shall exercise only such powers as are in furtherance of the exempt purposes of organizations set forth in Section 501(c)(3) of the Internal Revenue Code of 1986 and the regulations thereunder as the same now exist or as they may be hereinafter amended from time to time.

**Section 4.3.** No part of the net earnings of the Corporation shall inure to the benefit, or be distributable to, any Director or Officer of the Corporation or any other private individual (except that reasonable compensation may be paid for services rendered to or for the Corporation affecting one or more of its purposes); and no Director or Officer of the Corporation, or nay private individual, shall be entitled to share In the distribution of any of the corporate assets on dissolution of the Corporation.

**Section 4.4.** No substantial part of the activities of the Corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the Corporation shall not participate or Intervene In (Including the publication or distribution of statements) any political campaign on behalf of any candidate for public office.

**Section 4.5.** Notwithstanding any other provision of these Articles of Incorporation, the Corporation shall not conduct or carry on any activities not permitted to be conducted or carries on by an organization exempt from taxation under Section 501(c)(3) of the Internal Revenue Code and Regulations issued pursuant thereto as they now exist or as they may hereafter be amended, or by an organization contributions to which are deductible under Section 170(c)(2) of the internal Revenue Code and said Regulations as they now exist or as they may hereafter be amended.

**Section 4.6.** Upon the dissolution of the Corporation, the Board of Directors shall, after paying or making provision for the payment of all of the liabilities of the Corporation, dispose of all of the assets of the Corporation, exclusively for the purposes of the Corporation In such manner, or to such organization or organizations organized and operated exclusively for charitable, educational, religious or scientific purposes, as shall at the time qualify as an exempt organization or organizations under Section S01(c)(3) of the Internal Revenue Code of 1985 (or the corresponding provisions of any future United States Internal Revenue Law), as the Board of Directors shall determine. Any of such assets not so disposed of shall be disposed of by the court having proper jurisdiction in the county where the principal office of the Corporation is then located, exclusively for such purposes or to such organization or organizations, as said court shall determine, which are organized and operated exclusively for such purposes. Pursuant to Section 1002.33(8)(e), Florida Statutes, upon dissolution, all unencumbered public funds and property purchased with public funds, will revert to the ownership of the School District sponsor.

## **ARTICLE V** **DIRECTORS**

**Section 5.1.** The manner in which the directors are elected or appointed are set forth in the Bylaws.

**Section 5.2.** The initial Board of Directors shall consist of the following members elected in accordance with the Bylaws:

| <b><u>Name</u></b> | <b><u>Address</u></b>                                   |
|--------------------|---|
| Chris Card         | 2805 W. San Rafael St.<br>Tampa, Florida 33629          |
| Wayne Folsom       | 754 Dusparc Circle<br>Tallahassee, Florida 32312        |
| Elizabeth VanAcker | 5266 Beach Dr SE Apt B<br>St. Petersburg, Florida 33705 |

**Section 5.3.** The term of office of an elected Director shall be one (L) year and shall expire, regardless of whether or not a successor shall have been duly elected and qualified. The terms of elected Directors shall be staggered so that no elected Director's term expires less than four (4) months before the expiration of the next elected Director.

## **ARTICLE VI** **ADDRESS**

**Section 6.1.** The street address of the principal office of this corporation in the State of Florida is:

2675 Winkler Ave., Suite 200Fort Myers, FL 33901

The Board may, from time to time, move its principal office in the State of Florida to another place in this state.

## **ARTICLE VII**

**REGISTERED AGENT AND REGISTERED OFFICE**

**Section 7.1.** The registered agent and registered office of the Corporation shall be:

**Name**  
Jeffrey 5. Wood

**Address**  
One Financial Plaza, Suite 2602  
Ft. Lauderdale, Florida 33394-1697

**ARTICLE XIII  
BYLAWS**

**Section 8.1.** The Board of Directors of this Corporation shall adopt Bylaws for the government of this Corporation which shall be subordinate only to the Articles of Incorporation and the laws of the United States and the State of Florida. The Bylaws may be amended from time to time by the Board of Directors.

**ARTICLE IX  
INCORPORATOR**

**Section 9.1** The name and address of the Incorporator of this Corporation are as follows:

**Name**  
Jeffrey 5. Wood

**Address**

Ft. Lauderdale, Florida 33394-1697

**CERTIFICATE DESIGNATING PLACE OF BUSINESS OR DOMICILE  
FOR THE SERVICE OF PROCESS WITHIN THIS STATE,  
NAMING AGENT UPON WHOM PROCESS MAY BE SERVED**

In pursuance of Section 48.097 and Section 007.0501(3), Florida Statutes, the following is submitted in compliance with said Sections:

Pivot Education, Inc. desiring to organize under the laws of the State of Florida with its principal office as indicated in the Certificate of Incorporation, at the City of Bradenton, County of Manatee, State of Florida, has named Jeffrey S. Wood, located at One Financial Plaza, Suite 2602 in the City of Fort Lauderdale, County of Broward, State of Florida, as its agent to accept service of process within this State.

*Appendix B: Current Bylaws*

BY LAWS OF  
OF  
PIVOT EDUCATION, INC.  
(A Not-For-Profit Florida Corporation)

ARTICLE I  
NAME

**Section 1.1.** Name. The name of the Corporation shall be Pivot Education, Inc., (the “Corporation”).

ARTICLE II  
BOARD OF DIRECTORS

**Section 2.1.** Management. All powers of the Corporation shall be exercised by and under the authority of the Board, and the property, business and affairs of the Corporation shall be managed under the Boards direction. Except as specifically set forth to the contrary herein, the Board may not take any action, except upon the approval thereof by the affirmative vote of a majority of the Board present at a meeting at which a quorum of no less than forty percent (40%) of the Board is present. The affirmative vote of not less than a majority of the then current board members at a duly noticed meeting shall be necessary for all actions by the Board relating to the following:

2.1.1. Approval of charitable gifts, transfers, distributions, and grants by the Corporation to other entities;

2.1.2. Adoption of an amendment to the Articles of Incorporation or the Bylaws;

2.1.3. Organization of a subsidiary or affiliate by the Corporation; and

2.1.4. Approval of any merger, consolidation or sale or other transfer of all or a substantial part of the assets of the Corporation.

**Section 2.2.** Number of Directors. The initial Board shall consist of three (3). The number of Directors may be increased to no more than eighteen (18) and decreased to no fewer than three (3) by a majority vote of the Board. In the event of an increase in the number of Directors, the additional directorships created shall be filled in a manner prescribed herein for the Election of Directors in accordance with Section 4.4.

**Section 2.3.** Nomination of Directors. Not less than one month prior to a regular meeting, the Board may appoint a nomination committee to consist of no fewer than two (2) Board members. The nomination committee will compile and submit to the Board a slate of candidates for the directorships and offices to be filled at the upcoming meeting. These submissions shall be deemed to be nominations of each person named.

**Section 2.4.** Election of Directors. Directors shall be elected by the Board at any meeting when there is an expiring term from a slate of nominees.

**Section 2.5.** Vacancies. Vacancies occurring in an elected Directorship, however caused, shall be filled as soon as practicable by election in accordance with Section 4.4 hereinabove. Except for a Director elected due to the natural expiration of his predecessor’s one-year term, a Director so elected to fill a vacancy shall hold office of the remainder of his predecessor’s term.

**Section 2.6. Resignation or Removal of Directors.** A Director of the Corporation may resign at any time by tendering his resignation in writing to the Corporation, which resignation shall become effective upon the date specified therein, or if no date is specified, upon receipt by the Corporation at its principal place of business. Any elected Director may be removed at any time, with or without cause, by a majority vote of the other Directors. A Director who is an officer that has been removed as set forth in Section 4.7. is automatically removed as a committee member.

**Section 2.7. Compensation of Directors.** Directors will not receive compensation for services rendered in their capacities as Directors. The Corporation will follow Section 112.313(10) and 112.313(3), Florida Statutes, which prohibits an employee of a political subdivision in the State from also holding office as a member of the governing board, and which prohibits a public officer, acting in a private capacity, from selling goods or services to that person's agency.

**Section 2.8. Annual Meetings of the Board.** The annual meeting of the Board shall be held without other notice than this Bylaw during the second week of September of each year, unless the Board, by resolution, provides for a different time and place for the holding of such annual meetings. The annual meeting may be held at such other time and place, without other notice than such resolution.

**Section 2.9. Special Meetings.** Special meetings of the Board may be called at any time by the President of the Corporation. Further, special meetings of the Board must be called by the President within fourteen (14) days of receipt of a written request of any two (2) or more Directors. Written notice of special meetings shall be given to each Director not less than two (2) days prior to such meeting. The notice shall set forth the time, place and purpose of the meeting. The business to be transacted at any special meeting shall be limited to those items set forth in the notice or waiver thereof.

**Section 2.10. Regular Meetings.** The Board shall meet at least four (4) times each year, including the annual meeting, each such meeting being approximately three (3) months from the date of the previous regular or annual meeting. The Secretary shall mail notice of all regular and annual meetings to each Director at the address on file with the Secretary at least fourteen (14) days prior to a meeting, indicating the date, place and time of the meeting.

**Section 2.11. Quorum and Action of the Board.** Forty percent (40%) of the Directors must be present in person at a meeting to constitute a quorum for the transaction of business at such meeting. Except as otherwise provided by law, the Articles of Incorporation, or these Bylaws, the affirmative vote of at least two (2) Directors present at a meeting at which a quorum is present shall be necessary for an action of the Board. A majority of the Directors present, whether or not a quorum exists, may adjourn any meeting of the Board to another time and place. Notice of any such adjourned meeting shall be given to the Directors who were not present at the time of adjournment.

**Section 2.12 Parliamentary Authority.** Unless agreed to by a majority of the current Directors, the rules contained in *Robert's Rules of Order* shall govern the meetings of the Board.

### **ARTICLE III** **OFFICERS**

**Section 3.1. Number.** The Corporation may have a President, Vice President, Secretary and Treasurer, each of whom shall be elected by the Board. Such other officers and assistant officers as may be deemed necessary may be elected or appointed by the Board. Any two (2) or more offices may be held by the same person. The failure to elect an officer shall not affect the existence of the Corporation.

**Section 3.2. Election and Term of Office.** All officers of the Corporation shall be elected by a vote of the Board as set forth in Section 4.1 hereinabove at the annual meeting of the Board. A duly elected officer shall hold office for a term of three (3) years, commencing at the close of the annual meeting, and until their earlier death, resignation or removal.

**Section 3.3. Vacancies.** A vacancy in any office because of death, resignation, removal, disqualification or otherwise (including removal in the event an officer is not reelected during his term in office) shall be filled by an election by the Board as set forth in Section 4.1 for the remaining unexpired term of such office.

**Section 3.4. Resignation or Removal of officers.** An officer of the Corporation may resign at any time by tendering his resignation in writing to the President or the Secretary. Resignations shall become effective upon the date specified therein or, if no date is specified, upon receipt by the Corporation. An officer of the Corporation may be removed at any time, with or without cause, at any meeting of the Board by a vote of the Board as set forth in Section 4.1 hereinabove.

**Section 3.5. President.** The President shall preside at all meetings of the Board. He or she shall act as a duly authorized representative of the Board and the Corporation in all matters in which the Board has not formally designated some other person to act. He or she shall report as directed to the Board at each meeting. He or she may sign, with the Secretary or any other proper officer of the Corporation authorized by the Board, deeds, mortgages, bonds, contracts or other instruments which the Board has authority to execute, except in cases where the signing and execution thereof shall be expressly delegated by the Board or by these Bylaws to some other officer or agent of the Corporation, or shall be required by law to be otherwise signed or executed; and in general, shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board from time to time.

**Section 3.6. Vice-President.** The Vice-President shall act in the place and stead of the President in the event of the President's absence, inability or refusal to act, and shall exercise and discharge such other duties as may be required of him by the Board.

**Section 3.7. Secretary.** The Secretary shall keep or cause to be kept all of the records of the Corporation, record or cause to be recorded the minutes of the meetings of the Board, send out or cause to be sent out all notices of meetings of the Board and all Committees, attest to the seal of the Corporation where necessary or required, authenticate records of the Corporation and keep or cause to be kept a register of the names and addresses of each Director. The Secretary shall perform such other duties as may be prescribed by the Board.

**Section 3.8. Treasurer.** The Treasurer shall insure or cause to be insured that a true and accurate accounting of the financial transactions of the Corporation is made and that such accounting is presented to and made available to the Board. The Treasurer shall perform such other duties as may be prescribed by the Board.

**Section 3.9. Other Officers.** Other officers elected by the Board shall have such duties and responsibilities as the Board deems advisable.

**Section 3.10. Succession of Officers.** Unless otherwise directed by a vote of the Board, in the event that an officer of the Corporation has not resigned or been removed but is unable to act in such position for a period of one (1) month or more, whether due to disability or other reason, then another officer of the Corporation shall serve in that office until such officer is either removed or is able to perform his services in the following order:

**3.10.1** The Vice President shall perform the services of the President.

**3.10.2.** Any other officer may perform the services of the Secretary in his or her absence.

**3.10.3.** The Secretary shall perform the services of the Treasurer.

**3.10.4.** The President shall perform the services of the Vice President.

**Section 3.11. Salaries.** Officers will not receive compensation for services rendered as officers of the Corporation. The Corporation will follow Section 112.313(10) and 112.313(3), Florida Statutes, which prohibits an employee of a political subdivision in the State from also holding office as a member of the

governing board, and which prohibits a public officer, acting in a private capacity, from selling goods or services to that person's agency.

## **ARTICLE IV** **COMMITTEES OF THE BOARD**

**Section 4.1. Committees of the Board.** The Board may, by resolution, establish standing committees and special committees of the Board. Unless otherwise specified by resolution of the Board or these Bylaws, the President shall annually appoint the members and the chairmen of the standing committees and shall fill vacancies on any standing committee. Appointments by the President shall be made at the annual meeting of the Board. In addition, the President may, if so authorized by the Board, appoint the members and chairmen of such special committees as the Board may create, which members and chairmen may include persons who are not members of the Board. All committee appointments and chairmen appointments must be approved by a vote of the Board.

**Section 4.2. Standing Committees.** Standing committees shall be created as required by resolution of the Board. The purpose, duties, number of members and reporting requirements of each standing committee shall be specified in the resolution creating the committee.

**Section 4.3. Special Committees.** Special committees shall be created as required by resolution of the Board. The purpose, duties, number of members and reporting requirements of each special committee shall be specified in the resolution creating the committee.

**Section 4.4. Committee Members' Term of Office.** Unless otherwise specified by resolution of the Board, members of each committee shall continue in office until the next annual meeting of the Board and until their successors are appointed, unless the committee of which they are members shall be sooner terminated by resolution of the Board or until their earlier death, resignation or removal as committee members.

**Section 4.5. Committee Meetings.** Meetings of any committee may be called by the chairman of such committee or upon the written request of one-third (1/3) of the committee members. The call for any meeting shall be by giving notice of such meeting which sets forth its time and place and is delivered to the residence or place of business of the committee members as listed in the Secretary's office at least two (2) weeks prior to such meeting. Unless otherwise provided in these Bylaws, a majority of the members of any committee shall constitute a quorum for the transaction of business. After a quorum has been established at a committee meeting, the subsequent withdrawal of committee members from the meeting so as to reduce the number of committee members present to fewer than the number required for a quorum shall not affect the validity of any action taken at the meeting. Each committee shall keep minutes of its meetings and report to the Board as necessary with recommendations.

**Section 4.6. Resignation or Removal of Committee Members.** A member of any committee may resign at any time by tendering his resignation in writing to the President of the Board. The Board, by a vote, may remove, with or without cause, any member from a committee and specifically, but not by way of limitation, may remove any member from a committee for failing to attend three (3) consecutive meetings of the committee. A director who is a member of a committee that has been removed as set forth in Section 4.6. above is automatically removed as a committee member.

## **ARTICLE V** **INDEMNIFICATION OF DIRECTORS AND OFFICERS**

**Section 5.1. Indemnification.** The Corporation shall indemnify to the fullest extent permitted by law each of its officers, Directors, whether or not then in office (and his executor, administrator and/or heirs) or any person who may have served at its request as a director or officer, of another corporation, partnership, joint venture, trust or other enterprise as well as the executor, administrator and heirs of any of them against all reasonable expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and necessarily incurred by him in connection with any threatened, pending or completed action, suit, proceeding or arbitration, whether civil or criminal, administrative or investigative (including any appeal

thereof), to which he is or is threatened to be made a party because he is or was a Director, officer, employee or agent of this Corporation, or such other corporation, partnership, joint venture, trust or other enterprise. He shall have no right to reimbursement, however, in relation to matters as to which he has been adjudged liable to the Corporation for gross negligence or willful misconduct in the performance of his duties to the Corporation. The foregoing right of indemnification shall be in addition to and not exclusive of all other rights to which such Director, officer, employee or agent may be entitled.

**Section 5.2. Insurance.** The Corporation may purchase and maintain insurance on behalf of any person who is or was a Director, officer, employee or agent of the Corporation or who is or was serving at the request of the Corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against him and incurred by him in any such capacity or arising out of his status as such, whether or not the Corporation would have the power to indemnify him against such liability under the provisions of this Article VII.

## **ARTICLE VI** **CONTRACTS. CHECKS. DEPOSIT BOOKS AND RECORDS**

**Section 6.1. Contracts.** The Board may authorize any officer or officers, agent or agents, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the Corporation, and such authority may be general or confined to specific instances.

**Section 6.2. Loans.** No loans shall be contracted on behalf of the Corporation and no evidences of indebtedness shall be issued in its name unless authorized by a resolution of the Board, which authority may be general or confined to specific instances.

**Section 6.3. Checks, Drafts, Etc.** All checks, drafts or other orders for the payment of money, notes or other evidences of indebtedness issued in the name of the Corporation shall be signed by such officer or officers, agent or agents of the Corporation and in such manner as shall from time to time be determined by resolution of the Board.

**Section 6.4. Deposits.** All funds of the Corporation not otherwise employed shall be deposited from time to time to the credit of the Corporation in such banks, trust companies or other depositories as the Board may select.

**Section 6.5. Conflicts of Interest.** The Board will adopt a Policy on Conflicts of Interest.

**Section 6.6. Books and Records.** The Corporation shall keep correct and complete books and records of account and shall keep minutes of the proceedings of its Board and committees of the Board. Any books, records and minutes may be in written form or in any other form capable of being converted into written form within a reasonable time.

**Section 6.7. Financial Statements.** Not later than two (2) months after the close of each fiscal year, the Corporation shall prepare a balance sheet showing in reasonable detail the financial condition of the Corporation as of the close of its fiscal year, a profit and loss statement showing the results of the operations of the Corporation during its fiscal year, and any other financial statements as may be required by a resolution of the Board. The balance sheets and profit and loss statements shall be filed in the principal office of the Corporation, shall be kept for at least five (5) years, and shall be subject to inspection during business hours by any Board member.

## **ARTICLE XII** **FISCAL YEAR**

**Section 7.1. Fiscal Year.** The fiscal year of the Corporation shall end on July 1 of each year.

## **ARTICLE XIII**

## CORPORATE SEAL

**Section 8.1. Corporate Seal.** The Board shall provide a corporate seal which shall be circular in form and shall have inscribed thereon the name of the Corporation and the state of incorporation and the words "Corporate Seal."

## ARTICLE IX NOTICE

**Section 9.1. General.** Whenever, under the provisions of any statute, the Articles of Incorporation or these Bylaws, notice is required to be given to any Director or officer, it shall not be construed to require personal notice; rather, such notice may be given, unless otherwise required by these Bylaws, either personally or by depositing the same in a post office box in a postpaid envelope, transmitting by facsimile or by delivering the same to a telegraph company for transmission by wire, the cost thereof being prepaid, in either case addressed to such Director or officer at his address as the same appears in the records of the Corporation. The notice shall be effective as set forth in Florida Statutes Section 617.0141.

**Section 9.2. Waiver.** Whenever by law, the Articles of Incorporation or these Bylaws notice is required or permitted to be given to any Director or officer, a waiver thereof in writing signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be equivalent to the giving of such notice. Attendance of a person at a meeting shall constitute a waiver of notice of such meeting, except when the person attends a meeting for the express purpose of objecting at the beginning of the meeting to the transaction of any business because the meeting is not lawfully called or convened. The business to be transacted and the purpose of any special meeting of the Board shall be specified in any written waiver of notice thereof.

## ARTICLE X AMENDMENTS

**Section 10.1. By Directors.** These Bylaws may be amended or repealed wholly or in part, consistent with any bylaws adopted by the Board, at any meeting at which a quorum is present by an election by the entire Board in accordance with Section 4.1 hereinabove.

## CERTIFICATE OF SECRETARY

I certify that I am the duly elected and acting Secretary of the Pivot Education, Inc, a Florida not-for-profit corporation; that these bylaws, consisting of eight (8) pages including this page, are the bylaws of this corporation as adopted by the Board of Directors on October 9, 2012; and that these bylaws have not been amended or modified since that date.

**18. Funding for the purpose of calculating the administrative fee for ESE Charters.** (h)

If you have more than a 75% ESE student population please place a 1 in the following box: \_\_\_\_\_ \$ \_\_\_\_\_ -

**NOTES:**

- (a) District allocations multiplied by percentage from item 6A.
  - (b) District allocations multiplied by percentage from item 6B.
  - (d) Proceeds of 0.748 millage levy (s. 1011.71(3)(b), Florida Statutes) multiplied by percentage from item 6A.
  - (e) Consistent with Section 1006.21, Florida Statutes and DOE Student Transportation General Instructions. Numbers entered here will be multiplied by the district level transportation funding per rider. "All Riders" should include both basic and ESE Riders. "ESE Student Riders" should include only ESE Riders.
  - (f) Teacher Lead Program Allocation per Section 1012.71, Florida Statutes
  - (g) Funding based on student eligibility and meals provided, if participating in the National School Lunch Program.
  - (h) Consistent with Section 1002.33(20)(a), Florida Statutes, for charter schools with a population of 75% or more ESE students, the administrative fee shall be calculated based on unweighted full-time equivalent students.
  - (i) As provided in the 2013 General Appropriations Act, school districts are required to pay for instructional materials used for the instruction of public school high school students who are earning credit toward high school graduation under the dual enrollment program as provided in section 1011.62(l)(i), Florida Statutes.
  - (j) The Teacher Salary Allocation is provided pursuant to Specific Appropriation 87, Chapter 2013-40, Laws of Florida, and Section 26 of Chapter 2013-45, Laws of Florida.
- Administrative fees charged by the school district shall be calculated based upon 5 percent of available funds from the FEFP and categorical funding for which charter students may be eligible. For charter schools with a population of 251 or more students the difference in the fee calculation and the fee withheld may only be used for capital outlay purposes specified in Section 1013.62(2) F.S. To calculate the administrative fee to be withheld for schools with more than 250 students, divide the school population into 250. Multiply that fraction times the funds available, then times 5%.*
- For high performing charter schools, administrative fees charged by the school district shall be calculated based upon 2 percent of available funds from the FEFP and categorical funding for which charter students may be eligible. For charter schools with a population of 251 or more students the difference in the fee calculation and the fee withheld may only be used for capital outlay purposes specified in Section 1013.62(2) F.S. To calculate the administrative fee to be withheld for schools with more than 250 students, divide the school population into 250. Multiply that fraction times the funds available, then times 2 percent.*
- FEFP and categorical funding are recalculated during the year to reflect the revised number of full-time equivalent students reported during the survey periods designated by the Commissioner of Education.*
- Revenues flow to districts from state sources and from county tax collectors on various distribution schedules.*

# Welcome to the Florida Charter School Budget Template

July 22, 2013  
Version 1.12

This template has been developed to assist charter schools develop a comprehensive budget, both currently existing schools and those who are applying to start a new school. The tool has been developed to walk the user step by step through a variety of specific questions. The questions have been written in such a way so as to allow anyone from the most experienced charter school leader to a new Board member to walk through the process and develop a complete budget.

As you enter questions throughout the survey the bottom line of the budget will automatically be updated. At the top of each sheet you will see an "Ongoing Budget Totals" block which will give you the current income, expenses and bottom line for each year of the budget. This will allow you make sure you are maintaining a budget which is in the black.

**For additional support on how to use this tool, please login to <http://flcsu.org/moodle/login> and then go to the "Budget Template Tool" area**

Before we begin, we need some basic information about your school.

|  |
|--|
| Select Which District your School Is In: |
| What is the name of your school:         |

|                      |
|----------------------|
| 58-Sarasota          |
| Pivot Charter School |

← Click the cell, and then click the arrow next to it to select your district.

← Type in the name of your school here.

We recommend that you go through each tab of this tool and answer all of the questions on how you would ideally like to operate your school, without paying too much attention to the bottom line during the first time through. This will help you to become familiar with the various options and all of the types of expenses and income you can adjust. Then, once you have completely read through and answered all of the questions, go back and change your answers as necessary to balance the budget, this time paying attention to the bottom line and trying to ensure you have a balanced budget.

The tool has multiple pages (or tabs), each page focuses on a different area. Be sure to use go through each sheet of the workbook (by clicking on the tabs along the bottom). The tool is color coded with general information that you should be aware of:

Any cell that is this color contains a comment, hover your mouse over the cell to read the comment.

Any cell that is this color is information you can change. As you change the information it will update the overall budget estimates automatically.

Blue text are instructions and information describing the questions and concepts being asked about.

Any where the calculator requires a specific response (such as functions or budget numbers) there is a drop down list, click on the cell and the arrow next to it to select the appropriate option.

*Grey italicized numbers show the results of the decisions you make as you go along.*

Once you are complete with this tool, and your Board has approved the budget, we recommended that you keep this file so that you are able to see how you calculated each item of your budget. If you are using this to develop a charter application, the answers here can help to justify your application and provide information to use in your budget narrative. You may want to send this entire spreadsheet to your district for your budget, so that they are able to see the logic behind your budget. You are not bound to the specific decisions as part of this survey, you are only approving the overall budget, which is on the "Complete Budget" page. Sharing the decisions simply helps the district to understand your reasoning and offer suggestions if necessary.

If you have questions about the tool itself, you may contact the Charter Support Unit by visiting [flcsu.org](http://flcsu.org), calling (727) 286-3185 or by emailing [cfuller@flcsu.org](mailto:cfuller@flcsu.org).

| 5th Grade    | 22                 | 0                                 | 0      | 0      | 0      | 0      |
| 6th Grade    | 22                 | 1                                 | 1      | 2      | 2      | 2      |
| 7th Grade    | 22                 | 1                                 | 1      | 1      | 2      | 2      |
| 8th Grade    | 22                 | 1                                 | 1      | 1      | 1      | 2      |
| 9th Grade    | 25                 | 2                                 | 3      | 3      | 3      | 3      |
| 10th Grade   | 25                 | 2                                 | 2      | 3      | 3      | 3      |
| 11th Grade   | 25                 | 2                                 | 2      | 2      | 3      | 3      |
| 12th Grade   | 25                 | 1                                 | 2      | 2      | 2      | 3      |

|                          |       |   |
|--------------------------|-------|---|
| Percentage of seats full | 94.0% | In order to budget conservatively, enter the percentage of your total possible enrollment you think is realistic. For example, if you enter 95%, for a class of 22 students, the calculator will assume that the class will actually have about 21 students when it calculates your estimated income. It is better to under-estimate how many students you will have than over estimate, so be sure to leave some room for error. |
|--------------------------|-------|---|

| Total Classes      | 10  | 12  | 14  | 16  | 18  |
|--------------------|-----|-----|-----|-----|-----|
| Max Enrollment     | 241 | 291 | 338 | 385 | 432 |
| Assumed enrollment | 224 | 271 | 315 | 359 | 403 |

- ← This is the minimum number of classrooms you will need.
- ← This is the maximum number of students each year.
- ← Budget will be based on these numbers.

### Special Populations

The section below is for you to estimate the PERCENTAGE of students you anticipate in each special category at each grade level. Some categories go up as students get older, and others go down. For example, often more students have Speech and Language needs at the earlier levels (ESE) but more students are added to Gifted as they get older. The state of Florida releases detailed statistics which can be used to get an idea of the percentages for the district you are applying for. Visit <http://www.fldoe.org/eias/eiaspubs/pubstudent.asp> to check the numbers for your area. Some counties, for example, have significantly higher ESOL populations, some have higher free and reduced lunch populations, etc.

|              | ESE Students | Gifted Students | ESOL Students | Free/Reduced Lunch |
|--------------|--------------|-----------------|---------------|--------------------|
| Kindergarten | 0%           | 0%              | 3%            | 60%                |
| 1st Grade    | 0%           | 0%              | 3%            | 60%                |
| 2nd Grade    | 0%           | 0%              | 3%            | 60%                |
| 3rd Grade    | 0%           | 0%              | 3%            | 60%                |
| 4th Grade    | 0%           | 0%              | 3%            | 60%                |
| 5th Grade    | 0%           | 0%              | 3%            | 60%                |
| 6th Grade    | 10%          | 3%              | 3%            | 60%                |
| 7th Grade    | 10%          | 3%              | 3%            | 60%                |
| 8th Grade    | 10%          | 3%              | 3%            | 60%                |
| 9th Grade    | 10%          | 3%              | 3%            | 60%                |
| 10th Grade   | 10%          | 3%              | 3%            | 60%                |
| 11th Grade   | 10%          | 3%              | 3%            | 60%                |
| 12th Grade   | 10%          | 3%              | 3%            | 60%                |

The section below is just for your information. Based on the percentages you entered above, the numbers below represent how many students you can expect in each grade section in each category. These numbers will be important to help you to decide how many staff members you need in the next section. The percentages you entered above are applied to the estimated number of students (based on the percentage of open seats), and then rounded up to the nearest whole number.

The following options are unusual, and you should only use them if you know they apply to you. Most ESE students are considered basic ESE students. However, in some rare cases a student may have a very high degree of special needs, and the IEP team will complete a matrix of services to determine what level the student is. For students who are levels 4 or 5 receive additional funding. In general, most schools will not have students who are at level 4 or 5.

|                            | Kind-3rd | 4th - 8th | 9th - 12th |
|----------------------------|----------|-----------|------------|
| How Many Level 4 Students? | 0        | 0         | 0          |
| How Many Level 5 Students? | 0        | 0         | 0          |

Enter TOTAL number of students in each grade range. The calculator will use the same number for each year of the budget. However, unless you KNOW you will have students who meet this criteria, you should say 0.

|                     | Kind-3rd |   |
|---------------------|----------|---|
| ESE Focused School? | No       | State law provides for different income calculations for those schools who have at least 75% of their students who are ESE. In general, this will not apply to most schools, and you should leave this as "No", however, if you are a special ed focused school, this may apply to you. |

## Staffing Assumptions

The tool below will help you decide how many teachers you will need to be able to work with your estimated number of students. By entering the number of minutes of instruction for each of the special areas, the calculator will calculate the number of teachers you would need in order to provide the desired level of services to your students. In the yellow boxes below enter the NUMBER OF MINUTES you want your students to have EACH WEEK of each of the following areas:

|      | Art | Music | Wrlld Lng | Phys Ed | Rdg Spec | Other 1 | Other 2 |
|------|-----|-------|-----------|---------|----------|---------|---------|
| Kind | 30  | 30    | 30        | 150     | 90       | 0       | 0       |
| 1st  | 30  | 30    | 30        | 150     | 90       | 0       | 0       |
| 2nd  | 30  | 30    | 30        | 150     | 60       | 0       | 0       |
| 3rd  | 30  | 30    | 30        | 150     | 45       | 0       | 0       |
| 4th  | 30  | 30    | 30        | 150     | 45       | 0       | 0       |
| 5th  | 30  | 30    | 30        | 150     | 45       | 0       | 0       |

|             |      |   |
|-------------|------|---|
| Teacher FTE | 1875 | How many minutes can a full-time teacher teach during the week? |
|-------------|------|---|

For middle and high schools teachers are usually calculated based on sections as opposed to the number of minutes. The following questions will help to determine the number of teachers you will need for middle and high school students.

|  | Middle School (6-8) | High School (9-12)  |
|--|---------------------|---|
| Number of sections per day in the master schedule        | 4                   | 4<br><small>(i.e. 4 periods a day for block periods, 7 periods or 8 periods a day for more traditional schedules etc.)</small>                                      |
| How many sections per day does a full time teacher teach | 4                   | 4<br><small>Include only instructional time (time with students, not planning time).</small>  |
| Number of non class size sections per day                | 4                   | 4<br><small>Not all courses are required to follow class size amendments. Enter the number of sections per day not required to meet class size requirements</small> |

|   |           |           |  |
|---|-----------|-----------|--|
| <b>Class Size in NON CORE courses</b>     | <b>44</b> | <b>50</b> | Enter the maximum class size you will allow in none core courses that are not required to meet class size reduction numbers. |
| Recommended Number of Teachers for Year 1 | 2         | 4         |  |

|                         |           |   |
|-------------------------|-----------|---|
| <b>ESE Case Load</b>    | <b>30</b> | What is the maximum number of students one full-time ESE teacher can provide services to in your school?                              |
| <b>Gifted Case Load</b> | <b>40</b> | What is the maximum number of students one full-time Gifted teacher can provide services to in your school?                           |
| <b>ESOL Case Load</b>   | <b>50</b> | If you are going to have specialized ESOL staff at your school, how many ESOL students can one full-time teacher provide services to? |

Based on your answers above, the calculator has calculated the number of teachers you will need to have. To the right of each yellow box below is a small gray number, this is the number of teachers you will need to meet the minutes and services based on the assumptions you have entered above. In the yellow boxes, you can set the number of teachers you want. Be sure to enter the numbers based on "Full Time Equivalence" ... this means that a full time teacher is 1.0, a half time teacher would be 0.5.

|   |  | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Budget Function | Budget Object |

|                                 |          |  |
|---------------------------------|----------|--|
| <b>Teacher Salary</b>           | \$42,000 | Enter the AVERAGE full-time teacher salary you anticipate (remember this is average, so if one teacher makes \$38,000 and another makes \$45,000 the average would be \$41,500). If you are an already existing school and would rather enter your actual staff and their salaries for a more precise budget, you can use the "Staff List" page to add those staff members.                                    |
| <b>Annual Increases</b>         | 3.000%   | Enter the PERCENTAGE of ANNUAL INCREASES you anticipate in staff pay.  |
| <b>FTE For Benefits</b>         | 0.8      | What FTE (Full Time Equivalency (% of full time)) does someone need to be at in order to receive benefits from the school (i.e. if a teacher needs to work at least 30 hours a week, you would enter 0.75 (30 divided by 40)).   |
| <b>Combine for Benefits</b>     | Yes      | When calculating benefits, do you want to combine positions to make more people full time? If you answer 'Yes', a 0.4 and a 0.6 position will be counted as 1 teacher, and that person will get benefits. If you answer 'No', it will count those positions as two separate positions, and each would be evaluated separately to see if they work enough hours based on your answer above to receive benefits. |
| <b>Substitutes - Number</b>     | 0        | How many substitutes PER TEACHER do you anticipate paying for each year? (In otherwords, how many sick or personal days do you anticipate each teacher taking/being allowed?)  |
| <b>Substitutes - Pay</b>        | \$90.00  | How much will you pay a substitute per day?  |
| <b>Pay Teachers Unused PTO?</b> | No       | Some schools choose to pay teachers at the end of the year for their unused Paid Time Off. This provides an incentive to teachers to not call in sick or use their sick or personal time, and prevents teachers from building up large number of sick days in future years. Will you pay teachers for their unused Paid Time Off?  |

**Employer / Payroll Costs**

The items below are expenses the school will probably need to pay as an employer. Read the description for each item and make a decision in order to budget accordingly.

Benefits - Some schools budget for benefits based on a percentage of the total salary (For example, you will pay up to x% of a person's salary in benefits), and others choose to budget based on a set amount per employee (For example, the school will pay \$4,000 per employee for health insurance benefits). You can choose one or both of the options if you would like.

|   |          |  |
|---|----------|--|
| <b>Employee Benefit PERCENT</b>                 | 3.000%   | If you offer a percentage package for employee benefits, enter the percentage here. For example, if you offer a 3% of salary retirement package, or if you offer a cafeteria package valued up to 16% of their salary, etc.  |
| <b>Benefit PER EMPLOYEE</b>                     | \$3,300  | If you pay for a certain amount of employee benefits PER EMPLOYEE, enter that amount here. For example, if the school will pay for health insurance premiums, enter the amount per employee that the school will pay here.   |
| <b>How much of benefits towards retirement?</b> | 35%      | There are two line items on the budget for employee benefits, group insurance plans and retirement. For the purposes of this calculator, the total benefits amounts will be broken down based on this number. For example, if you have \$100,000 and you choose to direct 25% towards retirement, \$25,000 will go towards retirement and \$75,000 will go to employee benefits. This doesn't affect the overall bottom-line, just the placement of the funds. |
| <b>FICA</b>                                     | 6.20%    | Enter the federal Employer FICA Rate (Typically stays at 6.2%)   |
| <b>Medicare</b>                                 | 1.45%    | Enter the federal Employer Medicare Rate (Typically stays at 1.45%)  |
| <b>Federal Unemployment Percent</b>             | 0.00%    | Enter the maximum amount you will pay per employee in Federal Unemployment Tax   |
| <b>Federal Unemp. Maximum Cap</b>               | \$       | (If you are your own employer (not using a leasing company), and you have obtained 501(c)(3) status, you may be exempt from FUTA). Rates are available at <a href="http://www.oui.doleta.gov/unemploy/uitxtopic.asp">http://www.oui.doleta.gov/unemploy/uitxtopic.asp</a>  |
| <b>State Unemployment Percent</b>               | 2.70%    | Current Florida Unemployment rates can be accessed from:   |
| <b>State Unemp. Maximum Cap</b>                 | \$ 8,000 | <a href="http://dor.myflorida.com/dor/taxes/reemployment.htm#pay">http://dor.myflorida.com/dor/taxes/reemployment.htm#pay</a> . In 2013 the rate is 2.70% on the first \$8,000   |
| <b>Worker's Comp</b>                            | 1.250%   | Enter the percentage of salary you are charged for Worker's Compensation Insurance.  |

Most charter schools use an agency to assist with payroll and benefits, such as an employee leasing company or a PEO (Professional Employment Organization). Depending on the services you are using from the company, they usually charge on either a per-employee, per-paycheck rate, or a percentage of the total payroll. You can enter both before, but usually you will select one or the other based on the payroll options you are using.

|                                  |        |  |
|----------------------------------|--------|--|
| <b>Payroll Fees PERCENT</b>      | 1.700% | If you are paying payroll fees based on a PERCENTAGE of salary (i.e. you are using a full service leasing company), enter the percentage you are charged here. |
| <b>Payroll Fees PER EMPLOYEE</b> | \$     | If you are paying payroll fees based on a FLAT RATE PER EMPLOYEE / PER YEAR, enter the per employee amount here per year.                                      |

## Supplemental Payments

Some schools give supplements to their teachers for duties above and beyond what they do in the classrooms. For example, some schools will give stipends to teachers who take on extra curricular activities such as sports, clubs, etc. Others will give supplements to teachers who take on more ESE students or additional responsibilities to assist with these responsibilities. The options below will allow you to add in these stipends. You will need to pay taxes and payroll costs associated with these stipends, however, these amounts will not be included when calculating benefits. All stipends will be added to the "160" Object line (Other Support Personnel). Enter the total amount of stipends you plan to give, if any. For example, if you plan to give five \$500 stipends for extra curriculars, you could put \$2,500 (5 x 500) in a single line and mark it as an academic stipend.

| Stipend Description           | Pln Yr Totals | Year 1 Totals | Year 2 Totals | Year 3 Totals | Year 4 Totals | Year 5 Totals | Budget Function |

## Income Decisions

| Ongoing Budget Totals | Ping Yr    | Year 1       | Year 2       | Year 3       | Year 4       | Year 5       |
|-----------------------|------------|--------------|--------------|--------------|--------------|--------------|
| Estimated Income      | \$ 450,000 | \$ 1,509,660 | \$ 1,826,876 | \$ 2,123,765 | \$ 2,426,887 | \$ 2,737,174 |
| Estimated Expense     | \$ 418,024 | \$ 1,424,207 | \$ 1,675,861 | \$ 1,932,669 | \$ 2,214,047 | \$ 2,372,394 |
| Net Revenue           | \$ 31,976  | \$ 85,453    | \$ 151,015   | \$ 191,096   | \$ 212,840   | \$ 364,780   |
| Cash Balance          | \$ 31,976  | \$ 117,429   | \$ 268,444   | \$ 459,540   | \$ 672,380   | \$ 1,037,160 |

### Virtual School

Virtual schools are funded on a different basis than traditional schools. They receive a flat rate per student for each student. There is not a current income calculator available for this, and the state has recommended using \$5,200 per full-time student. If you are a virtual school indicate so below, and the calculator will use ignore the rest of the FTE increase options. Unless you have a loan or special income considerations, you can skip the rest of this page.

|   |      |
|---|------|
| Is your school a virtual school?              | No   |
| What is your anticipated pass rate? (Percent) | 100% |

You only receive full FTE on virtual students if they pass 100%. Otherwise you receive a prorated portion.

|  | Year 1     | Year 2     | Year 3     | Year 4     | Year 5     |
|--|------------|------------|------------|------------|------------|
| What per-student rate would you like to assume for virtual students? | \$5,200.00 | \$5,226.00 | \$5,252.13 | \$5,278.39 | \$5,304.78 |

### State Revenue Estimator Results

The calculator has used the State's Revenue Estimator Worksheet Based on the First Calculation of the FEFP 2013-14. The calculator has used the enrollment data entered on the 'Enrollment and Staff' worksheet. Here is a summary of your income based on the state revenue estimator:

|   | Estimator           |
|---|---------------------|
| FEFP - Base Funding                       | \$ 851,779          |
| FEFP - ESE Guarantee                      | \$ 27,588           |
| FEFP - Supplemental Academic Instruction  | \$ 45,696           |
| FEFP - Class Size Reductions              | \$ 204,772          |
| FEFP - Other FEFP (WFTE Share)            | \$ 5,679            |
| FEFP - Discretionary Local Effort         | \$ 152,722          |
| FEFP - Discretionary Millage Compression  | \$ -                |
| FEFP - Proration to Funds Available       | \$ -                |
| FEFP - Discretionary Lottery              | \$ -                |
| FEFP - Instructional Materials Allocation | \$ 17,573           |
| FEFP - Dual Enrollment Instr. Materials   | \$ -                |
| FEFP - Teacher Salary Allocation          | \$ 37,187           |
| Transportation (All Riders)               | \$ 19,880           |
| Transportation (ESE Student Riders)       | \$ 8,184            |
| <b>Total Income</b>                       | <b>\$ 1,371,060</b> |

If you have not answered questions about transportation yet, you may not see numbers here yet. Transportation questions are on the 'Services' worksheet.

This is your total FEFP revenue, but DOES NOT include the district withholding administrative fees.

### Historical Reference

Before entering income assumptions, it might be helpful to review the historical data regarding FEFP amounts over the last several years. Below is a chart of how much the state distributed per student. Analyzing this number can show you the percentage increase (or decrease) over the last several years. This will assist you to make an educated decision about what percentage increase or decrease (if any) you wish to assume in your projections.

|                                  | State Base FEFP | State Total UFTE | Base Allocation Increase | Other Funds Increase | Sarasota's Base Allocation | Sarasota's Total UFTE | Elem School ESE Guarantee | Middle School ESE Guarantee | High School ESE Guarantee |
|----------------------------------|-----------------|------------------|--------------------------|----------------------|----------------------------|-----------------------|---------------------------|-----------------------------|---------------------------|
| Sarasota's District Differential |                 |                  |                          |                      | 1,001                      | 1,001                 |                           |                             |                           |

Revenue amounts are determined by taking the state's base student allocations and student enrollment numbers, and multiply it times the district's allocation, and then by Program Calculator which acknowledges that educating Elementary or High School students are more expensive than middle school students. These numbers have changed every year. The historical program numbers are below. In addition, some charter schools are eligible for Capital Outlay (generally those who have been in existence for more than three years, or those that are accredited). The historical numbers for each of these are below as well. This information is for your information and comparison only.

|         | Program Cost Factors |                   |                   |

### Custom Income Assumptions

As you can see from the historical numbers, you can not depend on increases in FTE funds each year. Therefore, you must make careful decisions about how you will calculate the FTE amounts each year. This calculator allows you to enter a percentage increase you would like to assume each year of the budget. Be careful to be conservative, it is better the under budget and have more money than expected than to over estimate the annual increases and have less money then you expected. If you assume numbers will be decreasing (such as with Capital Outlay funds, for example), be sure to enter a NEGATIVE NUMBER.

| Planning Year | Base FEFP Increase | Other Funds Increase | ESE Guarantee Increase |
|---------------|--------------------|----------------------|------------------------|
| Year 1        | 0.000%             | 0.000%               | 0.000%                 |
| Year 2        | 1.500%             | 1.500%               | 0.000%                 |
| Year 3        | 1.500%             | 1.500%               | 0.000%                 |
| Year 4        | 1.500%             | 1.500%               | 0.000%                 |
| Year 5        | 1.500%             | 1.500%               | 0.000%                 |

| Capital Outlay Inc/Decrease |
|-----------------------------|

|-----------------------------|
| Yes                         |

The calculator assumes that the State Income Calculator numbers are the planning year numbers.  
 Percentage increase for Year one of the budget (Mouse over this cell for more information).  
 The percentage you enter will be a percentage above the Year 1 amount.  
 The percentage you enter will be a percentage above the Year 2 amount.  
 The percentage you enter will be a percentage above the Year 3 amount.  
 The percentage you enter will be a percentage above the Year 4 amount.

| Planning Year | Program Cost Factors |                   |                   |
|---------------|----------------------|-------------------|-------------------|
|               | Elem Program Factor  | MS Program Factor | HS Program Factor |
| Year 1        | 1.125                | 1.000             | 1.011             |
| Year 2        | 1.125                | 1.000             | 1.011             |
| Year 3        | 1.125                | 1.000             | 1.011             |
| Year 4        | 1.125                | 1.000             | 1.011             |
| Year 5        | 1.125                | 1.000             | 1.011             |

The numbers listed here for years 1-5 are the average of the numbers used over the last three years. You may change them if you would like, however, in general we recommend you leave them as is.

### Title 1 Funds

Title 1 Funds are only for schools that have a high poverty level. Each district sets its own threshold and reimbursement amounts based on their district's Title 1 plan. If Title 1 funds are used as part of the budget for a charter school application, the application must state what the funds will specifically be used for, and if the school does not receive these funds, whatever was indicated as being paid for these funds would not be essential to the operation of the school. If you are using this budget to develop a budget an existing school, be sure to realize that on financial reports, you must utilize fund-based accounting, and that Title 1 Funds must be separated from your general fund. This budget calculator does not do that for you. If you are unsure how to set this up, be sure to speak with your school's CPA.

|                      |     |  |
|----------------------|-----|--|
| District's Threshold | 70% | Enter the district's threshold to be eligible for Title 1 Funds. |
|----------------------|-----|--|

Your school has 56% FRL. You are not eligible based on these assumptions.

If you are eligible, enter the levels and amounts per eligible student that your district provides you. You will need to contact your district to get this information, unless it is listed above as a district message. Each district will have their own plan about how Title 1 funds are distributed to schools.

| Amount Per Student | Threshold Levels |  |  |
|--------------------|------------------|--|--|
|                    | 70%              |  |  |
| \$                 | -                |  |  |

If there is more than one threshold, please be sure to enter these in sequential order (the lowest % in the left box, and the highest in the right box)

### Financing

Some schools seek financing to assist with meeting the financial needs, especially in their early years. The options calculate the additional funds from financing, and automatically includes the payments of the financing in the budget as well. The calculator allows you to enter different loans for each year, and it will amortize and calculate the payments separately. Some charter schools are able to find an organization to loan them funds as an "interest only" loan, if you have been able to locate such a deal, enter the number of years for which it is interest only (for example, if you have a 5-year loan, and it is interest only for two years, you would enter the term as 5, and the interest only length as 2. If you are not able to secure such a deal, be sure to leave the Interest Only line as 0.

|                               | Ping Yr    | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|-------------------------------|------------|--------|--------|--------|--------|--------|
| Loan Amount (Dollars)         | \$ 450,000 | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Interest Rate (Percent)       | 4.000%     | 6.000% | 0.000% | 0.000% | 0.000% | 0.000% |
| Term/Length of Loan (Years)   | 6          | 3      | 3      | 3      | 3      | 3      |
| Interest Only Length? (Years) | 0          | 0      | 0      | 0      | 0      | 0      |

Based on the information you entered above, your debt service payments are calculated below in gray. To give you additional flexibility if you have a special financing package you can enter in the actual numbers in the yellow boxes below, the numbers in the yellow boxes below are what will be used in your final budget. If you change these numbers, be sure to include an explanation as an appendix to your budget.

|                                 | Ping Yr     | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|---------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Calculated Debt Service Amounts | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 |
| Debt Service Amounts To Use     | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 | \$85,842.86 |

## Other Income Amounts

Below are other income areas you can include in the budget, if they apply to you. Bear in mind that if you are submitting a charter application, most of these income types are frowned upon in charter applications unless you have a letter of support indicating that the funds will be available. For example, if you have a management company or benefactor who is providing a start-up grant, be sure to include a letter indicating where those funds are coming from. Most districts prefer not to see fund raising funds listed in an operating budget, as there is no guarantee that the funds will be able to be collected. As always, it is better to budget conservatively and end up with more money than expected, than to end up with less money than expected.

|                             | Ping Yr | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|-----------------------------|---------|--------|--------|--------|--------|--------|
| CSP Planning Grant          | \$0.00  | \$0.00 | \$0.00 | \$0.00 | \$0.00 | \$0.00 |
| Financial Backer / Donation | \$0.00  | \$0.00 | \$0.00 | \$0.00 | \$0.00 | \$0.00 |

| Cash Balance          | \$ 31,976  | \$ 117,429   | \$ 268,444   | \$ 459,540   | \$ 672,380   | \$ 1,037,160 |

### Building Size Needs

In order to determine the size of the building, we recommend looking at the number of anticipated students, and an estimated square footage per student. At a minimum we recommend you consider at least 55-square feet per student. If you are offering a school with a specialty that requires more space, you will want to consider more space per student. The chart below is the maximum number of students if you meet your limits from the Enrollment page. Enter what square footage you would like per per student to calculate the total building size you should be looking for.

| Estimated Sq. Ft. per student | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|-------------------------------|--------|--------|--------|--------|--------|
| 30                            | 241    | 291    | 338    | 385    | 432    |
| Building Size:                | 7,230  | 8,730  | 10,140 | 11,550 | 12,960 |

### Building Costs

There are a variety of ways charter schools pay for their facilities. Some pay a traditional rental amount per square foot, some pay per student, and other have special deals. If you already operate a school, you likely know the exact amount of building costs, you can enter it on row 28 below. Otherwise, there are three calculators for various ways of calculating the facility costs. BE SURE TO COMPLETE THE METHOD TYPE ON ROW 21 to identify which method you are using, so that the calculator knows which method to use when calculating the budget. Rental costs are represented on the budget on line 7900-360, whereas debt service is on 7900-720.

|                               |   |  |
|-------------------------------|---|--|
| Facilities Calculation Method | 2 | Enter the number (1 - 4) to identify which method you are using to calculate facility costs. (See below)<br>1 = Exact Costs, 2 = Per Square Foot Calculator, 3 = Per Student Calculator, 4 = Purchase Financing Calculator |
|-------------------------------|---|--|

#### Enter Exact Costs

If you know the exact costs of your facility, you may enter them here (i.e. if you already have a lease or contract for a facility)

|   | Ping Yr   | Year 1   | Year 2        | Year 3        | Year 4        | Year 5        |
|---|-----------|--|---------------|---------------|---------------|---------------|
| Enter ANNUAL amount                       | \$ 250.00 | \$ 450,000.00  | \$ 600,000.00 | \$ 750,000.00 | \$ 750,000.00 | \$ 800,000.00 |
| Is this a lease or debit service payment? | 1         | Enter 1 for lease payments or 2 for debit service (loan) payments. |               |               |               |               |

#### Rental Costs - Per Square Foot (Traditional)

Rental space varies significantly based on the location. Rural, less expensive areas may be able to find rental space for as low as \$8-10 per square foot per year, whereas expensive urban areas may need to pay \$20-22 per square foot per year. If we have specific information regarding your county, it will be displayed on the next line. It is also customary for many leases to have annual increases in the rental amount (i.e. 2%). Some charter schools also try to negotiate a "ramp up" schedule in their lease that allows for lower rates in the first year or two, and then has more significant increases later.

No information available for Sarasota county.

|                             | Ping Yr | Year 1        | Year 2        | Year 3        | Year 4        | Year 5        |
|-----------------------------|---------|---------------|---------------|---------------|---------------|---------------|
| Building Size (Square Feet) | -       | 15,000.0      | 15,000.0      | 15,000.0      | 15,000.0      | 15,000.0      |
| Annual Cost Per Square Foot | \$ -    | \$ 17.00      | \$ 17.43      | \$ 17.86      | \$ 18.31      | \$ 18.76      |
| Total Estimated Annual Cost | \$ -    | \$ 255,000.00 | \$ 261,375.00 | \$ 267,909.38 | \$ 274,607.11 | \$ 281,472.29 |

### Per Student Facility Estimate

Occasionally charter schools are able to negotiate leases based on a per-student payment as opposed to per square foot. This is particularly helpful to charter schools as it helps to manage facility costs in relation to actual enrollment. This is most common in situations where a school is leasing space from a church or community organization of some sort.

### Financing Calculator (To Purchase Building)

Some schools (usually schools that have been established for a few years) look at purchasing their facilities instead of continuing in leases. The calculator below is a simple mortgage calculator. Many times charter schools will look at using not-for-profit municipal bonds or other financing methods, in which case the payment amounts may be different than that created by this calculator, and you should manually enter the amounts you received from the financial consultant or financial institution you are working with on row 28 above (using optin #1). However, if you are in the planning process, this will assist you with making basic assumptions.

|                             |                |  |               |               |               |               |

### Other Facilities Costs

There are several ways we can calculate the costs of operating the facility. Some expenses, such as electricity, can be calculated based on a per-square-foot calculation, others based on the number of classrooms, some based on the number of students and others we need to just make an educated guess. The following costs are included in function 7900 regarding operating your facility.

|                                |                |               |               |               |               |               |
|--------------------------------|----------------|---------------|---------------|---------------|---------------|---------------|
|                                | <b>Plng Yr</b> | <b>Year 1</b> | <b>Year 2</b> | <b>Year 3</b> | <b>Year 4</b> | <b>Year 5</b> |
| Actual Building Square Footage |                | 15,000        | 15,000        | 15,000        | 15,000        | 15,000        |

|   |        |             |             |             |             |             |                       |

### Professional Services (i.e. Management, Network, Consulting, Financial & Legal Fees)

#### District Administrative Fee

In general, state law currently allows districts to take up to a 5% fee on the first 250 students for charter schools, unless they are high performing in which case the rate is 2% on the first 250 students. It is possible (however, extremely improbable) to negotiate a different rate as part of your contract negotiations. There are also special considerations for charter districts and schools who have more than 75% of students with special needs. Please see Florida Statute 1002.33(20) if you think one of these might apply to you.

|  | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |

See Comment here for details

#### Management, Network or Professional Services Organizations

If you are using a CMO / EMO or Charter Network, fees can be calculated in a variety of different ways. Below are four options. Enter the amount for any or multiple of the options available. For example, if you are paying an EMO 7% and also hiring another group to manage your back office support for a flat fee, you can enter both options, and the calculator will add them together. For any option not being used, be sure to enter 0. You should be able to get these amounts from the company you are working with, and fees can vary widely based on the contracts you have with the company. Anything entered here will be put onto the budget in the "Administrative Professional Services" budget line item.

#### Accounting Fees

Effectively managing the school's financial resources is an important component of operating the school. Many charter schools will hire an accountant to either manage the finances, or to at least conduct monthly reconciliations and closings. In addition, Charter schools are required to complete an annual audit by an independent auditor. These costs can be calculated below.

|   | Ping Yr | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|---|---------|-------------|-------------|-------------|-------------|-------------|
| Flat Rate Accounting Fees (Annual Amount) | \$ -    | \$ -        | \$ -        | \$ -        | \$ -        | \$ -        |
| Per Student Accounting Fees               | \$ -    | \$ 100.00   | \$ 100.00   | \$ 100.00   | \$ 100.00   | \$ 100.00   |
| Flat Rate Auditor Fees (Annual Amount)    | \$ -    | \$ 7,500.00 | \$ 7,725.00 | \$ 7,956.75 | \$ 8,195.45 | \$ 8,441.32 |
|   | \$0.00  | \$29,900.00 | \$34,825.00 | \$39,456.75 | \$44,095.45 | \$48,741.32 |

Budget Line: 7500-310

#### Legal Fees

Charter schools usually run into issues that they may need legal assistance and advice, so we recommend setting aside funds to consult with an attorney if necessary. Attorney fees generally range from \$300 - \$600 per hour. Enter an annual budget estimate

|            | Ping Yr     | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |

### Exceptional Education Services - Contracted Services

Many charter schools will contract with outside companies to assist with covering the special needs of students at the school. For example, often schools do not have enough students to justify hiring a speech and language therapist, but the school is still required to offer these services. So the school can contract with a third party to have a therapist come to the school to provide the services. Typical services that are contracted out are: Speech and Language, Occupational Therapy, Physical Therapy, Vision or Hearing Experts, etc. The calculator below will assist you with estimating the budget amount.

|                         | Plng Yr | Year 1     | Year 2     | Year 3     | Year 4     | Year 5     |
|-------------------------|---------|------------|------------|------------|------------|------------|
| Assumed Hourly Rate     |         | \$ 65.00   | \$ 65.65   | \$ 66.31   | \$ 66.97   | \$ 67.64   |
| Assumed Hours PER WEEK. |         | 2          | 2.5        | 3          | 3.5        | 4          |
|                         | \$0.00  | \$4,680.00 | \$5,908.50 | \$7,161.48 | \$8,438.22 | \$9,740.16 |

Budget Line: 5200-310

### Corporate Insurance Policies

Charter schools are required to carry their own insurance policies in compliance with their charter school contract. The calculator below allows you to estimate the budget in two categories, the first is liability and professional insurance which would cover things like student accident, operational, a general umbrella policy, directors insurance, etc. The second category is for property and renters insurance. Rows 62 and 64 will help you to estimate your insurance costs. Be sure to enter the total annual costs in rows 67 and 68, as these are the official numbers that will be used in the final budget. This way, if you already have your insurance policy quotes, you can enter the numbers directly on rows 67 and 68, otherwise just use the gray numbers created by rows 62 and 64 to set your annual costs.

|  | Plng Yr | Year 1     | Year 2     | Year 3     | Year 4      | Year 5      |

### Board of Directors Expenses

Charter schools are prohibited from compensating Board members for their contributions to the school, however reasonable expenses may be reimbursed. For example, if you have board meetings at various locations, mileage reimbursement to meetings would be reasonable. If a Board member attends the charter school conference, the school can reimburse those expenses. Additionally, you should plan to provide some professional development to the Board, each Board Member is required to do 4-hours of training at the start of their term and a 2-hour follow up every three years.

|  | Plng Yr | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |

### Transportation Services

There are a variety of ways to handle transportation for your students. You could purchase bus passes for older students if your area has a strong public transit system, you could buy or lease a bus and hire your own bus driver and do the transportation yourself, you could contract with your district. Fill in any of the applicable areas below, and they will be added together, you do not need to use all areas. For example, if you are contracting with your district for a per-student charge, you would not need to hire your own driver and lease your own bus. Only fill in the applicable areas, as the calculator will add all of the totals together to use in the budget.

|                                     |       |  |
|-------------------------------------|-------|--|
| Percentage of students to transport | 25.0% | Estimate the percentage of your total students who will require transportation.                |
| Number of students on one bus       | 60    | Enter the number of students you can transport on a single bus on a single trip. (See comment) |

**Financing Calculator to purchase / lease a bus**

The next few lines are basic loan and lease calculators, using standard calculation methods for each. This will allow you to estimate costs of financing or leasing a bus if you are wishing to purchase your own bus. The numbers for these calculators DO NOT AFFECT YOUR BUDGET, and are for your benefit. If you do decide to purchase a bus, please go down to the next section to enter the costs you are estimating. Bus prices range widely based on where they are being purchased from, how many miles, etc. Many charters are able to find decent busses from their district who many times will have annual auctions for surplus stock.

**Third Party Transportation Provider**

Many charter schools contract with a third party provider to provide transportation services. Some districts will work with charter schools to transport students through the district's transportation plan, whereas other charter schools will hire a third party company to provide bussing services. The options below will help you to estimate the costs to hire a company to provide this service. There are two common ways these contracts might be priced, on a per day or a per student basis. Use one or the other, as both are added to the budget if there are numbers in both.

| PER DAY Contract     |  | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|----------------------|--|-------------|-------------|-------------|-------------|-------------|
| Cost PER BUS PER DAY |  | \$ 225.00   | \$ 227.25   | \$ 229.52   | \$ 231.82   | \$ 234.14   |
| Number of Busses     |  | 1           | 1           | 1           | 1           | 1           |
|                      |  | \$40,500.00 | \$40,905.00 | \$41,313.60 | \$41,727.60 | \$42,145.20 |

Budget Line: 7800-390

**Public Transportation**

Some charter schools are able to effectively utilize public transportation for their students by purchasing bus passes for the students to get to and from the school. This will depend on your area (the availability of public transportation) and the age of your students. The following will calculate the cost of purchasing passes if you choose to use this as an option.

| Public Transportation      | Year 1   | Year 2   | Year 3   | Year 4   | Year 5   |
|----------------------------|----------|----------|----------|----------|----------|
| Public Transportation Pass | \$ 65.00 | \$ 65.00 | \$ 70.00 | \$ 70.00 | \$ 70.00 |

|                              |        |        |        |        |        |
|------------------------------|--------|--------|--------|--------|--------|
| Number of students utilizing | 0      | 0      | 0      | 0      | 0      |
|                              | \$0.00 | \$0.00 | \$0.00 | \$0.00 | \$0.00 |

Budget Line: 7800-390

### Reimbursements

The state reimburses schools on a per student basis. The amount they reimburse is published on their website at: <http://www.fldoe.org/transportation/transprof.asp>

|                               | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|-------------------------------|-------------|-------------|-------------|-------------|-------------|

## School Lunch Calculator

Charter schools are required to offer free/reduced lunch to those students who qualify, and must provide comparable lunches to all other students for a fee in such a way that does not alienate those students who are receiving the free and reduced lunch. Many charter schools are able to contract with their local school districts to provide the service, and it essentially is a wash and there is no need to budget anything for school lunch. However, if your district is unwilling or you decide not to contract with the district you will need to complete the following assumptions or work with another provider who is willing to work with you.

|                                       | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|---------------------------------------|--------|--------|--------|--------|--------|
| Percent FRL Students Ordering Lunch   | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| How much is charged for Reduced Lunch | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Percent Other Students Order Lunch    | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Other Students Full Price Lunch Rate  | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| How much does each lunch cost?        | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Federal NSLP Reimbursement Rate       | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Lunch Program Supplies                | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
|                                       | \$0.00 | \$0.00 | \$0.00 | \$0.00 | \$0.00 |

Income Lines: 3261 & 3262  
Budget Line: 7600-570

Budget Line: 7600-510

If you are running the lunch program at your site and your contract or agreement with a provider doesn't include staffing, you may need to consider additional staff members to handle the paperwork and/or with serving and preparing lunch. The calculator below will assist you determining staff costs. Many charter schools are able to run the lunch without additional staff people, but some do hire additional staff, especially if they are their own lunch provider.

| Cafeteria Staff                       | Apply To All | Year 1  | Year 2  | Year 3  | Year 4  | Year 5   |
|---------------------------------------|--------------|---------|---------|---------|---------|----------|

### Textbooks / Curricular Materials / Assessments

Generally most textbook companies sell their textbook series by student editions, and then provide all of the teacher's manuals and consumables for free. The calculator below allows you to indicate how many books you are purchasing and an average amount per book (generally books cost around \$50-80 depending on the subject and publisher). A good place to look for the costs for textbooks is the Florida School Book Depository (<http://www.fsbd.com/>). You are not required to purchase books from this source, however, it is a good place to find pricing information on a variety of options.

|                         | Plng Yr | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|-------------------------|---------|--------|--------|--------|--------|--------|

Many charter schools are using subscription services for curricular materials. These could come in a variety of services. Some schools utilize a "Blended Model" where curriculum is provided online, and no textbooks are necessary. Other examples are subscription based software programs that provide curricular materials online. Below you can enter the total amount of annual subscriptions for curriculum.

#### Academic Software

|   | Plng Yr | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|---|---------|-------------|-------------|-------------|-------------|-------------|
| Curricular Provider Subscriptions PER STUDENT |         | \$ 1,100.00 | \$ 1,166.00 | \$ 1,235.96 | \$ 1,310.12 | \$ 1,388.72 |

Many assessments, such as the FCAT and FAIR are provided to Charter Schools through the district. Other assessments that schools may wish to utilize need to be purchased (such as Stanford Achievement Test, NWEA MAP, etc.). The materials could include the test itself, consumable materials (such as answer sheets), and the costs for scoring the assessments. Enter the total amount PER STUDENT you anticipate for assessments.

#### Assessments

Budget Line: 7300-360

Computers are an important educational tool in schools today. Schools must have computers on which to provide the new state assessments, and it is recommend you review the state of Florida's accountability plans to determine what those needs may be at your school. (<http://fcats.fldoe.org/fcat2/>). Computers can be purchased or leased by a school, and the calculator below will allow you to calculate the costs. For both options there are two types of computers to allow you to plan for multiple types of computers (i.e. desktop computers for a lab or classroom use, student laptops and teacher laptops for example). All of the following computers will be put into the ACADEMIC section of the budget (5100), so only include student and teacher computers, not office staff (that will come next).

| PURCHASING Academic Computers               | Plng Yr      | Year 1 | Year 2 | Year 3 | Year 4      | Year 5      |

Classroom Instructional technology is often a part of a school's overall technology plan. If you intend to purchase technology the calculator below will assist you in assuming the amount of costs involved. You should figure out what technology you want in each classroom, and then estimate the COST PER CLASSROOM. For example, a SMART board with all of the equipment and supplies can easily range \$3,000 - \$4,000 per classroom. Less expensive alternatives are available where you may be able to outfit a classroom for closer to \$1,500 depending on the needs of your school. First determine the estimated cost per classroom, then you indicate the number of classrooms you want to outfit each year.

| Instructional Technology | Plng Yr     | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|--------------------------|-------------|--------|--------|--------|--------|--------|
| Cost PER CLASSROOM       | \$ 3,000.00 | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Number of Classrooms     | 4           | 0      | 0      | 0      | 0      | 0      |

Some schools hire their own inhouse IT support staff to manage their computer infrastructure (which would be indicated on the Enrollment and Staffing page of this calculator), where others have a contract with a third party to provide these services. Some management companies provide this service as part of their overall contract. Contracts can be an annual fixed amount, or you may purchase hours in advance. Generally these services are around \$120 per hour and depending the technical savy of your staff, you could easily go through 100+ hours a year to support the computers and network within your building.

| IT Service Provider                        | Plng Yr | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|--|---------|--------|--------|--------|--------|--------|

Budget Line: 6500-310

Above you indicate the amount of money you wish to set aside for curricular software. In addition, you may have other software expenses as well, such as software to setup your server, productivity software (such as Microsoft Office) for your staff, and other software needs to support the computers at your school. Enter the total amount you want to set aside for software each year. As you are researching amounts, we recommend you look into Volume Licensing Agreements as this is usually the most cost efficient way to purchase multiple copies of software.

| Software                             | Plng Yr     | Year 1      | Year 2      | Year 3      | Year 4      | Year 5      |
|--------------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| ANNUAL amount for software each year | \$ 5,000.00 | \$ 5,000.00 | \$ 2,500.00 | \$ 2,500.00 | \$ 2,500.00 | \$ 2,500.00 |

Budget Line: 7300-690

## Furniture and Classroom/Office Equipment

You will need to have furniture for your students, teachers and other staff members. Sometimes schools are able to obtain funding that includes "FF&E" (Furniture, Fixtures & Equipment) when they finance a building. More often, the school needs to either purchase or borrow furniture for thier school. The following calculator will allow you to figure out furniture costs based on either a purchase or a lease option. Some vendors will lease furniture allowing the school to spreadout the expenses over the course of a few years, however, you may want to investigate this before relying on it as an option.

|  | Plng Yr     | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 |
|--|-------------|--------|--------|--------|--------|--------|
| Estimated PER CLASSROOM furniture cost   | \$ 5,000.00 | \$ -   | \$ -   | \$ -   | \$ -   | \$ -   |
| Number of student classes each year      |             | 10     | 12     | 14     | 16     | 18     |

## Other General Expenses

The following items are general expenses that you will want to consider in your budget which usually are based on the size and number of students at your school. This calculator will give you an option to set each of the following items based on the number of students at your school. If you have operating history, we recommend you look at the amount you have spent on these areas in the past, otherwise recommendations for each item are in the comments of the title fields. For the planning year, enter the total budget amount you anticipate for the planning year (if any) for the budget line.

### Reserve Fund / Undesignated Expenditures

Some districts like to see a "Reserve Fund" line on the charter school budget ranging from 3-10% of the state FEFP funds. Not all districts require this, however, you can set either a percentage or a dollar amount below to put into a reserve fund. You can enter one or the other or both, and the gray number underneath will show you the total of the two. This money will be listed as an expense on your budget, but without a specific purpose. Hopefully you will not use this money and it will be carried over, however, if you forgot to include something in your overall budget, this provides you with a cushion for unexpected expenses. Your Board should have a policy about how to spend money that is not listed in the budget, or that is coming from the reserve fund.

Advanced Academics | *Online learning simplified™*

July 30, 2013

Carolyn Eads  
Board President  
PIVOT Education, Inc.  
2675 Winkler Avenue, Suite 200  
Fort Myers, FL 33901

Dear Ms. Eads,

On behalf of Advanced Academics, PIVOT's Educational Service Provider for all PIVOT Charter Schools in Florida, I would like to extend our financing commitment for the development and operation of your newest charter school in Sarasota County Florida.

Advanced Academics will provide financial capital for the Sarasota County charter school project up to the amount of \$1,000,000 over a period of five years at the New York Prime Rate of Interest.

We are very pleased with the progress of your schools in Hillsborough, Lee and Broward Counties and are confident that your continued expansion will lead to further successes for students in Sarasota County.

Sincerely,

Robert York  
President  
Advanced Academics

DRAFT

# Corporate Policy Manual

## (1) Foundation

### (1.1) Mission Statement

The mission of Pivot Education, Inc. is to provide a rigorous standards-based, individualized online curriculum to students in grades 6-12, within a site-based instructional model in a unique “learning studio” environment.

### (1.2) Organizational Philosophy

In carrying out its responsibilities the Pivot Education, Inc. is guided by the desire to use the resources of its community, its staff and its students to provide the highest quality education permitted by its financial resources. In reaching decisions the Board of Directors will attempt in every case to act in the best interest of its students.

### (1.3) Organizational Structure

Pivot Education, Inc. is a not-for-profit corporation incorporated within the state of Florida. The organization is directed by the Board of Directors who set the policies and guidelines for the organization and delegate to staff day-to-day responsibilities for operational matters. The Executive Director consults with staff members in order to allow for the greatest possible staff participation in the decision making of the organization.

### (1.4) Decision making

The Board of Directors is responsible for setting the budget, establishing organization wide policies and overseeing the general operation of the organization. It is the Executive Director’s responsibility to ensure these policies are carried out, and to develop a system that ensures the input of staff, students and community.

### (1.5) Non Discrimination

No person shall, on the basis of race, color, religion, gender, age, marital status, disability, political or religious beliefs, national or ethnic origin, or sexual orientation be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity, or in any employment conditions or practices conducted by this School, except as provided by law.

The School shall comply with all state and federal laws, which prohibit discrimination and are designed to protect the civil rights of applicants, employees, and/or students, or other persons protected by applicable law.

The School shall admit students to programs and classes without regard to race, color, religion, gender, age, national or ethnic origin, marital status, disability or handicap or sexual orientation.

## (1.6) School Evaluation Plan

It is the responsibility of the Board of Directors to ensure the success of Pivot Charter Schools. As a result, the Board, in collaboration with the Executive Director, shall define a specific 'dash board' of data to be submitted to the Board by each school throughout the year. This data will allow the Board to monitor the academic, fiscal and organizational progress being made by each school. A report containing some of this data (as it is applicable throughout the year) should be reported on at each meeting of the Board of Directors. Examples of the information to be included in this dash board include, but are not limited to:

- Financial Reports (Balance Sheet, Profit And Less, Budget vs Actual Spending)
- Progress Towards Achieving Annual Goals
- Failure Rates
- FCAT Results
- End of Course Exam Results
- Report Card Grades
- Course Completion / Credits Earned Data
- Enrollment Data
- Facility Reports
- Professional Development Progress

## (2) Board of Directors

### (2.1) Board of Directors Foundation

The Board of Directors is a legal requirement for a charter school organized as a not for profit organization and ensures its operations continue to focus on service to the public. In addition to its legal responsibilities the Board of Directors supports the organization mission and seeks to promote it by advocating the educational philosophy.

### (2.2) General powers

All affairs of the Organization shall be overseen by the Board of Directors. The Board of Directors primary duties include but are not limited to the hiring and evaluation of the Executive Director, setting of Policies and Procedures, strategic planning and assessment of the organization in accomplishing the missions of the organization as well as the oversight of the public trust.

### (2.3) General Responsibilities

In exchange for direct and indirect financial assistance from state and federal governments, state charter school legislation, as well as non profit corporate law requires the Board of Directors to serve as guardians of the "public trust". This

structure makes the organization's management accountable to the Board of Directors, who due to their voluntary nature, can effectively provide financial oversight since no personal gain is involved.

Election to the Board of Directors carries with it a responsibility of stewardship. The directors are the custodians of the integrity of the organization; they hold in trust the school's reputation as created by its founders, and as developed by those who have shaped the school in the past. Current directors accept the obligation to not only preserve, but also add to this organization. In this way board members help form not only the present, but also the future composition of the organization.

## (2.4) Board Membership

### (2.4.1) **Membership Criteria**

The Board of Directors shall consist of no less than three (3) and no more than eighteen (18) voting members. Potential members for the Board shall be nominated and selected by the Board.

### (2.4.2) **Membership Terms**

All newly elected Board members shall serve for an initial term of one (1) year beginning on the first day of the month following their fingerprinting and background check and ending on the June 30 following the anniversary of the beginning of the term, unless filling a vacancy. Following the first term of service, directors may be re-elected to serve another term.

### (2.4.3) **Board Powers**

The Board of Directors affirms that the directors, officers, administrators, faculty and other employees of the organization have an obligation to exercise their authority and to carry out the duties of their respective positions for the sole benefit of the organization. Other than described within these policies, individual members of the Board of Directors hold no authority or decision making ability outside of official meetings of the Board of Directors.

### (2.4.4) **Officer Positions and Responsibilities**

#### (2.4.4.1) **Chairman**

The Chairman as the chief officer of the non profit organization and shall preside at all meetings of the Board. He or she will sign, along with the Executive Director of the organization all teacher contracts. He or she will sign, along with the Executive Director and Secretary of the Board of Directors, or any other proper agent of the School authorized by the Board, any deeds, mortgages, leases or other instruments which the Board authorizes to be executed.

#### (2.4.4.2) **Vice Chairman**

The Vice Chairman fills in for the Chairman and performs all duties as assigned by the Chairman.

#### (2.4.4.3) **Treasurer**

The Treasurer shall be responsible for overseeing all funds and securities of the organization and perform all duties incident to the office of Treasurer and other duties assigned to him or her by the Chair or Board of Directors. The Treasurer is responsible, with the Executive Director for ensuring the monthly financial reports and the end of the year audit are completed and filed with the county in a timely manner.

**(2.4.4.4) Secretary**

The Secretary shall keep minutes of the meetings of the Board of Directors in a manner prescribed by the Board, and such duties as assigned by the Chairman or Board of Directors, and other duties incident to the office of Secretary.

**(2.4.5) Application Process**

Any person wanting to apply to serve as a member of the Board of Directors should contact either the Executive Director or the Board Chairperson to obtain an application which shall be submitted to the Board of Directors for review and consideration. The Board shall follow the nominating process as outlined in the Bylaws to select from the potential pool and other qualified applicants for Board membership. The Board of Directors may recruit members based on the identification of strategic needs of the Board and organization and solicit nominees who are natural matches.

**(2.4.6) Election Process**

The Directors of the organization shall be elected annually by the Board of Directors at the annual meeting of the Board, or as individual board members' terms are expiring. Vacancies may be filled or new offices created and filled at any meeting of the Board of Directors. When a newly elected Board member is filling a vacancy, that member shall fill the remainder of the original member's term, and then be eligible for reelection to continue on the Board. Each officer shall hold office until his or her successor shall have been duly elected.

The Board will evaluate the needs of the Board of Directors at the annual meeting of the Board for the coming school year. After review of all nominees and applicants the Board shall vote on the acceptance or denial of the nominees.

**(2.4.7) Board Member Resignations**

Any Board member who wishes to resign from office shall inform the School Board Chairperson in writing. The resignation shall become effective upon receipt of the letter unless an alternative date is suggested within the resignation letter. The Board Chairperson shall certify to the Board that the office is vacant. The Board will then appoint a replacement to serve using the process described within these policies.

**(2.4.8) Removal Process**

Any Director or agent elected or appointed by the Board of Directors may be removed by the Board whenever, in its judgment, the best interests of the organization would be served thereby, but such removal shall be without prejudice. In order to remove a director, the Board must vote on the issue and must have quorum to take the vote.

**(2.4.9) Operational Procedures**

Upon the election or appointment of new board members, the Executive Director shall provide the new Board member with copies of important documents such as: Florida

School Laws relating to charter schools, State Board of Education Rules relating to charter schools, Articles of Incorporation, Bylaws, Policies and Procedures, current Charter contract, current annual budget, and other documents the Executive Director deems essential to an understanding of the operation of the organization.

The Executive Director shall set aside such time as is necessary to answer any questions arising from the study of these documentations and shall cooperate fully in assisting the new member to become an informed and active Board member.

New Board Members shall be required to complete statutorily required training.

The organization shall provide the new Board member opportunities to attend a charter school conference or other training opportunities in regards to the responsibilities of Charter School Board Members.

## (2.5) Meetings

All meetings of the Board of Directors shall be held in accordance with Florida Government in the Sunshine laws. Except for special meetings described below, notice of all meeting and agenda shall be posted no less than three (3) calendar days prior to each meeting. The agenda will be prepared by the Executive Director with input from the Chairman. Input into the agenda should consist only of the placement of items on it and not used as a means to circumvent the sunshine law. A working agenda will be distributed to Board members seven (7) calendars prior to the meeting for input prior to the distribution of the final agenda except for special meetings as described below. These meetings will be rotated so that each of the Pivot Education, Inc. schools has the opportunity to host meetings. The specific location of each meeting will be identified by the Board in their annual calendar of meetings.

### (2.5.1) Governance Meetings

The Board of Directors shall fulfill these duties by meeting no less than quarterly. In compliance with the Florida Law the Board publishes the schedule of its meetings and holds them in open session. The Board will meet in accordance with the Florida Sunshine Law, Section 286.011 and shall meet in executive session only when and to the extent permitted by Florida law.

### (2.5.2) Annual Meeting.

The annual meeting of the Board of Directors shall be held in September each year, unless the Board, by resolution, provides for a different time and place for the holding of the annual meeting. At the annual meeting the new Board Members will be elected.

### (2.5.3) Regular Meetings

An annual schedule of General Meetings will be set by the Board of Directors and made available for public review.

### (2.5.4) Special Meetings

Special Meetings of the Board may be called by the Chairman or any two voting members of the Board. The person(s) calling such meeting may set the location of the meeting as a conveniently accessible place for all Board members and the public.

Special Meetings must be scheduled with no less than two (2) day prior notice and must be established to discuss only a single issue.

**(2.5.5) Audience Participation**

At all Operational Board Meetings any non Board member may elect to speak on each agenda item for up to three minutes. The posted agenda shall outline a time and procedure for individuals wishing to address the Board. Any audience member who becomes unruly or disruptive to the proceedings may be removed from the meeting.

**(2.5.6) Voting by Proxy**

Board Members may not vote by proxy. In circumstances where attendance at the meeting is impossible, the Board member may participate by electronically provided that all members and the public are able hear all discussion and votes. Members who are participating electronically may not be considered in the count to determine whether quorum has been met.

**(2.5.7) Notice of Board Meetings**

Notice of meetings of the Board of Directors, including Committees of the Board as described elsewhere within these policies, will be given in a manner to reasonably inform the public of the matters to be considered by the Board.

Notice of the time, date, and place of the meeting as well as the tentative agenda will be provided at least three (3) days prior regularly scheduled meetings of the Board of Directors. For special meetings or committee meetings the notice must be given at least twenty-four (24) hours prior to the meeting.

In order to maximize public participation, notice of Board meetings will be posted on the school's calendar, on the school's website and when possible in school publications such as newsletters. Upon request, members of the media will be provided with notice of the meeting at the same time notice is provided to members of the Board.

**(2.5.8) Records of Proceedings**

The minutes of the governing board and all committees with board delegated powers shall contain:

- The names of the persons who disclosed or otherwise were found to have a financial interest in connection with an actual or possible conflict of interest, the nature of the financial interest, any action taken to determine whether a conflict of interest was present, and the governing board's or committee's decision as to whether a conflict of interest in fact existed..
- The names of the persons who were present for discussions and votes relating to the transaction or arrangement, the content of the discussion, including any alternatives to the proposed transaction or arrangement, and a record of any votes taken in connection with the proceedings.
- A written memorandum from the interested person explaining the nature of the interest to be filed within 15 days after the vote to which s/he had exercised recusal steps under policy as described above.

## (2.6) Committees

### (2.6.1) Development of Committees

The Board of Directors by resolution adopted by a majority of voting members may designate one or more committees, each of which shall consist of at least one voting Board member, plus any non-board members as the Board sees fit to appoint.

### (2.6.2) Meetings

Committees that have been designated by the Board of Directors must be held in accordance with Florida's Government in the Sunshine law. The Executive Director shall ensure that all meetings are posted in the same way as Board of Directors Meetings are posted at least one (1) day prior to the meeting.

### (2.6.3) Committee Reports

All Board Committees are subject to the direction and control of the Board and a designated Board member serving on that committee will serve as chairman or appoint a chairman who will report directly to the Board in the public Operational Board meeting, unless a Special Meeting is called and lends itself to the function of the committee.

### (2.6.4) Authority

The designation of such committees and the delegation thereto of authority shall not operate to relieve the Board of Directors or any individual member thereof of any responsibility imposed on it, him, or her by law. Committee recommendations are not binding until and unless adopted by a majority vote of the Board of Directors in session, provided a quorum is present.

## (2.7) Conflict of Interest Policy

The purpose of the conflict of interest policy is to protect the interest of the organization when it is contemplating entering into a transaction or arrangement that might benefit the private interest of an officer or director of the organization or might result in a possible excess benefit transaction. This policy is intended to supplement but not replace any applicable state and federal laws governing conflict of interest applicable to nonprofit and charitable organizations generally and public charter schools specifically.

### (2.7.1) Definitions

**Interested Person:** Any director, principal officer, owner, president, chairperson, governing board member, or member of a committee with governing board delegated powers and any superintendent, principal, other administrator, or any other person employed by the organization who has equivalent decision-making authority who has a direct or indirect financial interest, as defined below, is an interested person.

**Financial Interest:** A person has a financial interest if the person has, directly or indirectly, through business, investment, or family:

- An ownership or investment interest in any entity with which the organization has a transaction or arrangement,

- A compensation arrangement with the organization or with any entity or individual with which the organization has a transaction or arrangement, or
- A potential ownership or investment interest in, or compensation arrangement with, any entity or individual with which the Organization is negotiating a transaction or arrangement.

**Family:** A “family” member means: father, mother, son, daughter, brother, sister, uncle, aunt, first cousin, nephew, niece, husband, wife, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, or half sister.

**Compensation:** Compensation includes direct and indirect remuneration as well as loans, gifts, in-kind services, favors or anything of value. A financial interest is not necessarily a conflict of interest. Under Article III, Section 2, a person who has a financial interest may have a conflict of interest only if the appropriate governing board or committee decides that a conflict of interest exists.

## (2.7.2) Procedures

### (2.7.2.1) *Duty to Disclose*

In connection with any actual or possible conflict of interest, an interested person must disclose the existence of the financial interest and be given the opportunity to disclose all material facts to the directors and members of committees with governing board delegated powers considering the proposed transaction or arrangement.

### (2.7.2.2) *Determining Whether a Conflict of Interest Exists*

After disclosure of the financial interest and all material facts, and after any discussion with the interested person, he/she shall leave the governing board or committee meeting while the determination of a conflict of interest is discussed and voted upon. The remaining board or committee members shall decide if a conflict of interest exists.

### (2.7.2.3) *Procedures for Addressing the Conflict of Interest*

- An interested person may make a presentation at the governing board or committee meeting, but after the presentation, he/she shall leave the meeting during the discussion of, and the vote on, the transaction or arrangement involving the possible conflict of interest.
- The chairperson of the governing board or committee shall, if appropriate, appoint a disinterested person or committee to investigate alternatives to the proposed transaction or arrangement.
- After exercising due diligence, the governing board or committee shall determine whether the organization can obtain with reasonable efforts a more advantageous transaction or arrangement from a person or entity that would not give rise to a conflict of interest.
- If a more advantageous transaction or arrangement is not reasonably possible under circumstances not producing a conflict of interest, the governing board or committee shall determine by a majority vote of the disinterested directors

whether the transaction or arrangement is in the organization's best interest, for its own benefit, and whether it is fair and reasonable.

- In conformity with the above determination, the organization shall make its decision as to whether to enter into the transaction or arrangement, EXCEPT if the interested person or his/her spouse or child (i.e., immediate family) has a direct material interest in a transaction involving the purchase, rent or leasing of any realty, goods or services, the organization is prohibited from entering into such transaction without subjecting the decision to competitive bidding.

#### **(2.7.2.4)**

#### ***Violations of the Conflicts of Interest Policy***

- If the governing board or committee has reasonable cause to believe a member has failed to disclose actual or possible conflicts of interest, it shall inform the member of the basis for such belief and afford the member an opportunity to explain the alleged failure to disclose.
- If, after hearing the member's response and after making further investigation as warranted by the circumstances, the governing board or committee determines the member has failed to disclose an actual or possible conflict of interest, it shall take appropriate disciplinary and corrective action.

#### **(2.7.3)**

#### **Compensation**

- A voting member of the governing board who receives compensation, directly or indirectly, from the organization for services is precluded from voting on matters pertaining to that member's compensation.
- A voting member of any committee whose jurisdiction includes compensation matters and who receives compensation, directly or indirectly, from the organization for services is precluded from voting on matters pertaining to that member's compensation.
- No governing board member or his/her spouse or minor child may either solicit or accept anything of value (including a gift, loan, reward, promise of future employment, favor, or service) that is based on any understanding that the vote, official action, or judgment of the governing board member would be influenced by such gift. Gifts from family are not prohibited, nor gifts associated primarily with the recipient's employment or business. Food or beverage consumed at a single sitting or event may be accepted.
- Board members may receive compensation for expenses spent on behalf of the Organization if such expenditures are approved within the Budget or by the Board of Directors. This includes travel to conferences, meetings, seminars and conventions related to charter schools or the Organization. The Director shall follow the reimbursement processes described elsewhere within these policies.

#### **(2.7.4)**

#### **Neptism**

The organization is prohibited from appointing, employing or promoting a family member of an interested person unless such family member has been in the continuous employ of the organization prior to July 1, 2009 and the organization discloses the nature of such employment.

**(2.7.5) Annual Statements**

Each director, principal officer and member of a committee with governing board delegated powers shall annually sign a statement which affirms such person:

- Has received a copy of the conflict of interest policy,
- Has read and understands the policy,
- Has agreed to comply with the policy, and
- Understands the organization is (i) charitable and, in order to maintain its federal tax exemption, it must engage primarily in activities that accomplish one or more of its tax-exempt purposes and is (ii) a public charter school subject to applicable state and federal laws and regulations.

**(2.7.6) Periodic Reviews**

To ensure the Organization operates in a manner consistent with charitable purposes and does not engage in activities that could jeopardize its tax-exempt status, periodic reviews shall be conducted. The periodic reviews shall, at a minimum, include the following subjects:

- Whether compensation arrangements and benefits are reasonable, based on competent survey information and the result of arm's length bargaining.
- Whether partnerships, joint ventures, and arrangements with management organizations conform to the Organization's written policies, are properly recorded, reflect reasonable investment or payments for goods and services, further charitable purposes and do not result in inurement, impermissible private benefit or in an excess benefit transaction.

**(2.7.7) Use of Outside Experts**

When conducting the periodic reviews as provided for in this policy above, the organization may, but need not, use outside advisors. If outside experts are used, their use shall not relieve the governing board of its responsibility for ensuring periodic reviews are conducted.

**(2.8) Financial Interest**

Members of the Board shall not receive any monetary compensation for their services nor shall they have any financial interest in the organization other than their own monetary donations to the organization.

**(2.9) Employer Responsibilities**

**(2.9.1) Purview of Private Employer Matters**

Although the Executive Director is responsible for all faculty hiring and evaluations the Board sets general guidelines for the qualifications of staff, terms of contracts, performance evaluation expectations, administrative grievance procedures, non-renewal and termination processes.

**(2.9.2) Private Employment Matters**

Most private employment matters will be effectively handled by the Executive Director of the organization. On occasion, should the Executive Director need additional advice or recommendations, the Executive Director will consult with either the employee leasing company's HR department, or an employment attorney.

### (3) Employment Manual

#### (3.1) Equal Opportunity Employment

The organization is an equal opportunity employer. The organization is committed to providing equal opportunity for all individuals in all areas of recruitment, selection, placement, training, assignment, transfer, compensation, benefits, discipline, retention, and promotion. The Board commits itself to the policy that there shall be no unlawful discrimination against any person because of race, color, religion, age, sex, national origin or disability. All decisions with regard to employment shall be in compliance with applicable state and federal laws.

The organization is required by the Immigration Reform and Control Act to employ only American citizens and aliens who are authorized to work in the United States. The purpose of this law is to preserve jobs for those individuals who are legally entitled to them.

#### (3.2) Employment Non-Discrimination and Non-Harassment

Pivot Education, Inc. does not discriminate against anyone, to general operations of the organization, and to any basis prohibited by applicable law or regulation.

Pivot Education, Inc. is committed to an environment in which all individuals are treated with respect and dignity. We believe that each individual has the right to work in a professional atmosphere that promotes equal employment opportunities and prohibits discriminatory practices, including harassment. Therefore, the organization expects that all relationships among persons in the workplace will be business-like and free of bias, prejudice and harassment. Thus the organization does not and will not tolerate discrimination against or harassment of or by our employees, students, vendors, or other person. The term "harassment" includes, but is not limited to, slurs, jokes, and other verbal, graphic, or physical conduct relating to an individual's race, color, sex (including discrimination against or harassment of individuals of the same sex), pregnancy, religion, national origin, ancestry, citizenship, age, disability, workers compensation claims, marital, veteran or any other protected status. "Harassment" may include a range of subtle and not so subtle behaviors and also includes unwelcome or unwanted sexual advances, requests or demands for favors, offensive touching, and other types of conduct whether it be physical, verbal, graphic, or electronic communication (including e-mail and facsimiles) of a harassing or sexual nature involving individuals of the same or different gender. This includes, but is not limited to:

- Unwelcome or unwanted physical contact or sexual advances including, but not limited to, patting, grabbing, pinching, brushing-up against, hugging, cornering, kissing, fondling, or any other similar physical contact.

- Unwelcome requests or demands for favors including, but not limited to, subtle or blatant expectations, pressures, requests or demands for sexual, unethical or illegal favors; or unwelcome requests for dates or contacts. Such unwelcome requests or demands may or may not relate to an implied or stated promise of preferential treatment, or a threat of negative consequences concerning employment, including, but not limited to, promotion, demotion, transfer, layoff, termination, pay or other form of compensation, and selection for training.
- Verbal and written abuse or unwelcome kidding including, but not limited to, that which is sexually-oriented, including same-sex harassment; commentary about an individual's body, sexual prowess or sexual deficiencies; inappropriate comments about race, color, religion, sex, pregnancy, national origin, ancestry, citizenship, age, disability, workers compensation claims, marital, veteran or other protected status; dirty jokes or other jokes which are unwanted and considered offensive or tasteless; or comments, innuendoes, epithets, slurs, negative stereotyping, leering, catcalls or other actions that offend, whether sexually oriented or otherwise related to a prohibited form of discrimination or harassment.
- Any form of behavior that unreasonably interferes with work performance, including, but not limited to, unwanted sexual attentions, comments, interruptions, or other communications, whether sexually-oriented or otherwise related to a prohibited form of discrimination or harassment, that reduces productivity or time available to perform work-related tasks or otherwise interferes with work performance.
- Actions that create a work environment that is intimidating, hostile, abusive, or offensive because of unwelcome or unwanted conversations, suggestions, requests, demands, physical contacts or attentions, whether sexually-oriented or otherwise related to a prohibited form of discrimination or harassment.
- The distribution, display, or discussion of any written or graphic material, including calendars, posters, cartoons, or names, that belittles or shows hostility or aversion toward an individual, his/her relatives, friends or associates or a group because of race, color, religion, sex (including same sex discrimination or harassment), pregnancy, national origin, ancestry, citizenship, age, disability, workers compensation claims, marital, veteran or other protected status.

All employees and applicants are covered by this policy and are strictly prohibited from engaging in any form of discriminatory or harassing conduct. Further, no employee has the authority to suggest to another employee or applicant that the individual's employment, continued employment, or future advancement will be affected in any way by entering into, or refusing to enter into, a personal relationship. Such conduct is a direct violation of this policy.

Conduct prohibited by this policy is unacceptable in the workplace and in any work-related setting outside the workplace, such as business trips, business meetings and business-related social events.

Violation of this policy will subject an employee to disciplinary action, up to and including immediate discharge.

**(3.2.1) Retaliation is Prohibited**

Pivot Education, Inc. prohibits retaliation against any individual who reports discrimination or harassment or participates in an investigation of such reports. Retaliation against an individual for reporting harassment or discrimination or for participating in an investigation of a claim of harassment or discrimination is a serious violation of this policy and, like harassment or discrimination itself, will be subject to disciplinary action, up to and including termination.

**(3.2.2) Reporting Procedures and Investigation**

Pivot Education, Inc. strongly urges the reporting of all incidents of discrimination, harassment or retaliation, regardless of the offender's identity or position. Individuals who believe they have experienced conduct they believe is contrary to the organization's policy or who have concerns about such matters should file their complaints with the Executive Director or any Member of the Board of Directors or the Board's designee, whereupon the matter will be discreetly and thoroughly investigated. The organization will then take immediate steps to stop any behavior which violates this policy and see that it does not repeat itself. Disciplinary action, up to and including termination, calculated to end the discrimination or harassment, will be taken, when appropriate, against the offender(s).

Employees who have experienced conduct they believe is contrary to this policy have an obligation to take advantage of this complaint procedure. An employee's failure to fulfill this obligation could affect his or her rights in pursuing any claim.

Early reporting and intervention have proven to be the most effective method of resolving actual or perceived incidents of discrimination or harassment. Therefore, while no fixed reporting period has been established, the prompt reporting of complaints or concerns is strongly urged so that rapid and constructive action can be taken.

The availability of this complaint procedure does not preclude individuals who believe they are being subjected to harassing conduct from promptly advising the offender that his or her behavior is unwelcome and requesting that it be discontinued.

**(3.2.3) Responsive Action**

Conduct constituting harassment, discrimination or retaliation will be dealt with appropriately. Responsive action may include training, referral to counseling and/or disciplinary action such as warning, reprimand, withholding of a promotion or pay increase, reassignment, temporary suspension without pay or termination, as the organization believes appropriate under all of the circumstances.

Any person utilizing this complaint resolution procedure will be treated courteously, and the problem will be handled swiftly and as confidentially as possible in light of all the circumstances, with appropriate corrective action being taken. The registering of a complaint will in no way be used against that individual, nor will it have an adverse impact on their employment status. A record of the complaint and findings will become

a part of the complaint investigation record and that file will be maintained separately from the personnel files.

#### (3.2.4) **Conclusion**

Individuals who have questions or concerns about this policy may talk with the Principal, Executive Director or any member of the Board of Directors.

Please keep in mind that the very nature of discrimination, harassment and retaliation makes it virtually impossible to detect unless a complaint is appropriately reported. Do not assume that the organization is aware of your problem! It is your responsibility to bring this information to the attention of the organization so the issue can be resolved.

#### (3.2.5) **Training**

New employee orientation training shall include a component on the harassment policy. All administrators are responsible for assuring that their staff members are familiar with the policy on harassment and that new employees are oriented as necessary throughout each school year. As part of the review of the Code of Student conduct at the beginning of the school year, this policy will be discussed in student classes, school advisory councils, and parent and teacher associations. Students enrolled after the beginning of the school year will be provided a copy of the Code of Student conduct and advised of this policy.

### (3.3) **Personnel Records**

Personnel records shall be maintained in accordance with State and Federal Laws. The following records for each employee shall be maintained in a secure file:

- a. Evidence of successful completion of required education
- b. Florida Teaching Certificate, certificate of law for the position
- c. Employee assessments
- d. Signed contract (if required)
- e. Signed loyalty oath if required by the State of Florida or the Federal Government.
- f. Withholding allowance certificate (W-4)
- g. Copy of Social Security Card
- h. Benefits enrollment documentation
- i. Background verification (results of School District fingerprint test)
- j. Letters of reprimand and information regarding any disciplinary action taken
- k. Personal Data Sheet
- l. Employment Eligibility Verification (I9 Form)
- m. Arrest and Conviction Record
- n. Drug-Free Workplace Policy.

It is the responsibility of the employee to obtain and submit these documents:

- a. **Florida Certificate:** the employee must submit the original. A copy shall be made to keep within the file, and the original shall be returned to the employee.
- b. **Health Certificate:** Prior to initial employment and re-employment following a termination, some employees may be required to submit a certificate of health signed by a licensed medical practitioner attesting to the employee's freedom

from contagious and infectious diseases and other physical and medical impairments which would prevent the applicant from performing the duties for whom an employment contract is required.

- c. **Contracts:** Each employee shall sign the offered contract and submit it to the school office within the specified time.
- d. **Certificate Extensions/Additions:** Other official correspondence with the state Department of Education and any other documents which may be requested shall be copied in the school office. Copies shall be retained and the originals shall be returned to the employee.
- e. **Criminal Records:** The school shall determine if the prospective employee has an arrest/conviction record.

Personnel records shall be open for inspection and copying consistent with Florida law, Chapter 119 and Federal laws. Social Security numbers will not be disclosed to the public. Evaluations shall be confidential and not open to the public until the end of the school year immediately following the school year in which the evaluation was made. The following payroll deductions are not open to the public: credit union cards, W-4's, tax shelter information, tax levy, court records.

## (3.4) Compensation and Benefits

### (3.4.1) Salaried Employees

Instructional and administrative staff members shall be salaried employees. Salaries shall be made in accordance with schedules adopted by the Board of Directors of the school, and in accordance with state and federal law.

#### (3.4.1.1) **Initial Salary Placement**

The initial placement on the salary schedule shall be based upon the degree and experience held by the employee on their first day of work.

#### (3.4.1.2) **Benefits**

#### (3.4.1.3) **Paid Time Off**

Salaried employees will be granted Paid Time Off (PTO) within the contract/agreement with the organization.

##### (3.4.1.3.1) **Approval**

PTO requests must be approved by the employee's immediate supervisor prior to the absence, unless the absence is a sick-day and prior notification is not possible.

##### (3.4.1.3.2) **Overuse of PTO**

If a staff member uses all PTO allotted to them, any additional sick days will be without pay. PTO time will be awarded at the beginning of the school year, should an employee leave before the end of the school, PTO will be prorated and the employee will be expected to pay back over-used PTO.

##### (3.4.1.3.3) **Unused PTO for Salaried Employees**

If a staff member uses all PTO allotted to them, any additional sick days will be without pay. PTO time will be awarded at the beginning of the school year, should an employee leave before the end of the school, PTO will be prorated and the employee will be expected to pay back over-used PTO.

**(3.4.1.3.4) Black Out Days**

The organizations acknowledges there are certain periods during the year where the attendance of its teachers and students is of utmost importance. As a result, black out periods have been established whereby staff will not be allowed to utilize personal days. If an employee is ill during these periods, a doctor's note will be required, otherwise all time off will be without pay during the following black out periods:

- Fall FTE Survey Week (Usually 2nd week in October)
- Spring FTE Survey Week (Usually 2nd week in February)
- During Midterm exams
- During Final exams
- During the FCAT administration

**(3.4.1.4) Vacation**

**(3.4.2) Hourly Employees**

Non-instructional and non-administrative employees shall be paid hourly. Hourly rates will be set by the Board of Directors of the school and in accordance with state and federal law.

**(3.4.2.1) Initial Compensation**

Hourly employees shall be offered a specific hourly rate based on the rates paid to similar employees at other local schools.

**(3.4.2.2) Paid Time Off**

All full-time employees are eligible. Temporary, part-time and PRN employees are not eligible. PTO accumulates in relationship to all regular hours you actually work. PTO does not accumulate on overtime hours or on hours not worked, such as when you are using PTO or are on a leave of absence. You may begin using your PTO at any time after it accumulates, however you may not use PTO in advance of any accumulation of it.

| Years of Experience | Accumulation Multiplier | Approximate Weeks Off for Full Time Employees |
|---------------------|-------------------------|---|
| Year 1              | 0.042017                | (2 weeks)                                     |
| Year 2-5            | 0.064378                | (3 weeks)                                     |
| Year 6 and on       | 0.087719                | (4 weeks)                                     |

**(3.4.2.2.1) Approval**

PTO requests must be approved by the employee's immediate supervisor prior to the absence, unless the absence is a sick-day and prior notification is not possible.

**(3.4.2.2.2) Unused PTO for Hourly Employees**

Hourly employees are encouraged to use their PTO time during the fiscal year in which it accrues (July 1 – June 30), however, up to fourth (40) hours of accrued PTO time may be carried forward to the following fiscal year. No more than forty (40) hours may be carried forward into the next year.

**(3.4.2.3) Vacation**

Hourly employees who normally work during the following times will be provided holiday pay for the following days. The amount to be paid will be based on the annual average hours worked per day, which is calculated by finding the sum of hours in the work agreement with the employee divided by 52, divided by 5.

Paid Holidays Time

- Independence Day
- Labor Day

Thanksgiving (total of 3 days)

Winter Break (total of 5 days - Schedule to be determined by the Executive Director)

- Memorial Day

**(3.4.3) Benefits**

The organization provides a comprehensive Benefit Plan which may vary from year to year as determined by the Board of Directors.

**(3.4.3.1) Eligibility**

Regular employees who work at least thirty-two (23) hours per week including job-share employees are eligible for benefits, per individual contracts.

- **Initial Enrollment:** Enrollment and change forms are due in the office within thirty (30) calendar days of hire or change of eligibility status. Coverage becomes effective the first day of the month following thirty (30) days of employment in an eligible benefit status.
- **Open Enrollment:** The Board provides an annual open enrollment period during which an employee may add, cancel, or change coverage. If no action is taken by the employee to change coverage, previous coverages will continue for the next calendar year.

**(3.4.3.2) Organizational Contribution**

The organization contributes toward the cost of certain employee benefits each pay period during the school year in which a paycheck is earned. In any period during which a paycheck is not earned, the employee will owe both the organization contribution amount and the normal insurance deductions. Organizational contribution amounts vary and are determined by the Board annual.

**(3.4.3.3) Termination of Coverage**

Insurance coverage ends the last day of the month in which an employee no longer meets eligibility requirements or terminates employment.

**(3.4.3.4) Leaves of Absence**

While on an approved, unpaid leave of absence, employees are required to pay the entire cost of all insurance plans, including the organization paid portion in order for coverage to continue. The appropriate person(s), agencies, and/or organizations must receive payment by the first of each month. Insurance coverage will be canceled for nonpayment if full payment is not received by the due date. When an employee is on an approved leave, the employee is responsible only for payment of the portion of premium(s) the employee normally pays. Nonpayment of premiums will result in cancellation of coverage.

*Suspension Without Pay:* While on suspension without pay, an employee is considered to be on unpaid leave of absence. As such, the employee is entitled to maintain insurance coverage by paying the total cost of insurance. If the employee elects to continue insurance and is reinstated, the employee will be refunded the organization contribution paid during the period of suspension. If the employee elects to continue insurance and is not reinstated, the insurance will terminate the last day of the month in which the employee is dismissed. If the employee chooses not to continue insurance and is reinstated, insurance will be reinstated the first of the month following the date of the final order and the employee will be responsible for any regular employee contributions.

**(3.4.3.5) Worker's Compensation**

The organization provides Workers' Compensation benefits pursuant to Florida law.

**(3.4.4) Miscellaneous**

**(3.4.4.1) Reclassification**

Employees who complete educational degrees or obtain a professional teaching certificate that would necessitate a move on the salary schedule or hourly rate are required to provide appropriate documentation to the Executive Director. Such changes to the salary shall only be made at three times during the year: at the start of the fiscal year, at the start of the school year, at the start of second semester of the school year.

**(3.4.4.2) Retroactive Payments**

When salary and benefit agreements are reached, any approved retroactive payments due employees will be paid only to those in active pay status on the date of Board approval.

**(3.4.4.3) Return of Overpayments**

If an employee is overpaid due to an error, resignation, or any other reason, the Organization is entitled to recover any overpayment.

**(3.7) Leaves**

**(3.7.1) Personal Leave**

**(3.7.1.1) Leave of Absence without Pay**

Should a situation arise that temporarily prevents an employee from working, he/she may be eligible for a Personal Leave of Absence without pay not to exceed 12 continuous weeks. However, employees must be employed for at least 12 months prior

to the requested leave. Any request for a leave of absence without pay must be submitted in writing as far in advance as possible and it will be reviewed on a case-by-case basis by the Executive Director. The decision to approve or disapprove is based on the educational requirements of the students, the business needs of the school, the length of time requested, the employee's job performance and attendance and punctuality record, the reasons for the leave, the effect the employee's absence will have on the work in the department and the expectation that the employee will return to work when the leave expires. Leaves of absence will be considered only after all PTO leave has been exhausted.

**(3.7.1.1.1) Salary Action**

Any planned salary increase for an employee returning from an unpaid leave of absence without pay will be deferred by the length of the leave.

**(3.7.1.1.2) Returning/Not Returning From a Leave**

Due to the nature of our business, the organization cannot guarantee either that an employee's job will remain available or that a comparable position will exist when return from an unpaid leave is sought. When an employee is ready to return from a leave of absence without pay, the organization will attempt to reinstate the employee to his/her former position or to one with similar responsibilities. If the position or a similar position is not available, the organization will search for a suitable position for 30 days from the date the unpaid leave was to officially end. The employee will not be paid for this time. If the employee has not been placed by the end of this period, he/she will be administratively terminated.

An employee who returns to work following an unpaid leave will be considered as having continuous service. If an employee does not return from an unpaid leave of absence without pay, the termination date is the last day of the authorized leave period or the date the employee notifies the Superintendent that he or she is not returning, whichever is earlier. Employees who have been administratively terminated pursuant to this paragraph may be considered for reemployment.

**(3.7.1.2) General Medical Leave (Including Pregnancy And Illnesses)**

**(3.7.1.2.1) Eligibility**

General Medical Leave is separate from PTO or other leave pursuant to the organization's paid time-off policy. Full-time employees who have completed their initial introductory (probationary) period are eligible for unpaid General Medical Leave not to exceed 12 continuous weeks.

Exceptions to this full-time employment requirement may be made where required by law to accommodate pregnancy related disabilities, on-the-job injuries or illness, or to accommodate an employee with a disability under the Americans with Disabilities Act. You may request a General Medical Leave of Absence when you are unable to work due to a medical condition and you have exhausted (or are expected to exhaust) all available PTO, yet you are still unable to return to work.

**(3.7.1.2.2) Duration**

General Medical Leave, if granted, is granted only for the period of inability to work due to a medical condition, not to exceed 90 days during any “rolling” 12-month period (measured backward from the date the General Medical Leave sought by the employee would begin).

**(3.7.1.2.3) Request and Approval**

Requests for General Medical Leave should be submitted to the Executive Director.

Requests for General Medical Leave must be accompanied by a Certification of Health Care Provider form (available from the Superintendent) whenever such leave is foreseeable. In cases where the leave is not foreseeable, a Certification of Health Care Provider must be provided within fifteen (15) calendar days of the request or as soon as reasonably practicable.

Properly supported and timely requests for General Medical Leave from eligible employees will be considered on a case by case basis subject to the educational requirements of the students, the business needs of the school and the durational limits stated above.

**(3.7.1.2.4) Reports on the Employee’s Status and Intent to Return to Work**

If you are on approved General Medical Leave, you are required to keep the organization advised of your status and intent to return to work. While on leave, you must contact the Executive Director every 2 weeks and inform him/her of your status and intent to return, unless other reporting arrangements have been expressly made. Your failure to keep the organization advised of your status and intent to return to work may be considered a resignation from employment.

**(3.7.1.2.5) Continuing Medical Coverage**

While on a personal or medical unpaid leave of absence, the employee’s medical coverage will continue during the length of the leave not to exceed 12 continuous weeks.

**(3.7.1.2.6) Other Benefits**

While on a personal or medical unpaid leave of absence, the organization will continue the employee’s medical coverage to the extent normally paid on a monthly basis by the organization. However, during the unpaid leave of absence, the organization will not continue to make payments towards the employee’s other benefits, such as, but not limited to, retirement, dental coverage, vision, or disability benefits.

**(3.7.1.2.7) Appeal**

If an employee’s request for personal or medical unpaid leave is denied by the Executive Director, an employee may appeal the decision to the Personnel Committee by submitting a written request to the Superintendent within five (5) business days.

The Personnel Committee will endeavor to schedule a meeting with the employee within 5 business days. A decision to overturn the Executive Director’s decision must be made by a majority of the Personnel Committee present.

**(3.7.2) Military**

If you enter military service while working for the organization, you will not lose your status as a regular employee. You will be given an unpaid leave of absence for the duration of your initial tour of duty and your time in the service will count toward your length of service with the organization. If you are a member of a reserve component of the armed forces, you will be granted unpaid leaves necessary to fulfill the requirements of this affiliation. You may use your vacation time instead of leave time for this purpose if you prefer, but you are not required to do so.

If you apply for reemployment within the time specified by federal law following an honorable discharge from the service, you will be given employment comparable to the position you previously held.

### **(3.7.3)**

#### **Personal Leave of Absence without Pay**

Should a situation arise that temporarily prevents an employee from working, he/she may be eligible for a personal leave of absence without pay not to exceed 12 continuous weeks. However, employees must be employed for at least 12 months prior to the requested leave. Any request for a leave of absence without pay must be submitted in writing as far in advance as possible and it will be reviewed on a case-by-case basis by the Executive Director. The decision to approve or disapprove is based on the educational requirements of the students, the business needs of the school, the length of time requested, the employee's job performance and attendance and punctuality record, the reasons for the leave, the affect the employee's absence will have on the work in the department and the expectation that the employee will return to work when the leave expires. Leaves of absence will be considered only after all PTO leave has been exhausted.

Any planned salary increase for an employee returning from an unpaid leave of absence without pay will be deferred by the length of the leave.

Due to the nature of our business, the organization cannot guarantee either that an employee's job will remain available or that a comparable position will exist when return from an unpaid leave is sought. When an employee is ready to return from a leave of absence without pay, the organization will attempt to reinstate the employee to his/her former position or to one with similar responsibilities. If the position or a similar position is not available, the organization will search for a suitable position for 30 days from the date the unpaid leave was to officially end. The employee will not be paid for this time. If the employee has not been placed by the end of this period, he/she will be administratively terminated.

An employee who returns to work following an unpaid leave will be considered as having continuous service. If an employee does not return from an unpaid leave of absence without pay, the termination date is the last day of the authorized leave period or the date the employee notifies the Superintendent that he or she is not returning, whichever is earlier. Employees who have been administratively terminated pursuant to this paragraph may be considered for reemployment.

### **(3.7.4)**

#### **Jury Duty**

If an employee is called for jury duty during a period you are regularly scheduled to work, you are not required to use PTO to cover your absence. When you are not

impaneled for actual service and only on call, you shall report back to work unless authorized by your supervisor to be absent from your work assignment.

**(3.7.5) Bereavement**

When a death occurs in a regular full-time employee's immediate family, that employee may take up to three (3) days off with pay to attend the funeral or make funeral arrangements. The pay for time off will be prorated for a part-time employee if the funeral occurs on a scheduled work day. The organization reserves the right to require verification of the need for the leave. For the purposes of this policy, immediate family is defined as employee's spouse, parents, stepparents, siblings, children, stepchildren, grandparent, father-in-law, mother-in-law, sister-in-law, son-in-law, daughter-in-law, or grandchild. Should additional time off be needed, the employee may make arrangements with the Superintendent for additional PTO or unpaid days off.

**(3.8) Employee Behavior**

**(3.8.1) Hours of Duty**

Unless another schedule has been determined between an employee and the supervisor, the regular workday for employees is from 7:45 am until 4:45 pm. If an occasion arises that requires leaving earlier than 4:45pm, employees should request a schedule accommodation, in advance, from the building Principal.

**(3.8.1.1) Leaving The Building**

If an employee leaves the building for any reason during the normal hours of duty (i.e. for lunch), the employee is required to both sign out and back in at the office. This allows each employee to be accounted for and to be able to be reached in case of an emergency. Individuals may not sign out or in other employees on their behalf.

**(3.8.2) Professional Conduct**

Employees shall not use the classroom, nor any other part of school facilities, as a platform for making disparaging remarks against students, parents, teachers or administrators. Conduct contrary to this policy may constitute grounds for disciplinary action up to and including dismissal.

**(3.8.2.1) Ethical Standards**

All employees are required to comply with SBE Rule 6B-1.001, Code of Ethics of the Education Profession in Florida and SBE Rule 6B-1.006, Principles of Professional Conduct for the Educational Profession in Florida.

**(3.8.2.2) Reporting Requirements**

It is the duty of all employees to promptly report to the Principal, Executive Director or the Board Chairperson any alleged misconduct by any employee that affects the health, safety or welfare of a student. Failure of an employee to report such misconduct shall result in disciplinary action. The report may be made verbally, however, the Principal, Executive Director or Board Chairperson may request written a explanation, which the employee shall be required to provide.

**(3.8.2.3) Investigation**

The Principal or Executive Director shall investigate any allegation of misconduct by an employee that affects the health, safety or welfare of a student. In the event that the allegation is made against the Executive Director, the Board Chairperson may contact the authorizing school district to assist with investigating the situation.

Upon receiving a complaint of misconduct, a prompt preliminary investigation will be undertaken to determine if a reasonable basis exists. If the allegation warrants further investigation, the employee who is alleged to have committed such misconduct shall be reassigned to a position not requiring direct contact with students, or shall be placed on administrative leave with pay pending the outcome of the investigation.

Information related to the alleged misconduct shall be confidential during the investigation.

**(3.8.2.4) *Legally Sufficient Complaint***

The Executive Director or Board Chairperson shall file any legally sufficient complaint with the Department of Education within thirty (30) days after the date the school became aware of the subject matter of the complaint. A complaint is considered to be legally sufficient if it contains ultimate facts that show that an instructional or administrative employee has committed a violation as provided in 1012.795, F.S., and defined by State Board of Education rule.

**(3.8.2.5) *Resignation or Retirement in Lieu of Termination***

The organization, or any of its employees, shall not enter into a confidentiality agreement regarding terminated or dismissed instructional personnel or administrators, or personnel or administrators who resign in lieu of termination, based in whole or in part on misconduct that affects the health, safety, or welfare of a student, and may not provide instructional personnel with employment references or discuss the personnel's performance with prospective employers in another educational setting, without disclosing the personnel's or administrators' misconduct.

**(3.8.2.6) *Training***

All employees shall be offered the opportunity to go through training on the Code of Ethics and Principles of Professional Conduct. Annually employees will be reminded of the reporting requirements of this policy, and participate in a refresher discussion regarding the Code of Ethics and Principles of Professional Conduct.

**(3.8.2.7) *Confidentiality***

Employees, volunteers, and board members are bound by ethical and legal codes to protect the confidentiality and privacy of our students and their families and to protect and maintain the confidentiality of all information related to them. Confidential communications include conversations, grades, progress, reports, forms, correspondence, and computer generated communications with, about or involving in any way any students or their families.

**(3.8.3) *Professional Standards***

Employees are expected to observe certain standards of job performance and good conduct. When performance or conduct do not meet organizational standards, Pinellas Preparatory Academy, Inc. will endeavor when it deems appropriate to provide the

employee a reasonable opportunity to correct the deficiency. If, however, the employee fails to make the correction, he or she will be subject to discipline, up to and including termination.

The rules set forth below are intended to provide employees with notice of what is expected of them. Necessarily, however, such rules cannot identify every type of unacceptable conduct and performance. Therefore, employees should be aware that conduct not specifically listed below but which adversely affects or is otherwise detrimental to the interests of Pinellas Preparatory Academy, Inc., other employees, students or parents may also result in disciplinary action.

**(3.8.3.1)**

***Job Performance***

Employees may be disciplined for poor job performance, including but not limited to the following:

- Below-average work quality or quantity;
- Poor attitude (for example, rudeness or lack of cooperation);
- Excessive absenteeism, tardiness, or abuse of break and lunch privileges;
- Failure to follow instructions or School procedures; or
- Failure to follow established safety regulations.

**(3.8.3.2)**

***Misconduct***

Employees may be disciplined for misconduct, including but not limited to the following:

- Insubordination;
- Dishonesty;
- Theft;
- Discourtesy;
- Misusing or destroying organization's property or the property of another on organization's premises;
- Violating conflict of interest rules;
- Disclosing or using confidential or proprietary information without authorization;
- Falsifying or altering Organization's records, including the application for employment;
- Interfering with the work performance of others;
- Altercations;
- Harassing, including sexually harassing, employees, students or parents;
- Being under the influence of, manufacturing, dispensing, distributing, using, or possessing alcohol or illegal or controlled substances on Organization property or while conducting School business;
- Gambling on School premises or while conducting organization business;
- Sleeping on the job or leaving the job without authorization;
- Possessing a firearm or other dangerous weapon on organization property or while conducting organization business; [or]

- Being convicted of a crime that indicates unfitness for the job or raises a threat to the safety or well-being of organization, its employees, students, parents or property; or
- Refusing to submit to testing for drugs and/or alcohol.

**(3.8.3.3) Attendance**

In addition to the general rules stated above, employees may be disciplined for failing to observe the following specific requirements relating to attendance:

- Reporting to work on time, observing the time limits for rest and lunch periods, and obtaining approval to leave work early; and
- Notifying the Principal in advance of anticipated tardiness or absence.

**(3.8.4) Discipline Procedure**

Except as set forth elsewhere in the organization's policies, discharge for poor performance ordinarily will be preceded by an oral warning and a written warning.

The organization reserves the right to proceed directly to a written warning for either misconduct or performance deficiency, or to terminate for misconduct without resort to prior disciplinary steps, when the organization deems such action appropriate.

**(3.8.4.1) Suspension and/or Dismissal of Instructional and Administrative Support Personnel During Contract Period**

Suspension of instructional and administrative personnel during the contractual period shall be by the Executive Director. Whether such suspension will be with or without pay will be at the discretion of the Executive Director. The Executive Director (or designee) shall promptly notify each employee in writing who has been suspended or dismissed and set forth the basis for suspension or dismissal.

**(3.8.5) Employment At Will**

Nothing in this Guideline is intended to alter the at-will status of employment with Pinellas Preparatory Academy, Inc.

**(3.8.6) Conflicts of Interest**

No employee or directors of the organization shall solicit students, employees, or the organization for the selling of goods and services, other than as part of a school or PTA/PTO activity.

No employee shall accept any gift, favor, or service of value from companies or organizations that now are engaged in, or are being considered for, doing business with the organization, with the exception of the PTA/PTO.

Expenses for trips to evaluate products or equipment shall be paid by the organization if previously approved by the Executive Director or designee. However, once equipment is purchased or leased, personnel may attend training sessions at the expense of the organization if training is included as a service within the purchase or lease price, and is approved by the Executive Director.

When a seminar, training, or educational meeting or session is provided by an industry representing more than one company and offered at no cost, or at reduced or partial

costs, to staff, and the resulting knowledge or training is judged by the Principal (or designee) to be in the organization's interest with no advantage or obligation given to an individual company, and to be no conflict of interest, the Principal (or designee) may authorize attendance.

No employee shall accept other employment which might impair the employee's independence of judgment in the performance of duties for the organization.

Violation of this policy may constitute grounds for dismissal from employment.

**(3.8.7) Financial Obligations**

Employees are expected to handle their personal financial obligations in such manner as to prevent the involvement of the organization.

**(3.8.8) Political Activities**

Employees are not allowed to conduct in activities support or denouncing individual political candidates or views which conducting activities for the organization. The use of organizational resources for political activities is strictly prohibited. Should an employee choose to campaign for and hold an elective public office, the Principal will ensure proper safeguards are put into place to ensure that the campaign or elected duties do not interfere with the role the employees plays at the organization.

**(3.8.9) Academic Freedom**

It is the rightful duty of a qualified teacher to encourage within students a never-ending search for truth in its many forms. Such a search may inevitably lead to areas of controversy. It is the belief of the organization that discussion of such issues, dealing with local, state, national and international affairs, shall be encouraged. Free, logical, and intelligent dialogue within the classroom is a necessity in the search for truth. Such freedom of expression should be viewed, not simply as a constitutional guarantee, but as a fundamental necessity for the successful practice of scholarship in a free society. All sides of such controversial issues shall be presented where reasonable and feasible in the judgment of the teacher and Principal.

It is recognized that the application of this principle in a K-12 program differs somewhat from its application at higher educational levels. Teachers shall consider the relative level of maturity of their students and their need for guidance in the study of such issues to arrive at objective and balanced views.

Teacher use of potentially controversial materials: It is the responsibility of the teacher (or other instructional staff member) that intends to use materials that may be considered offensive to reasonable persons within the community, to notify the Principal of the potentially controversial materials. It is the Principal's responsibility to insure that the materials used are at grade level or below, and appropriate and consistent with the Sunshine State Standards. If the materials are potentially controversial, a notice will be sent home to the parents giving them the opportunity to allow their student to do an alternative project.

**(3.8.10) Reporting Legal Infractions**

All employees are required to promptly notify the Principal if they are arrested or given a Notice to Appear for any criminal offense, including driving under the influence (DUI)

and other criminal traffic offenses and local ordinance violations punishable by any period of incarceration, or charged in any way with such offenses. In the event that the employee in question is the Principal, he or she shall report said legal infraction(s) to the Executive Director, and in the event that the Executive Director is the person in question the report shall be to the Chairman of the Board. Once a report has been made, the supervisor shall determine whether this offense could make the employee ineligible for employment under § 1012.315, F.S., and take such actions as are deemed necessary.

**(3.8.11) Employees Children At Work**

Due to issues of liability, employees are not allowed to bring their own children to work without the principal's consent. This includes regular school days, workshops, and institute days. Employees may bring their children into the building when working on their own time and school is not in session provided they are properly supervised.

**(3.8.12) Dress and Appearance**

Employees are expected to dress as professionals. On student attendance days, employees may not wear jeans, shorts, t-shirts, tank tops, low-cut shirts, low waisted pants, short-short skirts, extremely baggy, camouflage, or inappropriate clothing.

At a minimum, employees are expected to abide by the guidelines for student dress. Physical education teachers may wear professional athletic apparel, if necessary. Please use professional judgment in regard to selected work attire. It is admissible to wear jeans on Fridays, for fieldtrips or for other days specifically designated as a day to wear particular types of clothing (ex. Red, white and blue day). Appropriate shorts may be worn on field trips. Exceptions are also made for in-service, institute and workshop days when students are not present. Professional attire may be addressed at the discretion of the administration.

**(3.8.13) Email and Communication**

The use of Electronic Mail will be the official method of internal communication among employees. As a result, employees are expected to check their school Email at least twice per day. Employees should not use the organization's provided equipment and network for checking personal communications.

**(3.8.14) Staff Meetings**

Employees are required to attend and fully participate in all staff meetings unless they make prior arrangements with the Principal. If the Principal approves the employee missing a meeting, the employee is responsible for finding a colleague to take notes and provide the information to the Employee. Regular meetings will be held at least once per month.

**(3.9) School Rights**

**(3.9.1) Employment of Relatives**

No prospective employee shall be hired in which a close relative holds an administrative or supervisory position that directs an employee directly or indirectly.

No prospective employee shall be hired without disclosure of a close relative holding any position within the school or as a member of the Board of Directors.

If a close relative is employed by the organization. both parties shall agree in writing to maintaining professional conduct while on duty or at school related activities.

If the close relative is a member of the Board of Directors, the Board member shall abstain from any motions that directly involve employment matters or financial gain for the specific relative employee.

Close relative shall be defined as the first degree of kindred: husband, wife, father, mother, brother, sister, son, daughter, and in-laws of the same degree.

**(3.9.2) Pre-Work Physical Examinations**

Pre-work physical examinations are required of some employees, as mandated by Florida Law, and as prescribed by these policies.

**(3.9.3) Initial Appointment**

Except as otherwise provided for in Florida Statute, applicants for teaching positions must be eligible for a Florida Certificate and qualified for the positions for which they are recommended.

Appointments shall be made only by the Executive Director. The organization may offer contracts to outstanding applicants as early as November in anticipation of openings for the following school year. Priority shall be given to the employment of elementary teachers who are competent to teach reading and/or mathematics skills and concepts. Teachers who profess such competencies but do not or cannot demonstrate them, whether deliberately or not, may be terminated at the discretion of the Executive Director. The organization may require newly appointed teachers to participate in staff development activities up to 40 hours in reading, language arts, mathematics, science and social studies. Such training shall be given outside regular school hours at no cost to the teacher.

An adjunct instructor may be employed on an annual, daily, or part-time hourly basis, and shall not be eligible for a professional services contract.

Employment decisions shall be made by the Executive Director, subject to guidelines and requirements set forth by the Board of Directors and to the annual budget.

**(3.9.3.1) Background Screening**

Prior to employment, candidates must be screened by the organization using the Department of Education's electronic screening tools. The school shall also check each reference from the prospective employee's previous employers and character references when provided and reasonably feasible. All employment candidates that pass the screening shall undergo a level 2 background check with the school district to ensure they are eligible for employment under § 1012.315, F.S.

**(3.9.3.2) Initial Probationary Period**

Employees shall be subject to an initial probationary period of ninety (90) calendar days. Should the employee be discharged for unsatisfactory performance during such initial probationary period, as provided in Section 443.131, Florida Statutes, the School will not be liable for any unemployment compensation benefits.

### **(3.9.4) Employee Evaluations**

#### **(3.9.4.1) Intent**

It is the intent of the organization that assessments of personnel be used for two reasons: 1) Determining the suitability for retention of the continuing and professional service of contract personnel; and 2) Method of assisting staff in their professional development to best impact the education of students and operation of the school. The organization acknowledges and agrees to follow all legal requirements as set forth in Florida Statute as they apply to charter schools.

#### **(3.9.4.2) Observations**

Teachers will have at least one formal and two informal observations during each academic year by the individual's supervisor. The supervisor will share with the Teacher the evaluation criteria and expectations prior to conducting an observation. The supervisor will either provide a written summary or a personal conference to discuss the results the observation within two weeks after the observation.

##### **(3.9.4.2.1) Foundations**

Teacher evaluations and observations shall be based on the Florida Educator Accomplished Practices, or the Florida Leadership Standards for administrative staff members. These standards are defined in Florida Administrative Codes.

#### **(3.9.4.3) Student Performance Data**

Professional staff members shall have a portion of their annual evaluation based upon student performance indicators, as required by Florida law. If the student performance data is not available prior to the due date of the annual evaluations, the evaluations may be amended to incorporate the data once it becomes available.

#### **(3.9.4.4) Annual Evaluation**

Each staff member will receive a written annual evaluation each year, and the evaluation shall be presented to the employee by May 15 of each year.

##### **(3.9.4.4.1) Individual Writing Evaluation**

Each employee shall be notified at the start of each year who their immediate supervisor is who will be writing their annual evaluation. Teachers and support staff will be supervised by an administrative member of the staff. The Executive Director will be evaluated by the Board of Directors.

##### **(3.9.4.4.2) Categories**

As required by law, the organization shall use the following indicators of student performance as the result of the annual evaluation: Highly Effective, Effective, Needs Improvement or Unsatisfactory. For teachers in their first 3 years of employment, the Needs Improvement rating shall be replaced by Developing.

##### **(3.9.4.4.3) Miscellaneous**

Following the completion of the evaluation, the supervisor shall meet with the employee to discuss the evaluation. Employees may provide a written response to the evaluation as a permanent attachment to the evaluation. Employees will be expected to sign the evaluation, however the signature does not necessarily indicate consent with the

findings, only that the employee has received a copy of the evaluation. If the employee refuses to sign the document, the supervisor shall provide a written amendment documenting the date the evaluation was discussed with the employee and that the employee refused to sign the document acknowledging its receipt.

**(3.9.4.4.4) *Unsatisfactory Evaluations***

If an employee has received an unsatisfactory performance assessment or concerns exist throughout the year such as following a formal observation, the supervisor shall confer with the employee and shall make specific recommendations for actions the supervisor believes should result in improvement. The supervisor and employee shall develop a plan, which will be shared with the Executive Director of the organization. The plan shall include a prescribed period of time in which the corrective actions must be completed. If the employee has received an unsatisfactory evaluation, the employee shall be placed on a 90-day probationary period in which the employee shall receive assistance and training to correct the deficiencies noted in the evaluation.

(3.10) Employee Rights and Responsibilities

**(3.10.1) Professional Education**

The organization and the school district conduct various types of professional development opportunities which shall serve to increase the efficiency of all staff members, instructional, administrative and supportive. Staff members are expected to participate in such professional education activities. Days and times designated as pro- ed or training must be used as such unless the Principal agrees to another use of the time in writing.

**(3.10.1.1) *Principal Professional Development***

It is the policy of the Board of Directors that continuous improvement for all employees is essential to the success of Pivot Charter Schools. Therefore, each professional employee of the organization shall develop an Individual Professional Development Plan (IPDP) in conjunction with his or her direct supervisor. This plan shall address the strengths and needs of the employee. After the first evaluation of the employee is complete, the IPDP should address the areas the employee scored the lowest.

The Principal of each school and the Executive Director's shall be required to complete the Florida School Leaders School Leadership Development Program's (<https://www.floridaschoolleaders.org/>) evaluation to identify areas of strengths and weaknesses as an educational leader based on the Florida Principal Leadership Standards. The IPDP developed by these employees should address the results and areas in which the employee scored the lowest on this assessment.

The Executive Director shall develop a form to be used to record each employees's IPDP, the form should be completed by the start of each school year, and included in the employee's personnel file.

**(3.10.2) Copyrights and Patents**

In those instances in which a product is clearly outside the job description of an employee, the results of those employee's work are the employee's private property. Organization employees have the privilege to do research, write articles, pamphlets and

books, and to present papers before learned societies, to enter into contracts for the publication of their works, to procure copyrights and patents for their products, and to receive royalties that may accrue to them as a result of the sale of such works. Such work may not interfere with the performance of the employee's regular or assigned duties.

When such a product is connected with the employee's work assignment, and the employee desires to obtain a copyright or patent, a written outline of the project and a statement of the employee's intent to acquire a copyright or patent shall be presented to the Executive Director who shall have sixty (60) days to determine whether the school shall have an interest in such a product. If, at the end of such a sixty (60) day period, the employee has received no such statement from the Executive Director, the employee shall be free to consider such a product as personal property. In the event the Executive Director informs the employee that the organization has an interest in such product, the employee and the organization may enter into whatever contractual agreement(s) may be in their mutual interests.

**(3.10.3)**

**Reproduction of Copyrighted Materials**

Organization employees are expected to be familiar with and adhere to the provisions of the copyright laws currently in force under Title XVII of the United States Code. Any reproduction of copyrighted materials shall be done either with permission of the copyright holder or within the bounds of the "fair use" doctrine of the copyright law; otherwise, the individual employee responsible for reproduction may be liable for breach of copyright under existing laws.

**(3.10.4)**

**Transporting Students**

Unless an employee is transporting a student at the direction of the Principal, during an emergency, or during an officially approved trip in accordance with organization procedures, such transportation shall be furnished at the employee's own risk or liability. The organization does not expect employees to transport students except when such transportation is provided during an emergency or an officially approved trip. An employee who provides such transportation except for an emergency or during an officially approved trip shall be acting outside the scope of that employee's employment.

Each employee must provide a copy of a valid driver's license and proof insurance to the organization prior to transporting any student for any reason.

**(3.10.5)**

**Smoking of Tobacco Products on School Property**

The purpose of this policy is to comply with the "Florida Clean Indoor Air Act" in protecting the public health, comfort and environment by creating areas in all school facilities that are free from tobacco smoke. No person may be in possession of a lighted cigarette, lighted pipe, lighted cigar, or any other lighted tobacco product, in any school facility, including the outside grounds, or within 100 feet of any building or area used by the organization. No areas for smoking shall be designated on the organization's property, or within 100 feet of any building or area used by the organization. Students and staff members found in possession of tobacco products will face disciplinary actions as described within this policy manual. Other adults found in possession may be

restricted from access to organizational property based on the circumstances of the incident.

**(3.10.6) Drug-Free and Alcohol-Free Workplace**

This policy is derived from, and complies with, the Drug-Free Workplace Act of 1988. Additionally, the purpose of this policy is to comply with the Federal Highway Administration (FHWA) regulations for the establishment and implementation of anti-drug programs in the motor carrier industry as set forth in Title 49 of the Code of Federal Regulations (CFR) Parts 391 “Qualifications of Drivers” and 394 (Notification and Reporting of Accidents.” These parts of the CFR include, by reference, the requirements of 49 CFR Part 40 “Procedures for Transportation Workplace Drug Testing Programs” which apply to all Department of Transportation regulated industries and set forth the procedural requirements for testing, from urine sample collection through analysis and verification of test results.

**(3.10.6.1) Prohibition**

Employees are prohibited from engaging in the unlawful manufacture, distribution, dispensing, possession, being under the influence of, or use of alcohol and/or a controlled substance (as defined in Chapter 893 of the Florida Statutes): in the workplace; or during the workday; or when on duty; or in the presence of students or students’ families as part of any work-related activities. Violation of this prohibition shall result in appropriate disciplinary action up to and including termination and referral for prosecution.

**(3.10.6.2) Drug-Free and Alcohol-Free Workplace**

A drug-free and alcohol-free workplace shall be maintained. Each employee shall be given a copy of this policy as part of this Policy Manual. Additionally, each employee shall be notified that, as a condition of employment, the employee will abide by the terms of this policy and notify the employer of any criminal drug and/or alcohol statute conviction for a violation occurring in the workplace no later than five days after such conviction. The employer will initiate certification/revocation proceedings pursuant to Section 1012.795 F.S. for certificated employees convicted of criminal charges. Within thirty (30) days of notification, appropriate personnel action against such an employee shall be taken, up to and including termination. Employees can also be required to participate satisfactorily in a drug and/or alcohol abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency.

**(3.10.6.3) Drug and Alcohol Testing**

The organization retains the right to perform testing for Drugs and Alcohol at the following times:

- **Pre-employment testing:** All individuals whom the organization intends to hire on a permanent or temporary basis may be tested at the discretion of the organization.
- **Reasonable Suspicion Testing:** When a covered employee’s conduct or appearance is directly observed as indicative of being under the influence of a drug or alcohol during on-duty time.

- **Post-Accident Testing:** As soon as practicable following an accident, a driver (unless deceased) shall be tested for alcohol and controlled substances when any person involved in the accident has been fatally injured or the covered employee received a citation for a moving traffic violation arising from the accident. Testing will be conducted not later than thirty-two (32) hours after the accident for drugs and not later than eight (8) hours after the accident for alcohol. For the purpose of this rule an accident is defined as an incident involving a commercial motor vehicle in which there is either a fatality, an injury treated away from the scene, or a vehicle is required to be towed from the scene.
- **Follow-Up Testing:** As part of or as a follow-up to counseling or rehabilitation the covered employee is subject to unannounced follow-up drug or alcohol testing. The covered employee shall be subject to a minimum of six (6) follow-up drug or alcohol tests in the first twelve (12) months.
- **Random Testing:** Random testing can be performed at any point in time at the discretion of the Principal or Executive Director.
- **Return to Duty Testing:** Before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in a prohibited conduct the covered employee shall undergo a return-to-duty test. In the event a return-to-duty test is required, a substance abuse professional (SAP) must also evaluate the covered employee and the employee must participate in any assistance program prescribed.

**(3.10.6.4) Testable Substances**

Individuals shall be tested for the following drugs: marijuana, cocaine, opiates, amphetamines, phencyclidine (PCP), alcohol, and all other illegal or controlled substances. Covered employees who engage in prohibited drug and/or alcohol related conduct must be immediately removed from duties. Such removal shall be affected for the following, in addition to other actions deemed dangerous or improper by the Principal or Executive Director.

- a. Using alcohol while performing safety-sensitive functions.
- b. When required to take a post-accident alcohol test, using alcohol within eight (8) hours following the accident or prior to undergoing a post-accident alcohol test, whichever comes first.
- c. Refusing to submit to a drug or alcohol test required by post-accident, reasonable suspicion or follow-up test requirements.
- d. Reporting for duty or remaining on duty, requiring the performance of safety-sensitive functions, when the covered employee uses any drug, except when instructed by a physician who has advised the covered employee that the drug does not adversely affect the covered employee's ability to safely operate a CMV.
- e. Reporting for duty, remaining on duty or performing a safety-sensitive function, if the covered employee tests positive for drugs.

### **(3.10.6.5) *Disciplinary Consequences If Positive Results***

Disciplinary action up to and including termination may be instituted against covered employees who have violated the standards of conduct cited in this policy. Nothing will preclude the organization from seeking prosecution for violation of this policy where the Board deems appropriate. An employee who receives a positive drug test result or an alcohol test result (.04 or greater concentration) from a required test during on-duty time will be immediately suspended without pay and recommended for dismissal. An employee who refuses to submit to a required alcohol or controlled substances test will be immediately suspended and recommended for dismissal. Refusal to submit to an alcohol or controlled substances test is defined as: (1) failing to provide adequate breath for testing without a valid medical explanation after the employee has received notice of the requirement for breath testing; (2) failing to provide adequate urine for controlled substances testing without a valid medical explanation after the employee has received notice of the requirement for urine testing; or (3) the employee engaging in conduct that clearly obstructs the testing process. The employee will be provided with the name(s) of a qualified substance Abuse Professional (2) (SAP) and resources available from which the employee may choose to seek assistance.

An offer of employment will be withdrawn for any individual who receives a positive drug test result or who receives a result showing an alcohol concentration of .02 or greater on a required pre-employment test.

An employee who receives a result showing an alcohol concentration of .02-.039 from a required test shall be removed from performing any safety-sensitive function for a minimum of twenty-four (24) hours. Duty time missed shall be charged to unpaid leave or may be charged to PTO time if available. Disciplinary action will be taken in accordance with these policies.

An employee who receives a result showing an alcohol concentration of .02-.039 from a required post-accident test shall be removed from performing any safety-sensitive function for a minimum of twenty-four (24) hours. Duty time missed shall be charged to unpaid leave or may be charged to PTO time if available. Any covered employee who is cited and found guilty of a violation as a result of involvement in an accident will also receive a letter of reprimand. Disciplinary action for subsequent incidents will be taken in accordance with these policies.

An employee who is convicted of felony driving under the influence (DUI) or any drug related offense will be recommended for dismissal. As used in this policy, conviction is defined as a finding of guilt, a plea of guilt, a plea of Nolo Contendere, or entering a Pre-Trial Intervention (PTI) program, whether or not there is a formal adjudication of guilt.

### **(3.10.6.6) *Confidentiality***

The laboratory may disclose test results only to the Executive Director. Any positive results which the organization justifies by acceptable and appropriate medical or scientific documentation to account for the result as other than the intentional ingestion of an illegal drug will be treated as a negative test result and may not be released for the purpose of identifying illegal drug use. Test results will be protected under the provision of the Privacy Act, U.S.C. Section 552 a et seq., and Section 503(e) of the Act, and may not be released in violation of either Act. The School may maintain only

those records necessary for compliance with this order. Any records of the organization, including drug test results, may be released to any management official for purposes of auditing the activities the organization, except that the disclosure of the results of any audit may not include personal identifying information on an employee.

The results of a drug test of an employee may not be disclosed without the prior consent of such employee, unless the disclosure would be:

- a. To the Executive Director, who has authority to take adverse personnel action against such employee; To any supervisory or management official within the organization having authority to take adverse personnel action against such employee.
- b. Pursuant to the order of a court of competent jurisdiction or where required by the organization to defend against any challenge against any adverse personnel action.

Any covered employee who is the subject of a drug or alcohol test shall, upon written request, have access to any records relating to the employee's drug test, the results of any relevant certification, review or revocation of certification proceedings as referred to in 49 CFR Part 40 of this Act. Except as authorized by law, an applicant who is the subject of pre-employment drug testing, however, shall not be entitled to this information.

All drug testing information specifically relating to individuals is confidential and should be treated as such by anyone authorized to review or compile program records. In order to efficiently implement this order and to make information readily retrievable, the Superintendent shall maintain all records relating to reasonable suspicion testing, suspicion of tampering with evidence, and any other authorized documentation necessary to implement this order. Such shall remain confidential and maintained in a secure location with limited access. Only authorized individuals who have a "need to know" shall have access to them.

### **(3.10.7) Teacher Certification Standards**

#### **(3.10.7.1) *Applicable Standards***

In the absence of Florida Statutes or State Board of Education Rules mandating teacher certification requirements, the Executive Director is directed to establish and keep in force procedures for appropriate certification guidelines. The provision of the Standards shall apply to all teaching certificates issued for grades K-12. When state-mandated certificates are available, all such certificates issued by the organization shall become null and void.

#### **(3.10.7.2) *Certification Renewals***

Professional staff members are required to maintain their state educator certification in accordance to Florida regulations. Staff members are responsible for the completion and submission of all applicable forms and fees for the certification renewals. Once a professional staff member has renewed their certification, they must provide a copy of the certification to their supervisor.

**(3.10.8)**

**Familiarity with Statutes, Rules and Policies**

All instructional personnel are expected to be familiar with Florida Statutes, State Board of Education Rules, and Policies of the School, which have particular reference to their responsibilities as educators. When in doubt about the existence or applicability of any such statute, rule or policy, personnel should check with the Principal or Executive Director. Copies of Florida Statutes and State Board of Education Rules can be obtained from county law libraries, courthouses in St. Petersburg and Clearwater and the Internet.

**(3.10.9)**

**Tutoring**

No teacher shall receive compensation for tutoring a student who is enrolled in the teacher's class during the regular school term. No tutoring by teachers for compensation is allowed on the organization's property. Tutoring is defined as reviewing curriculum that is taught within the classroom.

**(3.10.10)**

**Membership in Organizations**

Membership in any organization shall not be a condition for employment by the organization.

**(3.10.11)**

**Professional Development Trade Hours**

In an attempt to encourage instructional and administrative staff members to participate in outside professional development activities, the school agrees to offer Professional Development Trade Days [PDTD] to employees. Periodically throughout the year professional development days are scheduled, staff members may utilize accumulated PDTD so that they may not report to work on some professional development days, or be allowed to leave early on early release days. If a staff member wants to participate in a professional development activity outside of their normal work hours, and count the training as a PDTD, the employee will ask the Principal for permission to attend the training as a PDTD. The Principal has the discretion to allow or disallow the training to be used as PDTD. The Principal also has the option to disallow specific professional development days to be missed by staff members if the offering on that day is important to the mission of the school.

**(3.10.12)**

**Reappointment or Non-Reappointment of Certified Personnel Not Under Continuing Contract**

Teachers with annual contracts will receive notification by May 15 if they are being asked to return the following school year.

**(3.11)**

**Resignations**

**(3.11.1)**

**Instructional Staff**

Instructional employees who for any reason intend to retire or resign at the end of the current school year are encouraged to indicate their plans in writing to the Executive Director as early as possible, but no later than June 1. Letters of resignation shall be submitted to the Executive Director. The letter should state reasons and an effective date for the resignation.

It is the practice of the organization to release individuals who resign for good cause prior to July 1 of each year. After July 1, a certificated employee may resign, however, the organization reserves the right to pursue any and all legal options available to it and may require monetary restitution from the employee for any funds the employee may have received for the new fiscal year.

**(3.11.2)**

### **Support Staff**

Support staff who wish to resign should address a letter of resignation to the Executive Director. The letter should state reasons and an effective date for the resignation. The organization requests employees provide fourteen (14) days written notice prior to resignation whenever possible.

**(3.12)**

## Reduction in Force

**(3.12.1)**

### **Instructional Staff**

If it becomes necessary to reduce the number of teachers due to a decrease in enrollment, school reorganization or the financial condition of the School, the organization will act to retain the most qualified teachers best able to serve the needs of the School's students. Seniority will not be the primary consideration for which staff members will be retained.

**(3.12.2)**

### **Support Staff**

The organization is authorized to reduce the number of support staff when in the Executive Director's sole discretion factors including, but not limited to, decreases in student enrollment, School reorganization or financial reasons necessitate such reduction. In making such staff reductions, the organization will seek to retain those staff members best able to serve the needs of School's students.

**(3.13)**

## Travel and Entertainment Expenses

**(3.13.1)**

### **Prior Approval**

The charter school recognizes that employees who travel far from home to represent the charter school's business interests must forego their living accommodations and may forfeit personal time. Accordingly, the charter school will make efforts to provide comfortable and secure accommodations for lodging, meals and travel for employees. However, these items are not intended to be perquisites and the charter school reserves the right to deny reimbursement of expenses that are considered lavish or extravagant. Prior to any travel or entertainment being conducted on the organization's behalf the employee must first obtain the prior approval of the Principal if the person making the request is the Executive Director permission should be obtained from the Board Chairperson.

**(3.13.2)**

### **Travel Arrangements**

All arrangements required for business travel are to be made by the individual participating in the travel. The Executive Director shall provide a form which will collect all pertinent travel information. For maximum savings on airfares, this form should be completed 30 days in advance unless this is not possible due to the nature of the trip. Unless otherwise agreed to by the Executive Director all expenses shall be paid by the

employee to be reimbursed by the organization afterwards. The organization discourages the use cash advances to pay for travel expenses. However, should a cash advance be necessary under special circumstances and the Executive Director approves such, all receipts must be submitted for the funds advanced. Any amount not covered by the receipts shall be returned to the school upon the conclusion of the travel. If the funds are not returned, they shall be deducted from the employee's paycheck. Direct billing to the charter school from hotels, restaurants, etc. are not permitted.

### **(3.13.3) Expense Guidelines**

#### **(3.13.3.1) Air Travel**

Make airline reservations based on the following criteria:

- **Expediency:** Getting the employee to their destination in an expedient way. (Direct flights when possible or connecting flights if necessary for faster flight schedules).
- **Cost:** Employees will fly coach class.
- **Carrier:** An employee's preferred airline can be utilized as long as expediency and cost factors are equal.
- Employees must use regularly scheduled airlines and obtain the lowest (discount) fare available. This may mean that the employee will fly at times that is not always the most convenient for them.

#### **(3.13.3.2) Lodging**

Employees are expected to use sound business judgment in selecting accommodations. In many cases a corporate rate is available and the employee should request this rate when registering at the hotel.

Suite accommodations are not permitted; the organization pays only for single rooms. An upgrade to a security room is a personal expense unless the hotel is in a place or a city that is designated to be a risk to all travelers.

If late arrival is guaranteed and the reservation must be canceled, the cancellation must be made within the time allowed. The organization will not pay for no-shows. All charges shown on the expense report form should be itemized to show hotel charges, meals, telephone charges, etc. In-room movies and use of mini-bars are considered personal expenses and therefore not reimbursable.

The employee will be reimbursed, less any travel advance for bills paid. The original detailed hotel bill as to be attached to the expense report. The employee will use the organization's sale tax exemption certificate; Florida sales taxes will not be reimbursed.

Employees will not be reimbursed for overnight travel within fifty (50) miles (one way) of the organization's office or their residence unless the circumstances necessitating the overnight stay is fully explained by the employee and approved by the Executive Director.

**(3.13.3.3) Meals**

For out of county travel, employees shall be allowed reimbursement for subsistence. Subsistence allowances for meals shall be paid at the following current rates:

- **BREAKFAST:** When travel begins before 6:00a.m. and extends beyond 8:00a.m., the traveler is entitled to an allowance for breakfast of \$3.00.
- **LUNCH:** When travel begins before 12:00 noon and extends beyond 2:00p.m., the traveler is entitled to an allowance for lunch of \$6.00.
- **DINNER:** When travel begins before 6:00p.m. and extends beyond 8:00p.m., the traveler is entitled to an allowance for dinner of \$12.00.

In lieu of receiving subsistence allowances for meals and actual expenses for lodging at the single occupancy rate, employees who are traveling may elect to receive a per diem rate of \$125.00 for overnight travel.

**(3.13.3.4) Car rentals**

The use of a rental car is permitted ONLY when it is in the interest of the organization to do so. Personal medical insurance should NOT be purchased from the car rental agency since employees are already covered under worker's compensation insurance.

For fewer than three (3) employees traveling together, the charter school will reimburse for the cost of a compact car. Upgrades to mid size are permissible if three (3) or more employees travel together.

If rental cars are retained over a weekend, such expenses are personal except when used to travel on a weekend to another location on organizational business.

**(3.13.3.5) Personal Vehicles**

An employee required to use their own automobile for business will be reimbursed at the prevailing rate per tax guidelines for per-mile deductions. The employee must provide on the expense report, documentation including dates, miles traveled and purpose of each trip. The organization assumes no responsibility for personal automobiles used for business. Further, any parking or speeding violation is the sole responsibility of the employee.

**(3.13.3.6) Telephone**

Business related telephone charges on an itemized lodging receipt and/or telephone charge card should be itemized under telephone expense.

**(3.13.3.7) Entertainment**

In order to be reimbursable, entertainment expenses must be ordinary and necessary expenses directly related or associated with the active conduct of business. It is very important to properly document entertainment expenses and substantiate the following elements:

- The date
- The place (name and location)

- Description or type of entertainment
- The business purpose and the nature of the business benefit expected to be gained by the organization. The business relationship to the organization of the persons entertained (name, occupation, title, etc.).

**(3.13.3.8) *Miscellaneous Expenses***

Any additional business expenses that are not categorized above should be listed under miscellaneous expenses and documented with all pertinent information to substantiate the expense.

Unexplained items labeled "miscellaneous" are not allowable items of expense. Some examples of items not considered allowable are: newspapers, magazines, movies, shoe shines, personal expenses incurred for household services due to an employee's absence on a business trip, etc.

**(3.13.4) *Expense Report Preparation and Reimbursement***

All business travel and entertainment expenditures incurred by employees are reimbursed through the use of a standard Expense Report attached to the Travel Arrangements form which shall be made available by the Executive Director. Expense reports should be completed and turned in within two weeks of return or incurrence of expenses. Expense report forms must be filled out and totaled completely. Use the appropriate headings and total on a daily basis. Required receipts for items charged must be attached to the report. Any questions regarding completion of the report should be directed to the Executive Director or bookkeeper for the organization.

Upon completion, the expense report along with all attachments should be turned into the employee's supervisor for approval. After approval, the expense report is submitted to the bookkeeper or designee for processing and reimbursement. In order to expedite reimbursements, the employee should ensure that the report is completed properly, required documentation is attached, proper authorization has been obtained, and any unusual items are properly explained and documented. Authorized expense reports will be reimbursed by check, normally within two weeks after receipt by the bookkeeper or designee.

**(3.13.5) *Local Travel Reimbursement Report Preparation***

All local travel expenditures incurred by employees on behalf of the organization are reimbursable if approved by the the employee's supervisor. Employees should complete an Expense Report to request reimbursement for these expenses. Upon completion, the expense report along with all attachments should be turned into the employee's supervisor for approval. After approval, the expense report is submitted to the bookkeeper or designee for processing and reimbursement. In order to expedite reimbursement, the employee should ensure that the report is completed properly, required documentation is attached, proper authorization is obtained, and any unusual items properly explained and documented.

**(4) Student Policies**

## (4.1)

### Admission of Students

The schools operated by the organization are a public charter schools which receive their Charters from the the local school district, and as such, complies with all applicable requirements of state law and the public school system as well as their Charters. As such, we must admit all eligible students based on space availability. The enrollment critiera is as follows:

- Resident of the sponsoring county
- In grades 6-12 to 16 years of are compensatory and fully eligible for open enrollment. Students born before September 1 and are 17 must meet certain conditions for open enrollment as well as 18 and 19-year old students.
- Students that are 17 and born after September 1 will be considered as a 16 year old for enrollment purposes. Students that are 17 and born before September 1 must have a minimum of 12 credits. If a student does not have 12 credits, the student can be conditionally enrolled with an academic contract.
- Eighteen and 19 year old students must have been continuously enrolled in another 9-12 regular educational setting other than adult education or a homeschool program. In addition, 18 and 19 year olds must be on track to graduate the semester at the conclusion of the academic year. Fifth-year seniors will be admitted under a conditional academic contract. (*Continuous enrollment for dropout purposes is defined as no break in enrollment for more than 10 consecutive school days. On the 11th consecutive school day a student age 18 or above is considered a dropout.*)
- Up to 22 with an IEP qualification and all inclusive programming (determined by a pre-enrollment staffing to determine the LRE)
- Discretionary principal approval – student is currently enrolled in or would be in an Alternative Learning Center (ALC) or rehabilitative program
- Non-discretionary enrollment - student must be released from an ALC or state approved rehabilitative program prior to enrollment as identified by the sponsoring district or program as complete
- Students living within two miles from the school will have the highest priority
- Students living 2.1 to five miles from the school will have the second priority
- Students 5.1 miles and beyond will have the least priority

#### (4.1.1)

#### **Enrollment Process**

If there is an opening in any program during the current school year, a student will only be enrolled upon submission of a completed Pivot Charter School (PCS) admissions packet. Otherwise, new applicants will be placed on a waiting list. As soon as an opening occurs, the administrative staff will contact the parent/guardian to complete the enrollment process. There is no tuition for admission to charter school programs, but a student must be able to furnish proof of residency.

If enrolling from the Sponsoring County public school, the student will be listed under PCS attendance in the County student database. Student records will be transferred to PCS from the sending school. If enrolling from a private school, a public school outside the school district or home-schooling, final evaluation of the application will depend on County school district regulations.

**(4.1.2)**

**Student Lottery / Selection Policy**

Students will be admitted to Pivot Charter School regardless of race, gender, religion or ethnic origin and our admissions and dismissal procedures will be equitable for all students.

1. Pivot Charter School will set and advertise in February and March the registration date. All brochures, flyers and advertising will include the registration deadline and admissions process. All applications are due April 24 of each year.
2. If the number of applicants is less than or equal to the number of available slots which qualifies applicant will be accepted and enrolled.
3. If the number of applicants meeting the established criteria of this charter exceeds the stated capacity of the school, or individual classroom or program, each student would be placed in a random lottery.
4. Each application will be given a number, and all numbers for each classroom program will be placed in a container. Numbers will be drawn on a random basis and all slots will be filled based on the order of their drawing. All numbers will be picked and the remainder will be used to create the wait list (the list will be developed based on the number order).
5. There will be at least two staff members present during the lottery drawing and the lottery will be open to the public. The lottery will take place every May 1st.
6. After the "Lottery" is completed, the wait list will be established and prioritized based on the order their numbers are drawn in.
7. As openings arise throughout the year, the next child on the waiting list for that particular classroom will be offered the space.
8. The parent has 48 hours to accept/refuse the space and complete all required documentation for admission into the program. If the parent is not able to do so, the space will go to the next child on the waiting list.
9. The following groups of students will not have to participate in the lottery and will gain automatic admissions/re-admission assuming they complete the "Intent to Return" form prior to the application deadline date.
  - a. Current students and their siblings.
  - b. Children of founding board members and teachers at Pivot Charter School.

**(4.1.3)**

**Late Entries**

Students who enroll into the organization after the start of a term will need to work with each teacher to determine what back work, if any, needs to be completed. Some assignments or testing which are essential to the completion of the required State Standards may be required. Teachers will give students until the end of the current term to complete assignments.

**(4.1.4)**

**Withdrawals**

Students who choose to leave the organization's school will be assisted in their transition to their new school by having the School create a report indicating the student's performance and current grade in each class. These reports can be provided twenty-four (24) hours after the parent provides notification of the withdrawal. The organization reserves the right to follow up with the student's future placement to ensure compliance with compulsory attendance laws.

## (4.2) Attendance

Florida Statutes 1003.21 mandates that all students are required to attend school, and sets forth specific requirements for the school. Parents and students can be held legally accountable for truancy.

### (4.2.1) Parental Reporting

Within 48 hours of a student's absence, the parent will send a note or call the school explaining the absence. If that contact does not occur, the absence will be recorded as unexcused. In the case that an unexcused absence is recorded, the school will attempt to contact the student's parent or legal guardian regarding the absence to prevent a pattern of nonattendance. Under some circumstances, more than parental notification may be required by the Principal.

### (4.2.2) Excused Absences

The following absences will be considered excused:

- a. Student is ill. (If illness persists for three or more consecutive days, or requires numerous nonconsecutive absences, a doctor's note may be required, as requested by the Principal).
- b. Major illness in the family. (If illness persists for three or more consecutive days, or requires numerous nonconsecutive absences, a doctor's note may be required, as requested by the Principal).
- c. Death in the immediate family of the student. A student's immediate family includes biological parents, grandparents, siblings, or adults and siblings from an immediate extended family unit, at the Principal's discretion.
- d. Religious holiday of the student's faith. This requires a parent's note seventy-two (72) hours prior to the absence.
- e. Religious institutes, conferences, or workshops (only two days allowed if the request is signed by a parent and given to the school at least forty-eight (48) hours before the absence).
- f. Subpoena or forced absence by any law enforcement agency. A copy of the subpoena or summons will be given to the school's Principal (or designee). This includes detention at a juvenile center in which the student continues his/her education.
- g. Mental health counseling for the student. A note on business stationery from the mental health facility or personnel may be required by the Principal.
- h. A major disaster, as decided by the administration.
- i. Any absence, including those for field trips or other parental requests as judged appropriate by the school's Principal, provided that the request is submitted to the Principal forty-eight (48) hours in advance of the absence. The Principal may waive the requirement for advance notice if extenuating circumstances exist.

### (4.2.3) Tardiness

The organization believes it is extremely important that students arrive at school on time and ready to learn. Students are allowed to enter the building 15 minutes prior to the start of school. We recommend students arrive a minimum of 5 minutes prior to the start of school to ensure ample time to reach their classroom before the start of class. We

have created strict guidelines in regards to students who are tardy to school in the morning:

- a. Students who are not in class at the time class begins will be considered tardy.
- b. For the legal purposes of truancy numerous tardies can be equated to absences. If a student is excessively tardy (defined as an hour or more late to school), three (3) such events will equate a single absence. Six (6) occurrences of tardiness less than one hour will equate to a single absence. The Principal can disallow individual instances of being tardy from this rule if a written explanation is provided to the school upon the return of the student.

#### **(4.2.4) Early Removal / Dismissal**

Students are expected to attend the entire day of school. The early release of students causes disruption to academic performance of all students and may create safety and security concerns. Students who are removed early from school are missing valuable instruction time, and this will be treated in the same manner as tardiness. A student who is removed an hour or more early from school three (3) times will be equated to one (1) absence. Six (6) occurrences of being removed from school less than an hour will equate to a single absence.

#### **(4.2.6) Truancy Consequences**

If a student has at least five (5) unexcused absences within a calendar month, or ten (10) days out of ninety (90), the student's homeroom teacher shall report to the Principal that there may be a pattern of absence existing. After this referral, the Principal will consider referring the student to a child study team for the purposes of satisfying the requirements of § 1003.26, Florida Statutes. If the team finds a pattern of nonattendance, the team will meet with the parent to identify potential remedies; the Principal must notify the School District's charter school office of the identified pattern of nonattendance. If the initial meeting with the parent does not resolve the problem, the team shall implement the following pursuant to Florida Statutes:

1. Frequent attempts at communication between the teacher and the family.
2. Evaluation for alternative education programs.
3. Attendance contracts.

The team may also, but is not required to, implement other interventions that include referral to other agencies for family services or changes to the learning environment. Additionally, legal authorities will be notified if the problem is not corrected.

If the parent refuses to participate in the remedial strategies because he or she believes those strategies are unnecessary or inappropriate, the parent may appeal to the Executive Director.

### **(4.3) Behavioral**

#### **(4.3.1) Code of Student Conduct**

Unless otherwise spelled out within these organizational policies, the organization will adhere to the School District's Code of Student Conduct. Copies of the organizations

student policies and the District's Code of Conduct will be made available all parents and students.

**(4.3.2) Foundation**

The organization believes that children learn in a variety of ways, and that our teachers provide an environment that meets the needs of our students. Utilizing our approach to education we believe that through student engagement we reduce the number of behavioral concerns within the classroom. However, we realize that when dealing with children, issues may arise which may require the school to address student behavior. In doing so, the school believes behavioral correction should be a learning opportunity, where students are given the opportunity to learn and demonstrate appropriate behavior, and cooperatively accept responsibility and be accountable for their actions. The organization believes we have a unique partnership with like-minded parents who share this philosophy of behavioral management and positive parental role modeling.

**(4.3.3) Removal of Students from Class**

On occasion, a student's behavior may require that he or she be removed from a class to ensure either the academic growth of other students or the safety of everyone involved. Due to the nature of our school, teachers do not have the option of requesting permanent removal from class. Should a situation arise that a student requires removal from class, the student may be issued a 10-15 minute cooling-off period to reflect and regroup. The student will be placed in the office until they regain both self-control and a cooperative attitude before returning to class. If necessary, the student may meet with the Principal (or designee) to discuss the concern and ways of remedying the situation. If necessary, the Principal (or designee) may meet with other involved or uninvolved students and/or the teacher(s) to identify ways to rectify the situation, towards allowing the student to return to class. Parents will receive notification by either a telephone call and/or in writing (e.g. email) if a child is removed from class for serious or repetitive behavioral concerns.

**(4.3.4) Behavioral Expectations**

Students are expected to behave in a respectful manner while under the responsibility of school staff (this includes during the school hours, after school activities, or any activity in which school staff members are responsible for the students). The Principal shall ensure that a document explaining student expectations and sample misbehaviors are developed which clearly describe behavioral expectations and consequences for misbehavior. This document shall be shared with families at the start of each school year and as often as needed thereafter. Each year, the school staff shall review the document and may make appropriate revisions.

**(4.3.5) Behavioral Consequences**

The following is a list of possible consequences that may be given to students for inappropriate behavior. In certain instances, other consequences that appropriately match the misbehavior may also be used.

**(4.3.5.1) Verbal Warning**

If a student is exhibiting a relatively minor behavioral infraction, the staff at their professional discretion, should give the child verbal warnings that their behavior is

inappropriate, and the warning may be documented by that staff member for future reference.

**(4.3.5.2) *Written Warning***

If the behavior was a minor infraction and/or was the first or second occurrence, the student may receive a written warning to let the student know that if similar inappropriate behavior continues there will be similar and more significant consequences in the future. This written notice will be sent home through either written or email form for the parents to make them aware of the issue.

**(4.3.5.3) *Referral To Permanent File***

A referral to a permanent file will be a paper that is completed by the Principal (or designee) after an internal investigation, including the student's comments regarding the misbehavior. This hard copy must be taken home, signed by the parent, and returned to school the next school day. Indication of the incident will be recorded within the student's permanent school records, and appropriate sanctions levied according to existing behavioral expectation guidelines. If the student does not return the referral with a parent signature, they may receive additional consequences, and the parent will be called.

**(4.3.5.4) *Detention***

A detention is an extension of the school day where the students will be expected to stay after school. The student must report immediately after school and stay until the time designated by the Principal. If the student does not report immediately on the assigned school day, or is absent for any reason (except having an official doctor's note on physician stationery), that detention will be rescheduled and an additional penalty detention added.

**(4.3.5.5) *In School Suspension***

An in school suspension is a consequence which secludes a student from his or her peers and allows the student time to reflect on his or her misbehavior. Students will be removed from class and located in an area outside the common areas where students are typically present. While suspended, students are not allowed to participate in any school related activities, including common lunch room. In school suspensions shall not be considered an absence from school. However, students are required to complete, on their own time, all make up work from the time missed. Computers may not be used by students in ISS, unless a teacher gives specific permission. When returning to normal class schedules, the student will not be allowed to participate in extracurricular activities or non-educational field trips for a period of thirty (30) days following the suspension.

**(4.3.5.6) *Out of School Suspension***

An out-of-school suspension will be time away from school to consider and reflect their misbehavior. When suspended, a student is not allowed on school property, and if seen on school property, will be considered trespassing. While suspended, students are not allowed to participate in any school related activities. Out-of-school suspensions will be considered unexcused absences, and the student will be required to make up on their own time all work from time missed. When returning, students will not be allowed to participate in extracurricular activities or non-educational field trips for a period of thirty (30) days following the suspension.

**(4.3.5.7) *Recommend Reassignment***

Under rare, serious circumstances, the organization may consider recommending the student be reassigned to another school by the School District. Should this become necessary the Principal shall work with District personnel to ensure proper district protocol and expectations are adhered to.

**(4.3.5.8) *Discipline of Students with Disabilities***

The obligation and the responsibility to attend school regularly and to comply with the organization's discipline policies apply to all students. When appropriate, the School may discipline a student with a disability who has not complied with the discipline organization's policies. Special education services will be provided to a disabled student if the student has been removed from school for more than ten (10) school days. If a student with a disability is removed for less than ten (10) cumulative days, educational services will be provided only if such services are provided to students without disabilities who have been similarly removed.

**(4.3.6) *Appeal Process***

**(4.3.6.1) *Foundation***

Every effort is taken to ensure students are treated equitably and fairly when investigating a behavioral concern and issuing referrals. However, should a parent/guardian feel that such issuance is unwarranted; they may use the following procedure to appeal the referral.

**(4.3.6.2) *Requesting An Appeal***

If a parent/guardian wishes to request an appeal to a referral, the parent/guardian must submit such a request in writing to the Principal within four (4) calendar days of the issuance of the referral. Failure to make a written appeal will forfeit the parent/guardians right to any further appeal hearing. Upon receipt of the request, the Principal shall decide if the request is warranted. If the Principal decides to overturn the referral he or she may do so. If not, the appeal will be forwarded to the Executive Director for a decision. The Executive Director shall responding writing within three (3) school days of the appeal being received. If the parent/guardian is unhappy with the decision of the Executive Director, they may request a further appeal to the Behavioral Team. The request must be made in writing within three (3) calendars days of receiving the response from the Executive Director.

**(4.3.6.3) *Student Consequences***

During the appeal process, the consequences the student was issued will stand and must be met by the student while any final decision is pending. If the student was suspended, he or she must also honor the terms of the suspension including accompanying consequences until the behavior team makes its decision. If the referral is appealed successfully all record of the consequence will be expunged and the students will be excused from any missed work during that time.

**(4.3.6.4) *Behavior Team Meeting***

After receiving a request for further appeal after the Executive Director has issued a decision on an appeal, the Principal will coordinate a behavior team meeting, making an effort to schedule the meeting at a time that is convenient for all involved, including the

parent/guardian who requested the appeal. The meeting shall be scheduled within four (4) school days of receiving the request. At the meeting the parent/guardian will be allowed the opportunity to present their case as to why the referral is being contested. The Principal (or designee) shall provide information regarding the investigation and justifications for why the referral was earned by the student. The behavior team can ask questions of either the parent or Principal in clarifying the issue. At the appeal meeting the Principal will serve as non-voting members of the team, and the Principal will leave with the parents during the committee's deliberation of the appeal and decision-making process. After gathering information, the team's deliberation shall be limited to the following:

1. Deciding whether the student's behavior or act was in clear violation of the organization's policies, the behavioral expectations outlined by the school, the District's Code of Student Conduct, and/or the mission of the school;
2. Deciding whether the student(s) is/are known to have committed the violation;
3. Deciding whether to uphold the initial findings and decision, or whether an appropriate alternate sanction should be issued based on established parameters of the Behavior Program for the school.

**(4.3.6.5) Reporting of Decision**

Under most circumstances, the behavior team will make a decision at the initial meeting, however, the team reserves the right to meet within four (4) school days to review and make a final decision. The final decision will be determined by a simple majority vote and will be presented to the Principal. The decision of the committee will be documented and a copy of the decision will be mailed to the parent/guardian within four (4) business days of the completion of the appeal committee's hearing. The decision of the behavior team is considered a final decision. In all cases, members' individual votes remain confidential.

**(4.3.6.6) Further Appeals**

Should a parent/guardian be dissatisfied with the decision of the behavior team, they may further appeal the decision only on the grounds that the school violated a procedural safeguard. The parent/guardian may submit a written request to the Executive Director requesting an appeal to the Board of Directors. The Board of Directors will only consider whether procedures were followed, and will not address questions or concerns regarding the appropriateness of a consequence. Parents are advised to consider that all meetings of the Board of Directors are considered public meetings, and as such any information shared with the Board is a matter of public record.

**(4.3.7) Student Conduct on Buses**

The safety of students during their transportation to and from school as well as while on field trips is a responsibility which they and their parents/guardians share with the bus drivers and school officials. Therefore, the rules of student conduct will be issued to all students at the beginning of the school year, and to new students upon enrollment.

Students are subject to all school rules and potential consequences while utilizing school transportation. Additionally, suspension of transportation privileges is another possible consequence for misbehavior during transportation.

**(4.3.8) Teen Dating Violence and Abuse**

The organization strictly prohibits any act of teen dating violence and abuse committed by one student against another on school property, during a school-sponsored activity, or during school-sponsored transportation.

**(4.3.8.1) Definition**

Teen Dating Violence and Abuse shall be defined as a pattern of emotional, verbal, sexual, or physical violence and/or abuse by one person in a current or past relationship of a romantic nature to exert power and control over another when one or both of the partners is a teenager. Abuse may include insults, coercion, social sabotage, sexual harassment, threats and/or acts of physical or sexual abuse. The abusive partner uses this pattern of violent and coercive behavior to gain power and maintain control over the dating partner. To be subject to this Policy, teen dating violence and abuse committed by one student against another must occur on school property, during a school sponsored activity, or during school-sponsored transportation.

**(4.3.8.2) Reporting**

Any student who is the victim of an act of teen dating violence and abuse, or has cause to believe that s/he is in immediate danger of becoming the victim of an act of teen dating violence and abuse, should report the matter to the Principal or to any member of the school staff. Any employee who has received a report of, or has any reason to suspect that acts of teen dating violence and abuse may be occurring shall report such report, observations, or suspicions to the Principal or designee. Any student, parent or community member who has reason to suspect that a student may be the victim of dating violence and abuse should report it to the Principal or designee, or use the anonymous reporting measures identified in policy against Bullying and Harassment. The Principal shall ensure the school community is made aware of how to report an act of dating violence and abuse.

**(4.3.8.3) Investigation**

The investigation of a report or suspicion of teen dating violence and abuse shall follow the same procedures as a bullying investigation identified elsewhere within these policies, including parent notification. At no time will the alleged perpetrator and victim be interviewed together. The written report of the investigation shall include all pertinent information and a determination upon whether an act of teen dating violence and abuse occurred based upon the definition above. The organization reserves the right to investigate a report of teen dating violence and abuse regardless of whether the student who is allegedly the victim wants to pursue the matter. If an investigation is pursued against the alleged victim's wishes, the Principal or designee will notify the victim and refer the victim to appropriate services for safety planning.

**(4.3.8.4) Consequences**

At the conclusion of the investigation the Principal or designee will determine whether or not the allegation of teen dating violence and abuse was substantiated. If the situation is substantiated, consequences will be assigned based upon policy the

behavioral consequences listed within these policies. All disciplinary action shall be taken in accordance with State law and applicable policy. In addition to school consequences, if the Principal or designee believes a crime has been committed, law enforcement will be immediately notified. In those cases where teen dating violence and abuse is not substantiated, the Principal or designee may consider whether the alleged conduct nevertheless warrants disciplinary action in accordance with the school policies.

**(4.3.8.5) Support and Reasonable Accommodations**

If requested during or after the investigation, the Principal shall make reasonable accommodations for the student who is allegedly experiencing teen dating violence and abuse including, but not limited to the following:

1. "Stay Away Contract," that is, a contract with the alleged perpetrator to stay away from the victim, including electronic contact, while on school grounds, on school transportation, and during school sponsored programs and events;
2. Class schedule changes;
3. Protection that will enable safe egress/regress from school, as well as movement within the school; and
4. Referrals for outside support or counseling.

Students should provide the Principal with a copy of an order of protection that has been issued by the court. The Principal shall then contact the student whose behavior is to be regulated by that order of protection and initiate a Stay Away Contract that is consistent with the terms of that order and provides penalties for known violations of the contract. Further, the Principal or designee shall immediately notify law enforcement immediately if a restraining order has been violated.

**(4.3.8.6) Other violations**

Individuals who maliciously or knowingly make a false report or complaint of teen dating violence and abuse, or individuals who retaliate against a person who has made such a report or was a witness in such an investigation shall be subject to disciplinary actions as elsewhere within these policies. Additionally, any staff member who does not inform the Principal of a report or suspicion of teen dating violence and abuse shall be subject to disciplinary action as defined within the Employee section of this policy manual.

**(4.3.8.7) Confidentiality**

The organization will respect the privacy of the complainant, the individual(s) against whom the complaint is filed, and the witnesses as much as possible, consistent with the school's legal obligations to investigate, to take appropriate action, and to conform with any discovery or disclosure obligations. All records generated under the terms of this policy and its related administrative procedures shall be maintained as confidential to the extent permitted by law.

**(4.3.8.8) Education and Training**

The Principal shall, along with the publication of the anti-bullying policy as defined within this policy manual, inform school staff, students and parents/guardians of the prohibition and reporting requirements regarding teen dating violence and abuse. In

addition, in accordance with with the state standards regarding the Health Curriculum, include instruction regarding teen dating violence and abuse.

#### **(4.3.9) Student Participation in Secret Organizations and Gangs**

The organization prohibits membership in secret fraternities or sororities, or in other clubs or gangs not sponsored by established agencies or organizations recognized by the organization. The organization feels that the presence of gangs and gang activities can cause a substantial disruption of or material interference with school and school activities. A "gang" as defined in this policy is any group of two or more persons whose purposes include the commission of illegal acts. By this policy, the organization acts to prohibit existence of gangs and gang activities as follows:

No student on or about school property or at any school activity:

1. Shall wear, possess, use, distribute, display, or sell any clothing, jewelry, emblem, badge, symbol, sign, or other things which are evidence of membership or affiliation in any gang.
2. Shall commit any act or omission or use any speech either verbal or non-verbal (gestures, handshakes, etc.) showing membership or affiliation in a gang.
3. Shall use any speech or commit any act or omission in furtherance of the interests of any gang or gang activity, including but not limited to:
  - a. Soliciting others for membership in any gangs.
  - b. Requesting any person to pay protection or otherwise intimidating or threatening any person.
  - c. Committing any other illegal act or other violation of school District policies.
  - d. Inciting other students to act with physical violence upon any other person.

### **(4.4) Academic**

#### **(4.4.1) Grading Policy**

There are multiple purposes for the assignment of grades, including but not limited to the documentation of student and teacher achievement; providing teacher feedback on student progress to students, parents and fellow teachers; monitoring for continuous student growth and concept mastery; and informing instructional practices and small-group instruction in the classroom.

##### **(4.4.1.1) Traditional Grading System**

The following grade scale will be used by the organization:

- A (90% - 100%) Superior
- B (80% - 89%) Above Average
- C (70% - 79%) Average
- D (60% - 69%) Below Average
- F (0% - 59%) Unsatisfactory
- I - Incomplete

#### **(4.4.1) Honor Roll/Principal's List**

Any student who receives all As and/or Bs on their report card will be considered to be on the Honor Roll. Any student who receives all As will be added to the "Principal's List."

#### **(4.4.2) Graduation and Promotion Requirements**

##### **(4.4.2.1) Middle School Students**

Placement that facilitates optimum learning for each student is determined by established principles of growth and development by the academic and career interests of the student and by acquisition of the subject area skills and competencies.

Promotion occurs when a student demonstrates acceptable skills proficiency in specified subject areas.

1. Sixth grade students must pass language arts, mathematics, science, and social studies to be promoted to the seventh grade.
2. Seventh grade students must pass language arts, mathematics, science, and social studies to be promoted to eighth grade.
3. Eighth grade students must pass language arts, mathematics, science, and social studies to be promoted to ninth grade.

##### **(4.4.2.2) High School Students**

The organization has adopted the following procedures for high school student promotion:

1. Students qualify for promotion from ninth to tenth grade after completing one full year and earning five credits including one of the following: 1) one required credit in English or mathematics or 2) one-half credit in English and one-half credit in mathematics while enrolled in grade 9.
2. Students qualify for promotion from tenth grade to eleventh grade when the student has completed two full years and has earned eleven credits including: three credits in English or mathematics, one required credit in science, and one required credit in social studies in grades 9 and 10.
3. For 24-credit option students, promotion from eleventh to twelfth grade occurs when a student has completed three full years and has earned seventeen credits including eighth required credits in English, mathematics, science, and social studies while enrolled in grades 9, 10, and 11.
4. Students electing the 18-credit graduation option are promoted to grade 12 immediately following FTE survey period 3 in February of their third year.
5. Students electing to graduate with 24 credits in three years are promoted to grade 12 on May 1 of their third year if they are on track to graduate.
6. High school credits earned in grades 7 and 8 are counted toward subject credit and the number of credits (18 or 24) for graduation. A credit earned prior to grade 7 counts toward subject area requirements, but not toward the credits (18 or 24) required for graduation.

##### **(4.4.2.3) Grade Level Retention**

The purpose of promotions and retentions is to provide maximum consideration for the long-range welfare of the student and to provide an opportunity for each student to progress through school according to his/her own needs and abilities.

It is expected that most students will be promoted annually from one grade level to another upon completion of satisfactory work, however, a student may be retained when his/her standards of achievement or social, emotional, mental, or physical development would not allow satisfactory progress in the next higher grade. Retention normally occurs before the student leaves the primary grades.

Parents/guardians who wish to appeal the decision for retention must first contact the Principal. If parents/guardians do not accept the decision of the Principal, an appeal may be made in writing to the Board. All appeals must be requested within two (2) weeks after the close of school.

#### **(4.4.4) Dual Enrollment**

The organization understands that the services of one school may not be able to completely address the needs of every student, and recognizes the value of Dual Enrollment. Given the academic structure of our school and the scheduling concerns, we do not permit students to be enrolled with the organization part-time as the result of a dual enrollment agreement, except for as allowed below.

##### **(4.4.4.1) Florida Virtual School**

Students whose academic needs require more than the course selections available within the organization will be allowed to enroll in courses through the Florida Virtual School.

##### **(4.4.4.2) Extracurricular Activities**

Students attending PPA for academic classes may be allowed to request Dual Enrollment at other schools for extracurricular activities.

##### **(4.4.4.3) College Dual Enrollment**

Students are able to concurrently enroll in college dual enrollment based on the requirements of the individual colleges and universities the student is working with. The organization will work with the families to assist with the college and universities dual enrollment requirements.

#### **(4.5) Extra-Curricular Activities**

##### **(4.5.1) Attendance Required for Extracurricular Participation**

Students participating in any school sponsored event must have been in attendance at school the day of the event, otherwise they will be disallowed from participating in the event. Additionally, students who are considered truant based on this policy manual may be disallowed from participating in any extracurricular activities sponsored by the school.

##### **(4.5.2) Extra Curricular Activites**

Participation in interscholastic and extracurricular activities is a privilege and not a right. Interscholastic competition and participation in extracurricular activities may be withheld from any student as a condition of discipline. Furthermore, all policies that apply to the regular school day apply also to interscholastic competition and extracurricular activities. Coaches and sponsors may establish policies for their groups in addition to those set out by athletic associations.

**(4.5.2.1)**

***Clubs***

The organization supports the use of clubs to allow students students extracurricular experience at school. When clubs are available, they will be advertised amongst the students and parents. All students participating in a school club are required to maintain a 2.0 GPA, have no behavioral concerns, and meet the expectation of the club. A copy of the club expectations will be provided to students joining an individual club. Clubs must be sponsored and supervised by a school staff member.

**(4.5.2.2)**

***Hazing***

Student hazing is inconsistent with the educational goals of the organization and poses a significant risk to the physical and mental welfare of students. Hazing of students, on or off School property, is prohibited and may result in suspension from school and from activity/athletic participation.

**(4.5.3)**

***Field Trips, Off Campus Events***

Field trips are school-related events for which school staff arranges transportation and ensures an appropriate number of chaperones. All trips shall be subject to prudent safety precautions and conducted according to the rules established by the school. Every effort will be made to schedule field trips without interrupting other school functions.

**(4.5.3.1)**

***Approval***

All trips off campus must be approved by the Principal at least two weeks prior to the event occurring. Field trips should have an educational purpose to be approved. All trips must be conducted under the supervision of a certified School employee, and additional chaperones may be necessary dependent upon the activity. The request for approval must include all locations the students will visit while on the trip, the details of transportation, and any other logistical issues the Principal requests. Students will follow the specific itinerary provided to the administration on the field trip request.

**(4.5.3.2)**

***Behavioral Exclusion***

Field trips can be a valuable learning opportunity for students; however, behavioral expectations are even more important when students are taken off campus. As a result, if a child has demonstrated an inability to control their behavior in school, extra steps may need to be taken to ensure the student has a successful experience.

- a. The school reserves the right to require parents or guardians of some students to attend the field trip to provide supervision for their child. In such cases, if a parent is unable to attend, the student will be required to remain at school.
- b. If a student has received a referral, or has demonstrated unsafe behavior, the student's parent or guardian may be required to attend as a chaperone.

- c. End of the year class field trips are reserved for students who show responsibility during the school year and meet school expectations. Students who have been issued a suspension during the year will be disallowed from attending the end of the year field trip.
  - a. Parents or guardians of students who have earned only one (1) suspension have the option of asking the staff behavioral team for an exception to this rule. They can present the reasons they feel their child should be allowed to attend. The staff behavioral team can decide to 1) disallow the student from attending, 2) allow the student to attend unaccompanied, or 3) allow the student to attend with conditions, possibly including requiring the student to be accompanied by a parent.
  - b. Students must have an average GPA of 2.0 or better for the current quarter in order to attend.

**(4.5.3.3) *Financial Limitations***

Students cannot be excluded from a field trip based on the inability to pay the accompanying fee. If a family is facing financial difficulties and unable to pay the accompanying fee, the student's parent or guardian must contact the Principal (or designee) prior to the date the field trip permission slip is due back to school to make alternative arrangements.

**(4.5.3.4) *Student Supervision***

While attending field trips, students will be closely monitored and supervised. Each student shall be directly assigned to a staff person or chaperone for the duration of the trip.

**(4.5.3.5) *Chaperones***

Chaperones for field trips must follow the volunteer guidelines found within the policies of the organization. Chaperones must be registered with the school prior to attending the field trip. All chaperones must be provided with a detailed list of the students they are responsible for, emergency contact information to reach the teacher in charge, as well as students' parents if the need arises.

**(4.5.3.6) *Teacher Check Ins***

While attending field trips where groups are separated from one another, the teacher in charge of the trip will coordinate times and locations where all staff and chaperones shall rendezvous periodically throughout the day.

**(4.5.3.7) *Student Counts***

Before transporting students to or from any field trip the teacher and at least one other adult will do a complete a roll call of all students to ensure all students are accounted for. At any given time each staff member and chaperone should know the number of students they are currently responsible for.

**(4.5.3.8) *Off Campus Activities***

Pivot Employees are discouraged from removing students from the campus outside of the traditional field trip process described above. Should an employee need to remove a student from campus for any reason, it is necessary that the student be signed out, that the destination be documented, and that an administrator approve the activity prior

to leaving. The staff member should also ensure they have a cell phone for contact in case of emergency.

## (4.6) Medical Policies

### (4.6.1) Inoculations of Students

All students accepted by the organization are required to be in compliance with state programs mandating immunization against specific diseases. Failure to comply with the state requirements will result in the students being unable to attend classes, and receiving unexcused absences, until proof of compliance is provided.

The Executive Director shall institute procedures for the maintenance of health records, which are to show the immunization status of every student enrolled, and for the completion of all necessary reports in accordance with guidelines prepared by the Florida Department of Health.

### (4.6.2) Administering Medications

It shall be the organization's policy that the giving of medicine to students during school hours be discouraged and restricted to medication that cannot be given on an alternative schedule. The organization recognizes that some students may require medication for chronic or short-term illness/injury during the school day to enable them to remain in school and participate in their education.

For those students who require medications, the parents must complete a medication form, and all doses administered must be administered according to standard school health procedures.

### (4.6.3) Students With Communicable Diseases

A student shall not attend classes or other school-sponsored activities, if the student (1) has, or has been exposed to, an acute (short duration) or chronic (long duration) contagious or infectious disease, and (2) is liable to transmit the contagious or infectious disease, unless the Principal or its designee has determined, based upon medical evidence, that the student:

1. No longer has the disease.
2. Is not in the contagious or infectious stage of an acute disease.
3. Has a chronic infectious disease that poses little risk of transmission in the school environment with reasonable precautions.

School officials may require any child suspected of having a contagious or infectious disease to be examined by a physician and may exclude the child from school, in accordance with the procedures authorized by this policy, so long as there is a substantial risk of transmission of the disease in the school environment.

A student who has a chronic infectious disease, and who is permitted to attend school, may be required to do so under specified conditions. Failure to adhere to the conditions will result in the student being excluded from school. A student who has a chronic infectious disease and who is not permitted to attend school or participate in school

activities will be provided instruction in an alternative educational setting in accordance with the organization's policy.

Students with acute or chronic contagious or infectious diseases and their families have a right to privacy and confidentiality. Only staff members who have a medical reason to know the identity and condition of such students will be informed. Willful or negligent disclosure of confidential information about a student's medical condition by staff members will be cause for disciplinary action.

The organization will implement reporting and disease outbreak control measures as necessary if a communicable disease seems to be spreading amongst the student body.

#### **(4.6.4) Student Physical Examination**

The organization may require any student to be examined by a physician for the purpose of determining whether the student is afflicted with a contagious or infectious disease or have the liability of transmitting the disease.

The organization may also require certification from a physician indicating a student's fitness to participate in specific educational programs or extra-class activities.

Refusal on the part of parent/guardian to obtain the required examination and to submit the certification indicating freedom from contagious or infectious disease may result in student exclusion from school.

Students may be excused from engaging in required educational activities upon proper certification from a physician advising of student disability.

All costs of physical or other examinations shall be at the expense of students unless state or federal law specifically mandates the examination to be the responsibility of the school.

#### **(4.7) General**

##### **(4.7.1) Releasing a Student from School**

The organization is concerned about the safety of our students. Students will only be released to people who are their parents or legal guardians, unless we have received written permission to release the student to another adult. In the case of divorce or separation of the parents, both parents shall have full rights until legal notification is provided to the school limiting the rights of either parent.

##### **(4.7.2) Relations with Law Enforcement Authorities**

It is the Organization's policy to cooperate fully with law enforcement agencies in promoting the welfare of students, staff and the community.

###### **(4.7.2.1) Child Abuse, Molestation, Neglect**

The organization considers the welfare of students to be of paramount concern in its responsibilities. Therefore, all organization employees and volunteers are directed to take whatever action may be necessary as required by Chapter 39, and 827 F.S. and

all statutes and laws of the State of Florida as regards to all instances of suspected child abuse, molestation and child neglect.

Any employee of the organization or volunteer who has reasonable cause to suspect child abuse shall immediately make an oral report to the Department of Children and Families Abuse and Neglect Hotline. A person who is required to report known or suspected child abuse, abandonment, or neglect and who knowingly and willfully fails to do so, or who knowingly and willfully prevents another person from doing so, is guilty of a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083. Further, a person who does make a report of suspected abuse in good faith has immunity from civil and criminal liability pursuant to § 39.203, F.S. The person making the call (if other than the Principal) shall notify the building Principal immediately. Any person who reports should keep a record of the date and time they made the report, whom they spoke to and the general information they provided to the Abuse Hotline. The Principal should maintain records of the report but these should not be placed in a student cum folder.

The report shall be made under the following circumstances: When there is reasonable cause to suspect that child abuse or maltreatment has been inflicted through willful or negligent acts which result in neglect, malnutrition, sexual abuse, physical injury, or mental injury. Neglect is a failure to provide sustenance, clothing, shelter or medical condition. Abuse or maltreatment may also include aiding, abetting, counseling, hiring or procuring a child to perform or participate in any photographic motion picture, exhibition show, representation or other presentation which, in whole or in part, depicts sexual conduct, sexual excitement or masochistic abuse involving a child as defined by law.

**(4.7.2.2) *Interviews, Interrogations and Removal From School by Law Enforcement***  
***Interview or Interrogation*** - The School has legal jurisdiction over students during the school day and hours of approved extracurricular activities. The school administration is responsible for making an effort to protect each student's rights with respect to interrogations by law enforcement officials. When law enforcement officials find it necessary to question students during the school day or periods of extracurricular activities, the Principal or designee will be present and the interview will be conducted in private.

The Principal will verify and record the identity of the officer or other authority and request an explanation of the need to question or interview the student at school. The Superintendent/CEO ordinarily will make reasonable efforts to notify the student's parents/guardians.

**Removal of Students From School** - Before a student at school is arrested or taken into custody by law enforcement or other legally authorized person, the Principal will verify the official's authority to take custody of the student. The school Principal will attempt to notify the student's parent/guardian that the student is being removed from school.

**(4.7.2.3) *Reporting Violent Behavior***

The Organization requires school administrators to report acts of school violence to teachers and other employees who are directly responsible for the student's education or who interact with the student in the performance of the employee's duties. School administrators will also disclose to appropriate staff members portions of any student's individualized education program that is related to past or potentially future violent behavior. Violent behavior and the phrase acts of school violence are defined as the use of physical force by a student with the intent to do serious physical injury to another person while on school property, including a school bus, or while involved in school activities.

In addition the Principal will report to law enforcement officials, as soon as is reasonably practicable, the commission of any of the acts or related juvenile offenses which are committed on school property, including school buses, or while involved in school activities.

**(4.7.3)**

#### **School Calendar**

The organization shall follow the school calendar of the authorizing school district. The Principal will, however, set the start and stop times for the school.

**(4.7.4)**

#### **Dress Code**

The Board expects student dress and grooming to be neat, clean and in keeping with community standards, so that each student may share in promoting a positive, healthy and safe atmosphere within the School. This expectation includes the school day and school sponsored extracurricular activities.

Students shall observe modes of dress and standards of personal grooming that are in conformity with the educational environment and necessary to maintain an orderly and safe atmosphere for all students. Apparel is expected to conform to reasonable student standards of modesty, and as such, no excessive or inappropriate areas of skin or undergarments may be exposed. No apparel or grooming which presents a safety concern is permitted. No apparel displaying messages that are gang-related, sexually explicit, vulgar, violent, or advocating illegal activities is permitted. Further, no clothing or personal grooming that disrupts, or can be forecasted to disrupt, the educational environment is permitted. The Principal shall ensure that strict dress code expectations are made available to students and parents at the start of each school year which will include examples of acceptable and unacceptable attire.

**(4.7.5)**

#### **Cell Phone Policy**

The organization allows students to have cellular phones at school only if parental permission is given to have the device at school, and with the Principal's approval. Once approved, students must keep their phones turned off and in their lockers or cubbies, unless they receive permission from their current teacher to use the phone for educational purposes. Without teacher permission, cell phones are not permitted in backpacks, book bags or on the student's person. If a phone is seen or heard while under school supervision without teacher permission, they will be taken away and existing behavioral sanctions will apply. All confiscated cell phones or other electronic devices will be made available only to the parent/legal guardian for direct pick-up at their convenience. When a student has a legitimate need to make a call during the school day, they may use a school telephone, provided they obtain permission from a

staff member prior to use. Parents who need to contact their children during the school day for valid emergencies should contact the school office to relay a message, and that message will be relayed to your child in a timely fashion.

**(4.7.6) Games and Electronic Devices**

Toys, games, playing cards, electronic devices and other non-academic items or games are only allowed with specific permission from a staff member (for example, clubs or special events). All usage of these items should be educationally focused and directed by a staff member. Any items found without permission will be confiscated and made available to parents for direct pick up. Items not picked up within five (5) school days may be discarded or given to charity. The organization cannot be held liable for any lost or stolen items.

**(4.7.7) Source Resources Policy**

Students may be issued school resources in some of their classes ranging from textbooks to school laptops., which remain the property of the school. Any lost, stolen, or damaged books are the sole responsibility of the student whom the resource has been checked out to. If something occurs to this property, the incident must be reported immediately. Students not returning resource or returning severely damaged will be required to make payment for the replacement or repair costs to the school.

**(4.7.8) Computers and Internet Acceptable Use Policy**

By virtue of using a school computer, network or online tool the students and parents of the organization agree to abide by the organization's acceptable use policy. This policy will be sent home annually. If a parent wishes to opt out of accepting this policy, they should notify the school in writing, and access to all school electronic resources will be denied for the individual student.

**(4.7.8.1) Acceptable Use Policy**

The organization offers Internet access for student and staff use at school and various online tools for staff, student and parent use. This policy is the Acceptable Use Policy for your use of our online tools and Internet use at school. The Internet system and online tools have been established for a limited educational purpose to include classroom activities, career development, and limited high quality, self-discovery activities as well as research. It has not been established as a public access or public forum and the organization has the right to place reasonable restrictions on the material you access or post, the training you need to have before you are allowed to use the system, and enforce all rules set forth in the school code and the laws of the state of Florida. Further, you may not use this system for commercial purposes to offer, provide, or purchase products or services through the system or use the system for political lobbying. Access to the Internet is available through this school only with permission of the Principal or his or her designee and your parents. This policy applies to the use on school equipment at school, or the use of services established or maintained by the school which may also be used off property.

The following uses of the the organization's Internet are acknowledged:

**(4.7.8.1.1) Personal Safety**

- a. You will not post contact information (e.g., address, phone number) about yourself or any other person.
- b. You will not agree to meet with someone you have met online without approval of your parents. Any contact of this nature or the receipt of any message you feel is inappropriate or makes you feel uncomfortable should be reported to school authorities immediately.

**(4.7.8.1.2) *Illegal Activities***

- a. You will not attempt to gain unauthorized access to this or any other computer system or go beyond your authorized access by entering another person's account number or accessing another person's files.
- b. You will not deliberately attempt to disrupt the computer system or destroy data by spreading computer viruses or by any other means.
- c. You will not use our system to engage in any other disruptive or illegal act, such as cyberbullying, arranging for a drug sale or the purchase of alcohol, engaging in criminal gang activity, threatening the safety of a person, etc.

**(4.7.8.1.3) *System security***

- a. You are responsible for your individual accounts and should take all reasonable precautions to prevent others from being able to use your accounts. Under no condition should you give your password to another person.
- b. You will immediately notify a teacher or the system administrator if you have identified a possible security problem. Do not look for security problems; this may be construed as an illegal attempt to gain access.
- c. You will avoid the inadvertent spread of computer viruses by following the district virus protection procedures when downloading software.

**(4.7.8.1.4) *Inappropriate Language***

On any and all uses of the Internet, whether in application to public or private messages or material posted on the Web pages, you will not use obscene, profane, lewd, vulgar, rude, inflammatory, threatening, or disrespectful language. You will not post information that could cause danger or disruption or engage in personal attacks, including prejudicial or discriminatory attacks. You will not harass another person by a persistent action that distresses or annoys another person and you must stop if asked to do so.

**(4.7.8.1.5) *Respect for Privacy***

- a. You will not repost a message that was sent to you privately without permission of the person who sent you the message.
- b. You will not post private information about yourself or another person.

**(4.7.8.1.6) *Respecting Resource Limits***

- a. You will use the system only for educational and career development activities and limited, high quality, self-discovery activities.

- b. You will not post chain letters or engage in “spamming” (that is, sending an annoying or unnecessary message to a large number of people).

**(4.7.8.1.7) Plagiarism and Copyright Infringement**

- a. You will not plagiarize materials that you find on the Internet. Plagiarism is taking the ideas or writings of others and presenting them as if they were yours.
- b. You will respect the rights of copyright owners. Copyright infringement occurs when you inappropriately reproduce a work that is protected by copyright. If a work contains language that specifies appropriate use of that work, you should follow the expressed requirements. If you are unsure whether or not you can use a work, you should request permission from the copyright owner. Direct any questions regarding copyright to a teacher.

**(4.7.8.1.8) Inappropriate Access to Material**

- a. You will not use the the organization’s computer system to access material that is profane or obscene (pornography) or that advocates illegal acts or violence or discrimination toward other people (hate literature). A special exception may be made for hate literature if the purpose of the access is to conduct research with both teacher and parental approval.
- b. If you mistakenly access inappropriate information, you should immediately tell your teacher or another staff member. This will protect you against a claim of intentional violation of this policy.
- c. Your parents should instruct you if there is additional material they think would be inappropriate for you to access. The school fully expects that you will follow your parents’ instruction in this matter.

**(4.7.8.1.9) Your Rights**

- a. Free Speech. Your right to free speech, as set forth in the school disciplinary code, applies also to your communication on the Internet. The Internet is considered a limited forum, similar to the school newspaper, and therefore the school may restrict your right to free speech for valid educational reasons. The school will not restrict your right to free speech on the basis of its disagreement with the opinions you express.
- b. Search and Seizure. You should expect no privacy of the contents of your personal files on the school system. Routine maintenance and monitoring of the system may lead to discovery that you have violated this policy, the school code, or the law. An individual search will be conducted if there is reasonable suspicion that you have violated this policy, the school disciplinary code, or the law.
- c. Due Process. The school will cooperate fully with local, state, or federal officials in any investigation related to illegal activities conducted through the organization’s Internet system. In the event of a claim that you have violated this policy, the school disciplinary code, or the law in your use of our system, you will be given written notice of suspected violations and an opportunity to present an

explanation according to school code and/or state and federal law. Additional restrictions may be placed on your use of your Internet account.

#### **(4.7.8.1.10) Other Acknowledgements**

The Organization makes no guarantee that the functions or the services provided by or through the system will be error free or without defect. The organization will not be responsible for any damage you may suffer including, but not limited to, loss of data or interruptions of service. The school is not responsible for the accuracy or quality of the information obtained through or stored on the system. The school will not be responsible for financial obligations arising from unauthorized use of the system.

Anyone caught breaking these rules will be subjected to disciplinary procedures depending upon the severity of the infraction. Additionally, any student caught intentionally damaging or vandalizing a school computer may be disallowed from utilizing computer resources. Any such act may result in partial or full restitution being required by the student and/or family.

#### **(4.7.9) Dances**

The organization may periodically sponsors dances for students. Attendance is limited to those students who are enrolled with the organization, are achieving academically, and following the rules of conduct set forth by the school. Dances may be held separately for different age levels. Students are required to follow the rules and regulations of the organization while attending any dance. All Dress Code restrictions and intent for modest and acceptable fashion wear would apply. Parents are encouraged to attend as chaperones.

#### **(4.7.10) Movies in the Classroom**

The organization emphasizes the use of engaging the multiple intelligences of students, and as such will use various media to educate students. Teachers are welcome to occasionally use videos in the classroom and at school sponsored events, providing that the following policies are adhered to:

##### **(4.7.10.1) Copyright**

Teachers are required to follow the legal copyright requirements of videos and media within the classroom

##### **(4.7.10.2) Middle School Students**

Students in grades six through eight may be shown "G" or "PG" rated movies without parental permission. Movies with are rated "PG-13" require that the teacher notify parents at least one week in advance using the school's online communication system, giving parents the option to opt- their students out of watching the video.

##### **(4.7.10.2) Middle School Students**

Students in grades nine through twelve may be shown "G", "PG" or "PG-13" rated movies without parental permission.

##### **(4.7.10.4) "R" Rated Movies:**

No "R" rated movies may be shown to students during school events.

#### (4.7.11) Searches by School Personnel

School lockers and desks are the property of the Organization and are provided for the convenience of students, and as such, are subject to periodic inspection without notice, without student consent, and without a search warrant. The lockers and desks may be searched by school administrators or staff who have a reasonable suspicion that the lockers or desks contain drugs, alcohol, material of a disruptive nature, stolen properties, weapons, items posing a danger to the health or safety of students and school employees, or evidence of a violation of school policy. In addition, the Board authorizes the use of trained dogs to sniff lockers or other school property to assist in the detection of the presence of drugs, explosives, and other contraband.

Students or student property may be searched based on reasonable suspicion of a violation of School rules, policy or state law. Reasonable suspicion must be based on facts known to the administration, credible information provided or reasonable inference drawn from such facts or information. The privacy and dignity of students shall be respected. Searches shall be carried out in the presence of adult witnesses, if such witnesses are available. Students may be asked to empty pockets, remove jackets, coats, shoes and other articles of exterior clothing for examination if reasonable under the circumstances. No employee shall perform a strip search of any student

Law enforcement officials shall be contacted if the search produces a controlled substance, drug paraphernalia, weapons, stolen goods or evidence of a crime, in any case involving a violation of law when a student refuses to allow a search, or where the search cannot safely be conducted. Parents may also be contacted. A student who refuses to submit to a search may be appropriately disciplined by school officials.

#### (4.7.12) Student Publications

The organization encourages student production and distribution of publications which can provide opportunities for practical journalistic experience and for the written expression of differing opinions. The organization recognizes that freedom of speech and press bring corresponding responsibilities. The Principal, through appointment of a faculty advisor, shall provide guidance to students in appropriate methods for preparing and producing publications. The Principal or designee may delay or stop distribution of any materials proposed for printing or that have been printed which may be reasonably forecast to cause substantial and material disruption or obstruction of any lawful mission, process, or function of the school.

### (5) Teaching and Learning

#### (5.3) Teacher's Lesson Plans

Teachers will be expected to submit lesson plans that correlate with both the school's Curriculum Guide and aligned to the State and/or National Standards. Lesson plans shall be submitted electronically through the method identified by the Principal, not later than one hour prior to the start of school each Monday morning. Lesson plans will be reviewed to ensure compliance with school and state requirements and will be kept on file for five years.

## (5.4) Reporting Student Progress

The organization believes parents are an integral part in their child's education. To keep parents informed, students' progress will be formally reported eight times per year. Midway through each marking period a progress report will be sent home with students. At the end of each quarter report cards will be distributed documenting student progress.

Additionally, the Organization will utilize an online grading system. Using this system, teachers will update student grades at least weekly onto the Internet so that parents can stay up-to-date about the progress of their children.

## (5.5) Exceptional Student Education

### (5.5.1) Acceptance of Students

The organization operates public schools that are required to admit all students, based on space availability. The school does not however serve the broad array of all exceptional educational needs. We provide classroom services, and contract with providers for therapeutic needs. If additional services are required that we are unable to provide or contract out, we will consider the option of dual enrollment at another with the School District.

### (5.5.2) Limitation of Services

The organization strives to meet the needs of all of our students. We attempt to provide individualized instruction to all of our students. The school will retain the services of an ESE teacher to assist with working with children who have special needs. The organization does not, however, provide the full-range of ESE services that are available from other public schools in the county. When a child with special needs is considering enrolling with the organization the family will be informed of the services provided by the school and the current staffing levels.

### (5.5.3) Dual Enrollment

If a child has special needs that are not able to be met by the staff of the organization, prior to enrollment, or during the staffing process for new referrals, staff will work with the the school district's staffing specialist to find a nearby school which provides the required services. Should the parents choose to do so, the child could be dual enrolled between the organization and the district school providing ESE services. The student would receive regular education services from the organization and would be transported to the district school for ESE services.

## (5.6) Section 504

### (5.6.1) Section 504 Plans

The organization provides a free and public education to each student who is disabled within the definition of Section 504 of the Rehabilitation Act of 1973 regardless of the nature of severity of the disability.

### (5.6.2) When a 504 Plan will be considered

The organization will consider a 504 plan for accommodations if a School Based Leadership Team feels that the child may have a disability which would meet the criteria for such a plan. This can occur when a teacher identifies a student who is having difficulties, a parent requests a team to consider the needs of a student, or if a medical report has been submitted identifying a student as having a disability.

**(5.6.3) Meeting to consider 504 Plan**

If the School Based Leadership Team recommends a student be considered for a 504 plan, the Principal or designee will coordinate a meeting among the student's teachers and school specialist. The teacher will also ensure the parents have been notified and invited to the meeting. While at the meeting, the team members will consider whether the student's disabilities qualify them for accommodations under Section 504 of the Rehabilitation Act. If so, the team will identify the accommodations necessary to allow the student to be successful within the school environment. The authorizing School District's forms will be used for both determination and the actual 504 Plan.

**(5.6.4) Eligibility**

To determine if a child has a disability that qualifies them for a 504 Plan, the team will utilize the policies of authorizing School District in regards to eligibility.

**(5.7) School Based Leadership Team (RTI)**

**(5.7.1) Purpose**

The purpose of the School Based Leadership Team [SBLT] is a diverse groups of professionals that will meet to discuss issues that may arise regarding specific students. The team will brainstorm strategies and research-based interventions to use with students that may be having academic, behavioral, or other concerns within school. The SBLT will analyze school data, assist with the providing suggestions for the RtI (Response to Intervention) process, and make recommendations for modifications in the classroom and monitor student progress by analyzing interventions to assess response to those interventions

**(5.7.2) Membership**

The Principal shall, at the start of each school year, assign members to the School Based Leadership Team. Membership will consist of the Principal, ESE Coordinator(s), and a careful selection of other staff members who represent a variety of backgrounds and expertise. Members shall serve for the entire school year. Additionally, the specific team of teachers who work with an individual student will be requested to attend when that specific student is being discussed.

**(5.7.3) Procedure**

The SBLT, in conjunction with the Principal, will regularly review school assessment data to determine students needing extra assistance. If a staff member wishes to seek the advice of the SBLT for a specific student, they shall complete a request form and forward to the Principal. The Principal shall then schedule a team meeting and distribute the relevant information to the team members. When the staff member requesting the meeting completes the form, they shall indicate whether or not they feel it would be beneficial to invite the parents to the meeting. The Principal shall make the

determination whether parents will be invited and will coordinate their attendance if requested.

When the School Based Leadership Team meets the staff member requesting the meeting has the responsibility to explain what the key issues or concerns are, and the team shall work together to brainstorm a list of action items to be attempted with the student. One staff member will be assigned to follow up at a specified time interval after the meeting to see how the recommendations are working.

## (5.8) English as a Second Language

The organization is committed to identifying and assessing the educational needs of students whose native or home language is other than English. Once identified, University Academy will provide appropriate programs to address the needs of these students.

### (5.8.1) Home Language Assessment

Upon being accepted to the school, the Principal will ensure each student's records are reviewed to ensure a home language survey/assessment has been completed, and if it has not, will ensure the survey is completed by the student's parents within the first two weeks of enrollment.

### (5.8.2) Services

The organization will also take steps to ensure to the maximum extent practicable that the interests of ESOL students are included in the development and implementation of School programs and services that are offered by the School to and for its student body. The Principal will ensure that all legal requirements are adhered to in regards to the instruction and services provided to students who qualify for ESOL students.

## (5.9) Instructional Time

The primary focus of the School's staff and programs is maximization of student learning. While learning occurs as a result of extracurricular activities and as a result of non-structured interaction between students and between students and staff, most learning occurs as a result of planned learning activities during class time. Therefore, every effort will be made to minimize disruptions in instructional time. Public address announcements and pull out programs will be planned to avoid loss of critical instruction time.

## (6) Management

### (6.1) Students

#### (6.1.1) Supervision of Students

Students are to be supervised at all times while under the control of the organization. This includes the time students are attending school, while away from the school on school-sponsored events, or while participating in extracurricular activities, such as clubs. Supervision will be provided for 15-minutes prior and 15-minutes after the start and end of school. Parents will be notified of supervision times at least twice per year in

writing through the school's newsletter. Students may not be left alone without supervision.

## (6.2) School Records

### (6.2.1) Security of Student Records

All student information is considered confidential and will be maintained as such in compliance with all applicable laws and regulations. Such information shall be available to the parent or guardian or to the student himself who has attained the age of eighteen (18) years. Professionally competent personnel shall be available for interpreting any data with the student's cumulative folder. Copies of such contents shall also be made available to parents/students at cost, within the limitations of copying facilities.

The school may, without the consent of the student or his/her parents, release student records contained within the cumulative folder or any supplementary classifications to school officials who have a proper educational purpose in examining such information.

No other person may have access to or make copies of a student's records, except under the following circumstances:

- a. The consent must be given by the student's parent or guardian except when a student reaches the age of eighteen (18) or is married, at which time his consent and not that of his parents shall be obtained in order to release the information; and a student who meets the foregoing requirements shall consent to parental access to his records.
- b. The consent shall be written and shall specify the records to be released and to whom they are to be released. Each request for consent shall be handled separately; blanket permission for the release of information shall not be acceptable.
- c. Under compulsion of law: courts, law enforcement agencies, agencies subpoenaing such records.
- d. When data for outside purposes is released in such form that no individual student is identifiable.
- e. When the Principal determines the release of specific information as described by the Family Education Rights and Privacy Act of 1974 is in the best interests of the student, provided such information has not been disallowed by the parents.

The parent or guardian, or an eighteen (18) year old or older student, shall have the right to challenge the accuracy and authenticity of data recorded within the student's cumulative folder. Any such data that is determined by the Principal to be inaccurate shall be expunged from the record; and an appeal from the decision of the Executive Director shall be made to the Board of Directors.

In each instance in which a student's record is transferred out of the organization, the school shall retain a complete copy of the student's academic record, together with all

other confidential information and reports. After three (3) years this material will be sent to Central Files with the school district.

### **(6.2.2) Up-To-Date Records**

It is the parent/legal guardian's responsibility to keep the school office informed and up to date regarding any changes of names, addresses, telephone numbers, email addresses, etc. so that important student information may be received from or provided to the parent/legal guardian in a timely manner for the benefit and well-being of the student.

### **(6.3) Public Records Request**

It is the policy of the organization that all public records made or received in connection with the official business of the agency be made available upon request of any person for inspection, examination, and copying in accordance with applicable law and the following policy guidelines:

- All public records shall be available for inspection or copying under the supervision of the custodian (or designee) of the public records at reasonable times during normal office hour. All public records that are presently provided by law to be confidential or prohibited from being inspected by the public, whether by general or special law, are exempt from production.
- The Executive Director may from time-to-time direct that public records requests be handled in a specific manner in order to ensure that the public record are protected, that requests are complied with as expeditiously as is reasonably possible given the nature and scope of the request, and that confidential and exempt records are not disclosed except as required by law. Such directives must not be used in any way to hinder, delay, or circumvent a person's right of access to the public records.
- The fact that the originator of a public record asks or directs that it remain confidential does not in fact make that document confidential. Such record is still subject to disclosure unless the law makes it confidential or exempt. Except in the case of student records, if a public record contains information that is confidential or exempt by law, a true and correct copy of the original record shall be made, the confidential or exempt portions of copy shall be redacted, and the redacted copy of the record shall be made available to the requesting party. In the case of student records, the entire record is confidential and exempt and shall not be disclosed except as required or permitted by applicable law.
- The requesting party need not demonstrate any special or legitimate interest in the requested public records. Requests for public records shall be complied with regardless of the motivation of the requesting party.
- No automatic waiting period shall be imposed. The only delay permitted is that which is reasonably necessary to allow the custodian to compile the requested records and protect against disclosure of those records or portions of records that are confidential and exempt.

- Public records made or received by a third party pursuant to a contract or agreement with the agency shall be subject to disclosure to the same extent as public records in the physical custody of the agency.
- If a public records request is insufficient to identify the records sought, the requestor shall be promptly notified that more information is needed in order to produce the records. The agency shall offer reasonable assistance to the requestor in describing the nature and extent of such information.
- The maximum cost of duplication prescribed by law, shall be charged and collected before and as a condition to production. The requesting party shall be advised of these costs in advance of the duplication of the requested records.
- In the absence of a statutory exemption, all public records requested shall be produced regardless of the number of records involved or the time and inconvenience associated with the production. However, in addition to the actual cost of duplication, a special service charge shall be imposed for the cost of the extensive use of information technology resources or of clerical or supervisory personnel, where such extensive use is required because of the nature or volume of public records to be inspected, examined or copied. The requesting party shall be given an estimate of the cost before the services are undertaken. Such estimated cost shall be collected from the requestor before duplication of the public records. In the event that the actual cost exceeds the estimate, the difference shall be collected from the requestor before production of the public records. If the actual cost is less than the estimate, the requestor shall be reimbursed the difference at the time the public records are produced. For purposes of this rule, "extensive" means that it will take more than fifteen (15) minutes to identify, locate, compile, review, copy, and re-file the requested records. This service charge shall be computed to the nearest quarter hour exceeding fifteen (15) minutes based on the current rate of pay of the organization employee(s) and/or supervisors who perform these services.
- Definitions:
  - **Public Records:** The term public records includes all documents, papers, letters, maps, books, tapes, photographs, films, sound recordings, data processing software, or other material, regardless of the physical form, characteristics, or means of transmission, made or received pursuant to law or ordinance or in connection with the transaction of official business by the agency. Public records encompass all materials used to perpetuate, communicate, or formalize knowledge, regardless of whether they are in final form.
  - **Public Records Request:** The term public records request means a request by any person, whether written or verbal, for inspection, examination, or copying of public records.
  - **Request for Information:** A request for information, as distinguished from a public records request, is one in which the requested information does not already exist in public record form.

## (6.4) Emergency Procedures

### (6.4.1) Fire Drill Procedures

The organization shall maintain an evacuation plan to be used in the case of fire or other emergency situations. This plan will be reviewed annually by the organization's administrators for effectiveness. All students and staff members will be made aware of the plan, and maps highlighting the escape routes will be posted in all school rooms. Fire drills will be conducted at least once per month. Drills will be held at various times throughout the day and will test various types of fire emergencies. Documentation of the drills will be maintained by the organization for review.

### (6.4.2) Tornado Drill Procedures

The organization will maintain an emergency plan for use during tornado and inclement weather. This plan will be reviewed annually. All staff and students will be made aware of this plan. The plan will be practiced at least twice per year as is required by Florida law. Documentation of the drills will be maintained by the organization for review.

### (6.4.3) Hurricane Closures

The organization will follow the same emergency closures as the authorizing school district. Parents should monitor local news outlets during inclement weather. If the public schools are closed, the organization will also be closed. In the event that too many closures occur, and time must be made up.

### (6.4.4) Intruder / Lock Down Procedures

The organization will maintain an emergency Intruder / Lock Down Procedure. This plan will be reviewed annually for effectiveness and to ensure compliance by school personnel. All staff and students will be made aware of the procedures. The procedures will be practiced at least twice per year, and documentation of such will be maintained by the organization for review. The emergency procedures described within this policy are confidential documents which pursuant to Florida State Statute 1006.07(4) is not subject to open record laws.

## (6.5) Fund Raising

The organization is a nonprofit organization which relies on governmental funds and contributions to effectively educate our students. As a result, fundraising is necessary to help support the educational programs offered. The Principal shall approve all fundraising activities and ensure that families are not being asked to contribute excessively at any given time. Efforts will be made to ensure only one fund raiser occurs at a time. All fundraisers will identify the purpose for the money raised.

## (6.6) Photographs of Students

### (6.6.1) Portraits

The organization will sponsor one or two formal portrait days for students. A company which best meets the needs of the families for a reasonable cost will be selected by school staff. These photos will be utilized for the creation of the yearbook in addition to being sold to the families.

**(6.6.2)**

**Snapshots**

Frequently throughout the school year school staff take pictures of events that happen during the school day. Should a parent not want their child photographed in such a way, they must submit written notification of their request to the Principal. This request will then be passed along to school staff. Snapshots may periodically be used for promotional materials for the school. Every attempt will be made to receive parental permission prior to the publishing of promotional materials which include the photograph of students. Additionally, the school reserves the right to utilize such snapshots through electronic media which do not individually identify any specific student. If a parent or guardian requests the removal of such a photograph, the school staff will comply with the request within 72 hours.

**(6.7)**

**Gifts**

Collections of funds from students by students for the purpose of giving gifts to a staff member of the organization is discouraged.

**(6.8)**

**Volunteers:**

**(6.8.1)**

**Background Checks**

All individuals who are not employed by the organization must enter through the main office. Should they wish to go beyond the main office, their identification must be scanned by the background check system, and printed a badge to wear, identifying that they have properly checked in through the office. It is the responsibility of all staff members to help police the halls to ensure that all visitors have properly checked into the office. Any individual who does not have an appropriate name badge must be walked back to the office to ensure they are signed in properly.

**(6.8.2)**

**Background Check Concern**

If, during the background check, an individual is identified as having a background as a sexual predator, the Principal will immediately be notified by the system. The person running the check should call the Principal and/or designee to decide what to do about the situation. The following guidelines are in place:

- If the person trying to gain entry has a relative who is a student attending the school, and there are no outstanding court orders barring that person from having contact with the child, the person may enter the school only with a staff member escort. The individual may not be left alone with any student on school property.
- If the person trying to gain entry has a relative who is a student attending the school, and there are restrictions on the visitation, the appropriate action will be taken as identified by the court documents. In most situations, the Police Department will be notified.
- If the person trying to gain entry does not have any relatives attending this school, they will not be permitted access to the building, and the Police Department will be notified.

- If the person trying to gain access is a volunteer, the person will not be granted entry until after their information has been entered into school district's volunteer background check system, and a clearance is given from the offices of Professional Conduct through the district offices.

**(6.8.3) Student Supervision Background Checks**

If an adult plans to volunteer with students (such as field trip chaperones, student tutoring, etc.) the individual must complete a volunteer registration form. If the adult will be responsible for student supervision (such as running an after school club), the parent must go through a Level 2 background check, the cost of which the parent is responsible for. The school district conducts the complete background check to ensure the individual is clear of anything in their past which would prevent them from working with children.

**(6.9) Policy Against Bullying And Harassment**

**(6.9.1) Statement prohibiting bullying and harassment**

It is the policy of the organization that all of its students, employees, and volunteers learn and work in an environment that is safe, secure, and free from harassment and bullying of any kind. The organization will not tolerate bullying and harassment of any type. Conduct that constitutes bullying and harassment, as defined herein, is prohibited.

**(6.9.2) Definition of bullying and definition of harassment**

Bullying means intentionally and repetitively inflicting physical hurt or psychological distress on one or more students or employees and may involve but is not limited to:

- a. Teasing
- b. Social Exclusion
- c. Threat
- d. Intimidation
- e. Stalking, including cyber stalking as defined herein
- f. Physical violence
- g. Theft
- h. Sexual, religious, racial or gender orientation harassment
- i. Public humiliation
- j. Destruction of property

Harassment means any threatening, insulting, or dehumanizing gesture, use of data or computer software, or written, verbal or physical conduct directed against a student or employee that:

- a. Places a student or employee in reasonable fear of harm to his or her person or damage to his or her property.
- b. Has the effect of substantially interfering with a student's educational performance, opportunities, or benefits.
- c. Has the effect of substantially disrupting the orderly operation of a school.

Bullying and harassment also encompasses:

- Retaliation against a student or employee by another student or employee for asserting or alleging an act of bullying or harassment. Reporting an act of bullying or harassment that is not made in good faith is considered retaliation.
- Perpetuation of conduct listed in the definition of bullying or harassment by an individual or group with intent to demean, dehumanize, embarrass, or cause emotional or physical harm to a student or school employee by:
  - Incitement or coercion
  - Accessing or knowingly and willingly causing or providing access to data or computer software through a computer, computer system, or computer network within the scope of the school
  - Acting in a manner that has an effect substantially similar to the effect of bullying or harassment
- Cyber stalking, which is defined as engaging in a course of conduct to communicate, or to cause to be communicated, words, images, or language by or through the use of electronic mail or electronic communication, directed at a specific person, causing substantial emotional distress to that person and serving no legitimate purpose. See s. 784.048(1)(d), F.S.

### **(6.9.3)**

#### **Expected Behavior**

The organization expects students to conduct themselves as appropriate for their levels of development, maturity, and demonstrated capabilities with a proper regard for the rights and welfare of other students and school staff, the educational purpose underlying all school activities, and the care of school facilities and equipment.

The organization believes that standards for student behavior must be set cooperatively through interaction among the students, parents/legal guardians, staff, and community members producing an atmosphere that encourages students to grow in self-discipline. The development of this atmosphere requires respect for self and others, as well as for school and community property on the part of students, staff, and community members. Since students learn by example, school administration, faculty, staff, and volunteers will demonstrate appropriate behavior, treat others with civility and respect, and refuse to tolerate harassment or bullying. The organization upholds that bullying of any student or employee is prohibited:

- a. During any education program or activity conducted by the school;
- b. During any school-related or school-sponsored program or activity;
- c. On a school bus; or
- d. Through the use of data or computer software that is accessed through a computer, computer system, or computer network within the scope of the district school system.

### **(6.9.4)**

#### **Consequences for an act of bullying or harassment**

Concluding whether a particular action or incident constitutes a violation of this policy requires a determination based on all of the facts and surrounding circumstances. The physical location or time of access of a computer-related incident cannot be raised as a defense in any disciplinary action. Consequences and appropriate remedial action for students who commit acts of bullying or harassment may range from positive behavioral interventions up to and including suspension or reassignment, as outlined in school's policies. Consequences and appropriate remedial action for an employee found to have committed an act of bullying or harassment may be disciplined in accordance with school policies, procedures, and agreements. Additionally, egregious acts of harassment by certified educators may result in a sanction against an educator's state issued certificate. (See State Board of Education Rule 6B-1.006, FAC, The Principles of Professional Conduct of the Education Profession in Florida.) Consequences and appropriate remedial action for a visitor or volunteer, found to have committed an act of bullying or harassment shall be determined by the school administrator after consideration of the nature and circumstances of the act, including reports to appropriate law enforcement officials. Accusations made in good faith, even though subsequently determined to be false, shall not be subject to discipline consequences or remedial action as called for by this section.

**(6.9.5)**

**Consequences for intentional misreporting**

Consequences and appropriate remedial action for a student found to have wrongfully and intentionally accused another as a means of bullying or harassment range from positive behavioral interventions up to and including suspension or reassignment, as outlined in school's policies. Consequences and appropriate remedial action for an employee found to have wrongfully and intentionally accused another as a means of bullying or harassment may be disciplined in accordance with school policies, procedures, and agreements. Consequences and appropriate remedial action for a visitor or volunteer, found to have wrongfully and intentionally accused another as a means of bullying or harassment shall be determined by the school administrator after consideration of the nature and circumstances of the act, including reports to appropriate law enforcement officials.

**(6.9.6)**

**Reporting an act of bullying or harassment**

The Principal or designee, is responsible for receiving complaints alleging violations of this policy. All school employees are required to report alleged violations of this policy to the Principal or designee. All other members of the school community, including students, parents/legal guardians, volunteers, and visitors are encouraged to report any act that may be a violation of this policy anonymously or in-person to the Principal or designee. In order to report incidents of bullying, individuals may meet with either the Principal or designee to make the report. Any report in person should be followed within one day with a written report or a written explanation to the school's office. Should the Principal wish, other forms of reporting may be created. The methods of reporting bullying will be prominently publicized to students, staff, volunteers, and parents/legal guardians, as well as how the report will be acted upon. The victim of bullying, anyone who witnessed the bullying, and anyone who has credible information that an act of bullying has taken place may file a report of bullying. An employee, school volunteer, student, parent/legal guardian or other persons who promptly reports in good faith an act of bullying or harassment to the appropriate official and who makes this report in

compliance with the procedures set forth in the school policy is immune from a cause of action for damages arising out of the reporting itself or any failure to remedy the reported incident. Submission of a good faith complaint or report of bullying or harassment will not affect the complainant or reporter's future employment, grades, learning or working environment, or work assignments. Written and oral reports shall be considered official reports. Reports may be made anonymously but formal disciplinary action may not be based solely on the basis of an anonymous report.

**(6.9.7) Investigation of whether a reported act is within the scope of the school**

A Principal (or designee) will investigate procedures to initiate an investigation of whether an act of bullying or harassment is within the scope of the school. The trained designee(s) will provide a report on results of investigation with recommendations for the Principal to make a determination if an act of bullying or harassment falls within the scope of the district and will act according to the following protocols:

- a. If it is within the scope of the school, further investigation will commence in accordance with subsection (8.9.8) herein;
- b. If it is outside scope of the school, and determined a criminal act, refer to appropriate law enforcement.
- c. If it is outside scope of the school, and determined not a criminal act, inform parents/legal guardians of all students involved.

**(6.9.8) Prompt investigation of a report of bullying or harassment**

The investigation of a reported act of bullying or harassment is deemed to be a school-related activity and begins with a report of such an act.

The Procedures for Investigating Bullying and/or Harassment include:

- a. a. The Principal (or designee employed by the school) will be assigned to initiate the investigation. The designee(s) may not be the accused perpetrator (harasser or bully) or victim.
- b. b. Each individual (victim, alleged perpetrator, and witnesses) will be interviewed separately.
- c. c. The investigator shall collect and evaluate the facts including, but not limited to:
  - a. Description of incident including nature of the behavior; context in which the alleged incident occurred, etc.;
  - b. How often the conduct occurred;
  - c. Whether there were past incidents or past continuing patterns of behavior;
  - d. The relationship between the parties involved;
  - e. The characteristics of parties involved (i.e., grade, age, etc.);

- f. The identity of the perpetrator, including whether the perpetrator was in a position of power over the student allegedly subjected to bullying or harassment;
  - g. The number of alleged bullies/harassers;
  - h. The age(s) of the alleged bullies/harassers;
  - i. Where the bullying and/or harassment occurred; and
  - j. Whether the conduct adversely affected the student's education or educational environment.
- d. Whether a particular action or incident constitutes a violation of this policy requires a determination based on all the facts and surrounding circumstances and includes:
- a. Recommended remedial steps necessary to stop the bullying and/or harassing behavior
  - b. A written final report to the Principal.

Where the victim is a student, according to the severity of the infraction, the Principal (or designee) shall promptly notify the parent/legal guardian of the victim via telephone or personal conference of any actions being taken to protect the victim. The frequency of notification will depend on the severity of the bullying incident. The maximum of 10 school days shall be the limit for the initial filing of incidents and completion of the investigative procedural steps.

**(6.9.9)**

**Determination of consequences and due processes for a perpetrator:**

Concluding whether a particular action or incident constitutes a violation of this policy requires a determination based on all of the facts and surrounding circumstances, followed by the determination of disciplinary sanctions appropriate to the perpetrator's position within the school.

- a. Consequences and appropriate interventions for students who commit acts of bullying may range from positive behavioral interventions up to, but not limited to suspension, or reassignment as outlined in the the organization's policies and school district's Code of Conduct.
- b. Consequences and appropriate interventions for an employee found to have committed an act of bullying will be instituted in accordance with school policy. Additionally, egregious acts of bullying by certified educators may result in a sanction against an educator's state issued certificate (Rule 6B-1.006 F.A.C.).
- c. Consequences and appropriate intervention for a visitor or volunteer, found to have committed an act of bullying shall be determined by the school administrator after consideration of the nature and circumstances of the act, including reports to appropriate law enforcement officials.

- d. These same actions will apply to persons, whether they are students, school employees, or visitors/volunteers/independent contractors, who are found to have made wrongful and intentional accusations of another as a means of bullying.
- e. If a complaint of bullying or harassment is made by the alleged victim during or after the commencement of an investigation into employee or student misconduct, it shall not be a defense to the allegations of employee or student misconduct but may be considered as a mitigating factor under school policy, if appropriate.

**(6.9.10) Providing immediate notification to the parents/legal guardians of a student victim:**

The Principal, or designee, shall by telephone and in writing, report the occurrence of any incident of bullying as defined by this policy to the parent or legal guardian of all students involved on the same day an investigation determines that an act of bullying has occurred. Notification must be consistent with the student privacy rights under the applicable provisions of the Family Educational Rights and Privacy Act of 1974 (FERPA).

If the bullying incident results in the perpetrator being charged with a crime, the Principal, or designee, shall by telephone or in writing by first class mail, inform parents/legal guardian of the victim(s) involved in the bullying incident about the Unsafe School Choice Option (No Child Left Behind, Title IX, Part E, Subpart 2, Section 9532) that states “A student attending a persistently dangerous public elementary school or secondary school, as determined by the State in consultation with a representative sample of local educational agencies, or a student who becomes a victim of a violent criminal offense, as determined by State law, while in or on the grounds of a public elementary school or secondary school that the student attends, be allowed to attend a safe public elementary school or secondary school within the local educational agency, including a public charter school.”

Once the investigation has been completed, appropriate local law enforcement agencies will be notified by telephone and/or in writing to determine whether to pursue criminal charges.

**(6.9.11) Referral of victims and perpetrators of bullying or harassment for counseling**

After an investigation has determined that an act of bullying has occurred, as defined herein, the school shall discuss with both the victim’s and perpetrator’s parents/legal guardians options available for counseling. This may include referrals to community agencies or partner agencies the school has relationships with. Parents/legal guardians will be notified that the school does not have a counselor or mental health specialists on staff.

The Principal (or designee) shall also refer the perpetrator to the school’s Student Success Team in an attempt to develop strategies to be used within school to prevent the bullying behavior from continuing. The Principal (or designee) shall decide if a similar recommendation would be prudent for the victim.

**(6.9.12) Providing instruction regarding bullying and/or harassment**

The organizational seeks to ensure that schools sustain healthy, positive, and safe learning environments for all students. It is important to change the social climate of the school and the social norms with regards to bullying. This requires the efforts of everyone in the school environment including all school staff, parents/legal guardians, students and school volunteers.

Students, parents/legal guardians, all school staff and, and school volunteers shall be offered instruction at a minimum on an annual basis on the school's Policy and Regulations against bullying and harassment. The instruction shall include evidence-based methods of preventing bullying and harassment, as well as how to effectively identify and respond to bullying in schools.

**(6.9.13) Regularly reporting of actions taken to protect the victim**

The Principal (or designee) shall by telephone and/or in writing report the occurrence of any incident of bullying as defined by this policy to the parent or legal guardian of all students involved on the same day an investigation of the incident has determined an act of bullying has occurred. According to the level of infraction, parents/legal guardians will be notified by telephone and/or writing of actions being taken to protect the child; the frequency of notification will depend on the seriousness of the bullying or harassment incident. Notification must be consistent with the student privacy rights under the applicable provisions of the Family Educational Rights and Privacy Act of 1974 (FERPA).

**(6.9.14) Publication of the policy**

At the beginning of each school year, the Principal shall, in writing, inform school staff, parents/legal guardians, or other persons responsible for the welfare of a student of this policy. The Principal shall also make all contractors working with students aware of this policy.

The Principal shall ensure the development an annual process for discussing the policy on bullying and harassment with students in a student assembly or other reasonable format.

**(6.10) Computer, E-Mail and Cell Phone Usage**

**(6.10.1) School Telephones**

Telephones are provided for business use only. Personal use of telephone systems should be for emergency use only. Staff members shall refrain from making or receiving outside calls while they are responsible for the supervision or education of students.

**(6.10.2) Personal Cell Phone Use**

Student use of cell phones are not allowed within the school building without the expressed permission of the teacher in charge. Teachers are allowed to permit cell phone usage for educational purposes. Staff members use of personal cell phones are prohibited while responsible for the supervision or education of students. Staff may use personal cell phones during scheduled breaks, planning time, etc.

**(6.10.3)**

**Social Media Policy**

The organization realizes that part of 21st century learning is adapting to the changing methods of communication. The importance of teachers, students and parents engaging, collaborating, learning, and sharing in these digital environments is a part of 21st century learning. To this aim, the organization has developed the following guideline to provide direction for instructional employees, students and the school community when participating in online social media activities. Whether or not an employee chooses to participate in a blog, wiki, online social network or any other form of online publishing or discussion it is his or her own decision. Free speech protects educators who want to participate in social media, but the laws and courts have ruled that schools can discipline teachers if their speech, including online postings, disrupts school operations. The organization's social media guidelines encourage employees to participate in online social activities. But it is important to create an atmosphere of trust and individual accountability; keeping in mind the organization's Acceptable Use Policy. By accessing, creating or contributing to any blogs, wikis, or other social media, you agree to abide by these guidelines. Please read them carefully before posting or commenting on any blog, wiki and/or podcast.

**(6.10.3.1)**

***Official / School Related Communication***

The organization provides online platforms and learning management systems related to the online training methodology utilized by the organization. As a result, all communication and online interactions with students must be conducted only through the systems provided by the organization.

**(6.10.3.1)**

***Social Media Guidelines for Faculty & Staff***

**(6.10.3.1.1)**

***Blogs, Wikis, Podcasts, Digital Images & Video***

- Personal Responsibility
  - Organizational employees are personally responsible for the content they publish online. Be mindful that what you publish will be public for a long time—protect your privacy.
  - Your online behavior should reflect the same standards of honesty, respect, and consideration that you use face-to-face.
  - When posting to your blog be sure you say that the information is representative of your views and opinions and not necessarily the views and opinions of the organization (See Blogging Rules)
  - Remember that blogs, wikis and podcasts are an extension of your classroom. What is inappropriate in your classroom should be deemed inappropriate online.
  - The lines between public and private, personal and professional are blurred in the digital world. By virtue of identifying yourself as a organizational employee online, you are now connected to colleagues, students, parents and the school community. You should ensure that content associated with you is consistent with your work at the organization.

- When contributing online do not post confidential student information.
- Disclaimers
  - The organization's employees must include disclaimers within their personal blogs that the views are their own and do not reflect on their employer. For example, "The postings on this site are my own and don't necessarily represent my organization's positions, strategies, opinions, or policies."
  - This standard disclaimer does not by itself exempt organizational employees from a special responsibility when blogging.
  - Classroom blogs do not require a disclaimer, but teachers are encouraged to moderate content contributed by students.
- Copyright and Fair Use
  - Respect copyright and fair use guidelines. See U.S. Copyright Office - Fair Use (<http://www.copyright.gov/fls/fl102.html>)
  - A hyperlink to outside sources is recommended. Be sure not to plagiarize and give credit where it is due. When using a hyperlink, be sure that the content is appropriate and adheres to the organization's acceptable use policy.
  - It is recommended that blogs be licensed under a Creative Commons Attribution 3.0 United States License.
- Profiles and Identity
  - Remember your association and responsibility with the organization in online social environments. If you identify yourself as an organizational employee, ensure your profile and related content is consistent with how you wish to present yourself with colleagues, parents, and students. How you represent yourself online should be comparable to how you represent yourself in person.
  - No last names, addresses or phone numbers should appear on blogs or wikis.
  - Be cautious how you setup your profile, bio, avatar, etc.
  - When uploading digital pictures or avatars that represent yourself make sure you select a school appropriate image. Also remember not to utilize protected images. Images should be available under Creative Commons or your own.

**(6.10.3.1.2) Personal Use of Social Media such as Facebook, Myspace and Twitter**

- The organization's employees are personally responsible for all comments/information they publish online. Be mindful that what you publish will be public for a long time—protect your privacy.

- Your online behavior should reflect the same standards of honesty, respect, and consideration that you use face-to-face, and be in accordance with the highest professional Standards.
- By posting your comments having online conversations etc. on social media sites you are broadcasting to the world, be aware that even with the strictest privacy settings what you “say” online should be within the bounds of professional discretion. Comments expressed via social networking pages under the impression of a “private conversation” may still end up being shared into a more public domain, even with privacy settings on maximum.
- Comments related to the school should always meet the highest standards of professional discretion. When posting, even on the strictest settings, staff should act on the assumption that all postings are in the public domain.
- Before posting photographs and videos, permission should be sought from the subject where possible. This is especially the case where photographs of professional colleagues are concerned.
- Before posting personal photographs, thought should be given as to whether the images reflect on your professionalism.
- Photographs relating to alcohol or tobacco use may be deemed inappropriate. Remember, your social networking site is an extension of your personality, and by that token an extension of your professional life and your classroom. If it would seem inappropriate to put a certain photograph on the wall - is it really correct to put it online?
- Microblogging (Twitter etc.) Comments made using such media are not protected by privacy settings. Employees should be aware of the public and widespread nature of such media and again refrain from any comment that could be deemed unprofessional.

#### **(6.10.3.1.3) Social Bookmarking**

- Be aware that others can view the sites that you bookmark.
- Be aware of words used to tag or describe the bookmark.
- Be aware of URL shortening services. Verify the landing site to which they point before submitting a link as a bookmark. It would be best to utilize the original URL if not constrained by the number of characters as in microblogs -- i.e. Twitter.
- Attempt to link directly to a page or resource if possible as you do not control what appears on landing pages in the future.

#### **(6.10.3.1.4) Instant Messaging**

- The organization’s employees are required to get authorization to have instant messaging programs downloaded on their school computers.

- The organization's employees also recognize this same authorization is required for access to instant messaging programs that are available through web interfaces with no download
- Avatar images and profile information should follow the same guidelines as the above Profiles and Identity section
- A written request must be submitted to the Executive Director for approval.
- When submitting a request to the Executive Director please include your name, building, grade level, and provide a statement explaining your instructional purposes for using the program.
- It would also be beneficial if you can tie your request to state curriculum standards or the student or teacher National Educational Technology Standards.

**(6.10.3.1.5) Requests for Social Media Sites**

- The organization understands that 21st century learning is constantly changing technology and that many sites that are currently "blocked" by internet filter may have pedagogical significance for teacher and student use.
- If you would like to request that another online site be accessible to use for teaching and learning, please email the Executive Director to make such a request.
- Requests will be reviewed and the district social media guidelines will be updated periodically throughout the school year.
- A description should be provided of the intended use of the site and what tools on the site match your needed criteria.
- A link to the site's privacy policy should be included if possible.

**(6.10.3.2) Social Media Guidelines for Students:**

Due to the wealth of new social media tools available to students, student products and documents have the potential to reach audiences far beyond the classroom. This translates into a greater level of responsibility and accountability for everyone. Below are guidelines students enrolled with the organization should adhere to when using Web 2.0 tools in the classroom.

1. Be aware of what you post online. Social media venues are very public. What you contribute leaves a digital footprint for all to see. Do not post anything you wouldn't want friends, enemies, parents, teachers, or a future employer to see.
2. Follow the school's code of conduct when writing online. It is acceptable to disagree with someone else's opinions, however, do it in a respectful way. Make sure that criticism is constructive and not hurtful. What is inappropriate in the classroom is inappropriate online.

3. Be safe online. Never give out personal information, including, but not limited to, last names, phone numbers, addresses, exact birthdates, and pictures. Do not share your password with anyone besides your teachers and parents.
4. Linking to other websites to support your thoughts and ideas is recommended. However, be sure to read the entire article prior to linking to ensure that all information is appropriate for a school setting.
5. Do your own work! Do not use other people's intellectual property without their permission. It is a violation of copyright law to copy and paste other's thoughts. When paraphrasing another's idea(s) be sure to cite your source with the URL. It is good practice to hyperlink to your sources.
6. Be aware that pictures may also be protected under copyright laws. Verify you have permission to use the image or it is under Creative Commons attribution.
7. How you represent yourself online is an extension of yourself. Do not misrepresent yourself by using someone else's identity.
8. Blog and wiki posts should be well written. Follow writing conventions including proper grammar, capitalization, and punctuation. If you edit someone else's work be sure it is in the spirit of improving the writing.
9. If you run across inappropriate material that makes you feel uncomfortable, or is not respectful, tell your teacher right away.
10. Students who do not abide by these terms and conditions may lose their opportunity to take part in the project and/or access to future use of online tools.

**(6.10.3.3) Social Media Guidelines for Parents:**

Classroom blogs and other social media are powerful tools that open up communication between students, parents, and teachers. This kind of communication and collaboration can have a huge impact on learning. The organization encourages parents to view and participate by adding comments to classroom projects when appropriate.

1. Parents should expect communication from teachers prior to their child's involvement in any project using online social media applications, i.e., blogs, wikis, podcast, etc.
2. Parents will not attempt to destroy or harm any information online.
3. Parents will not use classroom social media sites for any illegal activity, including violation of data privacy laws.
4. Parents are highly encouraged to read and/or participate in social media projects.
5. Parents should not distribute any information that might be deemed personal about other students participating in the social media project.
6. Parents should not upload or include any information that does not also meet the Student Guidelines.

## (6.11) Civility Policy

In order to ensure all individuals associated with the organization behave civilly and with fairness and respect, several policies are in place to ensure proper behavior. Students are obligated to meet school expectations as defined elsewhere in this policy. Adults are subject to the following civility policies:

### (6.11.1) Civility of Staff

All employees of the organization shall behave with civility, fairness and respect in dealing with fellow employees, students, parents, patrons, visitors, and anyone else having business with the school. Uncivil behaviors are prohibited. Uncivil behaviors shall be defined as any behavior that is physically or verbally threatening, either overtly or implicitly, as well as behaviors that are coercive, intimidating, violent, or harassing. Examples of uncivil behavior include, but are not limited to: use of profanity; personally insulting remarks; attacks on a person's race, gender, nationality, religion, or sexual preference; or behavior that is out of control. Such interactions could occur in telephone conversations, voice mail messages, face-to-face conversations, or in written communication.

Any uncivil behavior should be reported to the immediate supervisor or the Superintendent. A record shall be made of the alleged incident and the action taken, which may include disciplinary action as defined in within this policy manual. Confidentiality shall be observed whenever possible to protect the complainant and the alleged offending person. Students and employees may be subject to additional action under other state statute or school policies. Retaliation against a person who reports a claim of uncivil behavior shall be prohibited. Nothing in this policy should be construed to limit open and frank discussions of issues.

### (6.11.2) Civility of Parents and Patrons

All parents and patrons of the organization shall behave with civility, fairness and respect in dealing with fellow parents, patrons, staff members, students, and anyone else having business with the school. Uncivil behaviors are prohibited. Uncivil behaviors shall be defined as any behavior that is physically or verbally threatening, either overtly or implicitly, as well as behaviors that are coercive, intimidating, violent, or harassing. Examples of uncivil behavior include, but are not limited to: use of profanity; personally insulting remarks; attacks on a person's race, gender, nationality, religion, or sexual preference; or behavior that is out of control. Such interactions could occur in telephone conversations, voice mail messages, face-to-face conversations, or in written communication.

Any uncivil behavior by parents or patrons shall be reported to school administration. A record shall be made of the alleged incident and the action taken. Confidentiality shall be observed whenever possible to protect the complainant and the alleged offending individual. Repeated incidents of uncivil behavior can result in the individual being banned from the school premises. Retaliation against a person who reports a claim of uncivil behavior is prohibited.

## (6.12) Prohibition Against Firearms and Weapons

The presence of firearms or weapons poses a substantial risk of serious harm to organization students, staff and community members. Therefore, possession of firearms or weapons is prohibited on school premises at all times except for law enforcement officials. As used in this policy, the phrase “school premises” includes all organization buildings, grounds, vehicles and parking areas. This prohibition also extends to the sites of school activities, whether or not those school activities are conducted on organizational property.

Individuals found to be in violation of this policy will be dealt with severely. Students will be disciplined up to and including reassignment as provided elsewhere within this policy manual. Law enforcement officials will be notified and the individual violating this policy will be directed to leave school premises. Non-students violating this policy will be barred from all school premises and school activities for a period of one (1) year. Subsequent violations by the same individual will result in a permanent bar from organizational properties and activities.

Student participation in school sanctioned gun safety courses, student military or ROTC courses, or other school sponsored firearm related events does not constitute a violation of this policy, provided the student does not carry a firearm or other weapon into any school, school bus, or onto the premises of any other activity sponsored or sanctioned by school officials. In addition, persons passing through organizational property for purposes of dropping off or picking up a student do not violate this policy if they possess a lawful permitted weapon in the vehicle during this time.

#### (6.13) Research Requests

Requests for research studies involving students and/or staff of the Organization must be submitted to the Executive Director for approval. Any research utilizing human subjects must be authenticated by the sponsoring university. Written permission from parents of the students to be involved must also be obtained as well as approval of the Executive Director.

The organization will provide the university with the necessary information and data to conduct research and make decisions to support and improve Charter Schools. Student privacy will be respected in all such matters.

#### (6.14) Complaint Process

Although no member of the school community shall be denied the right to petition the Board for redress of a grievance, the complaints will be referred through the proper administrative channels for solution before investigation or action by the Board. Exceptions are complaints that concern Board actions or Board operations only.

The Board advises the school community that the proper channeling of complaints involving instruction, discipline, or learning materials is as follows:

1. Teachers
2. Principal
3. Executive Director
4. Board of Directors

Any complaint about school personnel will be investigated by the Administration before consideration and action by the Board of Directors.

## (7) Fiscal and Operational Management

### (7.1) General Office Procedures

#### (7.1.1) Handling of Mail

The office manager, or designee, will be responsible for checking the mailbox on a daily basis and receiving all incoming mail. All incoming mail will be date stamped before distribution.

A copy of all outgoing correspondence will be maintained in the appropriate office file.

#### (7.1.2) Property and Supplies

Office equipment and supplies are to be used for official business only. All property and supplies should be stored in a secure location.

The clerical support staff will maintain an inventory of basic office supplies used. Request for supplies should be submitted to the office manager for approval through the Principal.

#### (7.1.3) Purchasing

All office supplies must be ordered through the Principal or designee. Once a purchase has been approved, the requisite documentation required by specific grantors and/or the bookkeeper will be prepared and executed by the Principal or designee.

Purchase orders will include

- Date
- Purchase order numbers
- Vendor Name
- Vendor Telephone Number
- General Description
- Amount (Estimated)
- Preparer's Signature and Date

### (7.2) Accounting Processes

#### (7.2.1) Banking Policy and Relations

The Executive Director or designee in conjunction with the Board Treasurer can arrange with several financial institutions to provide for the operational requirements of the organization and can invest excess capital funds in certificates of deposit, money market funds, Treasury Notes, Bonds and bills, equities, mutual funds and professionally managed accounts. Further, the organization will maintain positive relations with all sources of capital and banking service providers.

##### (7.2.1.1) Banking Relations

The Executive Director or designee will be the charter school's primary representative in dealing with financial institutions. The Executive Director or designee will be responsible for meeting with personnel of the primary financial institutions on a quarterly basis to provide consistent financial information reporting and updates on the charter school's operations to financial institution officials. The Executive Director or designee will be responsible for promoting a positive working relationship between the financial institutions. The Executive Director or designee will also provide the institution officials with the charter school's anticipated capital needs or financial service requirements to provide institution officials adequate time to understand, approve and prepare for the charter school's needs.

The Board Treasurer or designee will also perform an ongoing evaluation of the institution's abilities to satisfy the needs of the organization and will make appropriate changes whenever necessary. Criteria to be used in the evaluating institutions can include:

- Institution Size (appropriate size to meet charter school needs while being small enough to be responsive)
- Financial safety and capital structure
- Reputation
- Location
- Flexibility and lending philosophy/attitudes
- Operating efficiency and accuracy (computerization, employee training, etc.)

**(7.2.1.2) Banking Policy and Arrangements**

The charter school shall establish a separate account for each fund and/or account group (internal funds, FTE funds, etc.) which will be used for all deposits and disbursements related to the fund.

**(7.2.2) Accounts Payable, Cash Disbursements and Accrued Expenses**

Proper internal control will be followed to ensure that only valid and authorized payables are recorded and paid. Accounting procedures will be implemented to ensure the accuracy of amounts, coding of general ledger accounts and appropriate timing of payments.

**(7.2.2.1) Documenting Accounts Payable**

After being stamped with the "date received" stamp, all Purchase Orders with purchase requisition, if applicable and Vendor invoices will be placed in an accounts payable file.

**(7.2.2.2) Recording of Invoices and Check Requests**

- The invoices will be matched to the purchase order request from each campus.
- All invoices will identify the bank account and other special instructions for payment, if applicable.

- The Principal or Executive Director will approve all invoices before being delivered to the administration office.
- The Check Request Form will follow the same procedure 2.1-2.3 except purchase orders maybe omitted subject to Superintendent approval.
- Approved invoices and check request will be entered into the accounting system for proper coding and payment

**(7.2.2.3) Payment of Accounts Payable**

Weekly, accounts payable invoices will be selected for payment according to their payment terms unless otherwise determined by the Executive Director or designee. Any credit balances (amounts owed to the organization) should be applied to the invoice amount when determining payment.

After the checks are printed, a copy will be made to attached to each invoice. The original checks will be paper clipped to the copied check and invoice. The original checks and all backup will be sent to the Executive Director for final approval and signature.

Original checks will be mailed as assigned by the Executive Director, while the attached backup will be returned to the administration office for filing.

**(7.2.2.4) Accrued Expenses**

The Executive Director will ensure that at the end of each month records are prepared for accrued expenses. Accrued expenses represent amounts due for services or benefits that the charter school has received but are not yet payable. The Once all amounts have been determined, the accrued expenses will be recorded in the accounting system.

**(7.2.3) Bad/NSF Checks**

Checks returned by the bank and designated uncollectible are to be processed in a method to avoid confronting or embarrassing clients/donors while ensuring that the funds will be collected.

**(7.2.3.1) Returned Checks**

A returned check for less than \$500 or stamped "uncollected funds," should be re-deposited the following day, or when the next deposit is made.

For returned checks in amounts greater than \$500, the bank that the check is drawn against should be telephoned and requested to provide if the check amount will clear the client/donor's account. If sufficient funds exist the check should be re-deposited.

**(7.2.3.2) Redeposited Checks**

In the event a re-deposited check is returned or if sufficient funds do not exist to cover the check, the check should be turned over to the Executive Director or treasurer immediately.

Further, when more than one bad check is issued by the same party within any three-month period, notify the Executive Director. Do not redeposit the check unless instructed to do so.

The Executive Director or designee should contact the issuer by phone to report the problem and discuss how the matter will be resolved. At the Executive Director's discretion, a check may be re-deposited. Whenever a check is returned for insufficient funds, a handling fee of \$25.00 should be charged to the issuer.

#### **(7.2.4) Bank Account Reconciliations**

Errors or omissions can be made to the cash records due to the many transactions that occur. Therefore, it is necessary to prove periodically the balance shown in the general ledger. Cash on deposit with a bank or other financial institution is not available for count and is therefore proved through the preparation of a reconciliation of the organization's record of cash in the bank/financial institution and the bank/financial institution's record of the organization's cash that is on deposit.

##### **(7.2.4.1) *Format***

The organization's format for monthly bank/financial institution reconciliations, is composed of two distinct sections. One section begins with the balance as shown on the bank/financial institution statement and works to a corrected balance. That is the balance the bank/financial institution statement would show if all transactions were recorded by the bank (e.g. outstanding checks, deposits in transit, etc.)

The second section starts with the balance shown by the charter school records and also works to a corrected balance, the balance that should be shown in the organization's records after all transactions are properly recorded (e.g. bank charges, interest, etc.).

##### **(7.2.4.2) *Preparation and Reconciling Items***

Upon receipt of the monthly bank/financial institution statement including cleared checks, deposit slips and any other transaction notifications, the monthly bank/financial institution reconciliation will be prepared by the accountant, bookkeeper or designee utilizing the following process:

- The first section of the monthly reconciliation will be started with the ending balance per the bank/financial institution statement.
- Next, any deposits in transit that were made by the organization, but were not yet recorded by the bank/financial institution will be listed and added to the bank/financial institution balance.
- Next, any checks that were written on the account prior to month-end but which have not yet cleared the bank/financial institution, will be listed and deducted from the bank/financial institution balance.
- From these steps, the "corrected" ending balance will be derived for the first section.

- The second section of the monthly reconciliation will be started with the ending balance per the charter school's books.
- Next, any interest or any other bank/financial institution credit items will be listed and added to the balance.
- Next, any bank/financial institution charges, transfer fees, etc. will be listed and deducted from the balance.
- From these steps, the "corrected" ending balance will be derived for the second section and should equal the "corrected" balance for the first section.
- Any discrepancies between these two balances will require research by the accountant, bookkeeper, or designee to determine the cause, such as recording errors, omissions, mispostings, etc. This can also include recalculation of the bank/financial institution statement for any possible errors made by the bank/financial institution.

**(7.2.4.3) Adjustments and Journal Entries**

Any book reconciling items such as interest, bank/financial institution charges and any recording errors will be summarized and drafted in journal entry form for recording in the general ledger. Further, any outstanding checks over six months old will be reviewed for disposition including write-off by journal entry.

**(7.2.4.4) Review and Approval**

The monthly bank/financial institution reconciliation for each account should be reviewed and approved by the Executive Director or designee (an individual who did not prepare it), via signature and date on the completed forms.

**(7.2.5) Bank Loan Applications**

The financial management function is responsible for developing the organization's financing plan for capital needs. To expedite loan approval processes, prepare for loan officer questions and as an aid in negotiating loan rates and other terms with multiple lenders, the treasurer or designee will prepare loan proposals according to established procedures.

**(7.2.5.1) Assessment of Capital Requirements**

The Chairman of the Board of Directors will be responsible for directing the Treasurer in developing borrowing and financial plans to meet the needs of the organization's operations. These plans shall take into account current and projected business conditions and can include the following criteria:

- Capital requirements to satisfy the organization's growth in relation to risk.
- Ability of the organization to meet present obligations as well as new debt under worse case conditions.
- Appropriateness of capital or debt structure.
- Level or type of debt does not preclude future borrowing or funding capacity.

- Cost of capital in relation to return on investment from use of funds obtained.

The Board Chairman will designate which institutions are to be contacted for borrowing purposes and will prepare loan applications with all required supporting analyses and documentation.

**(7.2.5.2)**

***Preparation of Loan Applications***

Loan proposals will be drafted and presented to the Board of Directors with the following information, if applicable:

- **Date:** The proposal for each bank should be dated with the current date the proposal will be given to the bank.
- **Borrower:** The specific legal name of the intended borrowing entity should be listed. This will avoid confusion with other organization subsidiaries and personal loans to officers.
- **Type of Loan:** The specific type of loan requested should be listed (i.e. equipment loan, line of credit, etc.) This eliminates any guessing or assumptions by the loan officer.
- **Amount:** The amount of the loan requested should be determined and listed. It is very important to establish credibility with the loan officer and committees. All numbers should be carefully forecasted and supported with documentation. Asking for too much or too little money can convey uncertainty or doubt about the organization's ability to implement successfully the plans for the loan proceeds.
- **Use of Proceeds:** As above, the use of proceeds should be listed and well supported by documentation in the organization's business plan and forecasts.
- **Term:** The desired term of the loan should be listed. If deemed possible, longer terms should be requested to avoid the process of having to renew the loan frequently.
- **Closing Date:** Set a closing date. For renewals, approximately 30 days after application; for new bank or loan applications, approximately 60 days after application. This communicates a bit of negotiating edge for the organization by conveying the message that the matter is to be resolved or the organization will use other banks willing to work within this schedule.
- **Takedown at Closing:** The amount of funds to be drawn immediately at closing of the loan should be listed. As above, this should reflect the business plan and conveys that the organization understands its business and financial requirements.
- **Collateral:** Any assets (i.e., equipment, inventory, accounts receivable, etc.) to be used as collateral for the loan should be listed and appropriately reflect the type of loan.
- **Guarantees:** This should normally be completed with "none." The organization should always propose loans based upon the organization's credit worthiness.

However, in certain situations, personal guarantees by the officers may be necessary.

- **Rate:** For negotiating purposes, rather than have the bank "suggest" the interest rate, it is better to state a reasonable but fair rate for the charter school. The rate should reflect the type of loan and the level of risk we think the charter school represents to the bank.
- **Repayment Schedule:** A realistic repayment schedule should be determined and should correspond to the charter school's business plan and financial forecasts.
- **Source of Funds for Repayment:** The specific source of cash flow to be used for repayment should be identified.
- **Alternate Source of Funds for Repayment:** To satisfy concerns by banks that in the event the organization does not meet financial projections, the plans on how the organization would meet the repayment schedule should be listed. For example, liquidating assets, etc., could be used to repay the loan.

#### (7.2.6) **Capitalization & Depreciation of Fixed Assets**

Assets acquisitions with a useful life expectancy of greater than one year and with a material unit cost of over \$500 will be capitalized by the organization and depreciated.

##### (7.2.6.1) **Capitalization**

Capitalization is the process of recording the purchase of a fixed asset that is generally recorded individually on an asset schedule. Examples of capital expenditures are purchases of land, buildings, machinery, office equipment, leasehold improvements, computer software and vehicles.

All assets with a useful life of greater than one year and a material unit cost of over \$500 will be capitalized and (except for land) will be recorded in the depreciation records. Any asset that does not meet the above criteria will be expensed such as small tools and equipment or repairs and maintenance.

The cost basis of furniture and equipment assets will include all charges relating to the purchase of the asset including the purchase price, freight charges and installation if applicable.

Leasehold improvements are to be capitalized if they relate to the occupancy of a new location or a major renovation of an existing location. Expenditures incurred in connection with maintaining an existing facility in good working order should be expensed as a repair.

The cost of buildings should include all expenditures related directly to their acquisition or construction. These cost include materials, labor and overhead incurred during construction and fees, such as attorneys and architects and building permits.

##### (7.2.6.2) **Depreciation**

Depreciation represents the write-down or write-off of the cost of the asset over its estimated useful life.

In general, the depreciation methods/lives for assets should be selected for consistent financial reporting and tax purposes. The following depreciation methods and useful lives should be used for the following asset classifications for financial reporting purposes:

| Asset Class                    | Useful Life   | Method        |
|--------------------------------|---|---------------|
| Vehicles                       | Five Years  | Straight Line |
| Office Equipment and Computers | Five Years  | Straight Line |
| Furniture and Line Machinery   | Seven Years   | Straight Line |
| Leasehold Improvements         | Remaining Life Of Lease Term, Including Option Renewals | Straight Line |
| Buildings                      | Thirty Years  | Straight Line |

The lowest life permitted by tax regulations for asset classes should be selected to optimize depreciation deductions.

**(7.2.7)**

**Check Requests**

To ensure efficient processing and record keeping. All manual check requests will be prepared on a written check request form.

**(7.2.7.1)**

**Origination**

Whenever an employee requires a manual check to be issued, such as picking up items or for cash on delivery items, a Check Request form should be completed with all pertinent information and receive appropriate approval.

**(7.2.7.2)**

**Processing**

The completed Check Request Form should then be forwarded to the bookkeeper for check preparation and signature by the authorized check signers. If a check is to be mailed directly to the vendor, any applicable documentation, such as order forms, etc., should be attached to the form.

**(7.2.8)**

**Check Signing Authority**

A limited number of employees and board officers will be authorized to sign checks, and there shall be no fewer than three individuals at all times.

**(7.2.8.1)**

**Authorized Check Signers**

Authorized check signers must be approved in writing and require Board of Directors authorization. The Executive Director will have check signing authority. Additional individuals with or without dollar limitations may be authorized as necessary.

The Chairman may revoke check-signing authority. Any person who is no longer entitled to sign charter school checks will be notified in writing. The Treasurer will oversee the proper notification of the charter school's financial institutions whenever authorized signature changes are made.

**(7.2.8.2) Signature Levels Required**

The following signature levels will be required according to the dollar amount of the check:

**Less than \$500** - A check issued for an amount less than \$500 requires only one signature, typically by the Executive Director.

**Less than \$10,000** - A check issued for an amount less than \$10,000 requires two different authorized signatures.

**Greater than \$10,000** - A check issued for greater than \$10,000 requires two signatures, one of which must be that of the Treasurer of the Board of Directors. The second signature can be that of any authorized check signer.

**(7.2.9) Petty Cash**

To facilitate minor business expenses, a petty cash fund will be available to select employees as described below.

**(7.2.9.1) Fund Control**

The secretary will maintain control of the cash box, petty cash journal and all petty cash transactions. The petty cash fund will be set up in the amount of \$100 for authorized out-of-pocket expenses and advances for minor business expenses.

Advances or reimbursements from petty cash will be limited to amounts of \$25.00 or less. If an employee requires funds in a greater amount, they should request a check.

**(7.2.9.2) Draws**

When an employee requests a petty cash draw, the cashier will record the amount disbursed, date of disbursement, reason for the disbursement and the name of the employee receiving the disbursement.

The employee should, by the next business day, return the receipt(s) and any change to the cashier. A petty cash voucher will then be completed with the receipt(s) attached.

**(7.2.9.3) Replenishment**

At the end of each month or whenever the petty cash fund drops below a balance of \$25.00, the cashier will complete the reimbursement paperwork from the journal with itemized descriptions of expenses and attach all vouchers. The cashier will then be issued a check in the amount of the reimbursement and will be responsible for obtaining cash from the bank to replenish the cash box.

**(7.2.10) Recording Transactions in the General Ledger**

The business manager or designee is responsible for the proper posting of journals and entries to the general ledger and for the maintenance of the accounts to ensure accuracy, validity and reliability of financial records.

**(7.2.10.1) Posting Transactions and Journals**

The computerized accounting system aids in the maintenance of journals and posting of transactions to general ledger accounts. The following functions should be performed on a monthly basis to update the general ledger for the month's activities:

- All activities recorded in journals will be posted to the general ledger using the computerized posting feature. These journals include:
  - General Journal
  - Purchases Journal
  - Cash Receipts Journal
  - Cash Disbursements Journal - Payroll Journal
- The recurring adjusting journal entries will be posted via the general journal. Recurring journal entries will be established for adjustments that occur equally each monthly accounting period. Recurring journal entries can include the following:
  - Accruals of interest expense not paid during the accounting period.  
Amortization of prepaid expenses Depreciation of fixed assets
  - Recurring journal entries will be reviewed monthly and adjusted accordingly.
- Adjusting journal entries will be prepared for transactions that have not been recorded in other journals or to correctly restate account balances to accurate amounts. The need to make adjusting journal entries may be due to the following:
  - Accrual of income and expense items
  - Correction of errors
  - Recording non-cash transactions

All journal entries will be reviewed and authorized by the Executive Director or designee before being posted. Adequate supporting documentation will be prepared for each journal entry.

**(7.2.10.2) Trial Balance**

After posting all journals and adjusting entries, a trial balance will be printed. The trial balance will be reviewed to ensure that the general ledger is in balance. Next, all control accounts in the general ledger will be reconciled to subsidiary ledgers. Any differences will be investigated and appropriate adjustments will be made.

The Executive Director or designee will make final review of the trial balance for accuracy and proper reflection of account balances before printing financial statements.

**(7.3) Fixed Asset Control**

Proper control procedures will be followed for all capital asset acquisitions, transfers and dispositions in order to provide internal control of capital equipment and to assist in reporting. The Executive Director is responsible and accountable for furniture, equipment, machinery and any other capital assets and will maintain some type of control over capital assets. The Executive Director or designee will assist and evaluate the capital asset control procedures.

### **(7.3.1)**

#### **Acquisitions**

All purchases of assets costing more than \$500 and authorized within the annual operating budget must be approved by the Executive Director. Assets that are not included within the annual budget must be approved by the Board of Directors.

A Capital Asset Requisition form (Exhibit 1) must be completed and approved for all purchases. This form is to be attached to all purchase orders or check authorization forms submitted to the bookkeeper. Management may source the vendor for the purchase of the capital asset or can submit the request to solicit bids to the board of directors for assets costing \$1000 or more.

All purchases for items over \$200 must include a completed purchase order, with the form indicating that the item is a capital purchase. When the bookkeeper is entering the records into the accounting system, the item will be recorded in the official school inventory documentation as well.

Any internally constructed or donated equipment will be reported to the bookkeeper if the item cost or has a FMV of \$100 or more. A complete description of the property, date manufactured or received, number of items, cost or estimated value and a statement that it was internally constructed or donated will be included on the organization's in-kind contributions log/records.

### **(7.3.2)**

#### **Dispositions**

Capital assets may be sold or traded-in on new equipment. An Asset Disposition form is to be completed and approved by the Executive Director. Any assets with an original value greater than \$1,000 will also require the Board of Director's approval.

Upon approval, the charter school may advertise the property for sale or submit a list to the bookkeeper for sale and disposition. After completion of the sale, the Asset Disposition form will be submitted to the accountant, and the item will be transferred out of the inventory records. The accountant will delete the item from the asset records and record any gain or loss on the disposition.

Worn-out or obsolete property with no cash value will be reported to the bookkeeper on the Asset Disposition form with description, serial number and condition. The bookkeeper will inspect all worn-out or obsolete property before it is removed from the charter school and discarded. The asset will then be removed from the asset records.

Any asset that is missing or has been stolen will be reported in writing as soon as possible. The description, serial number, and other information about the lost item should be included in the report. The Executive Director will determine the proper course of action and will notify the charter school's insurance carrier and any outside

authorities if deemed appropriate. If not recovered, the asset will then be removed from the asset records.

### **(7.3.3) Asset Records**

Upon any asset acquisition, the bookkeeper or designee is responsible for assigning and attaching asset number labels to the property where it can be readily located. The bookkeeper will then maintain a detailed Tangible Asset Log. Each asset that receives an asset label will be recorded on the log. This log will display the asset label number assigned to the asset, the date the asset was purchased, the date the asset was labeled, the cost or FMV of the asset, the location of the asset, the description of the asset and the date the asset was disposed of, if applicable.

On an annual basis, the Tangible Asset Log should be reviewed to verify the accuracy of the log. Any discrepancies noted should be reported to the bookkeeper to be resolved.

## **(7.4) Payroll Processes**

### **(7.4.1) Payroll Records and Procedures**

Payroll will be processed to ensure accuracy, validity of transactions and proper internal control procedures will be maintained to assure that all disbursements are for valid services performed.

### **(7.4.2) Personnel Records, Management and Changes**

Personnel records for hiring, classification, rate changes and termination are explained in the section 3 of this policy manual. Payroll processing will be performed in conjunction with the following related personnel procedures.

- Employee Hiring and New Employee Orientation
- Paid and Unpaid Time Off - Pay and Payroll matters
- Performance Appraisals and Salary/Wage Adjustments - Resignations and Terminations

### **(7.4.3) Payroll Processing**

The bookkeeper will receive completed and approved timesheets from the Executive Director or designee(s) according to the procedures outlined elsewhere within this policy manual.

Once timesheets have been received, the bookkeeper or designee will review for completeness and then perform calculations for payroll, payroll deductions and other accruals. The bookkeeper or designee will then prepare summary worksheets of payroll information and present along with supporting documentation to the Executive Director for review and approval.

Once the summary has been approved, the bookkeeper or designee will enter the information into the computer for processing. A payroll report will be printed before printing checks to verify accuracy and completeness. If correct, checks should be

printed. If incorrect, the necessary corrections should be made and reviewed (validated). Validated payroll checks will then be presented for signing and distribution.

Payroll tax deposits will be determined and timely submitted to the Department of Treasury (IRS), as required, using Form 8109 "Federal Tax Deposit Coupon" or the Electronic Tax Payment System.

All payroll related returns will be prepared by the accountant or designee, and approved/signed by the Executive Director or any board officer.

#### **(7.4.4) Payroll Returns**

Quarterly prepare Form 941 - Employers Quarterly Federal Tax Return and file with the Internal Revenue Service, which is due on the last day of the month following the end of the quarter being filed (i.e. the first report Form 941 is for the period January 1 through March 31 and is due April 30).

If the organization has four (4) or more employees, then Form UCT-6, Employer's Quarterly Tax Report is required to be filed with the Florida Department of Labor, and is due on the last day of the month following the end of the quarter being filed.

At the end of the calendar year, Forms W-3, Transmittal of Wage and Tax Statement and Form W-2, Wage and Tax Statement are to be completed for all employees and submitted to the Social Security Administration.

#### **(7.5) Property Tax Assessments**

All non-exempt property tax assessments will be reviewed for accuracy and proper assessed valuations to ensure minimum property tax costs to the organization.

##### **(7.5.1) Review of Assessments**

All assessments are to be promptly reviewed. Any qualified properties used by the organization for its exempt purpose should apply for exemption annually. Many jurisdictions only allow a challenge to an assessment within 30 days after the annual notice as assessed value is sent. If the charter school misses the deadline, it loses the chance to reduce the year's property tax. There are normally no refunds for prior years' property taxes even if successfully challenged in the future. Often, it may be advisable to begin the analysis process prior to receiving the assessment notice.

When reviewing an assessment, the first step is to find out how the property was assessed. Ask for a full explanation of how the assessed value was derived. Assessors are usually cooperative in providing this information.

##### **(7.5.2) Appealing of Assessments**

If upon review of the assessment and all other factors, the organization believes a downward adjustment to the property assessment is appropriate, an appeal should be prepared.

Once a sound case is prepared, an appeal can be sought by simply calling the local assessor's office and asking for an appointment to discuss the assessment. The meeting with the local assessor will generally be informal. It is important not to be adversarial with the assessor but to present the attitude that the organization is helping

the assessor to reach a more accurate valuation for the property by presenting additional information.

## (7.6) Release of Financial or Confidential Information

The release of financial, personnel, statistical or other information that may be of a confidential nature will be controlled and every request will be referred to the Executive Director or treasurer.

### (7.6.1) Written Request

Typical requests are for additional information concerning details of the published financial statements, litigation progress, insurance coverage, personnel, students, etc. If the request is by letter or written correspondence, the materials shall be forwarded to the <Director> or treasurer who will review the information to be released and who will be authorized to reply. All legal requirements regarding public records, and the policy regarding public records requests elsewhere in this policy manual will be adhered to.

### (7.6.2) Telephone / Personal Request

If the request is by telephone or a personal visit to our office, the requester will be referred to the Executive Director or designee. If either one is unavailable, the requester should be asked to provide their name, organization, telephone number and address, if possible. Also they should be asked the reason for the request and a brief description of the information desired. This information should be written down and forwarded to the Executive Director or designee for follow-up.

## (7.7) Year-End Closing

An orderly, timely and comprehensive closing of all accounts will be performed by the accountant or designee to assure an accurate representation of the organization's financial statements and to provide the necessary documentation for the organization's independent auditors.

### (7.7.1) Assets

Assets should be fairly stated, generally at realizable amounts. Work papers should show the basis and when required, how the amounts were calculated.

- **Cash** - Prepare bank reconciliations for year-end of balance per bank to the balance per books for each account. Show original dates and descriptions of each reconciling item. Prepare necessary journal entries and adjust the reconciliations. Prepare a summary of all petty cash and change funds. Totals must agree with the general ledger.
- **Investments** - Prepare a list of all securities on hand at year-end by location held such as broker or bank. Use full names and show the face amount or number of shares and date of acquisition. Determine cost and market values. Calculate accrued interest.
- **Accounts Receivable** - Obtain aged trial balances and reconcile to general ledger. Calculate possible allowance for uncollectible accounts and obtain approval of treasurer. Adjust allowance to calculated amount. Write off any unallocated differences.

- **Other Receivables** - Prepare schedule of grants and other miscellaneous receivables and reconcile to general ledger. Comment on collectibility, if material.
- **Inventories** - Prepare a summary of all properties held in inventory. Reconcile inventories from physical inventory to year-end balances. Explain significant variations from prior year.
- **Fixed Assets** - Prepare a schedule of assets and related allowances for depreciation. Reconcile allowance additions to total depreciation expense. Trace disposals to capital gain and loss schedule or to expense if items were scrapped or discarded.

### (7.7.2)

#### **Liabilities and Net Assets**

Liabilities are shown as the amount to be paid in the subsequent period. Overstatement rather than understatement is the rule for liabilities. If in doubt, record the liability.

- **Accounts Payable** - Determine that all items paid through year-end are not shown on the accounts payable list. Accounts payable shall be kept open for 45 days after year-end in order to receive invoices and record in the accounts payable list. After this 45 day period, maintain a list of any items over \$1,000 that are received or paid that are not included in accounts payable but relate to that year-end period.
- **Accrued Payroll** - Calculate accrued payroll and vacation pay due by the number of days outstanding at year-end. Include any incentive bonuses or other special payroll payments.
- **Other Accrued Expenses** - Review accruals for payroll taxes, payroll deductions payable, interest expense on short term borrowings and long term debt. Determine cost of audit and legal services through year-end and record.
- **Income Taxes Payable** - The Federal tax payable schedule will be prepared with the assistance of the auditors. (This is applicable only if the organization has unrelated trade or business income, which does not relate to its exempt purpose).
- **Current Liabilities** - Prepare a schedule of debt and calculate and record the current portion due within one year and accrued interest.
- **Contingent Liabilities and Commitments** - Prepare a schedule of any outstanding litigation and possible loss. Prepare a schedule of all long-term rental agreements.
- **Net Assets** - Bring permanent file of all net asset accounts up to date.

### (7.7.3)

#### **Revenues**

Prepare a schedule of all revenues and compare amounts to prior year. Evaluate and comment on any significant differences. Prepare a memorandum on new revenue accounts. Also prepare a schedule of revenues by program for inclusion in the annual report.

#### (7.7.4)

### Expenses

Each expense total should be compared to the prior year and unusual variances reviewed and explained. Several expense items are directly related to asset or liability accounts and the worksheets for the related accounts should be prepared at the same time and shown on one schedule.

- **Payroll** - Prepare a schedule of all payroll and employer taxes and reconcile to payroll expense. Prepare a schedule of annual payroll and benefit levels for each organization employee for the auditors and annual report.
- **Legal and Professional Fees** - Prepare a schedule of all legal invoices with the amount and brief description of services rendered. Reconcile total to Legal expense.
- **Bad Debt Expense** - Prepare a list of all accounts written off during the year. Note specifically any additions to the allowance for uncollectible accounts.
- **Interest Expense** - Prepare a schedule of interest expense by source. Reconcile amounts to short term borrowing and long-term debt.

#### (7.8)

### Files and Record Management

The organization will retain records in an orderly fashion for time periods that comply with legal and governmental requirements and as needed for general business requirements.

#### (7.8.1)

### Current Filing System

To ensure efficient access, filing centers will be established. To reduce the amount of duplicate and unnecessary record retention, individual desk files should be avoided unless they are used in daily operations. All other records should be filed in central filing areas. Unless necessary, records should usually only be kept by the originator or sender and not by the receiver to avoid duplicate filing systems. The following guidelines should be adhered to optimize filing efficiency and records access:

- All file cabinets and files will follow recognized rules of order, such as Left to Right, Top to Bottom, Front to Back and in the case of chronological records, newest to oldest.
- File markers and label headings will always be placed at the beginning or front of a file or group of files.
- Alphabetical files should always be filed under broad topical categories. Files should never be filed under individual employee names (except personnel) to avoid confusion and refiling in the event of turnover. Files should always be filed under the "proper" or charter school's name whenever appropriate. In the case of individuals, files should be maintained according to the persons "Last name", then "First name and Middle initial".

#### (7.8.2)

### Record Retention and Long Term Storage

Storage of archived records will be maintained in the locked storage area of the organization or designated public storage facility. Access to this area will be limited to the Executive Director, treasurer, officers of the charter school and the Office Manager.

Non-permanent files will be stored in cardboard file boxes. Each file box will be labeled on the front with the contents, dates covered, and destruction date if applicable. Permanent records will be maintained in metal fire-resistant file cabinets.

Files should be stored in boxes with similar items, dates and retention periods. This will allow for easier access and purging of records. A general rule to keep in mind is that it is better to only half fill a file box than to file dissimilar types of files in the same box. The file manager will be responsible for categorizing and maintaining a listing of records maintained and the location (i.e. by wall unit and shelf row number).

These holding periods will be maintained for the document listed below. Any questions regarding documents not listed should be directed to the Office Manager.

- Document Holding Period in Years
- Accident Reports After Settlement 8
- Accounts Payable (Vouchers & Invoices) 6
- Bank Statements and Reconciliations 6
- Canceled Checks 6
- Cash Receipt Books 6
- Claim Files (Against Us) 6
- Claim Files (By Us) 6
- Contracts, Agreements & Leases after Expiration 6
- Credit Files 6
- Employee Records (Terminated) 6
- Financial Statements (internal) 5
- Financial Statements (External) 6
- General Ledgers and Journals 6
- Income and Other Tax Returns 6
- Insurance Claims After Settlement 6
- Patents and Licenses 17
- Payroll Registers and Time Sheets 6
- Payments and Reports to Government Agencies 6
- Physical Inventory Records 6
- Purchasing Correspondence 6
- Sales/Reimbursement Correspondence 2
- Sales/Reimbursement Invoices 6
- Student Records 12
- Travel and Expense Reports 6

### **(7.8.3) Record Destruction**

Three to six months after each year-end, the office manager will proceed with the destruction of all files that have exceeded their recognized holding period. A listing of file categories to be destroyed will be circulated to all the officers thirty days prior to destruction for review and comment. The actual listing of records destroyed will be maintained permanently for future reference. Destruction of the files will be by

shredding. Disposal of records into the organization's general trash service is not allowed.

## (7.9) Charter of Accounts

To facilitate the record keeping process for accounting. All ledger accounts will be assigned a descriptive account title and account number consistent with the Financial and Program Cost Accounting and Reporting for Florida Schools manual (The Red Book).

## (8) Facilities

### (8.2) Animals In School

#### (8.2.1) Special Events

Special events involving animals must be approved by the Principal at least two weeks prior to the event. If such an event is approved, a list of all animals to be present must be sent home to parents so as to ensure that no students will have allergies to the animals. If a student has allergies to an animal, the teacher is responsible for finding another environment for that student and providing opportunities to gain from the learning experience as other students who do not have allergies.

### (8.4) Classroom Decor

#### (8.4.1) Custom Paintings/Murals

Prior to any staff member permanently affixing any design or color to a classroom wall (i.e. painting, permanent markers, etc.), a plan for the design must be submitted to the Principal for approval. The Staff member should also be prepared to paint over any designs should the Principal deem they are a distraction or no longer appropriate for the classroom.

#### (8.4.2) Affixing Items To Walls

Methods for affixing any items to common school areas, such as hallway walls, etc., shall be prior approved by the Principal. Methods of affixing typically approved would be sticky materials or tape which can be removed without leaving any holes of any kind or defacing walls by paint removal, etc. Methods of affixing requiring approval include, but are not limited to, staples, nails, tacks, or any objects requiring repairing, patching, or rebuilding surface areas to restore ready for painting.

#### (8.4.3) Prohibited Items

Due to safety issues, heating pads, electric burners, candles, etc. are not allowed in the instructional area with the exception of a temporary science lab. A microwave and coffee pot are available in the faculty lounge.

### (8.5) Hazardous Materials

The ensure that all chemicals and materials used in the care and maintenance of the building are stored and recorded in an appropriate manner. The Principal will ensure

that appropriate documentation will be kept of the purchase, use, storage and disposal of substances designated as hazardous by local, state and federal authorities.

## (8.6) Doors

### (8.6.1) **Small Group Doors**

Classroom doors should be left open at all times so that rooms are inviting for entrance. Open doors allow administration and visitors to enter without causing such a disruption. It is responsibility of all employees to ensure that transitions are made quietly, and if the noise level prevents effective instruction, an administrator should be notified.

### (8.6.2) **Exit Doors**

The doors to the outside must be shut and locked at all times. Employees may not prop these doors open or allow students to do so at anytime. Employees should regularly check to ensure that the doors are shut and locked.

## (8.7) Key Distribution and Control

Keys will be issued to employees at the beginning of the school year and will be collected at the termination of the school year. Employees are responsible for their keys, and if they lose their keys they may be responsible for the cost of rekeying the locks on the building as well as the cost of additional keys. When utilizing keys to enter the building during non-business hours, the employee is responsible for ensuring the building is properly secured.

## (9) Transportation

### (9.1) Student Transportation Services

The organization, in accordance with state law, shall provide free transportation for eligible students attending the organization's schools. The Executive Director shall ensure that the transportation services of the School meet all of the guidelines established by the State of Florida, as well as the policies that pertain directly to the qualifications of bus operators and operational procedures adopted by the organization.

All eligible students with disabilities will be provided bus transportation by the organization between home and the special education program. Transportation for a student with disabilities will be provided between schools if the Individualized Education Plan (IEP) team determines that such transportation is necessary as a related service due to the student's disability. Eligibility must be stated in the student's IEP.

### (9.2) School Bus Safety

Safe transportation of students shall be the paramount obligation of the transportation staff. All procedures and rules developed by the administration shall be governed by this requirement. State and local laws pertaining to the operation of buses and vehicles used to transport students will be observed by drivers, students and staff.

All behavioral policies within this manual also are applicable to students while on school provided transportation. Transportation rules and regulations will be distributed annually

to parents/guardians. Students will receive instruction for the safe loading, riding, unloading and emergency evacuation procedures.

The Principal or designee will file criminal charges of trespass against any person who unlawfully enters a school bus where entry is not approved by Board policy or where the individual does not have written approval of the organization.

### (9.3) Drivers

The safety and welfare of our students is of paramount importance to the organization. Accordingly, no person will operate a school bus unless the person possesses a valid school bus permit and has complied with the regulations of the State of Florida and other regulatory agencies. In addition to the health certificate required for each current school term, the Board may require evidence of continued good health from individual drivers at any time it deems necessary.

### (9.4) Routes and Schedules

The administration will prepare and monitor organization's bus routes and schedules. The Principal will initially approve all bus routes each school year; the final bus routes must be approved by July 30 of each school year. Buses will be routed with student safety, efficiency and economy as the controlling factors.

### (9.5) Inspection

The organization's vehicles that are used to transport students will be inspected annually by state approved inspectors each school year.

Bus inspections conducted by School employees shall not be made more than sixty (60) days prior to operating the vehicles during the school year. Bus drivers and bus maintenance employees have the responsibility to inspect, report and remedy any condition of the School buses which poses an unreasonable risk of harm to students and staff.

Newly purchased, newly leased, newly placed into service, newly contracted vehicles or vehicles replaced under contracted services with a rated capacity to carry more than ten (10) passengers including the driver, and used to transport students, shall meet state and federal specification and safety standards applicable to school buses.

### (9.6) Use of school buses

School buses will be used only for the transportation of students to and from school or for School educational purposes.

## Pivot Charter School Job Description

### Executive Director

The Executive Director is responsible for the effective operation of the schools; general administration of all instructional, business or other operations of Pivot Education -Florida; and for advising and making recommendations to the Board with respect to such activities. Executive Director shall perform all the duties and accept all of the responsibilities usually required of school district leader as prescribed by the Education Laws of Florida, the rules and regulations of the Board of Regents and Commissioner of Education, laws and regulations of the United States, statutes of Florida, and the policies, rules, and regulations established by the Board.

#### 1. Primary Activities

The Executive Director shall possess the following powers and be charged with the following duties:

- A. To be the Executive Director of Pivot Education, with the right to speak on all matters before the Board, but not to vote
- B. To enforce all provisions of law and all rules and regulations relating to the management of the schools and other educational, social and recreational activities under the direction of the Board.

#### 2. Responsibilities

- A. Keep the Board informed of the condition of Pivot's educational system; assure effective communication between the Board and the staff of the school system. Relay all communications by the Board regarding personnel to district employees and receive from all school personnel any communications directed to the Board.
- B. Prepare the agenda for Board meetings, in consultation with the President of the Board. Prepare and submit recommendations to the Board relative to all matters requiring board action, placing before the Board such necessary and helpful facts, information, and reports as are needed to insure the making of informed decisions.
- C. Submit to the Board a clear and detailed explanation of any proposed procedure that would involve either departure from established policy or the expenditure of substantial sums.

- D. Develop and recommend to the Board objectives of the educational system; see to the development of internal objectives which support those of the Board.
- E. Develop and recommend to the Board long-range plans consistent with population trends, cultural needs, and the appropriate use of District facilities, and see to the development of long-range plans which are consistent with Board objectives.
- F. See to the development of specific administrative procedures and programs to implement the intent established by Board policies, directives and formal actions.
- G. See to the execution of all decisions of the Board.
- H. See that sound plans of organization, educational programs and services are developed and maintained for the Board.
- I. Maintain adequate records for the schools, including a system of financial accounts, business and property records, personnel records, school population and scholastic records. Act as custodian of such records and all contracts, securities, documents, title papers, books of records, and other papers belonging to the Board.
- J. Be directly responsible for news releases and/or other items of public interest emanating from all District employees that pertain to education matters, policies, procedures, school related incidents or events. Approve media interviews of this nature with District employees.
- K. Provide for the optimum use of the staff Pivot Education -Florida. See that Pivot Education - Florida is staffed with competent people who are delegated authority commensurate with their responsibilities. Define the duties of all personnel.
- L. See that appropriate in-service training is conducted. Summon employees of Pivot Education - Florida to attend such regular and occasional meetings as are necessary to carry out the educational programs of Pivot Education -Florida.
- M. Prior to action by the Board, recommend the appointment, discipline or termination of employment of the administrators of Pivot Education -Florida.
- N. Prior to action by the Board, recommend the appointment, discipline or termination of employment of teaching and non-teaching personnel of Pivot Education -Florida.
- O. See to the development throughout Pivot Education -Florida of high standards of performance in educational achievement, use and development of personnel, public responsibility, and operating efficiency.
- P. See that effective relations with employee organizations are maintained, assume ultimate responsibility for collective negotiations with employees of Pivot Education -Florida

Q. See that the development, authorization, and the maintenance of an appropriate budgetary procedure is properly administered. Prepare the annual proposed budget and submit it to the Board by March 1 or at such earlier date as is necessary to provide an adequate opportunity for the Board's discussion and deliberation.

R. See that all funds, physical assets, and other property of Pivot Education -Florida are appropriately safeguarded and administered.

S. File, or cause to be filed, all reports, requests and appropriations as required by various governing bodies and/or Board policies.

T. Establish and maintain liaison with community groups which are interested or involved in the educational programs of Pivot Education -Florida.

U. Establish and maintain liaison with other school districts, the Florida State Education Department, colleges and universities, and the U.S. Department of Education.

V. Act on own discretion in cases where action is necessary on any matter not covered by Board policy or directive. Report such action to the Board as soon as practicable and recommend policy in order to provide guidance in the future.

#### Primary Relationships

The executive director observes and conducts the following relationships:

##### A. Board of Education

- 1) As operations officer, be accountable to the Board of Education, as a Board, for the administration of the educational system and for the interpretation and fulfillment of the aforesaid functions, primary activities and responsibilities.
- 2) Attend, or have a representative attend, all meetings of the Board.
- 3) Represent the Pivot Education -Florida as the executive officer in dealings with other school systems, professional organizations, business firms, agencies of government and the general public.
- 4) Report directly to the Board of Education, as a Board, and as required to all appropriate governmental agencies.
- 5) Act as reference agent for problems brought to the Board.
- 6) Work with the Board of Education to develop appropriate programs and policies, upon either the recommendation of the superintendent or the initiative of the Board of Education.

##### B. Administrators

- 1) Directly oversee the work of other central office personnel.
- 2) Hold regular meetings with Building Principals, Coordinators/Directors and all other administrators to discuss progress and educational problems facing Pivot Education -Florida.
- 3) Direct the operations and activities of administrators; see that they effectively guide and coordinate the operations and activities of the educational system; secure their assistance in formulating internal objectives, plans and programs; evaluate their job performance; and stand ready at all times to render them advice and support.
- 4) Approve the vacation schedules for administrators; and be personally responsible for all evaluations of administrators.

C. Others

- 1) Work with other Board employees and advisors, including auditors, architects, attorneys, consultants and contractors.
- 2) Hold such meetings with teachers and other employees as is necessary for the discussion of matters concerning the improvements and welfare of the schools. Represent Pivot Education - Florida in collective negotiations with recognized or certified employee organizations.
- 3) Attend, or delegate a representative to attend, all meetings of municipal agencies or governmental bodies at which matters pertaining to the public schools appear on the agenda.
- 4) Represent the Pivot Education -Florida before the public, and maintain, through cooperative leadership, both within and without the District, such a program of public relations as may keep the public informed as to the activities, needs and successes of the District.
- 5) Receive all complaints, comments, concerns and criticisms regarding the operation of the Pivot Education -Florida from the public, employees of the District, students and Board members.

## Pivot Charter School Job Description

### Principal

The Principal shall devote full time, skill, labor and attention to the operation of their Pivot Charter School Campus. The Principal shall have the responsibility for their Pivot Charter School campus personnel matters, including selection, assignment, transfer, and the termination of all personnel with Board or Executive Director approval. The Pivot Board or Executive Director will serve in an advisory role on those matters.

The Principal duties shall include but may not be limited to the following:

- Provide instructional leadership to Pivot Charter School;
- Supervise all employees of their PCS campus;
- Provide performance evaluations of PCS employees at their campus at least once annually;
- Provide comments and recommendations regarding policies presented by others to the Board;
- Pursue enrollment to sustain a strong operating budget;
- Work with the Executive Director to make written recommendations to the Board on programs, policies, budget and other school matters as they relate to their specific campus;
- Stay abreast of school laws and regulations;
- Provide all required reporting in a timely fashion;
- Ensure accurate student information system data entry and reporting;
- Participate in the dispute resolution procedure and the compliant procedure when necessary;
- Write applications for grants;
- Attend meetings with the back office business services provider and the State Board on fiscal oversight issues periodically upon request;
- Provide all legally required financial reports to the State;
- Develop and administer the budget as approved by the Board in accordance with generally accepted accounting principles;
- Present quarterly financial reports to the Board of Directors;
- Provide assistance and coordination in the implementation of curriculum;
- Oversee parent/student/teacher relations;
- Attend IEP meetings as required by law;
- Oversee student disciplinary matters;
- Coordinate the administration of State Standardized Testing;
- Attend all PCS Board meetings and attend State Board meetings as necessary;
- Site safety;

- Foster an amicable relationship between the authorizer and PCS and facilitate;
- Establish a communication model to facilitate communication among all the groups within PCS, between PCS and the State, and between PCS and the community at large;
- Develop the PCS annual performance report;
- Facilitate open house events;
- Any other duties assigned by the Executive Director

## Pivot Charter School Job Description

### **Educational Coordinator**

Pivot Charter School combines an online learning environment with access to early college (dual enrollment) courses and a strong career and post-secondary school guidance program with an emphasis on service learning experiences for students who are behind in credits, want to accelerate their learning and who are generally not succeeding at acquiring the standards through a traditional classroom environment and schedule. The school will provide a blended model of online learning and site-based offerings so students may receive the best of two educational models. Students attend learning lab sessions daily and work on their online courses while also participating in academic enrichment workshops such as small group instruction, tutoring, activities, clubs and assessment.

The Education Coordinator at Pivot acts as an academic advisor, a counselor and an academic, on-site support to the AAI ROADS curriculum. The EC's role is vital to the success of the hybrid learning program in so much as the initial presentation and implementation of the program for each individual student rests with the EC. The EC must act as a liaison, making first contact with students to foster a supportive, communicative and nurturing environment between the ROADS curriculum, online teachers and each student. In addition to the importance of helping to foster the relationship between AAI and students, ECs must consistently establish individualized goals and measured success to help each student maintain effective time management and motivation within the curriculum. The EC counsels, mentors, provides oversight and direction and provides whatever support it takes to help students succeed in their academic endeavors. At the end of the day, it is the ECs job to ensure that students find success and satisfaction within the ROADS curriculum.

#### **Job Description:**

Employer: Pivot Charter School

Employment Type: Full

Salary: Commensurate with experience

Materials for applying: resume, cover letter, list of references, credential and certification information

#### **Duties and Responsibilities:**

- Maintains accurate and up-to-date documentation of student learning student attendance and student progress (or lack thereof).

- Compiles student learning files and electronically documents all required educational data as prescribed by the Principal.
- Oversee student work and completion rates and makes recommendations for program changes accordingly.
- Teaches and guides in accordance with the abilities and achievements of the pupils assigned to him or her, and in conformance with the charter schools' philosophy, goals and objectives as expressed in the adopted courses of study.
- Improves each student's ability to read, write, compute, speak, and problem solve; monitor and document this progress through a variety of assessment techniques.
- Demonstrates evidence of team building, collaboration, creative problem solving, flexibility, conflict resolution, cultural sensitivity, and genuine care for each student.
- Maintains a professional demeanor and high expectations in his or her meetings/interactions that is conducive to learning, and works cooperatively with administrators in attempting to resolve problems.
- Identifies and attempts to meet special needs of pupils, and initiates referrals to special programs and services personnel as necessary.
- Communicates with pupils and parents regarding the educational and social progress of pupils.
- Prepares formal progress reports and provides other information appropriate for inclusion in the cumulative records of the pupils assigned to his/her student list.
- Full time teachers serve a caseload of up to 50.
- Serves, as requested, on school and organization-wide committees and project teams.
- Teaches at least 12-15 hours per week of site-based supplemental classes or other student support such as tutoring or office hours.
- Attends and participates in required in-services training activities and works with his/her site administrator in planning his/her own in-service program.

### A day in the life of an EC:

- The day begins with goal setting. Students begin Mondays with their goal sheets on the desk while simultaneously looking at their progress report in ROADS. Students fill out their goal sheets and make a "plan of attack" for the day. ECs make the rounds to each student to question their plan for the day. Praise is given for successes, plans are made for improvement. Tuesday through Friday, students begin the session with goal sheets out and a plan for the day made.
- EC's work with students one-on-one for tutoring support. A pull-out tutoring group is scheduled for one hour each day to support students struggling within a subject area of the curriculum.
- ECs attend to administrative duties such as enrolling new students, dropping classes, adding classes, communicating with AAI or Pivot staff. The bulk of this is done in the less hectic afternoon hours.
- By the 2<sup>nd</sup> or 3<sup>rd</sup> hour of the session ECs rotate within their groups again to check goals and see that students are making progress. Redirection and focus is given as needed. Measured goals are given to students who need direction.
- Praise is given often and repeatedly throughout the day. Students receive praise for every little gain made. ECs strive to maintain a learning environment that is conducive to continued

success. Thus by setting mini-goals and giving repeated praise, ECs help students build a healthy sense of self based on individual gains and achievement.

- Classroom management consists of refocusing students, maintaining a respectful and quiet learning environment, making accommodations for specific learning styles, and allowing for freedom within a structured setting.
- ECs work to foster healthy relationships among all students which support the school culture. We strive to create a family atmosphere where everyone is welcomed into a supportive and nurturing learning environment.

## Pivot Charter School Job Description

### **Lead Educational Coordinator**

- Orient new staff members to the EC process
- Floor Management/EC Assignments – Ensure adequate coverage in each students lab
- Staff (EC) Management – Assist ECs with the delicate meshing of varying class management styles to the benefit of staff and students (new for this blended model)
- Keep ECs informed of Pivot guidelines with regard to day-to-day operations
- Review Small Group Plans
- Review Weekly Student Reports
- Maintain small group schedule
- Maintain lunch/break/coverage schedule
- Periodically evaluate small group presentations for content, literacy embedding, and effective curriculum building
- Assist with facility maintenance (student area clean up, break room clean up, etc.)
- Student enrollment, schedule changes, withdrawals, and demographic changes
- Assist in the identification process of new ELLs via review of the HLS (Home Language Survey) and updating student plans and ESOL folders for existing ELLs.
- EC support:
  - Maintain ‘house’ accounts (email, scans, printing, ROADS access and navigation, etc.)
  - Obtain and submit supply requests
  - Assist with student monitoring, redirection, and parent phone calls
  - Assist with the Grade Reporting process (i.e. grade calculation, GGD completion, AGD completion)
  - Address staff needs and concerns and present to administrator(s) when necessary
  - Keep teachers informed of Common Core standards, FLDOE standards, and Hillsborough County district guidelines with regard to formative assessments, req’d professional development (e.g. ESOL ), and req’d certification
  - One-on-one and small groups with intervention students identified weekly by each teacher
  - Oversee PLC meetings and reporting
  - Create new student Panther folders
  - Provide clarity and reminders to ECs with regard to student guidelines

- Continually assess EC process and responsibilities; advocate with administrators (Executive Director, Principal, Asst. Principal) to implement suggested best practices, simplify processes where possible, and/or extract non-essential tasks

## Pivot Charter School Job Description

### **Educational Assistant**

#### **Skills:**

- Must have excellent communication skills, both verbal and written
- Be able to use those communication skills to speak in front of groups and present academic workshops
- Must be relatable to the students to establish friendly relationships
- Must have patience and a strong desire to help students achieve their goals
- Must be able to break down the complexity of the material
- Must adapt and be able to teach various teaching styles when a student does not show progress
- Must demonstrate enthusiasm for the topic for which they will tutor and inspire enthusiasm in the students
- Must be able to motivate the students and provide them with confidence
- Must be able to incorporate technology into their work

#### **Responsibilities:**

- Ensuring that the students improve their grades is the primary task
- Tutors should spend time on the floor communicating with coordinators and students as well as performing one-on-one or group tutoring sessions
- Use ROADS to filter through the students and reach out to the ones in need
- Tutors should set up times with targeted students and hold those students accountable
- They should help the students' self-esteem to look optimistically on their schoolwork
- They must encourage students to work independently
- Tutors must keep detailed records of sessions and topics covered
  - Such records should include concerns with regard to the student, including lack of preparation, absenteeism or behavioral issues, as well as the teaching strategies used and the goals set forth for the student
  - They must turn in these records to the lead Educational Assistant
- The Educational Assistant then should coordinate with the students' teachers and parents to address any concerns
- While on the floor, tutors should look out for misconduct and diffuse any situation or report to the student's Educational Coordinator
- Tutors must try to keep the tutoring rooms organized, clean, and tidy

- Be communicating with the ECs on a regular basis to keep an open dialogue about the student's needs and progress

## Pivot Charter School Job Description

### Receptionist

Under the supervision of the Principal, acts as the school receptionist answering incoming telephone calls, greeting and directing visitors, entering attendance, managing bussing and passes, receiving and disseminating documents from the public, handling office mail and other assigned duties.

DIRECTLY RESPONSIBLE TO: Assistant Superintendent, Human Resources

#### RELATIONSHIP TO STUDENT ACHIEVEMENT:

Maintains a professional approach, attitude and appearance with the public and school employees and high educational standards in relation to meeting the educational needs of students.

#### ESSENTIAL JOB FUNCTIONS:

1. Answers and extends calls to appropriate schools, site locations or personnel;
2. takes and transmits messages as requested; professionally greets, screens and directs visitors to
3. appropriate locations.
4. Provides appropriate information to those seeking employment, or submitting and picking up
5. requests for transcripts, employment verifications, bus passes, open enrollment forms, or other
6. documents.
7. Functions as a clearing house for all departments by disseminating and
8. gathering applications and forms for all departments.
9. Disseminates District information and/or materials to the public as necessary and requested.
10. Works closely with Principal in completing a variety of
11. duties related to the successful recruitment of employees in both the certificated and classified
12. service.
13. Operates a variety of office equipment including computer, fax, and copier.
14. Accomplishes fingerprinting when necessary.

#### DAILY JOB FUNCTIONS

1. Arrive by 7:30 a.m. to receive student return notes and generate passes
2. Dress in a manner that is professional and best represents the school
3. Answer incoming calls using professional and helpful etiquette
4. Greet and/or direct all guests at front window
5. Follow the job description duties in the Attendance Accounting Handbook and School Policy.
6. Maintain the period-by-period attendance log and tardies log.
7. Maintain and Code students absences
8. Collect electronic attendance at 15 minutes after each period starts, print and file daily attendance sheets in a binder with the attendance sheet.
9. Print out cycle and Semester Attendance Reports

10. Contact Teachers via e-mail on who did not submit attendance
11. Maintain accurate "tardy" information and distribute to all teachers via daily e-mail. Inform principal of any necessary discipline with excessive tardies.
12. Run Teacher Roster for student membership for the 1st and 4th six weeks
13. Send all attendance warning letters to parents via certified mail
14. Process necessary paperwork to file truancy charges on students/parents
15. Maintain a separate set of Annual Folders for Discipline, Tardy Slips, Parental & Doctor Notes for absences, Notice of Concerns and Attendance
16. Maintain and enter all discipline information daily
17. Maintain Student Request of Records sent electronic via intranet

**EDUCATION AND EXPERIENCE:**

Any combination equivalent to graduation from high school and two years of general clerical experience, including typing, public contact and computer literacy.

The School Receptionist will receive from the Principal a Yearly evaluation based upon these duties. The receptionist may be asked to perform other duties as necessary. These other duties will be taken into consideration at time of evaluation.

## Pivot Charter School Job Description

### Registrar

#### GENERAL DEFINITION AND CONDITIONS OF WORK

Performs a variety of general office clerical duties and is responsible for work in the registration and transfer of students, and in preparation and maintenance of student records.

#### ESSENTIAL FUNCTIONS/TYPICAL TASKS

The minimum performance expectations may include, but not be limited to, the following functions/tasks:

1. Maintains and respects confidentiality of student and school personnel information;
2. Serves as secretary to the Director of Counseling and the guidance staff; provides information; prepares correspondences and related matters; prepares and maintains files and records; assists teachers, parents and students;
3. Receives and greets persons or groups calling on guidance department staff; answers telephones, provides information, takes and dispatches messages, as needed;
4. Prepares cumulative record labels, grades, credits, GPA, rank in class, and end of year reports;
5. Registers new students/withdraws students and notifies the bus company (in conjunction with Receptionist);
6. Enters data for new and previous students;
7. Maintains diplomas for school term;
8. Prepares and sends transcripts to colleges, employers, and to schools for transfer students;
9. Obtains transcripts for new/transfer students;
10. Reviews requests made by Social Security Administration, law enforcement officers, mental health representatives, and other support staff and completes, as necessary;
11. Files incoming records from the middle school and high school;
12. Moves records to appropriate grade, placing proper labels for grade level;
13. Updates demographic data in computer database;
14. Checks and reviews a variety of data for accuracy, completeness, and conformance to established standards and procedures;
15. Requests records, as needed;
16. Maintains records and generates reports, as requested
17. Operates standard office equipment to include, word-processing, and data processing equipment, copiers, laminators, etc.;
18. Handles a variety of routine technical and administrative assignments;
19. Takes all necessary and reasonable precautions to protect students, equipment, materials, and facilities;
20. Complies with and supports school and division regulations and policies;
21. Models non-discriminatory practices in all activities;

22. Performs related tasks as assigned by building administrator(s) in accordance with the school/policies and practices.

KNOWLEDGE, SKILLS AND ABILITIES

General knowledge of standard office practices, procedures, equipment and secretarial techniques; thorough knowledge of business English, spelling and arithmetic; ability to word process accurately and at a reasonable rate of speed; ability to make arithmetical calculations; ability to meet the public effectively; ability to operate a variety of office equipment; skill in the use of data and word processing equipment; ability to establish and maintain effective working relationships with others; ability to follow oral and written instructions.

EDUCATION AND EXPERIENCE

Any combination of education and experience equivalent to graduation from high school, including or supplemented by courses in general office practices and procedures and clerical and secretarial experience.

SPECIAL REQUIREMENTS

The registrar is expected to exercise mature judgment in working with confidential information. General supervision of the registrar is received from the Principal. Candidate must possess good moral character.

PHYSICAL DEMANDS/REQUIREMENTS

This is sedentary work requiring stooping, kneeling, crouching, reaching, pulling, routine lifting up to approximately 20 pounds, grasping, and repetitive motions; vocal communication is required for expressing or exchanging ideas by means of the spoken word, and conveying detailed or important instructions to others accurately, loudly, or quickly; hearing is required to perceive information at normal spoken word levels, and to receive detailed information through oral communications and/or to make fine distinctions in sound; visual acuity is required for preparing and analyzing written or computer data, operation of machines, and determining the accuracy and thoroughness of work.

EVALUATION

The Principal will evaluate performance on the ability and effectiveness in carrying out the above responsibilities.

## INTRODUCTION

Traditional evaluation systems have not shown strong relationships to student achievement (Medley Coker, 1987; Peterson, 2000). Similarly, recent research specifically related to the Pivot Florida current evaluation system shows that the principal's evaluation of the teacher has no correlation with student achievement. As a whole, teacher evaluation systems tend not to address performance issues adequately and the results are poorly aligned with the perceptions of educators, both teachers and administrators, with actual teacher performance. Evidence does exist which shows that evaluation systems can improve instruction (Milanowski and Henerman, 2003; Danielson & McGreal, 2000) and positively impact student achievement (Holtzapple, 2003) properly designed and implemented.

Pivot Florida has taken the initiative as an opportunity to redevelop its teacher evaluation system with the purpose of ensuring: that the system increases student learning growth by improving the quality of instructional, administrative and supervisory practice. The system, as detailed in this document, is representative of a standardized approach that will ensure consistency of practice Pivot Florida-wide. Expectations are set and performance goals developed early in the fiscal year. Ongoing monitoring of teacher progress will ensure better alignment of the actual performance to the expected performance, and that performance issues are addressed in a timely manner. The system also brings about greater communication and improved feedback between the employee and the supervisor, significantly improving performance and engagement while also making the evaluation process more meaningful.

According to Danielson and McGreal (2000) the first step in the development of a teacher evaluation system is to determine the process. For the Pivot Florida, this step involved the formation of an evaluation committee comprised of a diverse group of stakeholders. This committee was tasked with examining current research and best practices around teacher evaluation. The result of the committee's work was an evaluation rubric based on the four domains in Charlotte Danielson's *Framework for Teaching*. This framework supports the observation and evaluation of teacher planning and preparation, the classroom environment, instruction, and professional responsibilities. Both the evaluation rubric and the research around the framework informed the development of observation instruments and processes described in this document.

## **THE TEACHER EVALUATION RUBRIC & STUDENT GROWTH**

The classroom teacher evaluation rubric was developed by a bargaining task force comprised of teachers, school and Pivot Florida administrators. The group based their work on the four domains in Charlotte Danielson's Framework for Teaching, adjusting the categories and descriptions to support the revised Florida Educator Accomplished Practices and Pivot Florida strategic goals. Teams were created within the task force and each was assigned a domain. The teams worked through multiple revisions of the rubric until they came to consensus on a final version. Similarly, a committee on assessment and evaluation was convened to discuss the selection and development of assessments and the plan for incorporating student growth measures into the teacher evaluation system. The Pivot Florida timeline for the development of student assessments used for evaluation and for incorporating assessments into the evaluation can be found in Appendix B. Pivot Florida will adopt state developed assessments as they become available. Pivot Florida will incorporate growth measures for additional grades and subjects, as the state makes such measures available.

### **Student Growth Measures**

Pivot Florida views the first year of implementation as a period of transition, system evaluation, and further planning. During this time, the growth results for classroom teachers and other instructional personnel, including those with less than 3 years of available data, will equal 50% of the evaluation result. For subjects and grades currently assessed by FCAT Reading, FCAT Math, the Algebra 1 EOC, Geometry EOC, Biology EOC and FCAT Science, student growth will be calculated based on the students assigned to the teacher of the subject/course. For subject and grades not assessed by statewide assessments, Pivot Florida will use grade-level or school-wide FCAT growth or, where possible the FCAT or EOC growth of the students assigned to the teacher. For teachers who are assigned solely ESE students at special centers or in the functional skills program, growth will be measured by established learning targets based upon the goals of the school improvement plan, and approved by the principal. Pivot Florida will use the state-adopted growth measures for courses associated with FCAT for 2012-2013. The list of student assessments for each subject and grade level for use in 2012-13 can be found in Appendix A.

As Pivot Florida capacity to assess student growth expands, Pivot Florida will examine how the growth results will be combined for teachers with assignments that utilize results from multiple assessments to equal 50% of the evaluation result . Pivot Florida will also seek to use a combination of student growth data (30%) and other measurable student outcomes to evaluate instructional personnel who are not classroom teachers. Additional, a plan will be developed for using either student achievement or a combination of growth and achievement in subjects for which these measures are more appropriate.

### **Instructional Practices**

Instructional practice is measured through observation framed by the evaluation rubric. The four domains of the rubric are Domain 1: Planning and Preparation, Domain 2: The Classroom Environment, Domain 3: Instruction and Domain 4: Professional Responsibilities. Each domain has 5 categories in which teachers will receive ratings. These ratings will account for 50% of the final performance rating, except in years prior to a milestone event, where an additional metric is employed as part of the multi-metric evaluation system. Where the additional metric is used, the additional metric will account for 25% of the performance rating, with the supervisor ratings on Domains 1 through 4 accounting for an additional 25%.

### **Rating Labels**

The rubric makes use of four internal rating labels: Unsatisfactory, Needs Improvement, Effective, and Highly Effective. A rating of Unsatisfactory is reflective of a teacher who consistently does not use appropriate strategies and methods or uses them incorrectly or with parts missing. The rating of Needs Improvement describes a teacher who is attempting to implement effective teaching strategies. Effective portrays a teacher who has mastered and consistently uses effective teaching strategies. The rating of Highly Effective describes an expert teacher who could model and/or teach others effective teaching strategies. The scoring process translates these labels into the required final performance ratings of Unsatisfactory, Needs Improvement, Effective, and Highly Effective., as described below.

### **The Performance Rating**

The performance rating is calculated using a point system with total scores ranging from 0 to 3. A maximum of 3 points can be earned through the student growth measurement. An additional 3 points

can be earned through the observation of instructional practice. In both methods, a rating of Highly Effective is valued at 3 points; Effective is valued at 2; Needs Improvement is valued at 1; and Unsatisfactory is valued at 0. A teacher receiving Unsatisfactory in either the student growth or the instructional practice portion of the evaluation will receive a final performance rating of Unsatisfactory.

Points for student growth will be assigned using a three step process. Pivot Florida recognizes that a certain amount of statistical error is expected in the calculation of the value added model (VAM scores). In order to account for this error, a confidence band around each teacher's VAM score will be calculated. This will allow Pivot Florida to be 95% certain that a teachers score falls within one of three bands: VAM score below C, VAM score crosses D, or VAM score is above C. Teachers whose scores fall in the band entirely below C will be rated as Unsatisfactory. Teachers whose stores fall in the band entirely above C will be rated as Highly Effective and receive 3 points toward student growth. For teachers whose VAM scores fall in the band crossing zero, a second step will be applied to determine the points assigned for student growth.

If a teacher's confidence band crosses zero, it means that the VAM score could be positive or negative. Teachers in this band will be rated either Effective or Needs improvement in the area of student growth. In order to determine which rating a teacher will receive, Pivot Florida will look at the percentage of students assigned to that teacher that met expected gains. Teachers with 30% or more of their students meeting expectations will be rated as effective and receive 2 points toward student growth. If less than 30% of their students meet expectations, teachers will be rated as Needs Improvement and receive 1 point toward student growth, as shown in Table 1. Pivot Florida will follow these two steps for each year of assessment data. For teachers with more than one year of data, a third step will be taken.

**Table 1: Assigning Points for Student Growth for Each Year of Data**

| <b>Score 0-3) for Each Year of</b> | <b>Criteria</b>   |
|------------------------------------|---|
| 3 (Highly Effective)               | 95% Confident VAM score above 0   |
| 2 (Effective)                      | 95% Confident VAM score crosses 0 AND Students Meeting Expectations a 30% |
| 1( Needs Improvement)              | 95% Confident VAM score crosses 0 AND Students Meeting Expectations <30%  |
| 0 (Unsatisfactory)                 | 95% Confident VAM score below 0   |

In uses where three years of data are available, the average of the points received toward student growth for each of those three years will be calculated. Where two years of data are available, the average for those two years will be calculated. In both cases, the most recent year will be weighted by counting those points twice.

The overall points received for student growth will be determined by comparing the average points to a range. Teachers whose average is within the range of 2.5 - 3, will be rated as Highly Effective and receive 3 points toward the student growth portion of the final performance rating; an average within the range of 1.5 – 2.49 will result in a rating of Effective and 2 points for student growth; an average within the range of 0.51-1.49 will result in a rating of Needs Improvement or Developing and 1 point for student growth; and an average within 0-0.50 will result a rating of Unsatisfactory. Additionally, teachers whose scores, prior to being averaged, were Unsatisfactory in the current year and also Unsatisfactory in any prior year receive a rating of Unsatisfactory.

Points for instructional practice will be assigned by counting the evaluation rubric ratings determined through final

Performance evaluation(s). Teachers will receive five ratings in each of the four domains. The system is weighted so that Domain 3, Instruction, has twice the value of the other domains. For a standard evaluation, this results a total of 25 ratings. For an evaluation with a second metric, the number of ratings doubles to 50 to account for the use of evaluation rubrics completed by two different observers. The score assigned is based on a count of each type of rating received. The number of ratings required to receive a particular score varies for beginning teachers, defined as having 0-3 years of teaching experience, and experienced teachers, defined as having 4 or more years of experience. The scores and rating requirements are shown in Table 2.

**Table 2: Assigning Points for Instructional Practice**

| <b>Score(0-3)</b>            | <b>Beginning Teachers: Years 1 and 2</b>   | <b>Beginning Teachers: Year 3 (Multi-Metric)</b>  |
|------------------------------|--|---|
| <b>3 (Highly Effective)</b>  | <b>At least Highly Effective ratings<br/>No ratings of Needs Improvement<br/>or Unsatisfactory</b> | <b>At least 32 Highly Effective ratings<br/>No ratings of Needs Improvement or<br/>Unsatisfactory</b> |
| <b>2 (Effective)</b>         | <b>At least 14 Effective or Highly<br/>Effective ratings No ratings of<br/>Unsatisfactory</b>      | <b>At least 22 Highly Effective and<br/>ratings No ratings of<br/>Unsatisfactory</b>                  |
| <b>1 (Needs Improvement)</b> | <b>No more than 2 ratings of<br/>Unsatisfactory</b>  | <b>No more than 2 ratings of<br/>Unsatisfactory</b>   |
| <b>0 (Unsatisfactory)</b>    | <b>3 or more ratings of Unsatisfactory</b>   | <b>3 or more ratings of Unsatisfactory</b>  |
| <b>Score(0-3)</b>            | <b>Experienced Teachers (including newly hired) : Years 4 or higher</b>                            |   |
| <b>3 (Highly Effective)</b>  | <b>At least 19 ratings at Highly Effective and no ratings of Unsatisfactory or<br/>Basic</b>       |   |
| <b>2 (Effective)</b>         | <b>At least 10 ratings at Highly Effective or Effective and no ratings of<br/>Unsatisfactory.</b>  |   |
| <b>1 (Needs Improvement)</b> | <b>No more than 1 rating of Unsatisfactory</b>   |   |
| <b>0 (Unsatisfactory)</b>    | <b>2 or more ratings of Unsatisfactory</b>   |   |

The points earned for the student growth measurement are added to the points earned for instructional practice and thermal performance rating is assigned based on a range. The range is the same for all teachers. A total score of 2 results in a final performance rating of Needs Improvement; 3-4 results in Effective; and 5-6 is Highly Effective. Teachers that receive low points in either the instructional practice or the student growth portions of the evaluation will receive a final performance rating of Unsatisfactory.

The final performance rating is assigned by the Supervisor. Supervisors enter the results of the final performance evaluation into the employee's record electronically. Pivot Florida will apply local calculations to student growth data. The results of the calculations will be imported into the performance management system. The performance management system will calculate the point earned for instructional practice and add those to the points earned for the student growth measure in order to assign a final rating. Information from the evaluation system will be returned to the teacher as feedback for individual continuous improvement both electronically and through the teacher's supervisor. The evaluation rubric and scoring system used to define and assign an employee's final evaluation rating can be found in Appendix B.

## **THE OBSERVATION AND EVALUATION PROCESS**

Pivot Florida has developed a system of observation and evaluation that ensures teachers receive ongoing and consistent feedback from their supervisor throughout the school year. The supervisor, for evaluation purposes, is determined by the school principal or departmental director. The principal or director may in take on the role of evaluator or may designate another school or departmental administrator as supervisor for evaluation purposes. Input into evaluation by trained personnel other than the designated supervisor will be incorporated as part of the multi-metric evaluation process described in the below, corresponding section.

### **Annual Evaluation of Teachers**

Teachers will receive annual evaluations supported by systematic observation. The evaluation process begins in August and follows the timeline shown in Table 3. For newly hired teachers, the timeline includes two evaluations during their first year. Parents have the opportunity for input during conferences and meetings with administration. All formal observations will be reduced to writing and discussed with the teacher within ten days of the observation. No later than five days following the discussion, the teacher will receive a copy of the formal observation report after signing to indicate that the report has been discussed with the teacher. If deficiencies are noted during the observation, the supervisor will provide the teacher with written recommendations for improvement and provide assistance in helping to correct such deficiencies. Evaluation results will be directly linked to professional development opportunities by FY14. Formal observations will be

supported by regular classroom walkthrough observations where the supervisor collects data and provides feedback to the teacher.

**Table 3 Evaluation System Timeline**

|                         |   |
|-------------------------|---|
| <b>August</b>           | Evaluation system overview is provided by supervisors (within first 60 days) Supervisors set general goals and expectations   |
| <b>September</b>        | First planning conference with teacher (set specific goals and expectations)  |
| <b>October</b>          | Complete initial observations<br>Establish follow-up conference/communications<br>First year teachers receive their first formal observation and evaluation including experienced teachers that are newly hired |
| <b>January-February</b> | Mid-Year review to determine progress on goals/expectations Continue  |
| <b>February-April</b>   | First year teachers receive their second formal observation, including experienced teachers that are newly hired  |
| <b>April-May</b>        | Final performance evaluations are completed for all teachers Follow-up conference/communications  |

The methods for data collection are designed around the four domains of the evaluation rubric. Methods include the use of Pivot Florida created forms for teacher self-assessment (Forms 1 and 3) and observation instruments (Forms 2A) with indicators of effective practices. Instruments include detailed connections between the indicators and the FEAPs. The design of and process for the use of these forms was informed by the research of both Charlotte Danielson and Robert Marzano.

**Form 1: Teacher Pre-Observation Tool : Lesson Planning and Professionalism**

Prior to a formal classroom observation the teacher completes the pre-observation lesson planning form by filling out the comments for domain one and four. The teacher sends the lesson planning form to the observer at least two days prior to the observation. The observer reads the plan, provides feedback to the teacher and asks any clarifying questions as necessary, as well as any other questions that would provide helpful information prior to the observation.

**Form 2: Observer Classroom Walk- Through Tool**

Prior to the completion of a classroom walk-through, the observer selects a domain or domain category for focus from domains one through four. The walk-through observation is conducted using the appropriate domain category observation form. The observer will complete observation forms within two days of the walk-through. The completed observation form will be available for review by the teacher within two days of the walk-through. It is the intent of the walk-through

observation to provide frequent and ongoing feedback to the teacher regarding performance. Post-observation conferences will be scheduled when appropriate. Observers will complete a minimum of 4 walk-throughs per teacher during the first semester and a minimum of 2 walk-throughs per teacher during the second semester, for a total of at least 6 per teacher per year.

### **Form 2B: Observer Formal Observation Tool**

During the pre-observation conference, teacher and observer discuss the upcoming lesson and identify the focus of the observation by reviewing and discussing Form 1. Together, the teacher and the observer identify the lesson elements that will be of most importance for this observation. Additionally, both teacher and observer review the specific descriptors within Form 2 regarding teacher and student evidence in determining the focus of the observation. The observer will seek evidence to assess proficiency on the targeted lesson elements. Observer may also observe other issues and address them in the post-observation conference. Observations are recorded using Form 2.

### **Form 3: Teacher Post-Observation Self-Assessment Tool**

The teacher conducts a post-observation self-assessment of the targeted elements using Form 3 and shares it with the observer electronically prior to the post-observation conference. During the post-observation conference, the teacher and observer meet to discuss the lesson. The observer also shares the ratings based on the evidence-observed during the observation. The observer and teacher share insights into the events that occurred during the observation and work toward an agreement regarding teacher's rating for the elements observed. Specific sections of the observation instrument may be discussed.

### **Annual Evaluation of First Year Teachers**

The process for evaluating teachers in their first year of the teaching profession includes all the elements described in the previous section of this document and aligns with the statutory requirement of a minimum of two formal observations by a trained supervisor, as shown in Table 3. Ongoing feedback and support from the supervisor is provided through professional conversations, classroom walk-through observations, formal observations, and a final performance assessment. The observation tools and evaluation rubric used are not altered for beginning teachers; however, the instructional practice scoring is modified as shown in Table 2.

Beginning teachers are provided with additional support through the Accomplished Professional Practices. This program was designed to assist first year teachers and, upon supervisor request, newly hired teachers with previous teaching experience. Within the first month of employment, a peer teacher is assigned. Throughout the first year, a minimum of three formative observations are conducted by the peer teacher. Each of these observations includes pre and post-observation conferences between the teacher and the peer teacher. The peer teacher has regular meetings with the teacher and reviews student data gathered from formative and summative assessments to assist the teacher in guiding instruction based on data analysis. At the end of the year, the supervisor either verifies that the teacher successfully completed the program or requests that additional assistance will continue to be provided in the following year.

**Table 5. Summary of Additional Assistance Provided to First Year Teachers**

| Action   | Timeframe           |
|--|---------------------|
| Peer teacher is assigned to teachers                                       | August              |
| Beginning teacher completes self- assessment to determine level with FEAPs | August              |
| First formative observation is completed by peer teacher                   | September - October |
| Individual Professional Development Plan is completed with supervisor      | November            |
| Second formative observation is completed by peer teacher                  | December -January   |
| Informative Observation completed by peer teacher                          | February—April      |
| Program completion is verified or continuance is requested by supervisor   | May                 |

In determining the final performance rating, Pivot Florida has identified two levels of teachers: The Beginning Teacher with C-3 years of experience and the Experienced Teacher, with 4 or more years of experience. The transition between the two levels has been identified as a milestone career event.

The annual evaluation for teachers in the year prior to a milestone event will take all the elements of a regular annual evaluation and add an additional metric. This additional metric will apply to teachers in their third year

of the teaching profession and will take the form of peer review. The process and the timeline for development and implementation of the additional metric is described below.

Peer reviewers will be selected from a pre-qualified pool of mentor teachers. The peer review process will be implemented during the 2013-14 school year. Peer reviewers will receive the same evaluation training as new administrators. Peer reviewers will use the same observation tools and evaluation rubric as supervisors and the results of peer review will account for 25% of the instructional practice score, as shown in Table 2. The annual evaluation timeline for peer review is outlined in Table 6.

**Table 6. Evaluation Timeline for Peer Review Metric**

|                           |   |
|---------------------------|---|
| <b>September</b>          | First planning conference with teacher  |
| <b>October- November</b>  | Complete initial formative observations<br>Establish follow-up conference communications                      |
| <b>January - February</b> | Mid-Year review to determine progress on goals/expectations. Continue conference/communications feedback loop |
| <b>March - April</b>      | Final performance evaluations are completed Follow-up conference/communications                               |

## Teaching Fields that Require Special Procedures or Criteria

| Personnel Impacted  | Fields identified   |
|---|---|
| School Based Non-Classroom Instructional Personnel        | Teachers on Assignment<br>Guidance Counselors<br>Academic Area Coordinators<br>Instructional Technology Specialists<br>ESOL and ESE Resource Teachers |
| Pivot Florida Based Non-Classroom Instructional Personnel | Teachers on Assignment<br>Curriculum Master Teachers<br>Academic Area Coordinators  |
| Classroom Teachers  | Other fields where performance-based assessment would be more appropriate-  |

### Amending Final Performance Ratings

Pivot Florida will put procedures in place for amending evaluations based on receipt of additional assessment data within 90 days after the close of the school year. Pivot Florida will identify teachers impacted by the additional data and amend the student growth portion of the evaluation accordingly. Notification of the amendment will be provided to the impacted teachers and their supervisors. If the amendment changes the rating received, a meeting between the supervisor and teacher will be required. Pivot Florida will inform teachers of the possible implications of failing to meet the performance evaluation ratings and their continued employment status with Pivot Florida in the language of the teacher's contract between Pivot Florida and the teacher. In addition, if the employee is a classroom teacher, the parent of any student who is assigned to that teacher will be notified accordingly and pursuant to the requirements of law.

## **IMPLEMENTATION AND SYSTEM EVALUATION**

Within the first sixty days of the teacher's contract year and prior to preparing the formal written report of a required teacher evaluation, each teacher will be informed of the criteria and the procedures to be used in his or her formal observations and evaluation. Supervisors will be responsible for providing this information to each teacher in their school or department location.

Pivot Florida will ensure that the same core of effective practices is used by all who are conducting evaluations through:

- (a) Pivot Florida-wide implementation of the evaluation system; (b) Pivot Florida-wide use of the forms and tools developed in alignment with the evaluation rubric and the Florida Educator Accomplished Practice; and
- (c) through the training and monitoring systems described below.

### **Initial Evaluator Training**

Persons assigned to observe and/or evaluate instructional personnel will be required to complete a comprehensive training on the Pivot Florida Teacher Evaluation System prior to involvement in any formal observation or evaluation activities. New administrators and peer teachers are examples of persons typically involved in initial evaluator training. Participants in this training will become proficient in the Pivot Florida Teacher Evaluation System to include the use of all data collection forms, and observation and evaluation instruments described in this document. Participants will be required to complete and receive a passing score on an assessment of their skills in using the system prior to being allowed to conduct formal observations and evaluations. This assessment is designed to ensure inter-rater reliability and consistency of evaluation/observation practices and procedures Pivot Florida-wide.

### **Ongoing Evaluator Training**

All personnel required to observe and/or evaluate instructional personnel will be required to complete refresher training on the Pivot Florida Teacher Evaluation System on an annual basis. This refresher is designed to maintain inter-rater reliability and to keep staff updated regarding any changes or revisions to the system and/or evaluation/observation practices and procedures.

## **Annual System Review and Monitoring Evaluator Performance**

Pivot Florida previously conducted an analysis of the correlation between the current evaluation instrument and student achievement and found that little to no correlation exists. The already developed process for analysis will be used to evaluate the effectiveness of the new Teacher Evaluation System in supporting improvements in instruction and student learning. The goal is to align student achievement results with the evaluation Instrument, making the evaluation instrument an accurate predictor of performance.

Following the completion of the annual evaluation (typically in May) for all instructional personae the outcomes will be analyzed by staff from Human Resources and Accountability, Research and Continuous Improvement (May/June). This analysis will show evaluation and observation trends and may also be used to identify opportunities for improvement within the evaluation system or the procedures involved in its implementation, including revisions to the rubric and/or indicators. Special emphasis will be placed on Pivot Florida-wide consistency and inter-rater reliability. Results from this analysis will be shared with the supervisors. These recommendations and revisions would be implemented for the following school year (August), thereby ensuring a cycle of continuous improvement. The annual review of evaluation results for consistency and inter-rater reliability will also be part of the process used to monitor evaluator performance. Pivot Florida will use the data to identify evaluators in need of further training and/or calibration. Additionally, Pivot Florida will review observation records to ensure that evaluators are using the system in the manner outlined in this document

## **System Integration**

The Teacher Evaluation System allows administrators to evaluate observation and evaluation results on a school-wide or Pivot Florida-wide basis. This monitoring will allow for the identification of trends which will help drive decisions around professional development and related training. Any areas of deficiency or in need of improvement identified in this manner would be targeted by a school in the School Improvement Plan. The school would then focus strategies for improvement to include Professional Development opportunities to meet these identified needs. Similarly, the Pivot Florida would identify Pivot Florida-wide trends for incorporation in the Pivot Florida Strategic Plan and would implement Pivot Florida-wide initiatives to meet these identified needs.

The process for this level of integration would involve school staff reviewing evaluation and observation results on an annual basis. This event would occur directly following the completion of the annual performance assessment for all staff. School-wide trends would be identified for

possible incorporation into the School Improvement Plan. The principal would share data collected from this process with the School Advisory Committee (SAC) and work with the SAC to incorporate goals and strategies to meet the areas identified by the claim analysis of the Teacher Evaluation System results. A similar process would also occur at the Pivot Florida level. The Board and the Pivot Florida Advisory Committee comprised of parents and community members would be involved in the decision-making process regarding how to incorporate the evaluation result into goals and strategies of the Strategic Plan.

| <b>Domain 2: The Classroom Environment</b>  |   |   |  |  |
| 2a. Creating an Environment of Respect  | Classroom interactions, both between the teacher and students and among students, are negative, inappropriate, or insensitive to students' cultural backgrounds or developmental differences, and are characterized by sarcasm, put-downs, or conflict. | Classroom interactions, both between the teacher and students and among students, are generally appropriate and free from conflict but may be characterized by occasional displays of insensitivity or lack of responsiveness to cultural or developmental differences. | Classroom interactions, both between teacher and students and among students, are polite and respectful, reflect general warmth and caring, and are appropriate to the cultural and developmental differences among groups of students.  | Classroom interactions, both between teacher and students and among students, are respectful and reflect genuine warmth, caring, and sensitivity to the cultural and developmental differences among groups of students. Students themselves ensure high levels of civility among members of the class.  |

|  |   |   |   |  |
|--|---|---|---|--|
| 2b. Establishes a Culture for Learning | The teacher has not created a positive culture for learning. Teacher commitment to the subject matter and expectations for student achievement are low. Student pride in work is not evident. | The teacher has partially established a positive culture for learning. Commitment to the subject matter is developing, and there are modest expectations for student achievement. Students show modest pride in their work. | The teacher has created a positive classroom culture for learning, characterized by high expectations for most students, the belief that students can succeed if they work hard, and genuine commitment to the subject matter by both the teacher and students. Students demonstrate pride in their work. | The teacher has created a culture for learning characterized by high levels of student energy and the teacher's passion for the subject area. Everyone shares a belief in the importance of the subject and the belief that all students can succeed if they work hard. All students hold themselves to high standards of performance; for example, by initiating improvement to their work. |
|--|---|---|---|--|

| Performance Rating  |  |  |  |  |
|---|--|--|--|--|
|  | Unsatisfactory   | Needs Improvement  | Effective  | Highly Effective   |
| Domain 2: The Classroom Environment   |  |  |  |  |
| 2c. Establishes and Manages Classroom Procedures                                  | Much instructional time is lost because of inefficient classroom routines and procedures for transitions, handling of supplies, and performance of non-instructional duties. | Some instructional time is lost because of inefficient classroom routines and procedures for transitions, handling of supplies, and performance of non-instructional duties, which are only partially effective. | Little instructional time is lost because of inefficient classroom routines and procedures for transitions, handling of supplies, and performance of non-instructional duties, which occur smoothly. | Students contribute to the seamless operation of classroom routines and procedures for transitions, handling of supplies, and performance of non-instructional duties. |

|  |  |  |   |   |
|--|--|--|---|---|
| <p>2d. Stops Misconduct by Using Effective, Appropriate Techniques</p> | <p>There is no evidence that standards of conduct have been established and little or no teacher monitoring of student behavior. Response to student misbehavior is repressive or disrespectful of student dignity.</p> <p>The teacher does not address off-task, inappropriate, or challenging behavior efficiently, thereby creating significant negative impact on the learning of students in the class. The teacher does not reinforce positive behavior.</p> | <p>It appears that the teacher has made an effort to establish standards of conduct for students and tries to monitor student behavior, but these efforts are not always successful.</p> <p>The teacher addresses some off task, inappropriate, or challenging behavior efficiently, thereby creating some negative impact on the learning of students in the class. The teacher reinforces positive behavior.</p> | <p>Standards of conduct appear to be clear to students, and the teacher monitors student behavior against those standards. The teacher's response to student misbehavior is appropriate and respectful to students.</p> <p>The teacher addresses most off-task, inappropriate, or challenging behavior efficiently, thereby creating little negative impact on the learning of students in the class. The teacher strategically reinforces positive behavior.</p> | <p>Standards of conduct are clear, with evidence of student participation in setting them. Expectations are developed and taught. The teacher's monitoring of student behavior is subtle and preventative, and the teacher's response to student misbehavior is sensitive to individual student needs.</p> <p>The teacher addresses almost all off-task, inappropriate, or challenging behavior efficiently, thereby creating no negative impact on the learning of students in the class. Students take an active role in monitoring the standards of behavior and there is significant evidence that students support the positive classroom culture.</p> |

## Appendix C: OBSERVATION TOOLS AND FORMS

**Observer Classroom Walk-Through Tool (Form 2A)  
Pivot Florida**

|          |  |           |  |                     |  |
|----------|--|-----------|--|---------------------|--|
| Teacher: |  | Observer: |  | Date of Observation |  |
|----------|--|-----------|--|---------------------|--|

**Instructions:**

1. Prior to the completion of a walk-through the observer selects a domain or domain category for focus.
2. Walk-through observation is conducted using the appropriate domain category observation form.
3. Observer will complete observation forms within two days of the walk-through.
4. Observation form will be available for review by the teacher within two days of the walk-through.
5. It is the intent of the walk-through observation to provide frequent and ongoing feedback to the teacher regarding performance. Post-observation conferences will be scheduled when appropriate.

## Observer Formal Observation Tool (Form 2B)

|          |  |           |  |                     |  |
|----------|--|-----------|--|---------------------|--|
| Teacher: |  | Observer: |  | Date of Observation |  |
|----------|--|-----------|--|---------------------|--|

### Instructions:

During the pre-observation conference, teacher and observer discuss the upcoming lesson and identify the focus of the observation by reviewing and discussing Form 1. Together, the teacher and the observer identify the lesson elements that will be of most importance for this observation.

1. Additionally, both teacher and observer review the specific descriptors regarding teacher and student evidence in determining
2. may also observe other issues and address them in the post-observation conference. Observations are recorded using Form 2B.
3. Teacher conducts a post-observation self-assessment of the elements that were targeted using Form 3 and shares it with the observer electronically prior to the post-observation conference.
4. During the post-observation conference, teacher and observer meet to discuss the lesson. Observer also shares the
5. ratings based on the evidence observed during the observation. Observer and teacher share insights into the events
6. that occurred during the observation and work toward agreement regarding teacher's rating for the elements observed.
7. Specific sections of the observation instrument may be discussed.
8. During the post-observation conference, teacher and observer meet to discuss the lesson. Observer also shares the ratings based on the evidence observed during the observation. Observer and teacher share insights into the events that occurred during the observation and work toward agreement regarding teacher's rating for the elements observed. Specific sections of the observation instrument may be discussed.

## About Evaluation

For the purpose of **increasing student learning growth** by improving the quality of instructional, administrative, and supervisory services in the public schools of the state, the district school superintendent shall establish procedures for evaluating the performance of duties and responsibilities of all instructional, administrative, and supervisory personnel employed by the school district. Florida Statutes Section 1012.34 (1) (a).

### What does this mean?

To accomplish the purpose defined in law, a district evaluation system for school administrator's must:

1. Be focused on school leadership actions that impact student learning , and;
2. Support professional learning on performance of duties and responsibilities that matter most for student learning, faculty and leadership development.

The evaluation system adopted by the district is:

- ✓ Based on contemporary research that reveals educational leadership behaviors that, when done correctly and in appropriate circumstances, have a positive impact on student learning and faculty development.
- ✓ Fully aligned with the Florida Principal Leadership Standards – a State Board of Education rule that sets expectations for principal performance (SBE Rule 6A-5.080).

A New Approach to Evaluation: This evaluation system is designed to support three processes:

- **Self-reflection** by the leader on current proficiencies and growth needs (What am I good at? What can I do better?)
- **Feedback** from the evaluator and others on what needs improvement.
- **An annual summative evaluation** that assigns one of the four performance levels required by law (i.e., Highly Effective, Effective, Needs Improvement, or Unsatisfactory).

### What is Evaluated?

Evaluation of school leaders is based on observation and evidence about certain leadership behaviors AND the impact of a leader's behavior on others.

The portion of evaluation that involves "impact on others" comes in two components:

1. Student Growth Measures: At least 50% of a school leader's annual evaluation is based on the performance of students in the school on specific state or district assessments (e.g. FCAT, EOC exams).
2. The Leadership Practice: This component contributes the remaining percentage of the school leader's evaluation. Leadership Practice combines results of the Florida School Leader Assessment (FSLA) and an additional Metric – Deliberate Practice. The FSLA contribution to evaluation is based on observation of the leader's actions and the leader's impact on the actions and behaviors of others

The processes and forms described in the following pages are focused on the Leadership Practice component of evaluation.

## Training and Reflection

The content of the district evaluation system informs those evaluated and those doing evaluations of the issues to address and the processes to use.

- Those being evaluated use these documents to guide self-reflection on practices that improve your work.
- Evaluators provide both recurring feedback to guide growth in proficiency in district priorities and provide summative performance ratings.
- Those who are both evaluated by this system and evaluate other with it will do both.

Things to know:

1. The Research Framework(s) on which the evaluation system is based. Each research framework is associated with particular approaches to instruction or leadership. The research aligned with the district framework(s) is a useful source of deeper understanding of how to implement strategies correctly and in appropriate circumstances. Evaluators can provide better feedback to sub-ordinates when they understand the research framework
2. Inter-rater reliability: Evaluators in the district should be able to provide sub-ordinates similar feedback and rating so that there is consistent use of the evaluation system across the district. This is promoted by training on the following:
  - a. The “look fors” – what knowledge, skills, and impacts are identified as system priorities by inclusion of indicators in the evaluation system.
  - b. The Rubrics – how to distinguish proficient levels.
  - c. Rater reliability checks. Processes for verifying raters meet district expectations in using the rubrics.
3. Specific, Actionable, and Timely Feedback Processes: What evaluators observe does not promote improvement unless it is conveyed to employees as specific, actionable and timely manner. Training on how to do so is essential.
4. Conferences protocols and use of forms: Know what is required regarding meetings, conference procedures, use of forms, and records.
5. Processes and procedures for implementing the evaluation system
  - a. Evidence gathering: What sources are to be used?
  - b. Timeframes, record keeping
  - c. Scoring rules
6. Student Growth Measures: What are the districts requirements regarding use of student growth measures in the district’s evaluation system?

7. Sources of information about the evaluation system: Where can evaluators and employees access manuals, forms, documents etc. regarding the evaluation process.
8. Additional metrics: Training on any additional metrics use to supplement the practice portion of evaluation.

## Framework: Leadership Evaluation

A Multi-Dimensional Framework: This evaluation system is based on contemporary research and meta-analyses by Dr. Douglas Reeves, Dr. John Hattie, Dr. Vivian Robinson, Dr. Robert Marzano and other research findings that identify school leadership strategies or behaviors that, done correctly and in appropriate circumstances, have a positive probability of improving student learning and faculty proficiency on instructional strategies that positively impact student learning.

| Indicator 4.2- Feedback Practices  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 4.3 - High effect size strategies  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |

|  |   |                                    |  |   |
|--|---|------------------------------------|--|---|
| Indicator 4.4 - Instructional Initiatives  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 4.5 - Facilitating & Leading Prof. Learning  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 4.6 - Faculty Development Alignments   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 4.7 - Actual Improvement   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| <b>Proficiency Area 5 - Learning Environment: Effective school leaders structure and monitor a school learning environment that improves learning for all of Florida's diverse student population.</b> |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>                           |   |                                    |  |   |
| Indicator 5.1 - Student Centered   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 5.2 - Success Oriented   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 5.3- Diversity   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 5.4 - Achievement Gaps   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |

|   |   |                                    |  |   |
|---|---|------------------------------------|--|---|
| <b>Domain 3 - Organizational Leadership</b>   |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>  |   |                                    |  |   |
| <i>Scale Levels: (choose one) Where there is sufficient evidence to rate current proficiency on an indicator, assign a proficiency level by checking one of the four proficiency levels. If not being rated at this time, leave blank.</i>  |   |                                    |  |   |
| <b>Proficiency Area 6 - Decision Making: Effective school leaders employ and monitor a decision-making process that is based on vision, mission, and improvement priorities using facts and data; manage the decision making process, but not all decisions, using the process to empower others and distribute leadership when appropriate; establish personal deadlines for themselves and the entire organization; and use a transparent process for making decisions and articulating who makes which decisions.</b>  |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>  |   |                                    |  |   |
| Indicator 6.1- Prioritization Practices   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 6.2- Problem Solving  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 6.3 - Quality Control   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 6.4 - Distributive Leadership   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 6.5 - Technology Integration  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| <b>Proficiency Area 7 - Leadership Development: Effective school leaders actively cultivate, support, and develop other leaders within the organization, modeling trust, competency, and integrity in ways that positively impact and inspire growth in other potential leaders.</b>  |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>  |   |                                    |  |   |
| Indicator 7.1- Leadership Team  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 7.2 - Delegation  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 7.3 - Succession Planning   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 7.4 - Relationships   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| <b>Proficiency Area 8 - School Management: Effective school leaders manage the organization, operations, and facilities in ways that maximize the use of resources to promote a safe, efficient, legal, and effective learning environment; effectively manage and delegate tasks and consistently demonstrate fiscal efficiency; and understand the benefits of going deeper with fewer initiatives as opposed to superficial coverage of everything.</b>  |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>  |   |                                    |  |   |
| Indicator 8.1 - Organizational Skills   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 8.2- Strategic Instructional Resourcing   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 8.3 - Collegial Learning Resources  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| <b>Proficiency Area 9 - Communication: Effective school leaders use appropriate oral, written, and electronic communication and collaboration skills to accomplish school and system goals by practicing two-way communications, seeking to listen and learn from and building and maintaining relationships with students, faculty, parents, and community; managing a process of regular communications to staff and community keeping all stakeholders engaged in the work of the school; recognizing individuals for good work; and maintaining high visibility at school and in the community.</b> |   |                                    |  |   |
| <b><input type="checkbox"/> Highly Effective   <input type="checkbox"/> Effective   <input type="checkbox"/> Needs Improvement   <input type="checkbox"/> Unsatisfactory</b>  |   |                                    |  |   |
| Indicator 9.1-- Constructive Conversations  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 9.2 - Clear Goals and Expectations  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 9.3 - Accessibility   | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |
| Indicator 9.4 - Recognitions  | <input type="checkbox"/> Highly Effective | <input type="checkbox"/> Effective | <input type="checkbox"/> Needs Improvement | <input type="checkbox"/> Unsatisfactory |

**Domain 4 - Professional and Ethical Behaviors**

**Highly Effective     Effective     Needs Improvement     Unsatisfactory**

*Scale Levels: (choose one) Where there is sufficient evidence to rate current proficiency on an indicator, assign a proficiency level by checking one of the four proficiency levels. If not being rated at this time, leave blank.*

**Proficiency Area 10 - Professional and Ethical Behaviors: Effective school leaders demonstrate personal and professional behaviors consistent with quality practices in education and as a community leader by staying informed on current research in education and demonstrating their understanding of the research, engage in professional development opportunities that improve personal professional practice and align with the needs of the school system, and generate a professional development focus in their school that is clearly linked to the system-wide strategic objectives.**

|  | <b><input type="checkbox"/> Highly Effective</b> | <b><input type="checkbox"/> Effective</b> | <b><input type="checkbox"/> Needs Improvement</b> | <b><input type="checkbox"/> Unsatisfactory</b> |
|--|--|---|---|--|
| Indicator 10.1 - Resiliency            | <input type="checkbox"/> Highly Effective        | <input type="checkbox"/> Effective        | <input type="checkbox"/> Needs Improvement        | <input type="checkbox"/> Unsatisfactory        |

| Indicator 10.3 - Commitment            | <input type="checkbox"/> Highly Effective        | <input type="checkbox"/> Effective        | <input type="checkbox"/> Needs Improvement        | <input type="checkbox"/> Unsatisfactory        |
| Indicator 10.4 - Professional Conduct  | <input type="checkbox"/> Highly Effective        | <input type="checkbox"/> Effective        | <input type="checkbox"/> Needs Improvement        | <input type="checkbox"/> Unsatisfactory        |

## Additional Metric: Deliberate Practice Guidelines

**Deliberate Practice: The leaders work on specific improvements in mastery of educational leadership is a separate metric and is combined with the FSLA Domain Scores to determine a summative leadership score.**

| <b>Deliberate Practice (DP)<br/>Proficiency Area(s) and Target(s) for School Leader Growth</b>   |
|--|
| <p><u>Deliberate Practice Priorities:</u> The leader and the evaluator identify 1 to 4 specific and measurable priority learning goals related to teaching, learning, or school leadership practices that impact student learning growth. One or two targets are recommended.</p> <ul style="list-style-type: none"><li>• The target of a deliberate practice process describe an intended result and will include “scales” or progress points that guide the leader toward highly effective levels of personal mastery;</li><li>• The leader takes actions to make discernible progress on those priority goals; monitors progress toward them, uses the monitoring data to make adjustments to practice, and provides measurable evidence of growth in personal mastery of the targeted priorities.</li><li>• The evaluator monitors progress and provides feedback.</li><li>• <u>The targets are “thin slices” of specific gains sought</u> – not broad overviews or long term goals taking years to accomplish.</li><li>• Deliberate practices ratings are based on comparison of proficiency at a “start point” and proficiency at a designated “evaluation point”. The start point data can be based on a preceding year FSLA evaluation data on a specific indicator or proficiency area, or determined by school leader and evaluator either at the end of the preceding work year or at the start of the new work year in which the DP targets will be used for evaluation.</li></ul> <p><u>Relationship to other measures of professional learning:</u> Whereas FSLA indicator 4.5 addresses the leader’s involvement with professional learning focused on faculty needs and indicator 10.2 addresses the leader’s pursuit of learning aligned with a range of school needs, the Deliberate Practice targets are more specific and deeper learning related to teaching, learning, or school leadership practices that impact student learning. The DP learning processes establish career-long patterns of continuous improvement and lead to high quality instructional leadership.</p> <p><u>Selecting Growth Targets:</u><br/>Growth target 1: An issue that addresses a school improvement need related to student learning and either selected by the district or approved by leader’s supervisor. The focus should be on complex issues that take some time to master such as providing observation and feedback of high-effect size instructional practices.<br/>Growth target 2: An issue related to a knowledge base or skill set relevant to instructional leadership selected by leader).<br/>Growth target 3-4: Optional: additional issues as appropriate.</p> <ul style="list-style-type: none"><li>• The addition of more targets should involve estimates of the time needed to accomplish targets 1 and 2. Where targets 1 and 2 are projected for mastery in less than half of a school year, identify additional target(s).</li></ul> <p>The description of a target should be modeled along the lines of learning goals.</p> <ul style="list-style-type: none"><li>• A concise description (rubric) of what the leader will know or be able to do</li><li>• Of sufficient substance to take at least 6 weeks to accomplish</li><li>• Includes scales or progressive levels of progress that mark progress toward mastery of the goal.</li></ul> <p>Rating Scheme</p> <ul style="list-style-type: none"><li>• Unsatisfactory = no significant effort to work on the targets</li><li>• Needs Improvement = evidence some of the progress points were accomplished but not all of the targets</li><li>• Effective = target accomplished</li><li>• Highly effective = exceeded the targets and able to share what was learned with others</li></ul> |

Sample:

Target: Leader will be able to provide feedback to classroom teachers on the effectiveness of learning goals with scales in focusing student engagement on mastery of state standards.

Scales:

Level 3: Leader develops and implements a process for monitoring the alignment of classroom assessments to track trends in student success on learning goals.

Level 2: Leader develops and implements a process for routinely visits classes and engaging students in discussion on what they are learning and compares student perceptions with teacher’s learning goals.

Level 1: Leader can locate standards in the state course description for each course taught at the school and completes the on-line module on Learning Goals (both at [www.floridastandards.org](http://www.floridastandards.org)) and engages teachers in discussion on how they align instruction and learning goals with course standards.

## Deliberate Practice Growth Target

## FSLA Proficiency Areas with Indicators

# Florida School Leader Assessment

A Multidimensional Leadership Assessment

4 Domains - 10 Proficiency Areas - 45 Indicators

A **summative performance level** is based 50% on Student Growth Measures (SGM) that conform to the requirements of s. 1012.34, F.S., and 50% on a Leadership Practice Score. In the Florida State Model, the Leadership Practice Score is obtained from two metrics:

- Florida School Leader Assessment (FSLA)
- Deliberate Practice Score

The school leader's FSLA Score is combined with a Deliberate Practice Score to generate a Leadership Practice Score. The tables below list the school leader performance proficiencies addressed in the four domains of the FSLA and the Deliberate Practice Metric.

**Domain 1: The focus is on leadership practices that impact prioritization and results for student achievement on priority learning goals - knowing what's important, understanding what's needed, and taking actions that get results.**

|  |
|--|
| <b>Domain 1: Student Achievement</b><br><b>2 Proficiency Areas – 8 Indicators</b><br><b>This domain contributes 20% of the FSLA Score</b>  |
| <b>Proficiency Area 1 - Student Learning Results: Effective school leaders achieve results on the school's student learning goals and direct energy, influence, and resources toward data analysis for instructional improvement, development and implementation of quality standards-based curricula.</b> |
| Indicator 1.1 - <u>Academic Standards</u> : The leader demonstrates understanding of student requirements and academic standards (Common Core and NGSSS).  |
| Indicator 1.2 - <u>Performance Data</u> : The leader demonstrates the use of student and adult performance data to make instructional leadership decisions.  |
| Indicator 1.3 - <u>Planning and Goal Setting</u> : The leader demonstrates planning and goal setting to improve student achievement.   |
| Indicator 1.4 - <u>Student Achievement Results</u> : The leader demonstrates evidence of student improvement through student achievement results.  |
| <b>Proficiency Area 2 - Student Learning as a Priority: Effective school leaders demonstrate that student learning is their top priority through effective leadership actions that build and support a learning organization focused on student success.</b>   |
| Indicator 2.1 - <u>Learning Organization</u> : The leader enables faculty and staff to work as a system focused on student learning, and engages faculty and staff in efforts to close learning performance gaps among student subgroups within the school.  |
| Indicator 2.2 - <u>School Climate</u> : The leader maintains a school climate that supports student engagement in learning.  |
| Indicator 2.3 - <u>High Expectations</u> : The leader generates high expectations for learning growth by all students.   |
| Indicator 2.4 - <u>Student Performance Focus</u> : The leader demonstrates understanding of present levels of student performance based on routine assessment processes that reflect the current reality of student proficiency on academic standards.   |

**Domain 2: The focus is on instructional leadership – what the leader does and enables others to do that supports teaching and learning.**

|   |
|---|
| <b>Domain 2: Instructional Leadership</b><br><b>3 Proficiency Areas – 17 Indicators</b><br><b>This domain contributes 40% of the FSLA Score</b>   |
| <b>Proficiency Area 3 - Instructional Plan Implementation: Effective school leaders work collaboratively to develop and implement an instructional framework that aligns curriculum with state standards, effective instructional practices, student learning needs, and assessments.</b> |
| Indicator 3.1 - <u>FEAPs</u> : The leader aligns the school's instructional programs and practices with the Florida Educator Accomplished Practices (FEAPs) (Rule 6A-5.065, F.A.C.), and models use of Florida's common language of instruction to  |

|  |
|--|
| guide faculty and staff's implementation of the foundational principles and practices.   |
| Indicator 3.2 - <b>Standards-based Instruction:</b> The leader delivers an instructional program that implements the state's adopted academic standards (Common Core and NGSSS) in a manner that is rigorous and culturally relevant to the students by aligning academic standards, effective instruction and leadership, and student performance practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals, and communicating to faculty the cause and effect relationship between effective instruction on academic standards and student performance.   |
| Indicator 3.3 - <b>Learning Goals Alignments:</b> The leader implements recurring monitoring and feedback processes to insure that priority learning goals established for students are based on the state's adopted student academic standards as defined in state course descriptions, presented in student accessible forms, and accompanied by scales or rubrics to guide tracking progress toward student mastery.  |
| Indicator 3.4 - <b>Curriculum Alignments:</b> The leader implements systemic processes to insure alignment of curriculum resources with state standards for the courses taught.  |
| Indicator 3.5 - <b>Quality Assessments:</b> The leader ensures the appropriate use of high quality formative and interim assessments aligned with the adopted standards and curricula.   |
| Indicator 3.6 - <b>Faculty Effectiveness:</b> The leader monitors the effectiveness of classroom teachers and uses contemporary research and the district's instructional evaluation system criteria and procedures to improve student achievement and faculty proficiency on the FEAPs.   |
| <b>Proficiency Area 4 - Faculty Development: Effective school leaders recruit, retain, and develop an effective and diverse faculty and staff; focus on evidence, research, and classroom realities faced by teachers; link professional practice with student achievement to demonstrate the cause and effect relationship; facilitate effective professional development; monitor implementation of critical initiatives; and secure and provide timely feedback to teachers so that feedback can be used to increase teacher professional practice.</b>   |
| Indicator 4.1 - <b>Recruitment and Retention:</b> The leader employs a faculty with the instructional proficiencies needed for the school population served.   |
| Indicator 4.2 - <b>Feedback Practices:</b> The leader monitors, evaluates proficiency, and secures and provides timely and actionable feedback to faculty on the effectiveness of instruction on priority instructional goals, and the cause and effect relationships between professional practice and student achievement on those goals.  |
| Indicator 4.3 - <b>High Effect Size Strategies:</b> Instructional personnel receive recurring feedback on their proficiency on high effect size instructional strategies.  |
| Indicator 4.4 - <b>Instructional Initiatives:</b> District-supported state initiatives focused on student growth are supported by the leader with specific and observable actions, including monitoring of implementation and measurement of progress toward initiative goals and professional learning to improve faculty capacity to implement the initiatives.  |
| Indicator 4.5 - <b>Facilitating and Leading Professional Learning:</b> The leader manages the organization, operations, and facilities to provide the faculty with quality resources and time for professional learning and promotes, participates in, and engages faculty in effective individual and collaborative learning on priority professional goals throughout the school year.   |
| Indicator 4.6 - <b>Faculty Development Alignments:</b> The leader implements professional learning processes that enable faculty to deliver culturally relevant and differentiated instruction by generating a focus on student and professional learning in the school that is clearly linked to the system-wide objectives and the school improvement plan; identifying faculty instructional proficiency needs (including standards-based content, research-based pedagogy, data analysis for instructional planning and improvement); aligning faculty development practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals; and using instructional technology as a learning tool for students and faculty. |
| Indicator 4.7 - <b>Actual Improvement:</b> The leader improves the percentage of effective and highly effective teachers on the faculty.   |
| <b>Proficiency Area 5 - Learning Environment: Effective school leaders structure and monitor a school learning environment that improves learning for all of Florida's diverse student population.</b>   |
| Indicator 5.1 - <b>Student-Centered:</b> The leader maintains a safe, respectful and inclusive student-centered learning environment that is focused on equitable opportunities for learning, and building a foundation for a fulfilling life in a democratic society and global economy by providing recurring monitoring and feedback on the quality of the learning environment and aligning learning environment practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals.   |
| Indicator 5.2 - <b>Success-Oriented:</b> The leader initiates and supports continuous improvement processes and a multi-tiered system of supports focused on the students' opportunities for success and well-being.   |
| Indicator 5.3 - <b>Diversity:</b> To align diversity practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals, the leader recognizes and uses diversity as an asset in the development and implementation of procedures and practices that motivate all students and improve student learning, and promotes school and classroom practices that validate and value similarities and differences among students.  |
| Indicator 5.4 - <b>Achievement Gaps:</b> The leader engages faculty in recognizing and understanding cultural and  |

developmental issues related to student learning by identifying and addressing strategies to minimize and/or eliminate achievement gaps associated with student subgroups within the school.

**Domain 3: The focus is on school operations and leadership practices that integrate operations into an effective system of education.**

| <b>Domain 3 - Operational Leadership</b><br><b>4 Proficiency Areas - 16 Indicators</b><br><b>This domain contributes 20% of the FSLA Score</b>  |
|---|
| <p><b>Proficiency Area 6 - Decision-Making: Effective school leaders employ and monitor a decision-making process that is based on vision, mission, and improvement priorities using facts and data; manage the decision-making process, but not all decisions, using the process to empower others and distribute leadership when appropriate; establish personal deadlines for themselves and the entire organization; and use a transparent process for making decisions and articulating who makes which decisions.</b></p>   |
| <p>Indicator 6.1 - <u>Prioritization Practices</u>: The leader gives priority attention to decisions that impact the quality of student learning and teacher proficiency, gathering and analyzing facts and data, and assessing alignment of decisions with school vision, mission, and improvement priorities.</p>   |
| <p>Indicator 6.2 - <u>Problem-Solving</u>: The leader uses critical thinking and problem-solving techniques to define problems and identify solutions.</p>  |
| <p>Indicator 6.3 - <u>Quality Control</u>: The leader maintains recurring processes for evaluating decisions for effectiveness, equity, intended and actual outcome(s); implements follow-up actions revealed as appropriate by feedback and monitoring; and revises decisions or implements actions as needed.</p>   |
| <p>Indicator 6.4 - <u>Distributive Leadership</u>: The leader empowers others and distributes leadership when appropriate.</p>  |
| <p>Indicator 6.5 - <u>Technology Integration</u>: The leader employs effective technology integration to enhance decision making and efficiency throughout the school. The leader processes changes and captures opportunities available through social networking tools, accesses and processes information through a variety of online resources, incorporates data-driven decision making with effective technology integration to analyze school results, and develops strategies for coaching staff as they integrate technology into teaching, learning, and assessment processes.</p>        |
| <p><b>Proficiency Area 7 - Leadership Development: Effective school leaders actively cultivate, support, and develop other leaders within the organization, modeling trust, competency, and integrity in ways that positively impact and inspire growth in other potential leaders.</b></p>   |
| <p>Indicator 7.1 - <u>Leadership Team</u>: The leader identifies and cultivates potential and emerging leaders, promotes teacher-leadership functions focused on instructional proficiency and student learning, and aligns leadership development practices with system objectives, improvement planning, leadership proficiency needs, and appropriate instructional goals.</p>   |
| <p>Indicator 7.2 - <u>Delegation</u>: The leader establishes delegated areas of responsibility for subordinate leaders and manages delegation and trust processes that enable such leaders to initiate projects or tasks, plan, implement, monitor, provide quality control, and bring projects and tasks to closure.</p>   |
| <p>Indicator 7.3 - <u>Succession Planning</u>: The leader plans for and implements succession management in key positions.</p>  |
| <p>Indicator 7.4 - <u>Relationships</u>: The leader develops sustainable and supportive relationships between school leaders, parents, community, higher education, and business leaders.</p>   |
| <p><b>Proficiency Area 8 - School Management: Effective school leaders manage the organization, operations, and facilities in ways that maximize the use of resources to promote a safe, efficient, legal, and effective learning environment; effectively manage and delegate tasks and consistently demonstrate fiscal efficiency; and understand the benefits of going deeper with fewer initiatives as opposed to superficial coverage of everything.</b></p>   |
| <p>Indicator 8.1 - <u>Organizational Skills</u>: The leader organizes time, tasks, and projects effectively with clear objectives, coherent plans, and establishes appropriate deadlines for self, faculty, and staff.</p>  |
| <p>Indicator 8.2 - <u>Strategic Instructional Resourcing</u>: The leader maximizes the impact of school personnel, fiscal and facility resources to provide recurring systemic support for instructional priorities and a supportive learning environment.</p>  |
| <p>Indicator 8.3 - <u>Collegial Learning Resources</u>: The leader manages schedules, delegates, and allocates resources to provide recurring systemic support for collegial learning processes focused on school improvement and faculty development.</p>  |
| <p><b>Proficiency Area 9 - Communication: Effective school leaders use appropriate oral, written, and electronic communication and collaboration skills to accomplish school and system goals by practicing two-way communications, seeking to listen and learn from and building and maintaining relationships with students, faculty, parents, and community; managing a process of regular communications to staff and community keeping all stakeholders engaged in the work of the school; recognizing individuals for good work; and maintaining high visibility at school and in the</b></p> |

|  |
|--|
| <b>community.</b>  |
| Indicator 9.1 - <u>Constructive Conversations</u> : The leader actively listens to and learns from students, staff, parents, and community stakeholders and creates opportunities within the school to engage students, faculty, parents, and community stakeholders in constructive conversations about important issues.   |
| Indicator 9.2 - <u>Clear Goals and Expectations</u> : The leader communicates goals and expectations clearly and concisely using Florida's common language of instruction and appropriate written and oral skills, communicates student expectations and performance information to students, parents, and community, and ensures faculty receive timely information about student learning requirements, academic standards, and all other local, state, and federal administrative requirements and decisions. |
| Indicator 9.3 - <u>Accessibility</u> : The leader maintains high visibility at school and in the community, regularly engages stakeholders in the work of the school, and utilizes appropriate technologies for communication and collaboration.   |
| Indicator 9.4 - <u>Recognitions</u> : The leader recognizes individuals, collegial work groups, and supporting organizations for effective performance.  |

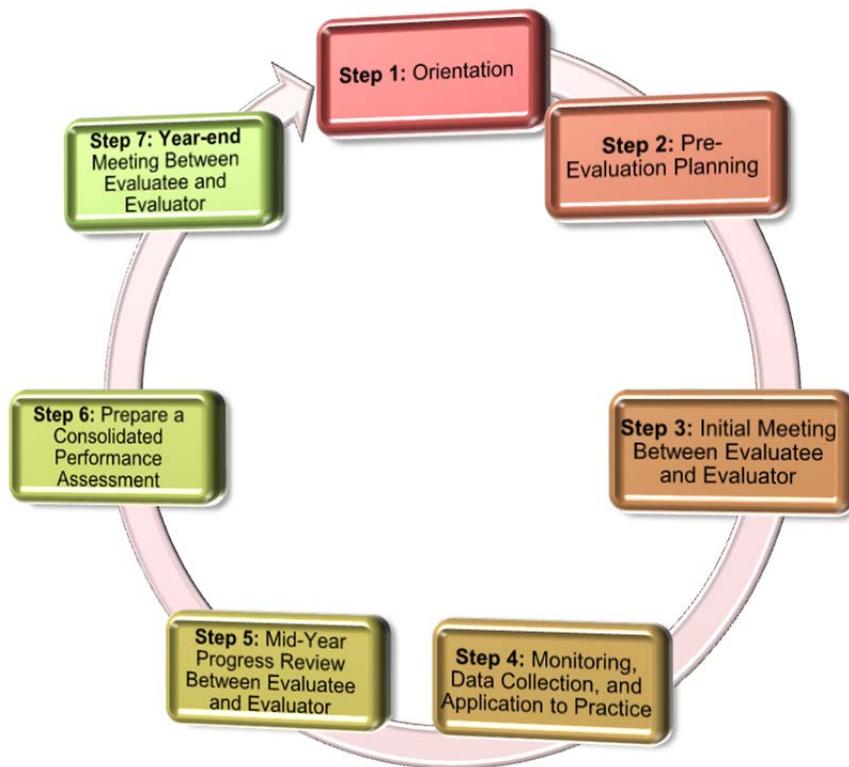

**Domain 4: The focus is on the leader's professional conduct and leadership practices that represent quality leadership.**

|  |
|--|
| <b>Domain 4 - Professional and Ethical Behaviors</b><br><b>1 Proficiency Area - 4 Indicators</b><br><b>This domain contributes 20% of the FSLA Score</b>   |
| <b>Proficiency Area 10 - Professional and Ethical Behaviors: Effective school leaders demonstrate personal and professional behaviors consistent with quality practices in education and as a community leader by staying informed on current research in education and demonstrating their understanding of the research, engage in professional development opportunities that improve personal professional practice and align with the needs of the school system, and generate a professional development focus in their school that is clearly linked to the system-wide strategic objectives.</b> |
| Indicator 10.1 - <u>Resiliency</u> : The leader demonstrates resiliency in pursuit of student learning and faculty development by staying focused on the school vision and reacting constructively to adversity and barriers to success, acknowledging and learning from errors, constructively managing disagreement and dissent with leadership, and bringing together people and resources with the common belief that the organization can grow stronger when it applies knowledge, skills, and productive attitudes in the face of adversity.   |
| Indicator 10.2 - <u>Professional Learning</u> : The leader engages in professional learning that improves professional practice in alignment with the needs of the school and system and demonstrates explicit improvement in specific performance areas based on previous evaluations and formative feedback.   |
| Indicator 10.3 - <u>Commitment</u> : The leader demonstrates a commitment to the success of all students, identifying barriers and their impact on the well being of the school, families, and local community.  |
| Indicator 10.4 - <u>Professional Conduct</u> : The leader adheres to the Code of Ethics of the Education Profession in Florida (Rule 6B-1.001, F.A.C.) and to the Principles of Professional Conduct for the Education Profession (Rule 6B-1.006, F.A.C.).   |

# The Florida School Leader Assessment

**Districts implement the Florida School Leader Assessment (FSLA) processes listed below to provide:**

- **Guides to self-reflection** on what's important to success as a school leader
- **Criteria for making judgments** about proficiency that are consistent among raters
- **Specific and actionable feedback** from colleagues and supervisors focused on improving proficiency
- **Summative evaluations** of proficiency and determination of performance levels

## **The seven steps of the FSLA are described below:**

**Step 1: Orientation:** The orientation step can occur at the start of a new work year, at the start of a new school year, or at the start of assignment (or new assignment) as a principal. The depth and detail of orientation may vary based on prior training and whether changes in evaluation model have occurred, but an annual orientation or re-fresher orientation should occur. The orientation step should include:

- District provided orientation and training on the Florida Principal Leadership Standards (FPLS), Student Success Act, applicable State Board of Education rules, Race To The Top (RTTT) requirements, and district specific expectations that are subject to the evaluation system.
- All leaders and evaluators should have access to the content and processes that are subject to the evaluation system. All leaders and evaluators should have access to the same information and expectations. This may be provided by the leader's review of district evaluation documents, online modules, mentor sessions, or face-to-face training where awareness of district processes and expectations are identified.
- At the orientation step, each school leader is expected to engage in personal reflection on the connection between his/her practice and the FPLS and the indicators in the district evaluation system. This is a "what do I know and what do I need to know" self-check aligned with the FPLS and the district evaluation system indicators.

**Step 2: Pre-evaluation Planning:** After orientation processes, the leader and evaluator prepare for a formal conference to address evaluation processes and expectations. Two things occur:

- Leader's self-assessment from the orientation step moves to more specific identification of improvement priorities. These may be student achievement priorities or leadership practice priorities. The leader gathers any data or evidence that supports an issue as an improvement priority. This may include School Improvement Plan (SIP), student achievement data, prior faculty evaluations, and evidence of systemic processes that need work.
- The evaluator articulates a perspective on strengths and growth needs for the leader and for student achievement issues at the school.

**Step 3: Initial Meeting between evaluatee and evaluator:** A meeting on "expectations" held between leader and supervisor to address the following:

- Evaluation processes are reviewed and questions answered.
- Perceptions (of both) from Pre-evaluation Planning are shared.
- Domain, Proficiency Areas, Indicators from evaluation system that will be focus issues are identified and discussed.
- Student growth measures that are of concern are discussed.
- Relationship of evaluation indicators to the SIP and district-supported initiatives are discussed.
- Such a meeting is typically face-to-face but may also be via tele-conference or phone. (Meeting issues can be clarified via texts and emails as appropriate.)
- Proposed targets for Deliberate Practice (additional metric) are discussed and determined, or a timeframe for selection of Deliberate Practice targets are set. While

a separate meeting or exchange of information may be implemented to complete the Deliberate Practice targets, they should be discussed at the Step 3 Conference given their importance to the leader's growth and the summative evaluation.

**Step 4: Monitoring, Data Collection, and Application to Practice:** Evidence is gathered that provides insights on the leader's proficiency on the issues in the evaluation system by those with input into the leader's evaluation.

- The leader shares with supervisor evidence on practice on which the leader seeks feedback or wants the evaluator to be informed.
- The evaluator accumulates data and evidence on leader's actions or impact of leader's actions during the routine conduct of work. Such data and evidence may come from site visits, be provided by the leader, from formal or informal observations, or from evidence, artifacts or input provided by others. The accumulated information is analyzed in the context of the evaluation system indicators.
- As evidence and observations are obtained that generate specific and actionable feedback, it is provided to the leader in a timely manner. Feedback may be provided face-to-face, via FSLA forms, via email or telephone, or via memoranda.
- Collegial groups, mentors, communities of practice (CoPs), professional learning communities (PLCs), and lesson study groups in which the leader participates may provide specific and actionable feedback for proficiency improvement.
- These monitoring actions occur before and continue after the mid-year Progress Check (step 5).

**Step 5: Mid-year Progress Review between evaluatee and evaluator:** At a mid-year point, a progress review is conducted.

- Actions and impacts of actions taken on priorities identified in Step 3 Initial Meeting are reviewed.
- Any indicators which the evaluator has identified for a specific status update are reviewed. (The leader is given notice of these indicators prior to the Progress Check, as the feedback expected is more specific than that for the general indicator overview.)
- The leader is prepared to provide a general overview of actions/processes that apply to all of the domains and proficiency areas and may include any of the indicators in the district system. Any indicator that the evaluator or the leader wishes to address should be included.
- Strengths and progress are recognized.
- Priority growth needs are reviewed.
- Where there is no evidence related to an indicator and no interim judgment of proficiency can be provided, a plan of action must be made:
  - If the evaluator decides that the absence of evidence indicates unsatisfactory proficiency because actions or impacts of action should be evident if leader was proficient, the leader is provided notice that the indicator(s) will be addressed in a follow-up meeting.
  - The absence of evidence is explained by lack of opportunity for the evaluator to note anything relevant, and leader is asked to provide follow-up data on the indicator prior to the year-end conference.

- The lack of evidence on one indicator is balanced by substantial evidence on other indicators in the same proficiency area. No follow-up is required until evidence supporting a Needs Improvement (NI) or Unsatisfactory (U) rating emerges.
- Any actions or inactions which might result in an unsatisfactory rating on a domain or proficiency area if not improved are communicated.
- Any indicators for which there is insufficient evidence to rate proficiency at this stage, but which will be a priority for feedback in remainder of the year, are noted.
- *FSLA Feedback and Protocol Form* (or district equivalent) is used to provide feedback on all indicators for which there is sufficient evidence to rate proficiency. Notes or memorandums may be attached to the forms as appropriate to reflect what is communicated in the Progress Check.

**Step 6: Prepare a consolidated performance assessment:** The summative evaluation form is prepared by the evaluator and a performance rating assigned.

- Consider including relevant and appropriate evidence by any party entitled to provide input into the leader's evaluation.
- Review evidence on leader's proficiency on indicators.
- Use accumulated evidence and rating on indicators to rate each proficiency area.
- Consolidate the ratings on proficiency areas into domain ratings.
- Consolidate Domain ratings, using FSLA weights, to calculate a FSLA score.

**Step 7: Year-end Meeting between evaluatee and evaluator:** The year-end meeting addresses the FSLA score, the Deliberate Practice Score and Student Growth Measures.

- The FSLA score is explained.
- The leader's growth on the Deliberate Practice targets is reviewed and a Deliberate Practice Score assigned.
- The FSLA Score and Deliberate Practice Score are combined (as per weighting formula) to generate a Leadership Practice Score.
- If the Student Growth Measurement (SGM) score is known, inform the leader how the Leadership Practice Score and SGM Score combine to a summative performance level of Highly Effective, Effective, Needs Improvement, or Unsatisfactory.
- If SGM score is not known, inform leader of possible performance levels based on known Leadership Practice Score and various SGM outcomes.
- If recognitions or employment consequences are possible based on performance level, inform leader of district process moving forward.
- Review priority growth issues that should be considered at next year's step 2 and step 3 processes.

### Directions for use of this Guide

#### **MAKING NO CHANGES!**

This guide may be used “as is” if using the state model FSLA and Deliberate Practice metric.

ALL DISTRICTS WILL NEED TO ADD DISTRICT DECISIONS ON CUT SCORES FOR SCHOOL LEADERS IN SECTION FOUR OF THE SCORING GUIDE

#### **MAKING CHANGES IN SCORING, FSLA OR DELIBERATE PRACTICE?**

1. Districts may modify the scoring process described in this guide or use a district developed scoring process (which will be described and included in documentation submitted with Review and Approval Checklist)
2. If any aspects of the FSLA or Deliberate Practice metrics are modified by the district, the district should review scoring processes to determine if any of the scoring processes need adjustment based on district changes to the metrics. Submit a scoring process that works with your modified metrics.
3. If a district employs a phase-in option on the FSLA and/or Deliberate Practice metric, the district will need to amend the scoring process to reflect the phase-in decisions.

## Scoring Guide for State Model Metrics

An evaluation system that is aligned with the purpose of Section 1012.34, F.S. and applicable State Board rules (e.g., 6A-5.065, 6A-5.080) has two functions:

- Providing quality feedback during a work year that focuses improvement effort on essential proficiencies.
- Generating an annual summative performance level based on the proficiency exhibited during the work year.

For Florida School Leaders being evaluated using the FSLA, the Florida state model for principal evaluation, the summative annual performance level is based on two factors:

- **Student Growth Measures Score (SGM):** The performance of students under the leader’s supervision represents 50% of the annual performance level. The specific growth measures used and “cut points” applied must conform to Florida Statutes and State Board rules.
- **Leadership Practice Score:** An assessment of the leader’s proficiency on the Florida Principal Leadership Standards (FPLS). This is based on two metrics:
  - The Florida School Leader Assessment (FSLA): A system for feedback and growth based on the leader’s work and impact of that work on others. The FSLA contributes 80% of the Leadership Practice Score.
  - Deliberate Practice (DP): Deep learning and growth on a few very specific aspects of educational leadership. The DP Score contributes 20% of the Leadership Practice Score.

### Summary of Scoring Processes

|   |   |
|---|---|
| 1. Score Indicators                       | Based on rubrics in the “long forms”  |
| 2. Score Proficiency Areas                | Based on tables in this guide   |
| 3. Score Domains                          | Based on tables in this guide   |
| 4. Score FSLA                             | Based on formula in this guide  |
| 5. Score Deliberate Practice Metric       | Based on directions in this guide   |
| 6. Calculate Leadership Practice Score    | Combine FSLA and Deliberate Practice Scores<br>Based on formula in this guide |
| 7. Calculate Student Growth Measure Score | Use district cut points for SGM   |
| 8. Assign Proficiency Level rating label  | Combine Leadership and SGM scores   |

### **What this FSLA Scoring Guide Covers:**

Section One: How to “score” the FSLA

Section Two: How to “score” Deliberate Practice

Section Three: Leadership Practice Score

Section Four: Annual Performance Rating

## **Section One: How to Score the FSLA**

**District Options:** The scoring process for the FSLA is one of a number of alternative scoring methods. Districts using the FSLA may use this scoring process or design a district system for scoring the FSLA. Use of the FSLA and use of the FSLA Scoring system are separate decisions. If using the FSLA scoring process, reference this scoring guide in element II-D in the “Review and Approval Checklist for Instructional Personnel and School Administrator Evaluation Systems” when submitting for review and approval. If your scoring model is adapted or is a district-developed scoring process, include your document(s) that describe your scoring process when you submit for review.

### **About the FSLA Scoring Process**

The state scoring model has these features:

- The performance labels used in Section 1012.34, F.S. for summative performance levels are also used in the FSLA to summarize feedback on domains, proficiency areas, and indicators:
  - Highly Effective (HE)
  - Effective (E)
  - Needs Improvement (NI)
  - Unsatisfactory (U)
- Direct Weighting: The FSLA score is based on ratings for each of four domains, but the system specifically gives added weight to Domain 2: Instructional Leadership: The weights are:
  - Domain 1: Student Achievement: 20%
  - Domain 2: Instructional Leadership: 40%
  - Domain 3: Organizational Leadership: 20%
  - Domain 4: Professional and Ethical Behavior: 20%
- Embedded Weighting: The use of Domain scores to generate an FSLA score results in embedded weighting as the Domains have different numbers of indicators. For example: Domain 1 has eight indicators, Domain 3 has 16 indicators and Domain 4 has four indicators, but each Domain contributes 20% to the FLSA score. The result of this is:
  - Domain 2 indicators have the most impact on the FSLA results due to direct weighing. There are 17 indicators, but the Domain is weighted at 40%, thus magnifying the impact of that domain on the final rating.
  - Domain 4 has the next highest level of impact due to embedded weighting. There are only four indicators in this Domain, but the Domain contributes 20% of the FSLA score.
  - Domain 1 has more impact than Domain 3 since Domain 1 has eight indicators and Domain 3 has 16 indicators, but each Domain contributes 20% of the FSLA score.
- Proficiency on Indicators leads to an FSLA Score.
  - Ratings on indicators (using rubrics in the FSLA) are combined to generate a rating (HE, E, NI, or U) on each Proficiency Area.
  - Ratings on Proficiency Areas are combined (using the tables in this scoring guide) to generate a Domain Rating.
  - Ratings on Domains are combined (using tables in this scoring guide) to generate a FLSA Score.

## **How to determine an FSLA Score.**

Generating a score for the FSLA has four steps:

### **Step One: Rate each Indicator.**

Start with judgments on the indicators. Indicators in each Proficiency Area are rated as HE, E, NI, or U based on accumulated evidence.

- The FSLA supports this indicator proficiency rating process with rubrics for distinguishing between the levels (HE, E, NI, or U) that are specific to the indicator.
- To guide the rating decision, illustrative examples of leadership actions and illustrative examples of impacts of leadership actions are provided.
- The rubrics for indicators and the illustrative examples are found in the “long forms” – the Data Collection and Feedback Protocols” posted on [www.floridaschoolleaders.org](http://www.floridaschoolleaders.org) (in the Learning Library, Resources Menu: Evaluation Resources – School Leaders).
- Ratings can be recorded on the long form or the short form (all FSLA forms and supporting resources are found on [www.floridaschoolleaders.org](http://www.floridaschoolleaders.org)).

### **Rating Labels: What do they mean?**

**The principal should complete a self-assessment by scoring each of the indicators. The evaluator also will score each of the indicators. In an end-of-the year conference, their respective ratings are shared and discussed. The evaluator then determines a final rating for each indicator and, using the procedures in this scoring guide, calculates an FSLA score.**

### **Indicator ratings:**

When assigning ratings to indicators in the FSLA, the evaluator should begin by reviewing the indicator rubrics. These are “word-picture” descriptions of leadership behaviors in each of the four levels of leadership behavior—“Highly Effective”, “Effective”, “Needs Improvement”, and “Unsatisfactory.” The evaluator finds the level that best describes performance related to the indicator.

**The rating rubrics provide criteria that distinguish among the proficiency levels on the indicator. The illustrative examples of Leadership Evidence and Impact Evidence for each indicator provide direction on the range of evidence to consider. The rating for each indicator is the lowest rating for which the “word-picture” descriptors are appropriate and representative descriptions of what was observed about the leader’s performance.**

**The ratings on the indicators aggregate to a rating on the Proficiency Areas based on tables in this guide. The ratings on the Proficiency Areas within a Domain aggregate to a domain rating, using tables and formulas in this scoring guide.**

**The FSLA rubrics are designed to give principals a formative as well as a summative assessment of where they stand in all leadership performance areas and detailed guidance on how to improve. While they are not checklists for school visits by the principal’s supervisor, they do reflect the key behaviors about which supervisors and principals should be conversing frequently throughout the year. Moreover, these behavioral leadership descriptions will form the basis for principal and supervisor coaching and mentoring sessions.**

**Distinguishing between proficiency ratings:**

The “Effective” level describes leadership performance that has local impact (i.e., within the school) and meets organizational needs. It is adequate, necessary, and clearly makes a significant contribution to the school. The majority of the leadership workforce will be in the effective area once they have a clear understanding of what the FPLS require and have made the adjustments and growth necessary to upgrade performance. The previous rating system of “satisfactory “ and “unsatisfactory” does not provide any guidance as to where those who repeat past performance levels will fall in the shift to research and standards-based assessments. Both school leaders and evaluators should reflect on performance based on the new FPLS and the rubrics of the FSLA.

The “Highly Effective” level is reserved for truly outstanding leadership as described by very demanding criteria. Performance at this level is dramatically superior to “Effective” in its impact on students, staff members, parents, and the school district. Highly effective leadership results from recurring engagement with “deliberate practice.” In brief, the “Highly Effective” leader helps every other element within the organization become as good as they are. In normal distributions, some leaders will be rated highly effective on some indicators, but very few leaders will be rated highly effective as a summative performance level.

The “Needs Improvement” level describes principals who understand what is required for success, are willing to work toward that goal, and, with coaching and support, can become proficient. Needs improvement rating will occur where expectations have been raised and standards made more focused and specific. Professional behavior and focused professional learning will guide school leaders toward increasingly effective performance.

Performance at the “Unsatisfactory” level describe leaders who do not understand what is required for proficiency or who have demonstrated through their actions and/or inactions that they choose not to become proficient on the strategies, knowledge bases, and skills sets needed for student learning to improve and faculties to develop.

**Step Two: Rate each Proficiency Area.**

Ratings on the indicators in a Proficiency Area are combined to assign a proficiency level (HE, E, NI, or U) to a Proficiency Area: The distribution of indicator ratings within a Proficiency Area result in a Proficiency Area Rating. Since the number of indicators in a Proficiency Area varies, the following formulas are applied to assign Proficiency Area ratings. For each Proficiency Area, use the appropriate table.

Table 1

|   |                 |                 |              |
|---|-----------------|-----------------|--------------|
| <b>For Proficiency Areas 1,2,5,7,9 and 10 with four Indicators, each Proficiency Area is rated:</b> |                 |                 |              |
| <b>Highly Effective (HE) if: three or more indicators are HE and none are less than E.</b>          |                 |                 |              |
| Examples:   | HE+HE+HE+HE= HE | HE+HE+HE+E=HE   |              |
| <b>Effective (E) if: at least three are E or higher and no more than one are NI. None are U.</b>    |                 |                 |              |
| Examples:   | E+E+E+HE=E      | E+E+E+NI=E      | E+E+E+E=E    |
| <b>Needs Improvement (NI) if: Criteria for E not met and no more than one is U.</b>                 |                 |                 |              |
| Examples:   | E+E+NI+NI=NI    | HE+HE+NI+NI =NI | HE+E+U+NI=NI |
| <b>Unsatisfactory (U) if: two or more are U.</b>  |                 |                 |              |
| Examples:   | HE+U+U+HE=U     | E+NI+U+U=U      | E+E+U+U=U    |

For the Proficiency Areas with fewer or more than four indicators, use the appropriate table below:

Table 2

|   |  |
|---|--|
| <b>For proficiency Area 3 with six Indicators, each Proficiency Area is rated:</b>              |  |
| <b>Highly Effective (HE) if: four or more indicators are HE and none are less than E.</b>       |  |
| Examples:   | HE+HE+HE+HE+HE=HE                      HE+HE+HE+HE+E+E=HE                |
| <b>Effective (E) if: at least four are E or higher and no more than two are NI. None are U.</b> |  |
| Examples:   | HE+HE+E+E+E=E                      E+E+E+NI+NI=E                         |
| <b>Needs Improvement (NI) if: Criteria for E not met and no more than two are U.</b>            |  |
| Examples:   | HE+HE+NI+NI+NI=NI    NI+NI+NI+U+U=NI    E+E+E+NI+NI=NI    HE+HE+E+E+U=NI |
| <b>Unsatisfactory (U) if: three or more are U.</b>  |  |
| Examples:   | HE+HE+HE+U+U=U    NI+NI+NI+U+U=U (*)                                     |

Table 3

|   |   |
|---|---|
| <b>For Proficiency Area 4 with seven Indicators, each Proficiency Area is rated:</b>            |   |
| <b>Highly Effective (HE) if: five or more indicators are HE and none are less than E.</b>       |   |
| Examples:   | HE+HE+HE+HE+HE+E=HE                                       |
| <b>Effective (E) if: at least five are E or higher and no more than two are NI. None are U.</b> |   |
| Examples:   | HE+HE+E+E+NI+NI=E    E+E+E+E+NI+NI=E                      |
| <b>Needs Improvement (NI) if: Criteria for E not met and no more than two are U.</b>            |   |
| Examples:   | E+E+E+NI+NI=NI    HE+HE+E+E+U+U=NI    HE+HE+HE+HE+HE+U=NI |
| <b>Unsatisfactory (U) if: three or more are U.</b>  |   |
| Examples:   | HE+HE+HE+U+U=U    NI+NI+NI+U+U=U (*)                      |

(\*) scoring tables updated 8/27/12

Table 4

|   |   |
|---|---|
| <b>For Proficiency Area 6 with five Indicators, each Proficiency Area is rated:</b>             |   |
| <b>Highly Effective (HE) if: four or more indicators are HE and none are less than E.</b>       |   |
| Examples:   | HE+HE+HE+HE=HE                      HE+HE+HE+E=HE     |
| <b>Effective (E) if: at least four are E or higher and no more than one are NI. None are U.</b> |   |
| Examples:   | E+E+E+E=E    HE+HE+E+E=E    HE+E+E+NI=E    E+E+E+NI=E |
| <b>Needs Improvement (NI) if: Criteria for E not met and no more than one is U.</b>             |   |
| Examples:   | HE+HE+NI+NI=NI    E+E+NI+NI+U=NI    NI+NI+NI+U=NI     |
| <b>Unsatisfactory (U) if: two or more are U.</b>  |   |
| Examples:   | HE+HE+HE+U+U=U                      NI+NI+NI+U+U=U    |

Table 5

|  |   |
|--|---|
| <b>For Proficiency Area 8 with three Indicators, each Proficiency Area is rated:</b>         |   |
| <b>Highly Effective (HE) if: two or more indicators are HE and none are less than E.</b>     |   |
| Examples:  | HE+HE+HE=HE                      HE+HE+E=HE           |
| <b>Effective (E) if: two or more are E or higher and no more than one is NI. None are U.</b> |   |
| Examples:  | E+E+E=E    E+E+HE=E    E+HE+NI=E    HE+HE+NI=E        |
| <b>Needs Improvement (NI) if: Criteria for E not met and no more than one is U.</b>          |   |
| Examples:  | NI+NI+NI=NI    NI+NI+U=NI    HE+E+U=NI    HE+NI+NI=NI |
| <b>Unsatisfactory (U) if: two or more are U.</b>   |   |
| Examples:  | HE+U+U=U    NI+U+U=U                                  |

When you have a rating (HE, E, NI, or U) for each Proficiency Area in a Domain, you then generate a Domain rating.

### **Step Three: Rate Each Domain.**

Domains are rated as HE, E, NI, or U based on the distribution of ratings on Proficiency Areas within the Domain. The tables below provide rating criteria for each FSLA Domain.

Table 6

| Domain Rating         | <b>Domain 1: Student Achievement</b> (Two Proficiency Areas)   |
|-----------------------|--|
| Highly Effective if:  | Both Proficiency Areas rated HE  |
| Effective if:         | <ul style="list-style-type: none"><li>One Proficiency Area rated HE and one Effective, or</li><li>Both rated Effective</li></ul>                 |
| Needs Improvement if: | <ul style="list-style-type: none"><li>One Proficiency Area rated HE or E and one rated NI or U</li><li>Both Proficiency Areas rated NI</li></ul> |
| Unsatisfactory if:    | <ul style="list-style-type: none"><li>One Proficiency Area rated NI and the other is rated U</li><li>Both are rated U</li></ul>                  |

Table 7

| Domain Rating         | <b>Domain 2: Instructional Leadership</b> (Three Proficiency Areas)   |
|-----------------------|---|
| Highly Effective if:  | <ul style="list-style-type: none"><li>All three Proficiency Areas are HE</li><li>Two Proficiency Areas rated HE and one E</li></ul>   |
| Effective if:         | <ul style="list-style-type: none"><li>Two Proficiency Area rated E and one Effective or NI</li><li>All three Proficiency Areas rated E</li></ul>  |
| Needs Improvement if: | <ul style="list-style-type: none"><li>Any two Proficiency Areas rated NI</li><li>One Proficiency Area rated NI, one Proficiency Area rated U and one Proficiency Area rated E or HE</li></ul> |
| Unsatisfactory if:    | <ul style="list-style-type: none"><li>Two or more Proficiency Areas rated U</li></ul>   |

Table 8

| Domain Rating         | <b>Domain 3: Organizational Leadership</b> (Four Proficiency Areas)  |
|-----------------------|--|
| Highly Effective if:  | <ul style="list-style-type: none"><li>All four Proficiency Areas are HE</li><li>Three Proficiency Areas rated HE and one E</li></ul>   |
| Effective if:         | <ul style="list-style-type: none"><li>Two Proficiency Areas rated E and two rated HE</li><li>All four Proficiency Areas rated E</li><li>Three Proficiency Areas rated E and one rated either NI or HE</li></ul>  |
| Needs Improvement if: | <ul style="list-style-type: none"><li>Two Proficiency Areas rated E and two rated NI</li><li>Any three Proficiency Areas rated NI</li><li>One Proficiency Area rated NI, one Proficiency Area rated U and two Proficiency Area rated E or HE</li></ul> |
| Unsatisfactory if:    | <ul style="list-style-type: none"><li>Two or more Proficiency Areas rated U</li></ul>  |

Table 9

| Domain Rating         | <b>Domain 4: Professional Behaviors</b> (One Proficiency Area) |
|-----------------------|--|
| Highly Effective if:  | If Proficiency Area 10 rated HE                                |
| Effective if:         | If Proficiency Area 10 rated E                                 |
| Needs Improvement if: | If Proficiency Area 10 rated NI                                |
| Unsatisfactory if:    | If Proficiency Area 10 rated U                                 |

When you have determined Domain ratings, you then combine those ratings to generate an FSLA score.

**Step 4: Calculate the FSLA Score.**

- In Step One, proficiency ratings for indicators were made based on an assessment of available evidence and the rating rubrics.
- In Step Two, the apportionment of Indicators ratings, using the tables provided, generated a rating for each Proficiency Area within a Domain.
- In Step Three, Domain ratings were generated. All of these steps were based on evidence on the indicators and scoring tables.

At the FSLA scoring stage the model shifts to a weighted point system. Points are assigned to Domain ratings, direct weights are employed, and scores are converted to a numerical scale. The following point model is used:

Table 10

| DOMAIN RATING                        | POINTS ASSIGNED |
|--------------------------------------|-----------------|
| A Domain rating of Highly Effective  | 3 points        |
| A Domain rating of Effective         | 2 points        |
| A Domain rating of Needs Improvement | 1 point         |
| A Domain rating of Unsatisfactory    | 0 points        |

The Domain points are multiplied by the Domain’s direct weight: The rating is entered in column 2 (“Rating”), the points in column 3 (“Points”), and a weighted score calculated in column 5.

Table 11

| Domain                                      | Rating | Points | Weight | Domain Weighted Score |
|---|--------|--------|--------|-----------------------|
| Domain I: Student Achievement               |        |        | .20    |                       |
| Domain 2: Instructional Leadership          |        |        | .40    |                       |
| Domain 3: Organizational Leadership         |        |        | .20    |                       |
| Domain 4: Professional and Ethical Behavior |        |        | .20    |                       |

**Example**

Table 12

| Domain                                    | Rating | Points | Weight | Domain Weighted Score |
|---|--------|--------|--------|-----------------------|
| Domain I: Student Achievement             | HE     | 3      | .20    | .6                    |
| Domain 2: Instructional Leadership        | E      | 2      | .40    | .8                    |
| Domain 3: Organizational Leadership       | HE     | 3      | .20    | .6                    |
| Domain 4: Professional & Ethical Behavior | NI     | 1      | .20    | .2                    |

After a Domain Weighted Score is calculated, the scores are converted to a 100 point scale. This process results in a FSLA Score range of 0 to 300 Points.

This table illustrates the conversion of a Domain Weighted value to a 100 point scale.

**Example**

Table 13

| Domain  | Rating | Points | Weight | Weighed value | Convert to 100 point scale | Domain Score |
|---|--------|--------|--------|---------------|----------------------------|--------------|
| Domain 1<br>Student Achievement               | HE     | 3      | .20    | .6            | x 100                      | 60           |
| Domain 2<br>Instructional Leadership          | E      | 2      | .40    | .8            | x 100                      | 80           |
| Domain 3<br>Organizational Leadership         | HE     | 3      | .20    | .6            | x 100                      | 60           |
| Domain 4<br>Professional and Ethical Behavior | NI     | 1      | .20    | .2            | x 100                      | 20           |
| <b>FSLA Score</b>                             |        |        |        |               |                            | <b>220</b>   |

The Domain scores are added up and an FSLA score determined. The FSLA Score is converted to an FSLA rating of HE, E, NI, or U based on this scale:

Table 14

| FSLA SCORE | FSLA Proficiency Rating |
|------------|-------------------------|
| 240 to 300 | Highly Effective        |
| 151 to 239 | Effective               |
| 75 to 150  | Needs Improvement       |
| 0 to 74    | Unsatisfactory          |

The FSLA score is combined with a Deliberate Practice Score to generate a Leadership Practice Score. Section Three provides scoring processes for Deliberate Practice.

The FSLA score will be 80% of the Leadership Score.

The Deliberate Practice Score will be 20% of the Leadership Practice.

(Note: If there is no Deliberate Practice or other additional metric at this time, then the FSLA score is the Leadership Practice Score.)

## Section Two: How to Score Deliberate Practice

**NOTE: This section applies IF the district is using the state model deliberate practice metric. If deliberate practice is not in use at this time, skip to Section Three.**

### Deliberate Practice Score

- The DP score is 20% of the Leadership Practice Score.
- The DP metric will have 1 to 4 specific growth targets.
- Each target will have progress points (much like a learning goal for students).
- The targets will have equal weight and the leader’s growth on each will be assessed as HE, E, NI, or U.

Table 15

| Scoring a DP Growth Target | Rating Rubrics  |
|----------------------------|---|
| Highly Effective           | Target met, all progress points achieved, and verifiable improvement in leaders performance |
| Effective                  | Target met, progress points achieves....impact not yet evident                              |
| Needs Improvement          | Target not met, but some progress points met  |
| Unsatisfactory             | Target not met, nothing beyond 1 progress point   |

A DP Score has an upper limit of 300 points. Each target is assigned an equal proportion of the total points. Therefore the points for each target will vary based on the number of targets.

Table 16

| Number of growth targets | Maximum points per target | Maximum Point Range |
|--------------------------|---------------------------|---------------------|
| One Target               | 300                       | 300                 |
| Two Targets              | 150 (300/2)               | 300 (150 x 2)       |
| Three Targets            | 100 (300/3)               | 300 (100 x 3)       |
| Four Targets             | 75 (300/4)                | 300 (75 x 4)        |

Target values based on Rating (HE, E, NI, or U) and Number of Targets.

This chart shows the points earned by a growth target based on a rating Level (HE, E, NI, or U) **and** the total number of targets in the DP plan.

Table 17

| Rating | Point values           | If 1 target | If 2 targets | If 3 targets | If 4 targets |
|--------|------------------------|-------------|--------------|--------------|--------------|
| HE     | max points             | 300         | 150          | 100          | 75           |
| E      | .80 of max             | 240         | 120          | 80           | 60           |
| NI     | .5 of max              | 150         | 75           | 50           | 37.5         |
| U      | .25 if some progress   | 75          | 37.5         | 25           | 18.75        |
| U      | .0 if 1 progress stage | 0           | 0            | 0            | 0            |

A DP score is based on ratings of the targets and the points earned for each rating.

### Examples

If Three Growth Targets:

Table 18

| DP Target                              | Rating | Points (based on table 17 – column 5 ) * |
|--|--------|--|
| DP TARGET 1                            | HE     | 100                                      |
| DP TARGET 2                            | E      | 80                                       |
| DP TARGET 3                            | NI     | 50                                       |
| DP Score (target score added together) |        | 230                                      |

**\* Points available vary based on total number of growth targets. Use Table 17 to select point values.**

Deliberate Practice rating

Table 19

| DP Score Range | DP Rating         |
|----------------|-------------------|
| 241 to 300     | Highly Effective  |
| 151 to 240     | Effective         |
| 75 to 150      | Needs Improvement |
| 0 to 74        | Unsatisfactory    |

**Summary**

80% of the Leadership Practice Score is based on the Florida School Leader Assessment Proficiency Score.

20% of the Leadership Practice Score is based on the Deliberate Practice Growth Score.

## **Section Three How to Calculate a Leadership Practice Score**

A. FLSA SCORE:

\_\_\_\_\_ x .80 = \_\_\_\_\_

B. Deliberate Practice Score:

\_\_\_\_\_ x .20 = \_\_\_\_\_

C. Add scores from calculations A and B above to obtain Leadership Practice Score

---

Example:

FLSA score of 220 x .80 = 176

DP score of 230 x .20 = 46

Leadership Practice Score is 222.

| Leadership Score Range | Leadership Practice Rating |
|------------------------|----------------------------|
| 240 to 300             | Highly Effective           |
| 151 to 239             | Effective                  |
| 75 to 150              | Needs Improvement          |
| 0 to 74                | Unsatisfactory             |

## Section Four How to Calculate an Annual Performance Level

1: Enter Cut scores for Student Growth Measures using a 300 point scale:

Above **XXX** = Highly effective

**XXX to XXX** = Effective

**XXX to XXX** = Needs Improvement

**Below XXX** = Unsatisfactory

Step 2: Enter Leadership Practice Score: \_\_\_\_\_

Step 3: Add SGM score and Leadership Practice Score

Example: SGM score of 212 + Leadership Practice score of 222 = 432 performance score

Performance score of 432 = rating of effective

| Performance Score ranges | Performance Level Rating |
|--------------------------|--------------------------|
| 480 to 600               | Highly Effective         |
| 301 to 479               | Effective                |
| 150 to 300               | Needs Improvement        |
| 0 to <b>149</b>          | Unsatisfactory           |

Step 4: Enter rating on Evaluation form

## **Florida School Leader Assessment Data Collection and Feedback Protocol Forms for Domains 1, 2, 3 and 4**

These forms provide guidance to school leaders and evaluators on what is expected regarding each indicator.

The forms provide:

- The text of all Proficiency Areas and FSLA indicators
- Rubrics to distinguish among proficiency levels
  - A generic rubric that applies to each indicator and
  - An indicator specific rubric that applies to the individual indicator
- Narratives to assist in understanding the focus and priorities embedded in the FSLA
- Illustrative examples of Leadership Actions and Impacts on Others of Leadership Action that assist in understanding how the issue(s) in an indicator are observed “on the job”.
- Reflection questions to guide personal growth

## Domain 1 - Student Achievement

Narrative: Student achievement results in the student growth measures (SGM) segment of evaluation represent student results on specific statewide or district assessments or end-of-course exams. The leadership practice segment of the evaluation, through the proficiency areas and indicators in this domain, focuses on leadership behaviors that influence the desired student results.

**Proficiency Area 1. Student Learning Results: Effective school leaders achieve results on the school’s student learning goals and direct energy, influence, and resources toward data analysis for instructional improvement, development and implementation of quality standards-based curricula.**

Narrative: This proficiency area focuses on the leader’s knowledge and actions regarding academic standards, use of performance data, planning and goal setting related to targeted student results, and capacities to understand what results are being obtained. This proficiency area is aligned with Florida Principal Leadership Standard #1.

**Indicator 1.1 - Academic Standards: The leader demonstrates understanding of student requirements and academic standards (Common Core Standards and Next Generation Sunshine State Standards).**

Narrative: Standards-based instruction is an essential element in the state’s plan of action for preparing Florida’s students for success in a 21st century global economy. This indicator is focused on the leader’s understanding of what students are to know and be able to do. School leaders need to know the academic standards teachers are to teach and students are to master.

Note: Every credit course has specific academic standards assigned to it. Common Core Standards and Next Generation Sunshine State Standards (NGSSS) assigned to each course are found at [www.floridastandards.org](http://www.floridastandards.org).

### Rating Rubric

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|--|--|---|
| Every faculty meeting and staff development forum is focused on student achievement on the Common Core Standards and NGSSS, including periodic reviews of student work.<br><br>The leader can articulate which Common Core Standards are designated for implementation in multiple courses. | The link between standards and student performance is in evidence from the alignment in lesson plans of learning goals, activities and assignments to course standards.<br><br>The leader is able to recognize whether or not learning goals and student activities are related to standards in the course descriptions. | Common Core Standards and NGSSS are accessible to faculty and students. Required training on standards-based instruction has been conducted, but the link between standards and student performance is not readily evident to many faculty or students.<br><br>Assignments and activities in most, but not all courses relate to the standards in the course descriptions. | Classroom learning goals and curriculum are not monitored for alignment to standards or are considered a matter of individual discretion regardless of course description requirements.<br><br>The leader is hesitant to intrude or is indifferent to decisions in the classroom that are at variance from the requirements of academic standards in the course descriptions.<br><br>Training for the faculty on standards-based instruction does not occur and the leader does not demonstrate knowledge of how to access standards. |
| <b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:  |  | <b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:  |   |
| <ul style="list-style-type: none"> <li>School leader extracts data on standards associated with courses in the master schedule from the course descriptions and monitor for actual implementation.</li> </ul>   |  | <ul style="list-style-type: none"> <li>Lesson plans identify connections of activities to standards.</li> <li>Teacher leaders’ meeting records verify recurring review of progress on state standards.</li> </ul>  |   |

**Indicator 1.2 – Performance Data: The leader demonstrates the use of student and adult performance data to make instructional leadership decisions.**

Narrative: This indicator addresses the leader's proficiency in use of student and adult performance data to make instructional leadership decisions. What does test data and other sources of student performance data related to targeted academic goals say about what is needed? What does data about teacher proficiency or professional learning needs indicate needs to be done? The focus is what the leader does with data about student and adult performance to make instructional decisions that impact student achievement.

**Rating Rubric**

| <p><b>Evidence Log</b> (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):</p>   |   |   |  |

### Reflection Questions for Indicator 1.2

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|--|---|---|--|
| How do you aggregate data about teacher proficiencies on instructional practices to stimulate dialogue about what changes in instruction are needed in order to improve student performance? | How do you verify that all faculty have sufficient grasp of the significance of student performance data to formulate rational improvement plans? | By what methods do you enable faculty to participate in useful discussions about the relationship between student performance data and the instructional actions under the teachers' control? | How much of the discussions with district staff about student performance data are confusing to you and how do you correct that? |

**Indicator 1.3 – Planning and Goal Setting: The leader demonstrates planning and goal setting to improve student achievement.**

Narrative: Knowing the standards and making use of performance data is expected to play a significant role in planning and goal setting. This indicator is focused on the leader's alignment of planning and goal setting with improvement of student achievement.

**Rating Rubric**

|   |  |  |   |
|---|--|--|---|
| <p><b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.</p>   | <p><b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.</p>   | <p><b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.</p>   | <p><b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.</p>  |
| <p>The leader routinely shares examples of specific leadership, teaching, and curriculum strategies that are associated with improved student achievement.</p> <p>Other leaders credit this leader with sharing ideas, coaching, and providing technical assistance to implement successful new initiatives supported by quality planning and goal setting.</p>   | <p>Goals and strategies reflect a clear relationship between the actions of teachers and leaders and the impact on student achievement. Results show steady improvements based on these leadership initiatives.</p> <p>Priorities for student growth are established, understood by staff and students, and plans to achieve those priorities are aligned with the actual actions of the staff and students.</p> | <p>Specific and measurable goals related to student achievement are established, but these efforts have yet to result in improved student achievement or planning for methods of monitoring improvements.</p> <p>Priorities for student growth are established in some areas, understood by some staff and students, and plans to achieve those priorities are aligned with the actual actions of some of the staff.</p>   | <p>Planning for improvement in student achievement is not evident and goals are neither measurable nor specific.</p> <p>The leader focuses more on student characteristics as an explanation for student results than on the actions of the teachers and leaders in the system.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   |
| <ul style="list-style-type: none"> <li>• Clearly stated goals are accessible to faculty and students.</li> <li>• Agendas, memoranda, and other documents reflect a comprehensive planning process that resulted in formulation of the adopted goals.</li> <li>• Leader's presentations to faculty provide recurring updates on the status of plan implementation and progress toward goals.</li> <li>• Leader's presentations to parents focus on the school goals for student achievement.</li> <li>• Other leadership evidence of proficiency on this indicator.</li> </ul> |  | <ul style="list-style-type: none"> <li>• Faculty members are able to describe their participation in planning and goal setting processes.</li> <li>• Goals relevant to students and teachers' actions are evident and accessible.</li> <li>• Students are able to articulate the goals for their achievement which emerged from faculty and school leader planning.</li> <li>• Teachers and students track their progress toward accomplishment of the stated goals.</li> <li>• Other impact evidence of proficiency on this indicator.</li> </ul> |   |
| <p><b>Scale Levels:</b> <i>(choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. If not being rated at this time, leave blank:</i></p> <p><input type="checkbox"/> <b>Highly Effective</b>      <input type="checkbox"/> <b>Effective</b>      <input type="checkbox"/> <b>Needs Improvement</b>      <input type="checkbox"/> <b>Unsatisfactory</b></p>  |  |  |   |
| <p><b>Evidence Log</b> (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):</p>  |  |  |   |

### Reflection Questions for Indicator 1.3

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|---|---|---|--|
| What methods of sharing successful planning processes with other school leaders are most likely to generate district-wide improvements? | How will you monitor progress toward the goals so that adjustments needed are evident in time to make "course corrections?" | How do you engage more faculty in the planning process so that there is a uniform faculty understanding of the goals set? | How are other school leaders implementing planning and goal setting? |

**Indicator 1.4 - Student Achievement Results: The leader demonstrates evidence of student improvement through student achievement results.**

Narrative: Engagement with the standards, using data, making plans and setting goals are important. This indicator shifts focus to the leader's use of evidence of actual improvement to build support for continued effort and further improvement.

**Rating Rubric**

### Reflection Questions for Indicator 1.4

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|---|---|---|--|
| How do you share with other school leaders how to use student improvement results to raise expectations and improve future results? | How do you engage students in sharing examples of their growth with other students? | How do you engage faculty in routinely sharing examples of student improvement? | What processes should you employ to gather data on student improvements? |

**Proficiency Area 2. Student Learning as a Priority: Effective school leaders demonstrate that student learning is their top priority through effective leadership actions that build and support a learning organization focused on student success.**

Narrative: This proficiency area is aligned with Florida Principal Leadership Standard #2. A learning organization has essential elements regarding the behavior of people in the organization. When all elements are present and interacting, productive systemic change is possible. This proficiency area is focused on the degree to which learning organization elements exist in the school and reflect the following priorities on student learning:

- Supports for personal mastery of each person’s job focus on job aspects related to student learning
- Team learning among faculty is focused on student learning
- Processes for exploring and challenging mental models that hamper understanding and progress on student learning are in use
- A shared vision has student learning as a priority
- Systems thinking is employed to align various aspects of school life in ways that promote learning

**Indicator 2.1 – Learning Organization: The leader enables faculty and staff to work as a system focused on student learning and engages faculty and staff in efforts to close learning performance gaps among student subgroups within the school.**

Narrative: Are the elements of a learning organization present among the adults in the school? Are the learning organization elements focused on student learning? Is the system in operation at the school engaging faculty in improving results for under-achieving subgroups? This indicator addresses the systemic processes that make gap reduction possible. Is the leader proficient in building capacity for change?

Note: Indicator 5.4 from Florida Principal Leadership Standard #5 addresses actual success in reducing achievement gaps.

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|---|---|---|
| <p>The essential elements of a learning organization (i.e. personal mastery of competencies, team learning, examination of mental models, shared vision, and systemic thinking) are focused on improving student learning results. Positive trends are evident in closing learning performance gaps among all student subgroups within the school.</p> <p>There is evidence that the interaction among the elements of the learning organization deepen the impact on student learning. The leader routinely shares with colleagues throughout the district the effective leadership practices learned from proficient implementation of the essential elements of a learning organization.</p> | <p>The leader’s actions and supported processes enable the instructional and administrative workforce of the school to function as a learning organization with all faculty having recurring opportunities to participate in deepening personal mastery of competencies, team learning, examination of mental models, a shared vision, and systemic thinking. These fully operational capacities are focused on improving all students’ learning and closing learning performance gaps among student subgroups within the school.</p> | <p>The leader’s actions reflect attention to building an organization where the essential elements of a learning organization (i.e. personal mastery of competencies, team learning, examination of mental models, shared vision, and systemic thinking) are emerging, but processes that support each of the essential elements are not fully implemented, or are not yet consistently focused on student learning as the priority, or are not focused on closing learning performance gaps among student subgroups within the school.</p> | <p>There is no or minimal evidence of proactive leadership that supports emergence of a learning organization focused on student learning as the priority function of the organization.</p> <p>Any works in progress on personal mastery of instructional competencies, team learning processes, examinations of mental models, a shared vision of outcomes sought, or systemic thinking about instructional practices are not aligned or are not organized in ways that impact student achievement gaps.</p> |

### Reflection Questions for Indicator 2.1

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>   |
|---|---|--|---|
| <p>Has your leadership resulted in people continually expanding their capacity to create the results they truly desire? Is there evidence that new and expansive patterns of thinking are nurtured? Are the people who make up your school community continually learning to see the "big picture" (i.e. the systemic connections between practices and processes)?</p> | <p>Where the essential elements of a learning organization are in place and interacting, how do you monitor what you are creating collectively is focused on student learning needs and making a difference for all students?</p> | <p>What essential elements of a learning organization have supports in place and which need development?</p> <p>Understanding that systemic change does not occur unless all of the essential elements of the learning organization are in operation, interacting, and focused on student learning as their priority function, what gaps do you need to fill in your supporting processes and what leadership actions will enable all faculty and staff to get involved?</p> | <p>What happens in schools that are effective learning organizations that does not happen in this school?</p> <p>How can you initiate work toward a learning organization by developing effective collaborative work systems (e.g., Data Teams, Professional Learning Communities, Lesson Studies)?</p> |

**Indicator 2.2 – School Climate: The leader maintains a school climate that supports student engagement in learning.**

Narrative: "Climate" at a school is determined by how people treat one another and what is respected and what is not. School leaders who promote a school climate where learning is respected, effort is valued, improvement is recognized, and it is safe to acknowledge learning needs have provided students support for sustained engagement in learning.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|--|--|--|---|
| <p>The leader ensures that the school's identity and climate (e.g., vision, mission, values, beliefs, and goals) actually drives decisions and informs the climate of the school.</p> <p>Respect for students' cultural, linguistic and family background is evident in the leader's conduct and expectations for the faculty.</p> <p>The leader is proactive in guiding faculty in adapting the learning environment to accommodate the differing needs and diversity of students.</p> <p>School-wide values, beliefs, and goals are supported by individual and class behaviors through a well-planned management system.</p>  | <p>The leader systematically (e.g., has a plan, with goals, measurable strategies, and recurring monitoring) establishes and maintains a school climate of collaboration, distributed leadership, and continuous improvement, which guides the disciplined thoughts and actions of all staff and students.</p> <p>Policies and the implementation of those policies result in a climate of respect for student learning needs and cultural, linguistic and family background.</p> <p>Classroom practices on adapting the learning environment to accommodate the differing needs and diversity of students are consistently applied throughout the school.</p> | <p>Some practices promote respect for student learning needs and cultural, linguistic and family background, but there are discernable subgroups who do not perceive the school climate as supportive of their needs.</p> <p>The school climate does not generate a level of school-wide student engagement that leads to improvement trends in all student subgroups.</p> <p>The leader provides school rules and class management practices that promote student engagement and are fairly implemented across all subgroups. Classroom practices on adapting the learning environment to accommodate the differing needs and diversity of students are inconsistently applied.</p>   | <p>Student and/or faculty apathy in regard to student achievement and the importance of learning is easily discernable across the school population and there are no or minimal leadership actions to change school climate.</p> <p>Student subgroups are evident that do not perceive the school as focused on or respectful of their learning needs or cultural, linguistic and family background or there is no to minimal support for managing individual and class behaviors through a well-planned management system.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   |
| <ul style="list-style-type: none"> <li>• The leader organizes, allocates, and manages the resources of time, space, and attention so that the needs of all student subgroups are recognized and addressed.</li> <li>• There are recurring examples of the leader's presentations, documents, and actions that reflect respect for students' cultural, linguistic and family background.</li> <li>• The leader maintains a climate of openness and inquiry and supports student and faculty access to leadership.</li> <li>• The school's vision, mission, values, beliefs, and goals reflect an expectation that student learning needs and cultural, linguistic and family backgrounds are respected and school rules consistent with those beliefs are routinely implemented.</li> <li>• Professional learning is provided to sustain faculty understanding of student needs.</li> <li>• Procedures are in place and monitored to ensure students have effective means to express concerns over any aspect of school climate.</li> </ul> |  | <ul style="list-style-type: none"> <li>• Classroom rules and posted procedures stress positive expectations and not just "do not's."</li> <li>• All student subgroups participate in school events and activities.</li> <li>• A multi-tiered system of supports that accommodates the differing needs and diversity of students is evident across all classes.</li> <li>• Students in all subgroups express a belief that the school responds to their needs and is a positive influence on their future well-being.</li> <li>• Walkthroughs provide recurring trends of high student engagement in lessons.</li> <li>• Student services staff/counselors' anecdotal evidence shows trends in student attitudes toward the school and engagement in learning.</li> <li>• Teacher/student/parent survey or questionnaire results reflect a school climate that supports student engagement in learning.</li> <li>• The availability of and student participation in academic</li> </ul> |   |

### Reflection Questions for Indicator 2.2

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|--|---|---|--|
| In what ways might you further extend your reach within the district to help others benefit from your knowledge and skill in establishing and maintaining a school climate that supports student engagement in learning? | <p>What strategies have you considered that would ensure that the school's identity and climate (e.g., vision, mission, values, beliefs, and goals) actually drives decisions and informs the climate of the school?</p> <p>How could you share with your colleagues across the district the successes (or failures) of your efforts?</p> | How might you structure a plan that establishes and maintains a school climate of collaboration, distributed leadership, and continuous improvement, which guides the disciplined thought and action of all staff and students? | What might be the importance of developing a shared vision, mission, values, beliefs, and goals to establish and maintain a school climate that supports student engagement in learning? |

**Indicator 2.3 – High Expectations: The leader generates high expectations for learning growth by all students.**

Narrative: The leader who expects little from students and faculty will get less than they are capable of accomplishing. “Every child can learn” takes on new meaning when supported by faculty and school leader expectations that students can and will learn a lot...not just a minimum to get by. Expecting quality is a measure of respect.

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
| What strategies have you considered using that would increase the professional knowledge opportunities for colleagues across the school district in the area of setting high academic expectations for students? | How might you incorporate community members and other stakeholder groups into the establishment and support of high academic expectations? | What are 2-3 key strategies you have thought about using that would increase your consistency in creating and supporting high academic expectations for every student? | What might be some strategies you could use to create or support high academic expectations of students? |

**Indicator 2.4 – Student Performance Focus: The leader demonstrates understanding of present levels of student performance based on routine assessment processes that reflect the current reality of student proficiency on academic standards.**

Narrative: Lots of talk about high expectations, goal setting, working hard, rigor, and getting results is important, but leaders need to know where students’ actual performance levels are to be able to track real progress. Knowing annual test results is useful, but it is not enough. What does the leader do to know whether progress is being made or not and whether “mid-course” corrections are required?

|---|--|--|--|
| What data other than end of year state assessments would be helpful in understanding student progress at least every 3-4 weeks? | What data other than end of year state assessments would be helpful in understanding student progress on at least a quarterly basis? | What data other than end of year state assessments would be helpful in understanding student progress on at least a semi-annual basis? | What data other than end of year state assessments would be helpful in understanding student progress? |

## Domain 2 - Instructional Leadership

Narrative: School leaders do many things. Domain 2 of the FSLA addresses a core of leader behaviors that impact the quality of essential elements for student learning growth. The skill sets and knowledge bases employed for this domain generate 40% of the FSLA Score. The success of the school leader in providing a quality instructional framework, appropriately focused faculty development, and a student oriented learning environment are essential to student achievement.

**Proficiency Area 3. Instructional Plan Implementation: Effective school leaders work collaboratively to develop and implement an instructional framework that aligns curriculum with state standards, effective instructional practices, student learning needs, and assessments.**

Narrative: Proficiency Area 3 is focused on Florida Principal Leadership Standard #3 (FPLS). Aligning the key issues identified in the indicators into an efficient system is the leader's responsibility. This area stresses the leader's proficiency at understanding the current reality of what faculty and students know and can do regarding priority practices and goals.

**Indicator 3.1 – FEAPs: The leader aligns the school's instructional programs and practices with the Florida Educator Accomplished Practices (Rule 6A-5.065, F.A.C.) and models use of the Florida common language of instruction to guide faculty and staff implementation of the foundational principles and practices.**

Narrative: Indicator 3.1 is focused on the school leader's understanding of the Florida Educator Accomplished Practices (FEAPs) and ability to use Florida's common language of instruction. To be effective participants in school, district and statewide communities of practice working collegially for high quality implementation of the FEAPs, educators at the school level must be able to communicate and organize their efforts using the terms and concepts in the FEAPs and the Florida common language of instruction. This indicator is about the school leader's proficiency in making that happen by using a core set of expectations (the FEAPs) and terminology (the common language) to guide and focus teacher discussions on instructional improvements. Florida's common language of instruction is used so that educators in Florida use the core terms in the same way and with a common understanding.

Note: The FEAPs, a FEAPs brochure, and Florida's common language may be explored at <http://www.floridaschoolleaders.org>.

### Rating Rubric

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|--|--|--|---|
| <p>The instructional program and practices are fully aligned with the FEAPs. Faculty and staff implementation of the FEAPs is consistently proficient and professional conversations among school leadership and faculty about instruction use the Florida common language of instruction and the terminology of the FEAPs.</p> <p>The leader's use of FEAPs and common language resources results in all educators at the school site having access to and making use of the FEAPs and common language.</p> <p>Teacher-leaders at the school use the FEAPs and common language.</p> | <p>The leader's use of FEAPs content and terms from the common language is a routine event and most instructional activities align with the FEAPs.</p> <p>Coordinated processes are underway that link progress on student learning growth with proficient FEAPs implementation.</p> <p>The leader's use of FEAPs and common language resources results in most faculty at the school site having access to and making use of the FEAPs and common language.</p> <p>The leader uses the common language to enable faculty to recognize connections between the FEAPs, the district's</p> | <p>The leader demonstrates some use of the FEAPs and common language to focus faculty on instructional improvement, but is inconsistent in addressing the FEAPs.</p> <p>The leader's use of FEAPs and common language resources results in some faculty at the school site having access to and making use of the FEAPs and common language.</p> <p>There are gaps in alignment of ongoing instructional practices at the school site with the FEAPs. There is some correct use of terms in the common language but errors or omissions are evident.</p> | <p>There is no or minimal evidence that the principles and practices of the FEAPs are presented to the faculty as priority expectations.</p> <p>The leader does not give evidence of being conversant with the FEAPs or the common language.</p> <p>The leader's use of FEAPs and common language resources results in few faculty at the school site having access to and making use of the FEAPs and common language.</p> |

### Reflection Questions for Indicator 3.1

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|---|---|--|--|
| How are you able to provide specific feedback to teachers on improving proficiency in the FEAPs and/or common language? | How do you recognize practices reflected in the FEAPs and/or common language as you conduct teacher observations? | Do you review the FEAPs and/or common language resources frequently enough to be able to recall the main practices and principles contained in them? | Do you know where to find the text of the FEAPs and common language? |

**Indicator 3.2 – Standards-Based Instruction: The leader delivers an instructional program that implements the state’s adopted academic standards (Common Core and NGSSS) in a manner that is rigorous and culturally relevant to the students by:**

- **aligning academic standards, effective instruction and leadership, and student performance practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals, and**
- **communicating to faculty the cause and effect relationship between effective instruction on academic standards and student performance.**

Narrative: Florida’s plan of action for educating our children for the 21<sup>st</sup> century is based on standards-based instruction. Course descriptions specify the standards that are to be learned in each course. All of the course content in courses for which students receive credit toward promotion/graduation is expected to be focused on the standards in the course description. This indicator addresses the leader’s proficiency at making sure all students receive rigorous, culturally relevant standards-based instruction by aligning key practices with the state’s academic standards (Common Core, NGSSS, Access Points). The leader does what is necessary to make sure faculty recognize and act on the cause and effect relationship between good instruction (i.e., research-based strategies, rigorous, culturally relevant,) on the “right stuff” (the state standards adapted based on data about student needs).

Note: Course descriptions and the standards for each course may be explored at [www.floridastandards.org](http://www.floridastandards.org).

### Reflection Questions for Indicator 3.2

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|--|---|--|--|
| <p>What procedures might you establish to increase your ability to help your colleagues lead the implementation of the district's curriculum to provide instruction that is standards-based, rigorous, and culturally relevant?</p> <p>What can you share about your leadership actions to ensure that staff members have adequate time and support, and effective monitoring and feedback on proficiency in use of research-based instruction focused on the standards?</p> | <p>In what ways can you offer professional learning for individual and collegial groups within the school or district that illustrate how to provide rigor and cultural relevance when delivering instruction on the standards?</p> <p>How do you engage teachers in deliberate practice focused on mastery of standards-based instruction?</p> | <p>What might be 2-3 key leadership strategies that would help you to systematically act on the belief that all students can learn at high levels?</p> <p>How can your leadership in curriculum and instruction convey respect for the diversity of students and staff?</p> <p>How might you increase the consistency with which you monitor and support staff to effectively use research-based instruction to meet the learning needs of all students?</p> <p>What are ways you can ensure that staff members are aligning their instructional practices with state standards?</p> | <p>Where do you go to find out what standards are to be addressed in each course?</p> <p>How might you open up opportunities for all students to meet high expectations through your leadership in curriculum and instruction?</p> <p>Do you have processes to monitor how students spend their learning time?</p> <p>In what ways are you monitoring teacher implementation of effective, research-based instruction?</p> <p>In what ways are you monitoring teacher instruction in the state's academic standards?</p> |

**Indicator 3.3 – Learning Goals Alignments: The leader implements recurring monitoring and feedback processes to insure that priority learning goals established for students are based on the state’s adopted student academic standards as defined in state course descriptions, presented in student accessible forms, and accompanied by scales or rubric to guide tracking progress toward student mastery.**

Narrative: “Learning goals” is a high-effect size strategy that uses scales or progressive levels to monitor student growth on the way to mastery of a state academic standard. Learning goals typically take 2-9 weeks of student time to master so are more comprehensive than daily objectives. The essential issue is that the teacher creates “scales” or levels of progress toward mastery of the learning goal. Teacher and students use those scales to track progress toward mastery of the goal(s). This indicator addresses the leader’s proficiency at monitoring and providing feedback on teacher and student use of priority learning goals with scales. The leader is expected to go beyond low levels of monitoring that address whether the teacher provides such goals and attends to the levels of student understanding and engagement with the learning goals. Do the students pursue those goals? Do they track their own progress? Is celebrations of success on learning goals focused on how success was achieved more than that is was obtained?

Note: Beginning in the 2012-13 school year, professional learning about learning goals and sample learning goals may be explored at [www.floridastandards.org](http://www.floridastandards.org), [www.floridaschoolleaders.org](http://www.floridaschoolleaders.org), and [www.startwithsuccess.org](http://www.startwithsuccess.org).

### Rating Rubric

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|---|---|---|--|
| <p>Recurring leadership involvement in the improvement in quality of daily classroom practice is evident and is focused on student progress on priority learning goals.</p> <p>Routine and recurring practices are evident that support celebration of student success in accomplishing priority learning goals and such celebrations focus on how the success was obtained.</p> <p>The leader routinely shares examples of effective learning goals that are associated with improved student achievement.</p> <p>Other leaders credit this leader with sharing ideas, coaching, and providing technical assistance to implement successful use of leaning goals in standards-based instruction.</p> | <p>Clearly stated learning goals accompanied by a scale or rubric that describes measurable levels of performance, aligned to the state’s adopted student academic standards, is an instructional strategy in routine use in courses school wide.</p> <p>Standards-based instruction is an evident priority in the school and student results on incremental measures of success, like progress on learning goals, are routinely monitored and acknowledged.</p> <p>The formats or templates used to express learning goals and scales are adapted to support the complexity of the expectations and the learning needs of the students.</p> <p>Clearly stated learning goals aligned to state or district initiatives in support of student reading skills are in use school wide.</p> | <p>Specific and measurable learning goals with progress scales, aligned to the state’s adopted student academic standards in the course description, are in use in some but not most of the courses.</p> <p>Learning goals are posted/provided in some classes are not current, do not relate to the students current assignments and/or activities, or are not recognized by the students as priorities for their own effort.</p> <p>Learning goals tend to be expressed at levels of text complexity not accessible by the targeted students and/or at levels of complexity too simplified to promote mastery of the associated standards.</p> <p>Processes that enable students and teachers to track progress toward mastery of priority learning goals are not widely implemented throughout the school.</p> | <p>Clearly stated priority learning goals accompanied by a scale or rubric that describes levels of performance relative to the learning goal are <u>not</u> systematically provided across the curriculum to guide student learning, <u>or</u> learning goals, where provided, are <u>not</u> aligned to state standards in the course description.</p> <p>The leader engages in minimal to non-existent monitoring and feedback practices on the quality and timeliness of information provided to students on what they are expected to know and be able to do (i.e. no alignment of learning goals with state standards for the course).</p> <p>There are minimal or no leadership practices to monitor faculty practices on tracking student progress on priority learning goals.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  |

### Reflection Questions for Indicator 3.3

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>   |
|--|--|---|---|
| What specific strategies have you employed to measure improvements in teaching and innovations in use of learning goals and how can you use such measures as predictors of improved student achievement? | What system supports are in place to ensure that the best ideas and thinking on learning goals are shared with colleagues and are a priority of collegial professional learning? | To what extent do learning goals presented to the students reflect a clear relationship between the course standards and the assignments and activities students are given? | What have I done to deepen my understanding of the connection between the instructional strategies of learning goals and tracking student progress? |

**Indicator 3.4 – Curriculum Alignments: Systemic processes are implemented to ensure alignment of curriculum resources with state standards for the courses taught.**

Narrative: Academic standards are determined at the state level and the curriculum used to enable students to master those standards is determined at the district and school level. Curriculum must be aligned with the standards if it is to support standards-based instruction. Curriculum resources may or may not be fully aligned with the standards assigned to a specific course. The learning needs of students in specific classes may require additional or adapted curriculum materials to address issues of rigor, cultural relevance, or support for needed learning goals. School leaders maintain processes to monitor the appropriateness and alignment of curriculum to standards and intervene to make adjustments as needed to enable students to access curriculum that supports the standards.

Note: Where gaps or misalignments are noted by the processes addressed in this indicator, the leader's actions relevant to Indicator 8.2 (Strategic Instructional Resourcing) should be addressed.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact. |
|---|--|---|---|
| <p>The leader routinely engages faculty in processes to improve the quality of curriculum resources in regard to their alignment with standards and impact on student achievement and supports replacing resources as more effective ones are available.</p> <p>The leader is proactive in engaging other school leaders in sharing feedback on identification and effective use of curriculum resources that are associated with improved student achievement.</p> <p>Parents and community members credit this leader with sharing ideas or curriculum supports that enable home and community to support student mastery of priority standards.</p>  | <p>Specific and recurring procedures are in place to monitor the quality of alignment between curriculum resources and standards.</p> <p>Procedures under the control of the leader for acquiring new curriculum resources include assessment of alignment with standards.</p> <p>Curriculum resources aligned to state standards by resource publishers/developers are used school wide to focus instruction on state standards, and state, district, or school supplementary materials are routinely used that identify and fill gaps, and align instruction with the implementation level of the standards.</p> | <p>Processes to monitor alignment of curriculum resources with standards in the course descriptions are untimely or not comprehensive across the curriculum.</p> <p>Efforts to align curriculum with standards are emerging but have not yet resulted in improved student achievement.</p> <p>Curriculum resources aligned to state standards by text publishers/developers are used school wide to focus instruction on state standards, but there is no to minimal use of state, district, or school supplementary materials that identify and fill gaps, and align instruction with the implementation level of the standards.</p>   | <p>There are no or minimal processes managed by the leader to verify that curriculum resources are aligned with the standards in the course descriptions.</p>       |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |   |
| <ul style="list-style-type: none"> <li>Curriculum is presented to faculty and students as the content reflected in course descriptions rather than the content in a textbook.</li> <li>School procedures for acquisition of instructional materials include assessment of their usefulness in helping students' master state standards and include processes to address gaps or misalignments.</li> <li>Course descriptions play a larger role in focusing course content than do test item specification documents.</li> <li>Agendas, meeting minutes, and memoranda to the faculty make evident a focus on importance of curriculum being a vehicle for enabling students to master standards in the course description.</li> <li>Media center acquisitions reflect a systematic effort to build curriculum supports that support student mastery of content</li> </ul> |  | <ul style="list-style-type: none"> <li>Teachers can describe the strengths and weaknesses of primary texts in regard to alignment with standards in the state course description.</li> <li>Students are able to characterize text books and other school provided resources tools as aids in student mastery of course standards.</li> <li>Pacing guides focus assignments and activities planned for students on learning goals and state standards rather than coverage of chapters in a text.</li> <li>Documents can be presented that inform of the alignment between curriculum resources and standards for the course.</li> <li>Teachers can identify supplementary material used to deepen student mastery of standards.</li> <li>Parent feedback/questionnaire results indicate recognition that</li> </ul> |   |

### Reflection Questions for Indicator 3.4

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>   |
|--|---|--|---|
| What system is in place to ensure that your best ideas and thinking on using curriculum to enable students to master standards are shared with colleagues, particularly when there is evidence at your school of improved student achievement? | What specific school improvement strategies have you employed to measure improvements in teaching and innovations in curriculum that serve as predictors of improved student achievement? | How can you monitor whether the activities and assignments student get that involve use of curriculum resources are aligned with learning goals and standards? | Do you know which standards are addressed in your curriculum? |

**Indicator 3.5 – Quality Assessments: The leader ensures the appropriate use of high quality formative and interim assessments aligned with the adopted standards and curricula.**

Narrative: How do we know what our students already know, what they need to know, and how they are doing as we move forward with instruction? The school leader needs “assessment literacy” to address these questions. Where indicator 1.2 addresses the leader’s proficiency in use of student performance data, this indicator focuses on actions taken at the school site to generate interim assessment data and make sure faculty use formative assessment practices to monitor and adjust instruction. Assessment of student progress toward academic standards is an important aspect of tracking student progress. Leaders need to make use of data on interim and formative assessments to guide goal setting and progress monitoring. They need to provide teachers access to quality assessments and promote teacher use of formative assessments as a routine strategy. The leader needs on-going assessment data to inform a variety of decisions regarding such issues as resource allocations, student and teacher schedules, professional learning impacts, and adjustments in plans.

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|--|---|---|
| <p>The leader uses a variety of creative ways to provide professional learning for individual and collegial groups within the district focused on applying the knowledge and skills of assessment literacy, data analysis, and the use of state, district, school, and classroom assessment data to improve student achievement.</p> <p>Formative assessments are part of the school culture and interim assessment data is routinely used to review and adapt plans and priorities.</p>  | <p>The leader systematically seeks, synthesizes, and applies knowledge and skills of assessment literacy and data analysis.</p> <p>The leader routinely shares knowledge with staff to increase students’ achievement.</p> <p>Formative assessment practices are employed routinely as part of the instructional program.</p> <p>The leader uses state, district, school, and classroom assessment data to make specific and observable changes in teaching, curriculum, and leadership decisions. These specific and observable changes result in increased achievement for students.</p> | <p>The leader haphazardly applies rudimentary knowledge and skills of assessment literacy and is unsure of how to build knowledge and develop skills of assessment literacy and data analysis.</p> <p>The leader inconsistently shares knowledge with staff to increase student achievement.</p> <p>There is inconsistency in how assessment data are used to change schedules, instruction, curriculum, or leadership.</p> <p>There is rudimentary use of assessment data from state, district, school, and classroom.</p>   | <p>The leader has little knowledge and/or skills of assessment literacy and data analysis.</p> <p>There is little or no evidence of interaction with staff concerning assessments.</p> <p>The leader is indifferent to data and does not use data to change schedules, instruction, curriculum or leadership.</p> <p>Student achievement remains unchanged or declines.</p> <p>The leader does not use assessment data from state, district, school, and classroom.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or status of the faculty and staff. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   |
| <ul style="list-style-type: none"> <li>• Documents for faculty use that set clear expectations for the use of formative assessments to monitor student progress on mastering course standards</li> <li>• Samples of written feedback provided to teachers regarding effective assessment practices.</li> <li>• Collaborative work systems’ (e.g., data teams, professional learning communities) agendas and minutes reflect recurring engagements with interim and formative assessment data.</li> <li>• Faculty meeting agendas and minutes reflect attention to formative and interim assessment processes.</li> <li>• Classroom walkthrough data reveals routine use of formative assessment practices in the classrooms.</li> <li>• Assessment rubrics are being used by the school.</li> <li>• Other leadership evidence of proficiency on this indicator.</li> </ul> |  | <ul style="list-style-type: none"> <li>• Teachers can describe interactions with the leader where effective assessment practices are promoted.</li> <li>• Teachers’ assessments are focused on student progress on the standards of the course.</li> <li>• Teachers attest to the leader’s efforts to apply knowledge and skills of effective assessment practices.</li> <li>• Teachers can provide assessments that are directly aligned with course standard.</li> <li>• Teachers attest to the leader’s frequent monitoring of assessment practices.</li> <li>• Student folders and progress tracking records reflect use of formative data.</li> <li>• Documents are in use that informs teachers of the alignment between standards and assessments.</li> <li>• Other impact evidence of proficiency on this indicator.</li> </ul> |   |

**Indicator 3.6 – Faculty Effectiveness: The leader monitors the effectiveness of classroom teachers and uses contemporary research and the district’s instructional evaluation system criteria and procedures to improve student achievement and faculty proficiency on the FEAPs.**

Narrative: School leaders are responsible for monitoring the effectiveness of classroom teachers. This indicator addresses the proficiency and focus of the leader’s monitoring processes to maintain awareness of faculty effectiveness and the use of monitoring data to improve student and faculty performance. The focus here is on monitoring teacher use of strategies supported by contemporary research, teacher proficiency on issues contained in the district’s teacher evaluation system, what teachers do to improve student achievement, and faculty proficiency on the FEAPs.

Note: Indicator 3.1 is focused on the leader’s grasp of the FEAPs whereas this indicator focuses on monitoring the faculties’ grasp of the FEAPs. Indicator 4.2 is focused on the leader’s use of monitoring data to provide timely feedback.

**Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations  | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|--|---|--|--|
| <p>The leader’s monitoring process generates a shared vision with the faculty of high expectations for faculty proficiency in the FEAPs, research-based instructional strategies, and the indicators in the teacher evaluation system.</p> <p>The leader shares productive monitoring methods with other school leaders to support district wide improvements.</p>   | <p>The leader’s effectiveness monitoring process provides the leader and leadership team with a realistic overview of the current reality of faculty effectiveness on the FEAPs, the indicators in the teacher evaluation system, and research-based instructional strategies.</p> <p>The leader’s monitoring practices are consistently implemented in a supportive and constructive manner.</p> | <p>The district teacher evaluation system is being implemented but the process is focused on procedural compliance rather than improving faculty proficiency on instructional strategies that impact student achievement.</p> <p>The manner in which monitoring is conducted is not generally perceived by faculty as supportive of their professional improvement.</p>  | <p>Monitoring does not comply with the minimum requirements of the district teacher evaluation system.</p> <p>Monitoring is not focused on teacher proficiency in research-based strategies and the FEAPs.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |   | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |  |

### Reflection Questions for Indicator 3.6

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>   |
|---|---|--|---|
| How do you convey to highly effective teachers specific feedback that would move them toward even higher levels of proficiency?<br><br>How do you engage highly effective teachers in sharing a vision of high quality teaching with their colleagues so that there is no plateau of "good enough"? | How do you improve your conferencing skills so your feedback to teachers is both specific enough to be helpful and perceived as support rather than negative criticism? | How do you restructure your use of time so that you spend enough time on monitoring the proficiency of instructional practices and giving feedback to be an effective support for the faculty? | How do you improve your own grasp of what the FEAPs require so that your monitoring has a useful focus? |

**Proficiency Area 4: Faculty Development: Effective school leaders recruit, retain, and develop an effective and diverse faculty and staff; focus on evidence, research, and classroom realities faced by teachers; link professional practice with student achievement to demonstrate the cause and effect relationship; facilitate effective professional development; monitor implementation of critical initiatives; and provide timely feedback to teachers so that feedback can be used to increase teacher professional practice.**

Narrative: This proficiency area is aligned with FPLS standard 4. It moves the focus from “what is the current reality” of faculty proficiency to continuous progress toward what the faculty can achieve with effort and focus.

**Indicator 4.1 – Recruitment and Retention: The leader employs a faculty with the instructional proficiencies needed for the school population served.**

Narrative: The focus of this indicator is on the leader’s actions to staff the school with the best faculty possible for the needs of the school population. It addresses actions taken to anticipate staffing needs, seek out quality applicants, and efforts to retain quality staff once on the faculty.

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|---|--|---|
| <p>The leader tracks the success of her or his recruitment and hiring strategies, learns from past experience, and revisits the process annually to continually improve the process.</p> <p>The leader engages in a variety of traditional and non-traditional recruitment strategies and then prioritizes based on where they find their most effective teachers.</p> <p>Effective recruiting and hiring practices are frequently shared with other administrators and colleagues throughout the system.</p>   | <p>The leader works collaboratively with the staff in the human resources office to define the ideal teacher based upon the school population served.</p> <p>The leader is sensitive to the various legal guidelines about the kind of data that can be sought in interviews.</p> <p>A hiring selection tool that helps interviewers focus on key instructional proficiencies that are aligned with the teacher evaluation criteria is developed and effectively utilized.</p> <p>A hiring process is clearly communicated including how staff is involved.</p> | <p>The leader relies on the district office to post notices of vacancies and identify potential applicants.</p> <p>Efforts to identify replacements tend to be slow and come after other schools have made selections.</p> <p>Interview processes are disorganized, not focused on the schools needs, and do not improve from year to year.</p>  | <p>The leader approaches the recruitment and hiring process from a reactive rather than a proactive standpoint. Consequently, the process may not be well thought out, is disjointed, and not aligned with key success criteria embedded within the teacher evaluation documents essential to organizational success.</p> <p>No coherent plan or process is employed to encourage quality staff to remain on the faculty.</p> |

| <p>How frequently do teachers recognize that your feedback is directly linked to improving both their personal performance and that of the school?<br/>What might you do to ensure that they see this important connection?</p> | <p>What are some examples of focused, constructive, and meaningful feedback that you provide to your staff? How does this support their learning?</p> | <p>In what ways do you currently recognize faculty in providing feedback and affirmation to them?<br/><br/>To what extent do you acknowledge the efforts of teams, as well as that of individuals?</p> | <p>How can frequent, focused, and constructive feedback support teachers in improving their instructional practice?</p> |

**Indicator 4.3 – High effect size strategies: Instructional personnel receive recurring feedback on their proficiency on high effect size strategies.**

Narrative: Teaching is a complex process. The “right thing to do” varies with conditions in the classroom. However, teachers need proficiency on a core repertoire of high importance strategies. These are strategies all teachers are expected to be able to use effectively. This indicator is focused on the leader’s proficiency in focusing faculty attention on improvement of those “high effect size” strategies – those with higher probabilities of causing student growth when done correctly and in appropriate circumstances.

Note: Department lists of high-effect size strategies are posted at [www.fldoe.org](http://www.fldoe.org) and [www.floridaschoolleaders.org](http://www.floridaschoolleaders.org)

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|---|---|---|
| <p>The leader uses a variety of creative ways to provide positive and corrective feedback on the implementation of high effect size strategies. As a result, the correct and appropriate implementation of high effect size instructional strategies across the curriculum and grades is a routine part of the learning environment for all students.</p> <p>The entire organization reflects the leader’s focus on accurate, timely, and specific recognition of correct and appropriate implementation of high effect size strategies.</p> <p>The leader balances individual recognition on high effect size strategies with team and organization-wide recognition.</p>                          | <p>In addition to the formal feedback consistent with the district evaluation system indicators, the leader provides recurring informal feedback on high effect size strategies to reinforce proficient performance and highlight the strengths of colleagues and staff.</p> <p>The leader has effectively implemented a system for collecting feedback from teachers as to what they know, what they understand, where they make errors, and when they have misconceptions about use of high effect size strategies.</p> <p>Corrective and positive feedback on high effect size strategies is linked to organizational goals.</p> <p>Both the leader and employees can cite examples of where feedback on high effect size strategies is used to improve individual and organizational performance.</p> | <p>The leader adheres to the district evaluation system requirements for providing formal feedback on high effect size strategies, but the feedback is general rather than providing details that improve teaching or organizational performance related to high effect size strategies.</p> <p>The leader tends to view feedback as a linear process; something they provide teachers rather than two way communications where the leader also learns from the teachers’ expertise.</p>  | <p>The leader is not aware of the high effect size strategies expected to be used in district schools or fails to communicate them to faculty.</p> <p>Feedback on high effect size strategies is rare, nonspecific, and not constructive.</p> |

**Indicator 4.4 - Instructional Initiatives: District supported state initiatives focused on student growth are supported by the leader with specific and observable actions including monitoring of implementation and measurement of progress toward initiative goals and professional learning to improve faculty capacity to implement the initiatives.**

Narrative: The Department of Education and/or district-supported initiatives focused on improving student performance require school leader support to be successful at the school site. This indicator addresses the leader's proficiency in supporting such initiatives. Indicator 4.4 also focuses on professional learning needed to implement priority initiatives.

Note: District and FLDOE websites provide support and information about priority initiatives.

| How do you engage your faculty in communities of practice where practices related to the initiatives are shared with faculty in other schools or districts? | How do you use monitoring of these initiatives to identify faculty professional development needs that, if addressed, would improve the quality of implementation? | How do you communicate with district and state resources to learn more about what these initiatives can contribute to my school? | How do you find out what initiatives should be implemented? |

**Indicator 4.5 – Facilitating and Leading Professional Learning: The leader manages the organization, operations, and facilities to provide the faculty with quality resources and time for professional learning and promotes, participates in, and engages faculty in effective individual and collaborative learning on priority professional goals throughout the school year.**

Narrative: Indicator 4.5 is focused on what the leader does to engage faculty in meaningful professional learning (which includes being involved in what the faculty is learning). Professional learning on-the-job is an essential aspect of effective schools. School leaders who manage the school in ways that support both individual and collegial professional learning get better outcomes than those who do not. The leader's personal participation in professional learning plays a major role in making professional learning efforts pay off. This indicator addresses the leader's role as a leader in professional development.

**Rating Rubric**

### Reflection Questions for Indicator 4.5

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|---|---|---|--|
| What strategies have you implemented so that you spread your learning about providing professional learning for individual and collegial groups within your school to your colleagues across the school system? | What might be some creative ways to provide professional learning for individual and collegial groups focused on deepening subject matter knowledge and proficiency at high effect size strategies? | As you think about your leadership in providing professional learning, what are key strategies for you to consider that would help you provide recurring opportunities for professional learning for individual and collegial groups focused on issues directly related to faculty proficiency at high effect size strategies and student learning needs? | How would you describe your efforts to make certain that your professional learning is focused on student needs or faculty proficiency at high effect size strategies? |

**Indicator 4.6 – Faculty Development Alignments: The leader implements professional learning processes that enable faculty to deliver culturally relevant and differentiated instruction by:**

- **generating a focus on student and professional learning in the school that is clearly linked to the system-wide objectives and the school improvement plan,**
- **identifying faculty instructional proficiency needs (including standards-based content, research-based pedagogy, data analysis for instructional planning and improvement),**
- **aligning faculty development practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals,**
- **and using instructional technology as a learning tool for students and faculty.**

Narrative: Faculty development has many aspects. This indicator addresses the leader's proficiency at developing faculty capacity to implement culturally relevant differentiated instruction by aligning the various faculty developments processes and practices with certain key issues (Standards-based content, research-based methods, data for planning, etc. as specified in the text of the standard.)

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|--|---|---|--|
| <p>The leader has demonstrated a record of differentiated professional learning for faculty based on student needs.</p> <p>The leader has developed a system of job-embedded professional learning that differentiates training and implementation of instructional priorities based on teacher needs, which help retain proficient and highly exemplary staff.</p> <p>The leader routinely shares professional learning opportunities with other schools, departments, districts, and organizations.</p>  | <p>Professional learning includes a plan for the implementation of the prioritized instructional needs (e.g., research-based instruction, data analysis, instructional technology, culturally relevant) aligned to school improvement plan and some effort has been made to differentiate (coaching, mentoring, collaborative teams, coaching) and embed professional development to meet the needs of all faculty members. The leader is able to use data from evaluation of instructional personnel to assess proficiencies and identify priority needs to support and retain proficient and exemplary faculty members.</p> | <p>The leader attempts to implement all of the priority instructional needs without a plan for doing so.</p> <p>The leader is aware of the differentiated needs of faculty and staff members, but professional development is only embedded in faculty meetings at this time, rather than incorporating the use of collaboration, study teams, etc. in order to meet the unique needs of staff.</p>   | <p>Professional learning is typically "one size fits all," and there is little or no evidence of recognition of individual faculty needs or matching of faculty needs to student achievement needs. Consequently, retaining proficient and exemplary staff is problematic.</p> |

### Reflection Questions for Indicator 4.6

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|--|--|---|--|
| What procedures have you established to increase professional knowledge opportunities for colleagues across the school system? | What system do you use to prioritize learning needs and empower faculty to create individual learning plans? | What strategies have you employed to meet the learning needs of your faculty, from novice to veteran to expert? | In what ways are professional learning opportunities linked to individual faculty needs? |

**Indicator 4.7 – Actual Improvement: The leader improves the percentage of effective and highly effective teachers on the faculty.**

Narrative: An indicator required by 1012.34 F.S., the focus is on whether the accumulated impact of the leader's actions result in positive trend lines on teacher effectiveness. Evidence gathered from proficiency area #3 provide a base line that, along with teacher rating in the district's teacher evaluation system and student growth measures, enable assessment of whether actual improvement in teacher's proficiency is occurring.

**Proficiency Area 5: Learning Environment: Effective school leaders structure and monitor a school learning environment that improves learning for all of Florida’s diverse student population.**

Narrative: This proficiency area is aligned with FPLS standard 5. Much of what student’s experience in school is a result of decisions and actions by the adults in the school. Learning environments that are success oriented, student centered, treat diversity as an asset, and focus on eliminating achievement gaps support students preparation for fulfilling lives.

**Indicator 5.1 – Student Centered: The leader maintains a safe, respectful and inclusive student-centered learning environment that is focused on equitable opportunities for learning and building a foundation for a fulfilling life in a democratic society and global economy by providing recurring monitoring and feedback on the quality of the learning environment and aligning learning environment practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals.**

Narrative: School leaders who monitor what students experience by being enrolled in the leader’s school have better insights on how to make the system work than those who do not monitor impact of policies and practices on students. It is the leader’s responsibility to know whether student life is equitable, respectful, and supportive of engagement in learning.

### Reflection Questions for Indicator 5.1

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|--|--|---|--|
| What practices have you engaged in to increase professional knowledge opportunities for colleagues across the school system regarding your efforts to ensure the creation and maintenance of a learning environment conducive to successful teaching and learning for all? | What evidence would you accept you were ensuring the creation and maintenance of a learning environment conducive to successful teaching and learning for all? | How would you describe your efforts to provide clear evidence that you create and maintain a learning environment that is generally conducive to ensure effective teaching and learning, although there may be some exceptions? | What strategies are you intentionally implementing to create and maintain a safe and respectful environment to ensure successful teaching and learning or addresses safety concerns as they arise? |

**Indicator 5.2 - Success Oriented: Initiates and supports continuous improvement processes and a multi-tiered system of supports focused on the students' opportunities for success and well-being.**

Narrative: The issues in 5.1 focus on monitoring how school policy and practice affect the quality of student lives. This indicator shifts focus from those broad issues to what happens at the school that creates opportunities for student success and students' perceptions that school life is organized to do something good for them. School should be rigorous and demanding but also implemented in ways that create recurring opportunities for success.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.                         |
|--|--|--|---|
| <p>Through all grades and subjects a multi-tiered system of supports is operational providing core universal supports (research-based, high-quality, general education instruction and support; screening and benchmark assessments for all students, and continuous data collection continues to inform instruction).</p> <p>Where student are not successful on core instruction, problem solving is employed to identify and implement targeted supplemental supports (data based interventions and progress monitoring).</p> <p>Where targeted supplemental supports are not successful, intensive individual supports are employed based on individual student needs.</p> <p>Skillful problem solving to ensure staff have adequate time and support, and effectively monitoring teacher's effective use of research-based instruction.</p> | <p>Problem solves skillfully (e.g., conceptualizing, applying, analyzing, synthesizing, and/or evaluating information) to provide adequate time, resources, and support to teachers to deliver the district's curriculum to all students.</p> <p>Celebrations of student success are common events and are focused on recognition of the methods and effort expended so students understand what behaviors led to the success.</p> <p>Most grades and subject track student learning growth on priority instructional targets.</p> <p>MTSS operational across the grades and subjects.</p> | <p>Problem solving efforts are unskillfully used to provide adequate time, resources, and support to teachers to deliver the district's curriculum and state's standards to students.</p> <p>Celebrations of student success are provided but are inconsistent in focusing on how/why students succeeded.</p> <p>MTSS operational in some classes.</p>   | <p>No actions other than use of slogans and exhortations to succeed are taken by the leader to address practices and process that actually enable success.</p> <p>MTSS not operational.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   |
| <ul style="list-style-type: none"> <li>Agendas, memorandum, and other documents provide direction on implementation of MTSS.</li> <li>Agendas, memorandum, and other documents reflect recurring discussion with faculty on continuous progress monitoring practices.</li> <li>The leader recognizes the accomplishments of individual teachers, student, groups and the whole school via newsletters, announcements, websites, social media and face-to-face exchanges)</li> <li>Leader solicits student input on processes that support or</li> </ul>  |  | <ul style="list-style-type: none"> <li>Teachers' records reveal data-based interventions and progress monitoring.</li> <li>Teacher-directed celebrations of student success identify causes of success.</li> <li>Supplemental supports are provided in classes.</li> <li>Faculty and student describe the leader as one who is genuinely committed to student success in school and life.</li> <li>Faculty teams, departments, grade levels or collegial learning teams who have worked together on student success are recognized.</li> </ul> |   |

**Indicator 5.3 – Diversity: To align diversity practices with system objectives, improvement planning, faculty proficiency needs, and appropriate instructional goals, the leader recognizes and uses diversity as an asset in the development and implementation of procedures and practices that motivate all students and improve student learning, and promotes school and classroom practices that validate and value similarities and differences among students.**

Narrative: “Diversity practices” refers to the capacity of teachers and school leaders to recognize the many variations in students that impact learning growth (e.g. learning processes, prior learning experiences, family and cultural backgrounds); implement practices that respect diversity in learning needs (e.g. multi-tiered system of supports) and make adjustments at the classroom level that make use of student strengths and promote growth needs.

| What procedures might you establish to increase your ability to help your colleagues develop curriculum, instruction, and assessment that reflect and respect the diversity of students and staff? | What strategies might you employ so that you could share with others throughout the district practices that help them put into action your belief that all students can learn at high levels by leading curriculum, instruction, and assessment that reflect and respect the diversity of students and staff? | How might you increase the consistency with which you act on the belief that all students can learn at high levels by sometimes leading curriculum, instruction, and assessment that reflect and respect the diversity of students and staff? | How might you expand the opportunities for all students to meet high expectations by leading curriculum, instruction, and assessment that reflect and respect the diversity of students and staff? |

**Indicator 5.4 – Achievement Gaps: The leader engages faculty in recognizing and understanding cultural and developmental issues related to student learning by identifying and addressing strategies to minimize and/or eliminate achievement gaps associated with student subgroups within the school.**

Narrative: Where indicator 5.3 is focused on the broad array of diversity factors that impact success of individual students and student sub-groups, indicator 5.4 focuses on academic growth of specific sub-groups whose academic performance lags behind what they are capable of achieving. The leader is expected to prepare the faculty to do what is needed to meet the academic improvement needs of the sub-group(s).

| <b>Highly Effective</b>   | <b>Effective</b>   | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
| What strategies might you employ to increase your ability to help your colleagues understand how the elements of culture are impacted by the current systems (e.g., curriculum, instruction, assessment, etc.) in order to improve student achievement? | What are one or two critical steps you could take that would shift your examination of culture to a point that they become a self-regulating system based on data that guarantees regular and predictable success even if conditions change? | How might you systematically apply the process of inquiry to develop methods of generating greater understanding of the cultures of individuals within the building and how the elements of culture are impacted by the current systems (e.g., curriculum, instruction, assessment) to improve student achievement? | Why do sub-groups students like those in your school not perform as well as similar groups in other schools?<br><br>In what ways might you demonstrate greater understanding of cultures and their impact on the current systems in your school to improve student learning? |

### Domain 3: Organizational Leadership

Narrative: This domain addresses proficiencies that impact the quality of a broad array of school operations. The focus is applying these proficiencies to improve student achievement, instructional leadership, and professional conduct.

Narrative: This proficiency area is aligned to FPLS standard #6. How decisions are made can be as important as what decisions are made. The leader's proficiency at balancing the various aspects of decision-making is the focus of this area.

**Indicator 6.1 – Prioritization Practices: The leader gives priority attention to decisions that impact the quality of student learning and teacher proficiency, gathering and analyzing facts and data, and assessing alignment of decisions with school vision, mission, and improvement priorities.**

Narrative: Leaders make many decisions. Those that impact student learning and teacher proficiency require priority attention. The focus is the leader's ability to make sure that decisions on student learning and faculty proficiency are not lost among the lower priority issues or given inadequate attention because of all the other things leaders do.

**Reflection Questions for Indicator 6.1**

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|--|--|--|--|
| <p>What procedures have you established to increase professional knowledge opportunities for colleagues across the school system?</p> <p>How do you promote and foster continuous improvement with new staff? What changes might you make to your decision-making process for further improvement?</p> | <p>What system do you use to prioritize learning needs and empower faculty to create individual learning plans?</p> <p>How might you reinforce and establish your efforts so that direct reports and your entire school community understand the link between decisions and your priorities?</p> | <p>What strategies have you employed to meet the learning needs of your faculty, from novice to veteran to expert?</p> <p>Why is it necessary to explicitly reference your vision and mission, even though they are visibly posted in high traffic areas of your school?</p> | <p>How should your awareness of learning, teaching, and student development inform decisions?</p> <p>How might you better align your decisions with the vision and mission of your school?</p> |

**Indicator 6.2 – Problem Solving: The leader uses critical thinking and data-based problem solving techniques to define problems and identify solutions.**

Narrative: Problem solving is an essential support to decision making. The leader’s skill in using thinking skills and data to define problems and identify solutions is the focus here.

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|---|---|---|---|
| <p>The leader demonstrates the ability to construct a clear and insightful problem statement with evidence of relevant contextual factors.</p> <p>The leader identifies multiple approaches for solving a problem and proposes one or more solutions/hypotheses that indicate a deep comprehension of the problem. The solutions are sensitive to contextual factors as well as all of the following: ethical, logical, and cultural dimensions of the problem.</p> <p>The leader’s evaluation of solutions is comprehensive and includes all of the following: history of the problem, logic/reasoning, feasibility and impact of the solution.</p> <p>The solution is implemented in a manner that addresses each of the contextual factors of the problem. A thorough review of the results is conducted to determine need for further work.</p> | <p>The leader demonstrates the ability to construct a problem statement with evidence of most relevant contextual factors and the problem statement is adequately detailed.</p> <p>The leader identifies multiple approaches for solving a problem.</p> <p>The leader’s solutions are sensitive to contextual factors as well as at least one of the following: ethical, logical, or cultural dimensions of the problem.</p> <p>Evaluation of solutions is adequate and includes: history of the problem, reviews logic and reasoning, examines feasibility of solution, and weighs impact.</p> <p>The solution is implemented and the results reviewed with some consideration for further work.</p> | <p>The leader is beginning to demonstrate the ability to construct a problem statement with evidence of most relevant contextual factors, but the problem statements are superficial or inconsistent in quality.</p> <p>Typically, a single “off the shelf” solution is identified rather than designing a solution to address the contextual factors.</p> <p>The solution is implemented in a manner that addresses the problem statement but ignores relevant factors. Results are reviewed with little, if any, consideration for further work.</p>  | <p>The leader demonstrates a limited ability to identify a problem statement or related contextual factors.</p> <p>Solutions are vague or only indirectly address the problem statement.</p> <p>Solutions are implemented in a manner that does not directly address the problem statement and are reviewed superficially with no consideration for further work.</p> |

| <ul style="list-style-type: none"> <li>• Samples of problem statements, contextual factors, recommended approaches, proposed solutions, evaluation, and review with consideration for further work are presented.</li> <li>• A well-established problem-solving process can be described by the leader.</li> <li>• Data records reveal the range of problems addressed and after-implementation data collections.</li> <li>• Reports and newsletters to stakeholders inform of problems addressed and the impact of solutions implemented.</li> <li>• Other leadership evidence of proficiency on this indicator.</li> </ul>  |   | <ul style="list-style-type: none"> <li>• Teachers can personally attest to the problem-solving skills of the leader.</li> <li>• Teachers report a high degree of satisfaction with the problem-solving process established by the leader.</li> <li>• Teacher and/or students describe participating in problem solving led by the school leader.</li> <li>• Multi-tiered System of Supports (MTSS) is fully operational in classrooms.</li> <li>• Sub-ordinate leaders are engaged in data-based problem solving.</li> <li>• Other impact evidence of proficiency on this indicator.</li> </ul> |   |

**Scale Levels:** (choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. If not being rated at this time, leave blank:

**Highly Effective**       **Effective**       **Needs Improvement**       **Unsatisfactory**

**Evidence Log** (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):

**Reflection Questions for Indicator 6.2**

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>                                |
|--|--|--|--|
| What might be some of the things you learned about problem solving that will influence your leadership practice in the future? | What can you do to enable your sub-ordinate leaders to be more effective in problem solving? | What are some specific recollections (data) that come to mind that define your thinking about effective problem solving? | How would you describe your problem solving process? |

**Indicator 6.3 – Quality Control: The leader maintains recurring processes for evaluating decisions for effectiveness, equity, intended and actual outcome(s); implements follow-up actions revealed as appropriate by feedback and monitoring; and revises decisions or implementing actions as needed.**

Narrative: Decisions are made....but there is a follow-up process. What was the impact of the decisions? The focus here is the leader's follow-up on decisions and capacity to make revisions where needed.

### Reflection Questions for Indicator 6.3

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|--|--|--|--|
| How do you continue to clarify the decision-making process in a dynamic, changing environment? | Why is it necessary for you as a school leader to reevaluate prior decisions and programs in light of emerging research, personal experience, and changing situations? | What will you do from now on to ensure previous decisions and programs are revisited and evaluated on a routine basis? | When do you take time with your leadership team to reflect on decisions that have been made? In what ways do you evaluate decisions on the basis of student achievement? |

**Indicator 6.4 – Distributive Leadership: The leader empowers others and distributes leadership when appropriate.**

Narrative: A school is too complex for one person to make all decisions. Some of the functions of leadership must be shared with others. Developing capacity for success in a workforce requires enabling other people to be responsible for meaningful decisions. The leader’s capacity to share the “right stuff” and distribute decision making among other appropriate staff is the focus here.

**Rating Rubric**

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|--|--|---|--|
| To what extent do you have a systematic process in place for delegating authority to subordinates? | <p>How might you increase the range and scope of tasks and responsibilities you delegate to key individuals or teams?</p> <p>In what areas do faculty and staff bring expertise that will improve the quality of decisions at your school?</p> | <p>Under what circumstances would you be willing to release increased decision-making authority to your staff and faculty?</p> <p>How might you use the function of delegation to empower staff and faculty at your school?</p> | What factors prevent you from releasing responsibilities to staff? |

**Indicator 6.5 – Technology Integration: The leader employs effective technology integration to enhance decision making and efficiency throughout the school. The leader processes changes and captures opportunities available through social networking tools, accesses and processes information through a variety of online resources, incorporates data-driven decision making with effective technology integration to analyze school results, and develops strategies for coaching staff as they integrate technology into teaching, learning, and assessment processes.**

Narrative: Technology was a separate standard in the 2005 Florida Principal Leadership Standards (FPLS). By 2011 the state had made great strides toward accepting technology into the schools. In the 2011 FPLS, technology moved from a separate general “pro-technology” standard to focused applications of technology embedded in several standards. This indicator focuses on technology integration and the leader’s use of technology to improve decision-making processes in several priority areas.

**Rating Rubric**

**Proficiency Area 7. Leadership Development: Effective school leaders actively cultivate, support, and develop other leaders within the organization, modeling trust, competency, and integrity in ways that positively impact and inspire growth in other potential leaders.**

Narrative: This proficiency area aligns to Standard 7. Leaders are developed by other leaders. This is a process critical to an organization's capacity to improve over time and sustain quality processes. This proficiency area focuses on what leaders do to develop leadership in others.

**Indicator 7.1 – Leadership Team: The leader identifies and cultivates potential and emerging leaders, promotes teacher-leadership functions focused on instructional proficiency and student learning, and aligns leadership development practices with system objectives, improvement planning, leadership proficiency needs, and appropriate instructional goals.**

Narrative: The FPLS are based on a presumption that the school leader works with and through a team of other people to insure coordination and focus of school operations and improvements. Leadership teams get things done!

**Rating Rubric**

### Reflection Questions for Indicator 7.1

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|--|--|--|--|
| <p>How do you provide guidance and mentorship to emerging leaders outside of your personal job description and leadership responsibilities?</p> <p>How would you describe the system you use to ensure that emerging leaders pursue job opportunities when they are available? How might you embed this preparation into their job duties, and what changes will you need to make to help build such leadership capacity at your school?</p> | <p>How have you designed the school improvement process to develop leadership capacity from existing faculty?</p> <p>What strategies and lessons might you impart to your direct reports to better prepare them for expanded leadership opportunities?</p> | <p>What process do you employ to encourage participation in leadership development?</p> <p>When do you release responsibility to your assistants to own key decisions? How do you leverage school improvement activities to build leadership capacity for assistants and emerging teacher leaders?</p> | <p>What process is available to you that help you screen and develop potential leaders?</p> <p>How might you spend time explicitly preparing your assistants to assume your role as principal? What steps would you take to spend more time in preparing your assistants to assume your role as principal?</p> |

**Indicator 7.2 – Delegation: The leader establishes delegated areas of responsibility for sub-ordinate leaders and manages delegation and trust processes that enable such leaders to initiate projects or tasks, plan, implement, monitor, provide quality control, and bring projects and tasks to closure.**

Narrative: Leadership teams engage other skilled people in the business of the school. However, involvement does not insure effective organizations. This indicator focuses on the distribution of responsibility and whether sub-ordinate leaders have been delegated all that is needed to succeed.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|---|---|---|--|
| <p>Staff throughout the organization is empowered in formal and informal ways.</p> <p>Faculty members participate in the facilitation of meetings and exercise leadership in committees and task forces; other employees, including noncertified staff, exercise appropriate authority and assume leadership roles where appropriate.</p> <p>The climate of trust and delegation in this organization contributes directly to the identification and empowerment of the next generation of leadership.</p>  | <p>There is a clear pattern of delegated decisions, with authority to match responsibility at every level in the organization.</p> <p>The relationship of authority and responsibility and delegation of authority is clear in personnel documents, such as evaluations, and also in the daily conduct of meetings and organizational business.</p> | <p>The leader sometimes delegates, but also maintains decision-making authority that could be delegated to others.</p> <p>Clarity of the scope of delegated authority is inconsistent from one delegation to another.</p> <p>Actions taken by those to who tasks are delegated are sometimes overruled without explanation.</p>   | <p>The leader does not afford subordinates the opportunity or support to develop or to exercise independent judgment.</p> <p>If delegation has occurred there is a lack of clarity on what was to be accomplished or what resources were available to carry out delegated tasks.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or status of the faculty and staff. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |  |
| <ul style="list-style-type: none"> <li>• A Responsibility Matrix or chart of "who does what" provides evidence that the leader trust others within the school by identifying how leadership responsibilities are delegated to other faculty members on his or her staff.</li> <li>• The leader's processes keep people from performing redundant activities.</li> <li>• The leader has crafted "job descriptions" for sub-ordinate leaders' roles that clarify what they are to do and have the delegated authority to do.</li> <li>• Communications to delegated leaders provide predetermined decision-making responsibility.</li> <li>• Documents initiating projects and tasks identify personal responsibility for success at the beginning of the project.</li> <li>• Delegation and trust are evident in personnel evaluations.</li> <li>• Delegation and trust are evident in the school improvement plan as a variety of school staff are identified as being directly responsible for various components of the planning effort.</li> <li>• Meeting minutes provide evidence of delegation and trust being extended to select members of the faculty.</li> <li>• Other leadership evidence of proficiency on this indicator.</li> </ul> |   | <ul style="list-style-type: none"> <li>• Teachers report that areas of delegated responsibility include authority to make decisions and take action within defined parameters.</li> <li>• Faculty and staff can cite examples of delegation where the leader supported the staff member's decision.</li> <li>• Faculty report that building leaders express high levels of confidence in their capacity to fulfill obligations relevant to the shared task of educating children.</li> <li>• Staff to whom responsibility has been delegated in turn delegates appropriate aspects of their tasks to other staff thus expanding engagement.</li> <li>• Other impact evidence of proficiency on this indicator.</li> </ul> |  |

**Scale Levels:** (choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. If not being rated at this time, leave blank:

**Highly Effective**       **Effective**       **Needs Improvement**       **Unsatisfactory**

**Evidence Log** (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):

**Reflection Questions for Indicator 7.2**

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>  |
|--|---|--|--|
| To what extent do you have a systematic process in place for delegating authority to subordinates? | How might you increase the range and scope of tasks and responsibilities you delegate to key individuals or teams?<br><br>In what areas do faculty and staff bring expertise that will improve the quality of decisions at your school? | Under what circumstances would you be willing to release increased decision-making authority to your staff and faculty?<br><br>How might you use the function of delegation to empower staff and faculty at your school? | What factors prevent you from releasing responsibilities to staff? |

**Indicator 7.3 – Succession Planning: The leader plans for and implements succession management in key positions.**

Narrative: When the leader is off campus – who is in charge? When the leader changes jobs or retires, who is prepared to take over? What about the school's sub-ordinate leaders? Who takes over for them? Succession planning is building relationships and preparation processes for involving others in ways that prepare them to move into key positions as they become vacant.

| <p>In what ways might you further extend your reach within the district to help others throughout the district benefit from your knowledge and skill in succession management practices?</p> <p>What have you prepared to assist your successor when the time comes?</p> | <p>In what ways are you interacting with central office personal to share highly effective succession planning practices with other leaders throughout the district?</p> <p>What are some of your strategies you have employed that help your school get work done during vacancy periods?</p> | <p>What are the key components of within your succession management plan?</p> <p>What might be the one or two personal leadership practices to which you will pay particular attention as you implement your succession management plan?</p> | <p>In what ways would a plan for succession management be helpful to you as you move to replace key and hard-to-fill positions at your school?</p> |

**Indicator 7.4 – Relationships: The leader develops sustainable and supportive relationships between school leaders, parents, community, higher education, and business leaders.**

Narrative: This is a fundamentally important skill set. Leaders get quality work done through other people. The skill set of relationship building, including networking and engaging others in a shared vision, are hallmarks of quality leaders.

**Rating Rubric**

|   |  |   |  |

|---|---|--|---|
| In what ways might you further extend your reach within the district to help others throughout the district benefit from your knowledge and skill in establishing relationships among key stakeholder groups? | What strategies are you employing so you can share your experiences relative to establishing relationships with key stakeholders to support potential and emerging leaders? | In what ways are you working to establish networks with key stakeholder groups to cultivate and support potential and emerging leaders in your school? | How might your relationships with faculty and key stakeholder groups help to cultivate and support potential and emerging leaders in your school? |

**Proficiency Area 8. School Management: Effective school leaders manage the organization, operations, and facilities in ways that maximize the use of resources to promote a safe, efficient, legal, and effective learning environment; effectively manage and delegate tasks and consistently demonstrate fiscal efficiency; and understand the benefits of going deeper with fewer initiatives as opposed to superficial coverage of everything.**

Narrative: This proficiency area aligns with Standard 8. A school is an “organization.” School leaders manage implementation of many rules, regulations, and policies. However, the “organization” is the people working together to provide learning to students. What leaders do to manage those people and the environment in which they work is the focus of this area.

**Indicator 8.1 – Organizational Skills: The leader organizes time, tasks, and projects effectively with clear objectives, coherent plans, and establishes appropriate deadlines for self, faculty, and staff.**

Narrative: Time, tasks, and projects all need organization to have the desired impact. This indicator focuses on the key aspects of organization essential to school success.

### Rating Rubric

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact. |
|--|---|--|---|
| <p>The leader uses project management as a teaching device, helping others understand the interrelationship of complex project milestones throughout the organization.</p> <p>The leader uses complex project management to build system thinking throughout the organization.</p> <p>Project plans are visible in heavily trafficked areas, so that accomplishments are publicly celebrated and project challenges are open for input from a wide variety of sources.</p> <p>Successful project results can be documented.</p>  | <p>Project management documents are revised and updated as milestones are achieved or deadlines are changed.</p> <p>The leader understands the impact of a change in a milestone or deadline on the entire project, and communicates those changes to the appropriate people in the organization.</p> <p>Task and project management and tracking of deadlines are routinely monitored with an emphasis of issues related to instruction and faculty development.</p> | <p>Project management methodologies are vague or it is unclear how proposed project management tools will work together in order to help keep tasks and projects on time and within budget.</p> <p>The impact of changes in an action plan or deadline is inconsistently documented and communicated to people within the organization.</p>  | <p>There is little or no evidence of time, task or project management focused on goals, resources, timelines, and results.</p>                                      |

### Reflection Questions for Indicator 8.1

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>   |
|---|---|---|---|
| <p>How much of your work on organization of time and projects is reactive to establish conformity with deadlines and short term situations and how much is proactive focused on creating capacity for continuous improvement.?</p> <p>Are you able to identify and articulate to others the systemic connections between the various projects and tasks you manage?</p> | <p>To what extent are tasks and major tasks delineated in your overall project design? What might you do to emphasize the most important components over minor tasks?</p> <p>How do you distinguish between the support needed for high priority projects and tasks that impact student achievement or faculty development and compliance with projects that have fixed due dates for parties outside the building?</p> | <p>How do you ensure unanticipated changes do not derail or prevent completion of key projects at your school?</p> <p>How do you monitor whether work needed to meet deadlines is proceeding at a necessary pace?</p> | <p>What changes in your practice are needed to ensure necessary projects are identified, realistically designed, carefully implemented, and supported with sufficient time and resources?</p> <p>How to you distribute workloads so the appropriate people are involved and with sufficient clarity on goals and timeframes to get work done?</p> |

**Indicator 8.2 – Strategic Instructional Resourcing: The leader maximizes the impact of school personnel, fiscal and facility resources to provide recurring systemic support for instructional priorities and a supportive learning environment.**

Narrative: Resources are always limited. How well a leader does at putting resources where they are needed and when they are needed to support instructional goals is the focus here. Do teachers and students get what they need when they need it?

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact. |
|--|---|---|---|
| <p>The leader regularly saves resources of time and money for the organization, and proactively redeploys those resources to help the organization achieve its strategic priorities. Results indicate the positive impact of redeployed resources in achieving strategic priorities.</p> <p>The leader has established processes to leverage existing limited funds and increase capacity through grants, donations, and community resourcefulness.</p>  | <p>The leader leverages knowledge of the budgeting process, categories, and funding sources to maximize all available dollars to achieve strategic priorities.</p> <p>The leader has a documented history of managing complex projects, meeting deadlines, and keeping budget commitments.</p> <p>The leader documents a process to direct funds to increase student achievement that is based on best practice and leveraging of antecedents of excellence in resources, time, and instructional strategies.</p> | <p>The leader sometimes meets deadlines, but only at the expense of breaking the budget; or, the leader meets budgets, but fails to meet deadlines.</p> <p>The leader lacks proficiency in using the budget to focus resources on school improvement priorities.</p> <p>Resources are not committed or used until late in the year or are carried over to another year due to lack of planning and coordination.</p> <p>The leader makes minimal attempts to secure added resources.</p>  | <p>The leader has no clear plan for focusing resources on instructional priorities and little or no record of keeping commitments for schedules and budgets.</p>    |

### Reflection Questions for Indicator 8.2

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|---|---|---|--|
| How would you describe the systematic method for pursuing grants, partnerships, and combining community resources you have implemented to support increases to student achievement? | To what extent are faculty and staff aware of your budgeting expectations? How are your budgeting expectations delineated, published, and communicated? | Have there been instances in which you failed to meet deadlines or where expenditures resulted in budget overruns? What did you learn from that experience and how did you apply lessons from it? | When resources are limited, what actions do you take as the school leader to allocate them most efficiently? |

**Indicator 8.3 – Collegial Learning Resources: The leader manages schedules, delegates, and allocates resources to provide recurring systemic support for collegial learning processes focused on school improvement and faculty development.**

Narrative: Team learning is an essential element in a learning organization. Does the leader provide needed supports to collegial learning? Are barriers to success removed? Everyone working in isolation reduces the probability of improvements. Collegial processes need resource support. This indicator assesses the leader's proficiency at providing that support.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.                          |
|--|---|---|--|
| <p>The leader leverages knowledge of the budgeting process, categories, and funding sources to maximize the impact of available dollars on collegial processes and faculty development.</p> <p>Results indicate the positive impact of deployed resources in achieving a culture of deliberate practice focused on school improvement needs.</p> <p>The leader has established processes to support collegial processes and faculty development through grants, business or higher education partnerships, and/or community resourcefulness.</p>   | <p>The leader has established routines regarding allocation of time and facility resources that result in wide faculty participation in collegial processes and faculty development.</p> <p>School fiscal resources are allocated to support collegial processes and faculty development.</p> <p>Clear delegations of responsibility are evident that involve highly effective faculty in sustaining collegial processes and faculty development.</p> | <p>The leader lacks proficiency in using budget, work schedules, and/ or delegation of involvement to focus time and resources on collegial processes and faculty development.</p> <p>There is a lack of sustained and focused resource allocation on these issues.</p>   | <p>The leader has little or no record of making plans or keeping commitments to provide resources or build schedules of events that support collegial processes and faculty development.</p> |

### Reflection Questions for Indicator 8.3

| <b>Highly Effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>   |
|--|---|---|---|
| How would you describe the systematic method for pursuing grants, partnerships, and combining community resources you have implemented to support increases in the quality of collegial processes? | <p>To what extent are faculty and staff aware of your focus on collegial processes?</p> <p>How are faculty given opportunities to request or recommend time or resource allocations that support collegial processes and faculty development?</p> | <p>Have there been instances in which you failed to act on opportunities to support collegial processes or faculty development?</p> <p>What did you learn from that experience and how did you apply lessons from it?</p> | When resources are limited, what actions do you take as the school leader to reallocate them to the high impact functions like collegial processes and faculty development? |

**Proficiency Area 9. Communication: Effective school leaders use appropriate oral, written, and electronic communication and collaboration skills to accomplish school and system goals by:**

- **Practicing two-way communications, seeking to listen and learn from and building and maintaining relationships with students, faculty, parents, and community;**
- **Managing a process of regular communications to staff and community keeping all stakeholders engaged in the work of the school; and**
- **Recognizing individuals for good work; and maintaining high visibility at school and in the community.**

Narrative: The “voice of the school” represents a core set of communication processes that shape perceptions about the school – the leader’s communications central among them. The leader must manage the “voice of the school” so clear, coherent and accurate information flows to faculty, students, and stakeholders. The perceptions of those involved in the success of the school need to be heard, acknowledged, and understood.

**Indicator 9.1 – Constructive Conversations: The leader actively listens to and learns from students, staff, parents, and community stakeholders and creates opportunities within the school to engage students, faculty, parents, and community stakeholders in constructive conversations about important issues.**

Narrative: Skillful “speaking” is important. So is skillful listening. People can engage in conversation on many things, but some things are more important to school improvement than others. Making sure speaking and listening occurs on the important issues is a leader’s task.

### Rating Rubric

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |
|--|--|--|---|
| In addition to the practices at the effective level, the highly effective leader routinely mentors others within the district to effectively employ key active listening skills (e.g. wait time, paraphrasing, asking clarifying questions) when interacting with diverse stakeholder groups about high achievement for all students.<br><br>There is evidence of the leader making use of what was learned in constructive conversations with others in the leader’s subsequent actions, presentations, and adjustments to actions. | The leader systematically (e.g., has a plan, with goals, measurable strategies, and a frequent-monthly-monitoring schedule) and reciprocally listens to and communicates with students, parents, staff, and community using multiple methods (i.e., oral, written, and electronic) to seek input/feedback and to inform instructional and leadership practices.<br><br>The leader systematically communicates with diverse stakeholders about high achievement for all students. | The leader’s involvement in regard to listening to and communicating with students, parents, staff, and community is primarily unplanned and/or initiated by others rather than the leader “reaching out.”<br><br>The leader has only a few methods to seek input/feedback with the intent to inform instructional and leadership practices.<br><br>The leader’s communications with stakeholders about high achievement for all students are not carefully planned and implemented. | The leader’s visibility within the community is virtually non-existent; conducts little to no interactions with stakeholders regarding the work of the school.<br><br>The leader is isolated from students, parents, staff, and community and engages in no or minimal listening to and communicating with them to seek input/feedback and inform instructional and leadership practices.<br><br>The leader avoids engaging faculty and/or stakeholders in conversations on controversial issues that need to be addressed in the interest of school improvement. |
| <b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:   |  | <b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or status of the faculty and staff. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:   |   |

### Reflection Questions for Indicator 9.1

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>  |
|---|---|---|--|
| <p>How might you further expand your influence over your colleagues within the district relative to the implementation of effective listening and communication techniques?</p> | <p>What support might you provide your colleagues within the school that would help them become as capable in the area of listening and communicating as you?</p> | <p>How would you describe your efforts to implement a plan to communicate with various stakeholders within your school community?</p> <p>What might be some of the things you are taking away from this experience that will influence your communication practice in the future?</p> | <p>How might listening with the intent to learn from students, staff, parents, and community stakeholders be beneficial to the successful operation of the school?</p> |

**Indicator 9.2 – Clear Goals and Expectations: The leader communicates goals and expectations clearly and concisely using Florida’s common language of instruction and appropriate written and oral skills, communicates student expectations and performance information to students, parents, and community, and ensures faculty receives timely information about student learning requirements, academic standards, and all other local, state, and federal administrative requirements and decisions.**

Narrative: Proficiency in the competencies addressed in this indicator impacts success on many other indicators. The most successful school leaders are able to provide clear goals and expectations on every aspect of school operations and instructional leadership. You need to do the “school leader’s two step.” Having clear goals and expectations is step one, communicating them so others can act on them is step two.

**Rating Rubric**

**Scale Levels:** (choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. If not being rated at this time, leave blank:

**Highly Effective**       **Effective**       **Needs Improvement**       **Unsatisfactory**

**Evidence Log** (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):

**Reflection Questions for Indicator 9.2**

| <b>Highly Effective</b>  | <b>Effective</b>   | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>   |
|--|--|--|---|
| <p>What additional strategies have you established to diffuse your practices on goals and expectations among your colleagues across the school system?</p> <p>How does feedback from key stakeholder groups inform the work of the school?</p> | <p>How might you articulate to faculty the benefits that could be gained by the school if parents and community members understood the rationale for most decisions on goals and expectations?</p> | <p>How might you improve your consistency of interactions with stakeholders regarding the work of the school?</p> <p>Knowing that some teachers and parents are reluctant to initiate conversations with school leaders, what strategies have you employed or considered in which you—as the leader—would initiate communication on priority goals and expectations?</p> | <p>What are your priority goals for school improvement?</p> <p>How do you know whether others find them clear and comprehensible?</p> |

**Indicator 9.3 – Accessibility: Maintains high visibility at school and in the community, regularly engages stakeholders in the work of the school, and utilizes appropriate technologies for communication and collaboration.**

Narrative: Leaders need to be seen by those they are to lead...and those who are asked to engage in rigorous effort on the leader's goals need access to the leader. While leaders must manage their time, they must also make sure those who need access can get it in reasonable ways and timeframes. In a 21<sup>st</sup> century technological society use of social networking and other technologies to promote accessibility is a valuable leadership competency.

|--|--|---|--|
| How can you involve subordinate leaders as high visibility assets of the school? | What uses can you make of modern technology to deepen community engagement and expand your accessibility to all? | How can you assess what students, faculty, and stakeholders think of your level of accessibility? | What work habits would you need to change to be more visible to students, faculty, and stakeholders? |

**Indicator 9.4 – Recognitions: The leader recognizes individuals, collegial work groups, and supporting organizations for effective performance.**

Narrative: Leading is about enabling others to succeed. Recognition of the successes and contributions of others is a key leadership function. Recognition from the leader is motivating and focusing. The recognition needed is more than “good job.” It identifies what people did to generate the success being recognized. Recognizing the way in which people succeed encourages them to continue those practices and informs others “by what methods” they may do the same.

| <p>What might be some of the potential benefits that would come from you sharing your talents in this area with your colleagues in the district?</p> | <p>In what ways are you utilizing the recognition of failure as an opportunity to improve?</p> <p>How do you enable those that make progress to share "by what method" they did so?</p> | <p>How might you compare your beliefs about the importance of providing individual and collective praise to your actual practice?</p> <p>What do you want to be most aware of as you make future plans in this area?</p> | <p>As you assess the importance of acknowledging failures and celebrating accomplishments, what assumptions are guiding you?</p> |

## Domain 4 - Professional and Ethical Behavior

Narrative: This domain is focused on the professional integrity and dedication to excellence of the school leader. The indicators in this domain focus on behaviors essential to success as a school leader.

Narrative: There are two broad proficiency areas that are the focus of evaluation of behavior and ethics. One is approached as Proficiency Area 10 of the FSLA which is focused on Florida Principal Leadership Standard #10 (FPLS). The indicators in proficiency area 10 address resiliency, professional learning, commitment, and conduct. The other major professional behavior area, Deliberate Practice, is a separate metric, scored separately and, when combined with the overall FLSA score, generates the Leadership Practice Score.

|   |
|---|
| <p><b>Indicator 10.1 – Resiliency: The leader demonstrates resiliency in pursuit of student learning and faculty development by:</b></p> <ul style="list-style-type: none"> <li>• <b>staying focused on the school vision,</b></li> <li>• <b>reacting constructively to adversity and barriers to success,</b></li> <li>• <b>acknowledging and learning from errors,</b></li> <li>• <b>constructively managing disagreement and dissent with leadership,</b></li> <li>• <b>bringing together people and resources with the common belief that the organization can grow stronger when it applies knowledge, skills, and</b></li> <li>• <b>productive attitudes in the face of adversity.</b></li> </ul> |
|---|

Narrative: The lead indicator in this FSLA domain is focused on resiliency. Leadership takes strength of character and a capacity to “weather the storm(s)” to get quality results. It includes learning from mistakes and sticking with it until you get it right.

### Rating Rubric

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.  | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.   |

### Reflection Questions for Indicator 10.1

| <b>Reflection Questions</b>  |   |   |   |
|--|---|---|---|
| <b>Highly effective</b>  | <b>Effective</b>  | <b>Needs Improvement</b>  | <b>Unsatisfactory</b>   |
| <p>What additional insights are you gaining about the challenges of reconciling points of view disagreements and fully supporting and executing organizational policy and leadership decisions?</p> <p>What additional insights have</p> | <p>How might you reconcile your opinions with final decisions in supporting and implementing organizational policy and leadership decisions?</p> <p>How can you help your staff grow to acknowledge and implement systems for gaining</p> | <p>When or how is it appropriate to challenge policy and leadership decisions, if at all?</p> <p>What leadership practices, structures, and processes could you put in place that would help staff know that dissent is welcomed as part of an informed</p> | <p>How do you deal with decisions with which you are uncomfortable? Do you think about the impact when unpopular or difficult policy decisions are undermined, ignored, or executed with public disagreement or lack of</p> |

|   |  |                                 |  |
|---|--|---------------------------------|--|
| <p>you gained about the value of supporting processes that enable faculty to reflect on and modify their own mental models based on evidence rather than assumptions?</p> | <p>multiple perspectives in decision-making?</p> | <p>decision-making process?</p> | <p>enthusiasm from yourself or your staff?</p> <p>What needs to be done to establish enough trust that faculty and staff feel free to present opposing views with you in an open, sharing way?</p> |
|---|--|---------------------------------|--|

**Indicator 10.2 – Professional Learning: The leader engages in professional learning that improves professional practice in alignment with the needs of the school and system and demonstrates explicit improvement in specific performance areas based on previous evaluations and formative feedback.**

Narrative: Professional learning is addressed in several FSLA indicators, each from a different perspective. Indicator 4.5 is focused on what the leader does to engage faculty in meaningful professional learning (which includes being involved in what the faculty is learning). Indicator 4.4 focuses on professional learning needed to implement priority initiatives. Indicator 4.6 addresses alignment of faculty professional learning with improvement of instruction. The Deliberate Practice metric concentrates on a very few issues where the leader drives for deep learning and personal mastery of a few “thin slices.” Indicator 10.2 is focused on the impact of the leader’s professional learning – does the leader’s learning result in improved performance?

**Rating Rubric**

| <b>Highly Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.  | <b>Effective:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.  | <b>Unsatisfactory:</b> Leader’s actions or impact of leader’s actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|---|---|--|--|
| <p>Performance improvements linked to professional learning are shared with other leaders thus expanding impact.</p> <p>The leader approaches every professional learning opportunity with a view toward multidimensional impact.</p> <p>Knowledge and skills are shared throughout the organization and with other departments, schools, and districts.</p> <p>Rather than merely adopting the tools of external professional learning, this leader creates specific adaptations so that learning tools become part of the culture of the organization and are “home-grown” rather than externally generated.</p> <p>The leader provides evidence of leverage, applying each learning opportunity throughout the organization. This leader creates forms, checklists, self-assessments, and other tools so that concepts learned in professional development are applied in the daily lives of teachers and leaders throughout the organization.</p> | <p>The leader routinely shows improvement in areas where professional learning was implemented.</p> <p>The leader engages in professional learning that is directly linked to organizational needs.</p> <p>The priority is given to building on personal leadership strengths.</p> <p>The leader personally attends and actively participates in the professional learning that is required of other leaders in the organization.</p> <p>The leader personally attends and actively participates in the professional learning required of teachers.</p> <p>There is clear evidence of the actual application of personal learning in the organization. Where learning has not been applied within the organization, this leader rigorously analyzes the cause for this and does not continue investing time and money in professional learning programs that lack clear evidence of success when applied in the organization.</p> | <p>The leader demonstrates some growth in some areas based on professional learning.</p> <p>The leader actively participates in professional learning, but it is reflective of a personal agenda rather than addressing the strategic needs of the organization.</p> <p>The leader attends professional learning for colleagues, but does not fully engage in it and set an example of active participation.</p> <p>The leader has given intellectual assent to some important learning experiences, but can give only a few specific examples of application to the organization.</p> | <p>There is no or only minimal impact of professional learning on the leader’s performance.</p> <p>The leader might introduce a professional learning program, but does not participate in the learning activities along with the staff.</p> <p>The leader is not strategic in planning a personal professional learning focus aligned with the school or district goals.</p> <p>Even on those rare occasions when the leader engages in professional learning, the purpose appears to be merely collecting information rather than reflecting on it and applying it to the organization. Professional learning is an expense, not an investment in constructive improvements.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader’s behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>   |   | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students, and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  |
| <ul style="list-style-type: none"> <li>The leader is an active participant in professional learning provided for faculty.</li> <li>The leader’s professional growth plan includes professional learning topics that are directly linked to the needs of the school</li> </ul>   |   | <ul style="list-style-type: none"> <li>Teachers’ anecdotal evidence of the leader’s support for and participation in professional learning.</li> <li>The frequency with which faculty members are engaged in professional learning with the school leader.</li> </ul>  |  |

**Indicator 10.3 – Commitment: The leader demonstrates a commitment to the success of all students, identifying barriers and their impact on the well-being of the school, families, and local community.**

Narrative: Leaders are committed to carrying out the role of school leader in ways that benefit others: Students – faculty – community. Barriers to having that impact are not seen as reasons to give up but as problems to be solved.

**Rating Rubric**

| <b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.   | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.   | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.   | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.  |
|--|---|---|--|
| The messaging and support systems of the effective principal are expanded to engage parents and the community at large in participating in actions that promote student success and mitigate or eliminate multiple barriers to success. The principal's actions on behalf of students form a foundation of mutual respect between students, faculty and the community.   | There are programs and processes within the school that focus all students on the importance of success in school and multiple tiers of support to assist them in overcoming barriers to success. Positive slogans and exhortations to succeed are supported with specific and realistic guidance and supports on how to succeed and overcome barriers. The schools vision of success for all students is shared with the community at large. | The leader demonstrates professional concern for students and for the development of the student's potential but implementation of processes to identify barriers to student success have limited scope and have resulted in actions to mitigate those barriers and provide supports for success only for some students. There are gaps in processes that engage all faculty in understanding the student population and the community in which they live. Some student sub-groups do not perceive the school as focused on their best interests.                                   | Other than slogans and exhortations to do better, there is minimal or no evidence of principal leadership being employed to implement the FEAPs and FPLS for the benefit of students in the school, and the leader is not perceived by staff, students, or community as a sincere and effective advocate for the students. |
| <b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:   |   | <b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:   |  |
| <ul style="list-style-type: none"> <li>Agenda, memorandum, and other documents show a recurring emphasis on student success with specific efforts to remove barriers to success.</li> <li>Agenda, memorandum, and other documents show a recurring emphasis on deepening faculty understanding of the students and the community in which they live.</li> <li>The leader can describe the challenges present in the students' lives and provide specific examples of efforts undertaken to support student success.</li> <li>Barriers to student achievement or faculty development are identified in the SIP, and strategies are implemented to address them.</li> <li>Other leadership evidence of proficiency on this indicator.</li> </ul> |   | <ul style="list-style-type: none"> <li>Student results show growth in all sub-groups.</li> <li>Faculty members' anecdotal evidence describes a leader focused on and committed to student success.</li> <li>Parent and community involvement in student supports are plentiful and address the needs of a wide range of students.</li> <li>Student work is commonly displayed throughout the community.</li> <li>News reports in local media draw attention to positive actions of students and school.</li> <li>Other impact evidence of proficiency on this indicator.</li> </ul> |  |
| <p><b>Scale Levels:</b> <i>(choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. If not being rated at this time, leave blank:</i></p> <p><input type="checkbox"/> <b>Highly Effective</b>                      <input type="checkbox"/> <b>Effective</b>                      <input type="checkbox"/> <b>Needs Improvement</b>                      <input type="checkbox"/> <b>Unsatisfactory</b></p>   |   |   |  |
| <p><b>Evidence Log</b> (Specifically, what has been observed that reflects current proficiency on this indicator? The examples above are illustrative and do not reflect an exclusive list of what is expected):</p>   |   |   |  |

Reflection Questions for Indicator 10.3

| <b>Highly Effective</b>   | <b>Effective</b>  | <b>Needs Improvement</b>   | <b>Unsatisfactory</b>   |
|---|---|--|---|
| What actions are needed to sustain the role of the school in generating a community wide effort to insure students succeed? | What outreach can you initiate to expand the involvement of parents and community leaders in supporting student success and deepening understanding of the barriers and actions that mitigate them? | Have you presented an effective challenge to perceptions that student apathy or lack of parent involvement are acceptable explanations for lack of success by some students or sub-groups? | Do you know enough about the students and the community in which they live to recognize the barriers that prevent success by all of the students? |

**Indicator 10.4 – Professional Conduct. The leader Adheres to the Code of Ethics (Rules 6B-1.001) of the Education Profession in Florida and to the Principles of Professional Conduct for the education profession (Rules 6B-1.006, F.A.C.).**

Narrative: State Board Rules define specific expectations for the conduct and ethical behaviors for Florida educators.

**Rating Rubric**

|  |  |   |  |
|--|--|---|--|
| <p><b>Highly Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders.</p>  | <p><b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations.</p>   | <p><b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.</p>  | <p><b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.</p>   |
| <p>There is clear, convincing, and consistent evidence that the school leader abides by the spirit, as well as the intent, of policies, laws, and regulations that govern the school and the education profession in the state of Florida, and inspires others within the organization to abide by that same behavior.</p> <p>The leader clearly demonstrates the importance of maintaining the respect and confidence of his or her colleagues, of students, of parents, and of other members of the community, as a result the leader achieves and sustains the highest degree of ethical conduct and serves as a model for others within the district.</p>  | <p>There is clear evidence that the leader values the worth and dignity of all people, the pursuit of truth, devotion to excellence (i.e., sets high expectations and goals for all learners, then tries in every way possible to help students reach them) acquisition of knowledge, and the nurture of democratic citizenship.</p> <p>The leader's primary professional concern is for the student and for the development of the student's potential. Therefore, the leader acquires the knowledge and skills to exercise the best professional judgment and integrity.</p> <p>The leader demonstrates the importance of maintaining the respect and confidence of his or her colleagues, of students, of parents, and of other members of the community. As a result the leader adheres to the prescribed ethical conduct.</p> | <p>The leader's behaviors enable recurring misunderstanding and misperceptions about the leader's conduct and ethics as expressed in the Code and Principles.</p> <p>There are segments of the school community whose developmental needs are not addressed and leadership efforts to understand and address those needs is not evident.</p> <p>The leader has only a general recollection of issues addressed in the Code and Principles and there is limited evidence that the school leader abides by the spirit, as well as the intent, of policies, laws, and regulations that govern the school and the education profession in the state of Florida.</p> | <p>The leader's patterns of behavior are inconsistent with the Code of Ethics, Rule 6B-1.001, or disciplinary action has been initiated based on violation of the Principles of Professional Conduct, Rule 6B-1.006.</p> |
| <p><b>Leadership Evidence</b> of proficiency on this indicator may be seen in the leader's behaviors or actions. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  | <p><b>Impact Evidence</b> of leadership proficiency may be seen in the behaviors or actions of the faculty, staff, students and/or community. <u>Illustrative examples</u> of such evidence may include, but are not limited to the following:</p>  |  |
| <ul style="list-style-type: none"> <li>• Samples of written feedback from teachers regarding the leader's judgment and/or integrity on issues related to the learning environment, instructional improvement or school organization.</li> <li>• Samples of written feedback provided by parents regarding the leader's judgment and/or integrity on issues related to the learning environment, instructional improvement or school organization.</li> <li>• School improvement plan's focus on student success and evidence of actions taken to accomplish such plans.</li> <li>• School safety and behavioral expectations promoted by the leader for the benefit of students.</li> <li>• Other leadership evidence of proficiency on this indicator.</li> </ul> |  | <ul style="list-style-type: none"> <li>• Teacher, student, parent anecdotal evidence reflecting respect for the principal's ethics and conduct.</li> <li>• Recognition by community and parent organizations of the principal's impact as a role model for student and adults in the community.</li> <li>• Parent or student questionnaire results.</li> <li>• Other impact evidence of proficiency on this indicator.</li> </ul>   |  |
| <p><b>Scale Levels:</b> (choose one) Where there is sufficient evidence to rate current proficiency on this indicator, assign a proficiency level by checking one of the four proficiency levels below. ### Reflection Questions for Indicator 10.4

| <b>Highly Effective:</b> Leaders' actions or impact of leader's actions relevant to this indicator exceed effective levels and constitute models of proficiency for other leaders. | <b>Effective:</b> Leader's actions or impact of leader's actions relevant to this indicator are sufficient and appropriate reflections of quality work with only normal variations. | <b>Needs Improvement:</b> Leader's actions or impact of leader's actions relevant to this indicator are evident but are inconsistent or of insufficient scope or proficiency.                                     | <b>Unsatisfactory:</b> Leader's actions or impact of leader's actions relevant to this indicator are minimal or are not occurring, or are having an adverse impact.                                     |
|--|---|---|---|
| How might you expand your influence within the district so that others achieve and sustain your high degree of ethical conduct?  | What might be some strategies you could pursue that would inspire others within the organization to demonstrate your level of ethical behavior?                                     | How might you be more overt in demonstrating that you abide by the spirit, as well as the intent, of policies, laws, and regulations that govern the school and the education profession in the state of Florida? | In what ways are you demonstrating that you abide by the spirit, as well as the intent, of policies, laws, and regulations that govern the school and the education profession in the state of Florida? |

## EVALUATION FORM: Annual PERFORMANCE LEVEL

This form is used to calculate a Summative Performance Level

Name: \_\_\_\_\_

School: \_\_\_\_\_ School Year: \_\_\_\_\_

Evaluator: \_\_\_\_\_ District: \_\_\_\_\_

Evaluator's Title: \_\_\_\_\_ Date Completed: \_\_\_\_\_

Examine all sources of evidence for each of the four domains, using the results from the FSLA process as it applies to the school leader's performance. Incorporate the Deliberate Practice Score. Refer to the Scoring Guide to rate FSLA and Deliberate Practice... Assign an overall evaluation of the school leader's performance, sign the form and obtain the signature of the school leader.

A. Leadership Practice Score

FSLA score \_\_\_\_\_ x .80 = \_\_\_\_\_

Deliberate Practice Score x .20 = \_\_\_\_\_

Combined score is Leadership Practice Score: \_\_\_\_\_

B. Student growth Measure Score: \_\_\_\_\_

C. Performance Score: \_\_\_\_\_

| Performance Score ranges | Performance Level Rating |
|--------------------------|--------------------------|
| 480 to 600               | Highly Effective         |
| 301 to 479               | Effective                |
| 150 to 300               | Needs Improvement        |
| 0 to 149                 | Unsatisfactory           |

Performance level is     Highly Effective     Effective     Needs Improvement     Unsatisfactory

## Student Service Learning Plan

Student Name: \_\_\_\_\_ Student ID#: \_\_\_\_\_

Address: \_\_\_\_\_

Phone # \_\_\_\_\_ Email: \_\_\_\_\_

Course Instructor: \_\_\_\_\_ Semester: \_\_\_\_\_

Agency/Site: \_\_\_\_\_ Phone #: \_\_\_\_\_

Site Supervisor: \_\_\_\_\_ Phone #: \_\_\_\_\_

Address: \_\_\_\_\_

Approximate # of Hours Start Date: \_\_\_\_\_ End Date: \_\_\_\_\_

### Learning Objectives:

Identify what you hope to learn from this service experience about each of the following: the agency, the challenges and assets of the population with whom you will be working, yourself, your community. How do you expect what you learn through this experience to relate to your course work?

**Service Objectives:** Briefly identify the service activities you will engage in that will help you achieve your learning objectives.

### The Site Supervisor:

Agrees to guide this student's work and to submit a brief final evaluation of his/her achievement upon request.

Agrees to discuss any concerns about the service learner's performance with him/her directly, and with the course supervisor if necessary.

Site Supervisor Signature: \_\_\_\_\_ Date: \_\_\_\_\_

Faculty/Course Supervisor: \_\_\_\_\_

I have examined and approved \_\_\_\_\_'s learning plan.

Faculty/Course Supervisor Signature: \_\_\_\_\_

Date: \_\_\_\_\_

## Student Service Learning Plan

The Student agrees to abide by the following Guidelines and Limitations

### Guidelines

- Ask for help when in doubt: Your site supervisor understands the issues at your site and you are encouraged to approach him/her with problems or questions as they arise. He/She can assist you in determining the best way to respond to difficult or uncomfortable situations. Feel free to contact your professor or the service learning office with questions concerning your placement.
- Be punctual and responsible: Although you are volunteering your time, you are participating in the organization as a reliable, trustworthy and contributing member of the team. Both the administrators and the individuals you serve rely on your punctuality and commitment to completing your service hours/project throughout your partnership.
- Call if you anticipate being late or absent: Call the site supervisor if you are unable to come in or if you anticipate being late. Be mindful of your commitment, people are counting on you.
- Respect the privacy of all clients: If you are privy to confidential information with regard to the persons with whom you are working (i.e. organizational files, diagnostics, personal stories, etc.), it is vital that you treat it as privileged information. You should use pseudonyms in your course assignments if you are referring to clients or the people you work with at the service site.
- Show respect for the community-based organization you work for: Placement within community programs is an educational opportunity and a privilege. Keep in mind, not only are you serving the community, but the community is serving you by investing valuable resources in your learning.
- Be appropriate: You are in a work situation and are expected to treat your supervisor and others with courtesy and kindness. Dress comfortably, neatly and appropriately. Use formal names unless instructed otherwise. Set a positive standard for other students to follow as part of CSU's ongoing Service Learning Program.
- Be flexible: The level or intensity of activity at a service site is not always predictable. Your flexibility to changing situations can assist the partnership in working smoothly and producing positive outcomes for everyone involved.

### Limitations

- DON'T report to your service site under the influence of drugs or alcohol.
- DON'T give or loan a client, money or other personal belongings.
- DON'T make promises or commitments to a client you cannot keep.
- DON'T give a client or agency representative a ride in a personal vehicle.
- DON'T tolerate verbal exchanges of a sexual nature or engage in behavior that might be perceived as sexual with a client or community organization representative.
- DON'T tolerate verbal exchanges or engage in behavior that might be perceived as discriminating against an individual on the basis of their age, race, gender, sexual orientation, ability, or ethnicity.
- DON'T engage in any type of business with clients during the term of your service.
- DON'T enter into personal relationships with a client or community partner representative during the term of your service.

## *Appendix I: Sample contract with AAI (Not for this school)*

*This a sample curriculum contract for another Pivot school.  
Each contract is negotiated separately for each school.  
No contract has been started for this school yet.*

## AAI SERVICES AND LICENSE AGREEMENT

This Agreement (the "Agreement") is entered into as of \_\_\_\_\_, 2011 ("Effective Date"), between Pivot Education, Inc. ("Pivot"), a Florida Non Profit Corporation, on behalf of Pivot Charter School of Hillsborough ("Charter School"), and Advanced Academics, Inc. ("AAI"), a Delaware corporation. Pivot and AAI may each be referred to in this Agreement as a "Party," and both as the "Parties."

### BACKGROUND

- a. Pivot received a Charter Agreement from the Hillsborough County School District (the "District"). A copy of the Charter Agreement between the Sponsor and the Charter School is attached as Appendix A and is fully incorporated herein (the "Charter Agreement").
- b. The Board of Directors of Pivot may carry out any act and ensure the performance of any function by Pivot that is in compliance with the Florida Charter School laws, F.S. §1002.33, other federal, state or local statutes and regulations, orders and ruling applicable to Florida charter schools, any Charter Agreement Pivot(collectively, "Applicable Law").
- c. AAI operates a national network of full-time and part-time online educational programs for grades six through twelve. AAI and its personnel are knowledgeable and experienced in operating and promoting web-based distance learning programs that have a proven track record of academic success.
- d. Pivot desires to have AAI provide certain curriculum design, implementation and online educational services, as detailed herein, to students of the Pivot Charter School.

### 1. Definitions.

- a. The "AAI Platform" shall mean the AAI proprietary online learning management system, which includes the software, hardware, interfaces and other components used to provide the products and services to Pivot
- b. Subject to the terms and conditions set forth in this Agreement, and subject to applicable laws and regulations, AAI agrees to provide the products and perform the services selected by Pivot, as set forth in Appendix C attached hereto and any subsequent addendums or amendments hereto ("Products and Services"). AAI reserves the right, from time to time, to add, change or modify any of its Products or Services to the extent those changes meet or exceed accepted industry standards and meet the terms of the Charter School's Charter Agreement.

## 2. Term.

- a. This Agreement shall commence on the Effective Date and, unless earlier terminated pursuant to paragraph 13 hereof, will terminate at the close of business on June 30, 2015 (the "Term"). This agreement will thereafter automatically renew for a successive five year period, unless either party delivers written notice of its intent not to renew this agreement to the other party no less than ninety days prior to the expiration of the initial term.

## 3. License/Services.

- a. AAI hereby grants Pivot a non-transferable, non-exclusive, non-sublicenseable license to access and use the applicable portions of the AAI Platform, and any upgrades and enhancements made to the AAI Platform, during the term of this Agreement for the sole purpose of Pivot receiving the Products and Services in connection with this Agreement. All such access and use of the AAI Platform, and all upgrades or enhancements thereto, shall be subject to the terms and conditions of this Agreement. AAI will provide Pivot upgrades and enhancements made to the AAI Platform free of charge. All rights not specifically granted herein to Pivot are reserved by AAI.
- b. Restrictions. Under no circumstances may Pivot, without prior written permission from AAI (i) use the AAI Platform, Products or Services to provide products or services to another school or other third party; (ii) directly or indirectly provide access to the AAI Platform or provide AAI Products or Services, in whole or in part, to another school or other third party. Students, faculty and staff of the Charter Schools shall not be deemed "third parties" but are authorized users of the Charter Schools, (iii) disassemble, decompile, or otherwise derive source code from the AAI Platform; (iv) reverse engineer, reverse assemble, reverse compile or otherwise translate the AAI Platform; or (v) modify, improve, or enhance, or create derivative works of, the AAI Platform, modify the approved installation of the AAI Platform. Pivot represents and warrants that it shall not sublicense its rights with respect to this Agreement without the written permission of AAI, or use the AAI Platform to (a) engage in spamming or other impermissible advertising, marketing or other activities, including, without limitation, any activities that violate anti-spamming laws or regulations; (b) transmit, display or store infringing, obscene, threatening, indecent, libelous, slanderous, defamatory or otherwise unlawful or tortious material, including material that is harmful to children or violates third party privacy rights; (c) knowingly send or store malicious code; (d) interfere with or disrupt the integrity or performance of the AAI Platform, the AAI services or the data contained or used therein; or (e) attempt to gain unauthorized access to the AAI Platform or its related systems or networks.
- c. AAI shall provide the following services:
  - Online curriculum and instructional materials
  - Develop in cooperation with Pivot supplemental support curriculum
  - Access to online FL credentialed teachers pursuant to the Charter Agreement between the School and Sponsor
  - 24/7 Access to AAI Platform Technical Support via Toll-Free Telephone, E-mail, or Instant Help Chat System
  - Support for reporting and student data management
  - AAI Platform training and support

#### **4. Specifications.**

- a. Pivot agrees that it must provide computer systems for the AAI Platform that meet the specifications as set forth in Appendix B attached to this Agreement.
- b. Pivot and AAI also understand that each party must comply with the obligations as set forth in Appendix C attached to this agreement.
- c. AAI respects the privacy of every individual who visits their web sites or responds to their promotions and as such will protect private personal information as set forth in Appendix D attached to this agreement.

#### **5. License Fees, Payment Terms, Invoicing and Audits.**

- a. Pivot shall pay AAI a monthly license fee on the pro-rata student allocation per academic year equal to (1) \$1,200.00 per enrolled student during the 2011-2012 school year, (2) \$1,300.00 per enrolled student during the 2012-2013 school year, (3) \$1,400.00 per enrolled student during the 2013-2014 school year, (4) \$1,600.00 per enrolled student during the 2014-2015 school year (4) \$1,800.00 per enrolled student during the 2015-2016 school year. AAI shall invoice Pivot for the license fee within twenty (20) days after the end of each month, and Pivot shall pay invoiced amounts to AAI within thirty (30) days of receipt of invoice. Notwithstanding anything to the contrary contained in this section, no interest or late fee shall be required if untimely payment is a direct result of funding deferrals by the State of Florida.
- b. If Pivot is unable to pay monthly license fees when due as a result of circumstances outside of its control, including but not limited to funding deferrals, the Parties agree to meet to discuss the possibility of a loan from AAI to Pivot. Any such loan shall be negotiated and agreed upon by both Parties in a separate written agreement.
- c. Notwithstanding the Parties' agreement to discuss the possibility of a loan to Pivot Education, AAI's agreement to enter into any such loan shall be in its sole discretion. The parties hereto acknowledge and agree that as of the date of this Agreement, the amounts allocated in this Agreement are reasonable, necessary, and fair market value compensation for services rendered.
- d. Audit. Pivot agrees to permit AAI or any authorized representative thereof, to visit and inspect the records and properties of Pivot, including but not limited to enrollment and financial records pertaining to this Agreement, and to discuss its business finances with officers of Pivot, during normal business hours following three (3) days notice.

#### **6. Disclaimer of Warranty.**

The AAI Platform, Products and Services are provided "as is" and "as available." AAI MAKES NO WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE AAI PLATFORM, PRODUCTS AND SERVICES, THEIR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND NO WARRANTY OF NONINFRINGEMENT OF THIRD PARTIES' RIGHTS.

## 7. Property.

- a. *Ownership.* AAI shall retain ownership of all rights whatsoever in all AAI proprietary information and property, including but not limited to the AAI Platform, Products and Services, including all updates and enhancements, reproductions and corrections thereof and all related patent rights, copyrights, trade secrets, trademarks, service marks, related goodwill and intellectual property, including but not limited to, source code, programming code and software. AAI shall also retain all right, title and interest, including all intellectual property rights therein, in and to any computer code, work product or any other work of authorship or invention conceived of, developed or created by AAI under the terms of this Agreement or any schedule or exhibit. Pivot shall not remove or destroy any copyright, trade secret, proprietary or confidential legends or markings placed upon or contained or embedded within the AAI Platform, Products or Services. Pivot shall use commercially reasonable efforts to prevent any violation of AAI's intellectual property rights in the AAI Platform, Products and Services, and shall, under no circumstances, sell, lease, assign, sublicense or otherwise transfer the AAI Platform, Products or Services except as provided herein.
- b. *Domain Name.* AAI, with the assistance of Pivot, will attempt to secure a domain name with AAI as the billing, administrative, technical and zone contacts. Any rights granted to AAI for such domain name shall be assigned in full to AAI. All fees to purchase and maintain a domain name shall be paid by AAI.
- c. *Return of Property.* No later than three (3) business days after the termination of the Agreement for any reason, the Parties shall return all of the non-consumable property of the other Party and shall not retain any originals or copies of such materials. For purposes of this paragraph 7(c) "Parties" shall include employees of either Party. Paragraph 7(c) shall not apply to student records, which, shall become and remain the property of the Charter Schools upon creation by either Party. AAI shall ensure that Pivot has immediate access (even during non-business hours) of all student records generated by AAI during the course of this Agreement. Notwithstanding the foregoing, AAI will be allowed to retain a copy of all student records. Notwithstanding the foregoing, Pivot shall not be liable for the non-returned, lost, stolen, or damaged non-consumable property issued to students of the Charter School.
- d. This Section 7 shall survive the termination of this Agreement.

## 8. IDEA, Section 504 and ADA Compliance.

Pivot shall be responsible for facilitating and responding to religious or disability-related requests for accommodation from students and employees of Pivot under the IDEA, Section 504 of the Rehabilitation Act, Americans with Disabilities Act and other Applicable Law, and shall be responsible for funding (to the extent federal and state special education funds are available to each respective Charter School) and implementing any such reasonable accommodations relating to the implementation of or participation in the courses or products covered by this Agreement. AAI agrees to cooperate with Pivot's accommodation efforts to the extent practicable and consistent with its obligations under the Charter Agreement, but does not assume and expressly disclaims responsibility or liability under any applicable law for responding to requests for or providing such accommodations to students or employees of Pivot or for the accommodations deemed

reasonable by Pivot. Notwithstanding the above, in the event that the Pivot' special education costs (including but not limited to special education encroachment paid to the District by Pivot) exceed state and federal special education funding provided to Pivot in any fiscal year, AAI shall be solely responsible for these costs.

## **9. Insurance.**

At all times during the Term, AAI will maintain, at its own expense, comprehensive commercial general liability coverage in an amount (per occurrence or annual aggregate combined single limit for personal injury and property damage) not less than \$1 million. This insurance shall name Pivot as an additional insured and include a provision that it will not be canceled or materially altered or amended without at least thirty (30) days prior written notice to Pivot. A certificate of insurance showing the above insurance requirements shall be provided to Pivot prior to commencing operations under this Agreement and annually thereafter.

## **10. Marketing and Advertising.**

To the extent Pivot wishes to market the program beyond the marketing and advertising offered by AAI, Pivot will be solely responsible for the costs associated with marketing and advertising such products and services; AAI must approve any use of its logos or trademarks in Pivot's marketing or advertising materials.

## **11. Indemnification.**

- a. To the fullest extent permitted by law, Pivot shall indemnify, defend (at Pivot's sole cost and expense), protect and hold harmless AAI, and all affiliated AAI entities, and their respective representatives, partners, officers, directors, board members, employees, consultants, (collectively, the "indemnified parties") and the property of AAI, from and against any and all claims, including, without limitation, claims for bodily injury, death, property damages, any and all claims by the chartering authority, State Board of Education, State of Florida, audit findings, SB 740 funding determination reconsideration, costs, damages and/or expenses in law or equity, costs and expense associated with the provision of educational services, attorney fees, expenses, disbursements, court costs, professional and/or expert consultant fees, investigative costs, of every kind and nature whatsoever (collectively, the "claims") arising out of or in connection with the performance of the Agreement or under this Agreement, or any other work performed by either party to this Agreement, provided that the "claims" are allegedly or actually attributable in whole or in part to any act or omission or willful misconduct by Pivot, anyone directly or indirectly employed by Pivot or anyone for whose acts Pivot could be liable. The indemnification obligations of Pivot shall not be limited by the amounts or types of insurance carried by Pivot. The indemnification obligation shall survive the expiration or earlier termination of this Agreement and shall continue until the last to occur of 1) the last day permitted by law for bringing any claim or action with respect to which this indemnification may be claimed or 2) the date on which any claim or action for which indemnification may be claimed under this Agreement is fully and finally resolved.
- b. The duty to defend is wholly independent and separate from the duty to indemnify and exists regardless of any ultimate liability of Pivot to AAI. The defense obligation shall arise immediately upon written notice of a claim being provided to AAI. Advance payment

of defense costs shall not be a condition precedent to enforcing the rights to indemnification.

- c. To the fullest extent permitted by law, AAI shall indemnify, defend (at AAI's sole cost and expense), protect and hold harmless Pivot, and all affiliated Pivot entities, and their respected representatives, partners, officers, directors, board members, employees, consultants, (collectively, the "indemnified parties") and the property of Pivot, from and against any and all claims, including, without limitation, claims for bodily injury, death, property damages, any and all claims by the chartering authority, State Board of Education, State of Florida, audit findings, costs, damages and/or expenses in law or equity, costs and expenses associated with the provision of educational services, attorney fees, expenses, disbursements, court costs, professional and/or expert consultant fees, investigative costs, of every kind and nature whatsoever (collectively, the "claims") arising out of or in connection with the performance of the Agreement or under this Agreement, or any other work performed by either party to this Agreement provided that the "claims" are allegedly or actually attributable in whole or in part to any act or omission or willful misconduct by AAI, anyone directly or indirectly employed by AAI or anyone for whose acts AAI could be liable. The indemnification obligations of AAI shall not be limited by the amounts or types of insurance carried by AAI. The indemnification obligation shall survive the expiration or earlier termination of this Agreement and shall continue until the last to occur of 1) the last day permitted by law for bringing any claim or action with respect to which this indemnification may be claimed or 2) the date on which any claim or action for which indemnification may be claimed under this Agreement is fully and finally resolved.
- d. The duty to defend is wholly independent and separate from the duty to indemnify and exists regardless of any ultimate liability of AAI to Pivot. The defense obligation shall arise immediately upon written notice of a claim being provided to Pivot. Advance payment of defense costs shall not be a condition precedent to enforcing the rights to indemnification.
- e. The indemnification and duty to defend obligations shall survive the termination of this Agreement.

## **12. Termination.**

- a. This Agreement may be terminated for cause by either Party if the other is in material breach of any provision of this Agreement, but then only after written notice of default and opportunity to cure has been given to the breaching party. The notice of default must provide for an opportunity to cure of at least thirty (30) days following receipt of notice. If the Party receiving the notice has not cured the breach before the cure date stated in the notice, then the Party giving notice may terminate this Agreement by giving the breaching party written notice of termination, which will be effective upon delivery. Nonpayment by Pivot as outlined in section 5 shall be a material breach unless otherwise agreed upon by both Parties.
- b. *Change in Applicable Law.* If Applicable Law, or the source or amount of School Revenues or government policy applicable to the Pivot changes, and the change has a material adverse effect on the economic benefits of this Agreement to either Party, then the Party suffering such material adverse effect may request renegotiation of this Agreement in writing. Such renegotiation will be undertaken in good faith. If the Parties are unable to renegotiate and agree upon revised terms within thirty (30) days after such notice, then the

Party materially adversely affected may notify the other Party of its intent to terminate this Agreement at the end of the school year. Neither Party will be obligated to agree to any such renegotiated agreement, but instead each may enter into or decline to enter into such renegotiated agreement in its sole discretion.

- c. This Agreement may be terminated by either Party upon the occurrence of any of the following events, which termination will be effective thirty (30) days after the giving of written notice by either Party to the other Party of intent to terminate which date will be the Termination Date:
  - (i) Implementation of this Agreement will cause Pivot to lose state or federal funds that would otherwise be available in the absence of this Agreement; implementation of this Agreement will cause Pivot to lose its tax exempt status with the IRS or Franchise Tax Board; or
  - (ii) Any activity of the other party that is in violation of Applicable Law is not corrected within such thirty (30) day period
- d. Either Party may terminate this Agreement immediately upon notice to the other Party of the other Party's violations of any Applicable Law meant to protect the health, welfare or safety of students, or which violations could subject Pivot to legal and/or fiscal penalties or sanctions including but not limited to revocation.
- e. If Pivot loses its right to operate the School pursuant to revocation, non-renewal, or other operation of law, AAI shall cease to provide services to the School, and the Agreement shall terminate effective on the same date that Pivot has lost its right to operate the Charter Agreement. This agreement shall be terminated immediately upon the written agreement of both Parties.
- f. Upon termination or expiration of this Agreement, all licenses granted hereunder shall immediately terminate, and any and all guaranteed fees and amounts due for products and services provided through the date of termination set forth herein shall become immediately due and payable.
- g. The Parties acknowledge and agree that AAI has devoted significant resources including, without limitation, substantial time of its employees and consultants and made substantial expenditures to develop the software, hardware, interfaces and other components constituting the AAI Platform being provided to Pivot under this Agreement. The Parties further agree that to recoup such expenditures of money and resources will require that the term of this Agreement continue for the entire 5-year period of the initial Term of this Agreement (as described in Section 2 above) and beyond. Therefore, the Parties agree that the damages that would result from an early termination of this agreement are not readily ascertainable. Furthermore, the Parties agree that the following costs to be paid by Pivot for an early termination of this agreement are not a penalty but are liquidated damages and that the amounts set forth below are reasonably related to the amount of damages that would be expected to flow from a breach of this agreement and that the intent of these liquidated damages is only to induce full performance of this agreement by the Parties. Accordingly, if this Agreement terminates or is terminated prior to the expiration of the initial Term: (i) by Pivot without cause; or (ii) by AAI as provided in Sections 13.a., 13.c.(ii), or 13.d or 13.e, Pivot will pay AAI the following amounts for resources devoted to Pivot:

- (i) If terminated as described above prior to the expiration of the second year of the Term, Pivot will pay \$500,000 to AAI within 30 days following such termination;
- (ii) If terminated as described above prior to the expiration of the third year of the Term, Pivot will pay \$400,000 to AAI within 30 days following such termination; and
- (iii) If terminated as described above prior to the expiration of the fourth year of the Term, Pivot will pay \$300,000 to AAI within 30 days following such termination; and
- (iv) If terminated as described above prior to the expiration of the fifth year of the Term, Pivot will pay \$200,000 to AAI within 30 days following such termination.

### 13. Miscellaneous.

- a. *Governing Law.* This agreement shall, for all purposes, be governed by and interpreted and enforced in accordance with the laws of the State of Florida, without reference to any conflict of law principles.
- b. *Exclusive Jurisdiction.* Any lawsuits, legal actions or proceedings against Pivot arising out of this Agreement will be brought in the State of Florida if the plaintiff is AAI and any lawsuit, legal actions or proceedings against AAI arising out of this Agreement will be brought in Oklahoma if the plaintiff is Pivot. Each party shall submit to and accept the exclusive jurisdiction of such court for the purpose of such suit, legal action or proceeding. Each Party irrevocably waives any objection it may have now or any time in the future to this choice of venue and further waives any claim that any suit, legal action or proceeding brought in any such court has been brought in an inappropriate forum. Pivot and AAI shall stipulate in any proceeding that this Agreement is to be considered for all purposes to have been executed and delivered within the geographic boundaries of the State of Florida.
- c. *Severability.* The provisions of this Agreement are severable, and the invalidity or unenforceability of one or more of the provisions herein shall not have any effect upon the validity or enforceability of any other provision.
- d. *Waiver.* No terms or provisions hereof shall be deemed waived and no breach consented to or excused, unless such waiver, excuse or consent shall be in writing and signed by the Party claimed to have waived or consented. Any consent, waiver or excuse by either Party of a breach of any provision of this Agreement by the other Party shall not operate or be construed as a waiver of any subsequent breach by such other Party.
- e. *Confidentiality.* Unless consented to by the other Party in writing, neither Party hereunder shall disclose any confidential information received from the other Party in connection with the performance of this Agreement, to any other person or entity, except to the officers, directors, employees, counsel, consultants and auditors of such Party and then only to the extent necessary in the ordinary course of its business or as required by law or other legal process. AAI shall be considered an educationally interested party in accordance with the Family Educational Rights to Privacy Act (FERPA) and as such shall maintain the confidentiality of student records in the same manner as legally required by Pivot. If either Party receives any subpoena, court order or other legal process requiring the disclosure of any of the terms and conditions of this Agreement, such Party shall promptly notify the

other Party hereto in writing, and shall cooperate with the other Party in complying or obtaining protective orders or other appropriate forms of relief limiting the extent and scope of such legally required disclosures. This paragraph 16(e) shall survive the termination or expiration of this Agreement.

- f. *No Coercion.* The Parties acknowledge they have signed this Agreement as a free and voluntary act and not as the result of coercion of any kind.
- g. *Parties' Relationship.* In making and performing this Agreement, the Parties intend to act and shall act at all times as independent contractors and nothing contained in this Agreement shall be construed or implied to create an agency, partnership, or employer-employee relationship between AAI and Pivot or between any Party hereto.
- h. *Force Majeure.* With the exception of a Party's obligation to make payments properly due to the other Party, neither Party shall be considered to be in default as a result of its delay or failure to perform its obligations herein when such delay or failure arises out of causes beyond the reasonable control of the party. Such causes may include, but are not restricted to, acts of God or the public enemy, acts of the state or the United States in either its sovereign or contractual capacity, fires, floods, epidemics, strikes, and unusually severe weather; but, in every case, delay or failure to perform must be beyond the reasonable control of and without the fault or negligence of the party.
- i. *Amendments or Modifications.* Except as provided otherwise herein, neither this Agreement nor any term or provision in it may be changed, waived, discharged or terminated orally, but only by an agreement in writing signed by both Parties.
- j. *Enforceability.* It is the Parties' mutual intent that the provisions of this Agreement shall be enforced to the fullest extent permissible under applicable laws and public policies applied in each jurisdiction in which enforcement is sought. Accordingly, if any particular provision to this Agreement shall be adjudicated to be invalid or unenforceable, such provision shall be deemed amended to delete there from such invalid or unenforceable portion, and shall otherwise remain in full force to the extent permitted.
- k. *Assignment.* AAI may assign this Agreement with written approval by Pivot. Approval will not be unreasonably withheld. This Agreement shall inure to the benefit of, and be binding upon, AAI, its successors and assigns, including without limitation any entity which may acquire substantially all of AAI's assets and business, or with or into which AAI may be consolidated or merged. AAI shall give Pivot thirty (30) business days' notice, if practicable, of any assignment and the terms of the assignment, and the option of termination. Pivot is not permitted to assign this Agreement without the express written consent of AAI.
- l. *Notices.* Any notice required or permitted to be given pursuant to this Agreement shall be in writing and shall be delivered by next-day air courier (e.g., Federal Express) to the addresses listed below or to such other addresses as the Party to whom notice is given may have furnished to the other Party hereto in writing, in accordance with this paragraph 15.
- m. *Headings.* The headings contained in this Agreement are for reference purposes only and shall not affect in any way the meaning or interpretation of this Agreement.

- n. *Counterparts.* This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same Agreement.
- o. *Entire Agreement.* This Agreement contains and constitutes the entire Agreement between the Parties and supersedes and cancels any prior agreements, representations, warranties, or communications, whether oral or written, between the Parties relating to any of the transactions contemplated by this Agreement.
- p. *Representation and Warranty.* Each of the Parties represents and warrants to the other that the representing Party has the full power and authority to enter into this Agreement, and to fully and effectively perform its obligations hereunder without violating any rights of any third party, and that no consent or approval of any other person or entity is required.
- q. *Attorney's Fees.* If any suit, proceeding or other action arising out of or related to this Agreement is brought by either Party, the prevailing Party will be entitled to recover the costs and fees (including, without limitation, reasonable attorneys' fees, the fees and costs of experts and consultants, copying, courier and telecommunication costs, and deposition costs and all other costs of discovery) incurred by such Party in such suit, proceeding or other action, including without limitation, any post-trial or appellate proceeding, or in the collection or enforcement of any judgment or award entered or made in such suit, proceeding or action.

IN WITNESS WHEREOF, the parties hereto have executed and delivered this Agreement as of the date first written above.

## Appendix B

### Computer Specifications

#### 1. Hardware Components

1.1. The computers utilized to access Advanced Academics' courses shall have the minimum hardware configuration:

- Windows 98, Windows ME, Windows 2000, Windows XP, Mac OS X 10.1 or greater.
- 500 MHz processor or greater.
- 256 MB of RAM.
- Screen resolution of 800 x 600 pixels or higher with 256 color capable graphics card. (1024 X 768 recommended)
- A soundcard and headphones or speakers.
- 56 kbps dialup, DSL, cable modem or other internet access. High speed internet is strongly recommended.

#### 2. Software Components

2.1. The computers utilized to access Advanced Academics' courses shall have the minimum software configuration:

- Compatible Browsers:
  - Internet Explorer version 6.0 or higher
  - Mozilla Firefox 1.5 or greater.
- Sun Java Runtime Environment version 1.4.2 or higher
- Macromedia Flash Player version 9 or higher
- Macromedia Shockwave Player
- Adobe Acrobat Reader
- Windows Media Player
- Apple Quicktime Player

#### 3. Network Components

3.1. AAI shall provide, at the request of Pivot and at the sole expense of AAI, the assistance of a network administrator in order to properly configure firewall rules and address other technical issues, such as:

- Opening ports **80** (HTTP), **443** (HTTPS).
- Adding "Proxy Exceptions", if needed, to the browser's LAN configuration pages,
- Addressing, and modifying if necessary, "user security context" and/or any management or security software which may be enabled on the desktop computers.

## **Appendix C**

### **Additional Obligations of Each Party**

#### **1. Pivot Obligations.**

- a. Pivot will employ Florida State credentialed teachers and is responsible for all teacher hiring, payroll and benefits subject to AAI's obligations relating to teachers based in other states.
- b. The cumulative student to teacher ratio will not fall below the ratio required by Applicable Law. Pivot is responsible for all student testing (with AAI providing testing facilities at its sole expense if requested by Pivot), transcripts, establishing graduation requirements and diplomas.
- c. Pivot shall retain the independent financial auditor for Pivot and ensure annual audits are conducted in accordance with Applicable Law
- d. Pivot shall hire an Executive Director who shall have full power and authority over day-to-day operations of the Charter Schools and its employees except as otherwise provided in the Charter Agreement of the Charter Schools or Board policy.
- e. Pivot shall provide special education services to students enrolled in the Charter Schools
- f. Pivot grants permission to AAI during the Term of this Agreement to copy, transmit, use and prepare derivative works of Pivot' information to the extent necessary for AAI to perform its obligations under this Agreement.

#### **2. AAI Obligations.**

- a. Assist in monitoring, in conjunction with Pivot, student activity and progress;
- b. AAI will provide on-site training for Pivot staff members at its sole expense. Training covers the enrollment and reporting features of Advanced Academics' online learning system, as well as the instructional tools contained in the system.
- c. AAI will provide Pivot with a unique password with which each student can access the course(s).
- d. AAI shall provide the educational program including the curriculum and instructional materials which align with New Florida State Sunshine Standards
- e. AAI shall cooperate fully with requests for information from Pivot's independent financial auditor. This provision shall survive the termination of this contract.
- f. AAI will assist Pivot as requested in interviewing and recommending teacher candidates, posting/advertising position, conducting interviews, ranking candidates, and recommending hires.

## **Appendix D**

### **Privacy Policy**

#### **1) General**

Advanced Academics, Inc. and its affiliates ("AAI") respect the privacy of every individual who visits our web sites or responds to our promotions. AAI intends to act reasonably to protect your privacy, but obviously cannot guaranty security against "hackers" or other issues beyond our control. To better protect your privacy we provide this notice explaining our online information practices and the choices you can make about the way your information is collected and used. This notice applies to all information collected or submitted on AAI web sites, unless otherwise posted.

#### **2) Personally Identifiable Information**

AAI will not collect any personally identifiable information about you (that is your name, address, telephone number or email address) unless you provide it voluntarily. If you do not want your personally identifiable information collected, do not submit it to us. If you do submit personally identifiable information we may use it as follows: we will use it to complete the contact or request; we may store and process it to better understand your needs, and how we can improve our products and services; and we may use it to contact you. We will not give or sell your individual information to any outside company for use in marketing or solicitation products or services other than AAI's products or services, and we will maintain the confidentiality of your personal information, which will be used only to support your relationship with AAI. AAI will comply with the requirements of the Family Education Rights and Privacy Act in relation to student's personally identifiable information.

#### **3) Non-personally identifiable information collected automatically**

In some cases, we may collect information about you that is not personally identifiable. Such information may be gathered by the Internet browser and type of operating system you are using, and via the domain name of the web site that linked you to our site. When you view one of our web sites, we may store information from time to time on your computer. These "cookies" allow us to tailor a web site or advertisement to better match your interests and preferences. With most Internet browsers you can block, receive a warning or erase all "cookies" from your hard drive. Please refer to your browser instructions or Help screen to learn more about these functions.

#### **4) Third-party web sites**

Links to third-party web sites on AAI sites are provided solely as a convenience to you. If you use these links, you will leave the AAI site. AAI does not review all third-party sites, nor does it control or assume responsibility for the content or privacy policies of any of these sites. Thus, AAI does not endorse or make any representations about them, or any information, or other products or materials found there, or any results that may be obtained from using them. If you decide to access a third-party site linked to an AAI web site, you do so at your own risk.

#### **5) How can you correct your information?**

If you have any questions regarding this privacy policy or would like to have your personally identifiable information modified or deleted from our records, please email us or call our toll-free number.

**6) How to contact us**

Should you have other questions or concerns about this privacy policy, contact us at:

*Appendix J: CSSC Contract*

## Services Agreement

THIS SERVICES AGREEMENT (the "Agreement") is made and entered into as of the \_\_\_\_ day of \_\_\_\_, 2011 (the "Effective Date") by and between Pivot Education, Inc. Florida nonprofit corporation, with offices at 5245 Office Park Boulevard, Suite 103, Bradenton, Florida 34203 (the "School") and Charter School Services Corporation, Inc. a Delaware nonprofit corporation, with offices at 1225 SE 2<sup>nd</sup> Avenue, Fort Lauderdale, Florida ("CSSCI").

In consideration of the mutual obligations specified in this Agreement, and any compensation paid to CSSCI for its services, the parties agree as follows:

### 1. DEFINITIONS.

All capitalized terms used in this Lease and not specifically defined in the text shall have the meanings ascribed to them below. Words used herein in the singular shall also include the plural and words in the plural shall include the singular. Words used in neuter gender include the masculine and feminine, and words in the masculine or feminine gender include the neuter. The headings or titles of this Lease shall have no effect upon the construction or interpretation of any part hereof.

- 1.1 **"Affiliate"** shall mean any entity that, directly or indirectly, controls, is controlled by, or is under common control with, a party.
- 1.2 **"CSSCI"** means and includes Charter School Services Corporation, its officers, directors, employees, agents, personnel, subcontractors, licensees, and invitees.
- 1.3 **"Charter"** refers to all or any one of the DISTRICT Charter School Agreement(s) issued to the School as of the date hereof as well as any Charters issued in the future. A list of the existing Charters is attached hereto as Exhibit A and made a part hereof.
- 1.4 **"Control"** shall mean direct or indirect ownership of 50% or more of the stock or other interests entitled to vote for the election of the board of directors or other governing body of the entity.

- 1.5 **"Deliverables"** includes all papers, documents, files, papers, reports, data, checks, MICR-encoding ready blank checks, backup media, testing results, insurance certificates, records, handbooks, invoices, receipts (whether in physical form, on electronic media or both) obtained, generated, received or used in the course of performing Services. Included without limitation are those items which are required: (a) to be turned over to the School after every June 30<sup>th</sup> closing of the books, (b) to be produced for use in the annual audit, (c) for any board meeting, (d) by the Charter or any DISTRICT or State Audit regulation, and (e) to be turned over to the School upon termination of this Agreement.
- 1.6 **"DISTRICT"** means The School Board, its members, employees and agents.
- 1.7 **"Service(s)"** shall mean all services provided by CSSCI pursuant to this Agreement and all Statements of Work entered into pursuant to this Agreement.
- 1.8 **"Student Records"** shall mean any and all documents, data, electronic media, written materials and records relating to any one or more School students which are require by applicable federal or state law or regulation or School Board policies to be kept confidential. "Applicable federal or state laws, regulations and/or School Board policies" include, but are not limited to, the Family Educational Rights and Privacy Act (FERPA), the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Florida Statute 1002.22, and The School Board of Broward County SB Policy 5100.

## 2. **STATEMENTS OF WORK**

- 2.1 **Statements of Work.** During the term of this Agreement, CSSCI agrees to provide consulting and professional services for the School which the School authorizes from time to time by the placement a of Statement of Work signed by each of the parties hereto (each, a "Statement of Work" and the work done thereunder, the "Work"). In the event of any conflict between the terms of this Agreement and a Statement of Work, the terms of this Agreement shall govern, unless the Statement

of Work specifically references that it supersedes the conflicting provision in this Agreement.

- 2.2           **Contents.** Each Statement of Work shall contain, among other provisions, (i) a description of the Work to be performed by CSSCI, (ii) a list of the Deliverables to be provided by CSSCI, if any, (iii) any acceptance testing or acceptance criteria for such Deliverables, (iv) the delivery or performance schedule, (v) all fees for the Work, and (vi) a list and amount of any anticipated expenses to be reimbursed by the School, if any. The parties hereby acknowledge that included or implied in every Statement of Work, even when not specifically expressed, is the obligation of a CSSCI representative to attend School Board meetings upon request to explain the School's financials and any Deliverables under a Statement of Work.
- 2.3           **Changes.** Upon written consent of CSSCI, the School may from time to time make changes to the scope of Work set forth in a Statement of Work.
- 2.4           **Systems, Storage, and Security.** In the course of providing Services under this Agreement and any Statement of Work CSSCI shall use Quickbooks software, the Financial and Program Cost Accounting and Reporting for Florida Schools manual (The Red Book), the School's Cash Management Manual, and engage in record keeping and employ internal controls and other systems as required by GAAP. The implied additional standard in all Statements of Work is to proceed in a manner that will result in a letter from the auditor opining on the annual report without exception, without material weakness, and without a management letter containing criticisms of management's accounting or internal controls. CSSCI shall provide an appropriate system of checks and balances to ensure that all information and documents are accurately recorded. Deliverables shall be properly organized, filed, maintained, inventoried, safely and securely stored in a retrievable fashion until delivered to School. CSSCI shall at all times keep all Deliverables in its office located at 1225 S.E. 2<sup>nd</sup> Avenue, Fort Lauderdale, FL 33316 unless it receives the School's prior written consent to relocate all or any portion of them. At all times CSSCI will keep its office and the Deliverables under lock and key.

CSSCI has or will acquire computers, computer storage, network servers or other equipment at its own expense to be used in performing the Services. CSSCI shall establish a protocol for individual computer and network security, including but not limited to user names, passwords, individual network, software and data authority, and (if connected to the Internet) appropriate firewall hardware and software and virus, malware and spyware protection software. CSSCI shall also include in its protocol procedures for backup of all Deliverables in electronic format, including the timing, methodology (hardware and software), person(s) responsible, methods for verifying data integrity, and the means to ensure the ability to restore data. This protocol shall include the requirement for transport of backup data offsite to a secure location at least weekly. The foregoing protocol(s) shall be submitted in writing to the School promptly for its review and approval.

### **3. EQUIPMENT; PERSONNEL; INSURANCE**

- 3.1 **Supply of Equipment/Personnel.** CSSCI shall be responsible for providing equipment, facilities, and/or personnel necessary to carry out the Work specified in the Statement of Work. CSSCI shall have personnel available five days per week, for eight hours per day, year round, except for federal holidays and winter and spring School break, to prepare checks for the School.
- 3.2 **Insurance.** CSSCI shall provide at its own expense personnel, offices, and automobiles used in or related to the performance of Services under this Agreement (and any Statement of Work), the insurance required to be carried by School under the Charter or otherwise by DISTRICT as if the Services, personnel, offices, or automobiles were performed by, employed by, belonged to or owned by the School. As further explanation, and without limitation to the above general statement, CSSCI shall obtain and pay the insurance which the School would have been required to carry to perform the activities included in a Statement of Work under this Agreement. The insurance shall be carried with the coverages, policies, limits, deductibles, insured and additional insured, and otherwise as provided in the Charter, by the DISTRICT, and by law. CSSCI

shall provide proof of insurance and certificates of insurance naming the School and, if required, DISTRICT and others as additional insured under the policies.

**3.3 Subcontractors.** The School expressly consents to CSSCI's use of subcontractors in connection with the performance of the Services; provided that prior to engaging in any activities (including having access to the Deliverables) under a Statement of Work CSSCI provides written proof to the School and ensures that each and every subcontractor is: (i) bonded; (ii) passes a drug test; (iii) obtains a Level 2 screening clearance from DISTRICT under the Jessica Lunsford Act (iv) provides proof of insurance; (v) is provided with copies of the Charters; (vi) agrees in writing to read and comply with the Charters; and (vii) otherwise is in compliance with the Charter and Applicable Law. All contracts between CSSCI and its subcontractors shall be in writing and provide that each subcontractor consents to random drug testing at the School's request and that each subcontractor shall obtain and maintain insurance as required of CSSCI by paragraph 3.2 above. CSSCI's relation with its subcontractors may be that of independent contractor and not an employee of CSSCI; provided however, that such subcontractors shall be deemed agents of CSSCI, and CSSCI shall be responsible for the Statements of Work under this Agreement. CSSCI's use of independent or subcontractors shall not relieve it from performance of the Services, or responsibility or liability to the School under this Agreement. This Agreement may not be assigned by the parties hereto.

#### **4. DISTRICT REQUIREMENTS**

**4.1 Charter Requirements.** CSSCI hereby acknowledges that the School currently holds one Charter with DISTRICT. CSSCI and the School agree that any new Charters obtained after the date of this Agreement shall be a Charter under and included in this Agreement. CSSCI represents that it has read and understands the Charter and related laws and regulations, has the necessary expertise and understanding of the accounting, bookkeeping, internal control, record keeping and similar requirements necessary or appropriate to the Services, and as may be required by the Charters. CSSCI agrees to observe and perform the

Services in accordance with the requirements of the Charter and all amendments thereto. CSSCI shall ensure that all of its officers, directors, employees, agents, personnel, and subcontractors involved in performing any Services have read and are familiar with the Charter, including the financial record keeping and reporting requirements contained therein.

4.2 **Fiscal Year.** DISTRICT's fiscal year runs from July 1 through June 30 and, accordingly, all Work performed under any Statement of Work shall be consistent with a July 1 through June 30 fiscal year. CSSCI shall ensure that all of its officers, directors, employees, agents, personnel, and subcontractors are familiar with DISTRICT's calendar and comply with same, especially with regard to fiscal year end financial reporting requirements.

4.3 **Capital Outlay Funds.** CSSCI will ensure that its officers, directors, employees, agents, personnel, and subcontractors adopt policies for and comply with Florida Statutes Section 1013.62 (2008) and all amendments and replacements thereto and all regulations and Technical Assistance Papers (including TAA No.: 2006-18) regarding the use of Capital Outlay Funding.

4.4 **FTE Counts.** For School funding purposes DISTRICT conducts its Full Time Equivalent ("FTE") student counts at each School on October 15 and February 15 of each year. Any pricing for a Statement of Work tied to a "per student basis" shall use DISTRICT's most recent FTE student counts until such time as a new count becomes available.

4.5 **Conflicts.** If any conflict arises between (a) this Agreement or a Statement of Work and (b) the Charters, the Charters shall control. If any conflict arises between this Agreement and a Statement of Work, this Agreement controls.

## 5. FEES; EXPENSES; INVOICING; PAYMENT

5.1 **Fees.** CSSCI agrees to provide the Work and Deliverables set forth in each Statement of Work for the fees specified therein. Any annual fee under a Statement of Work shall be paid in twelve (12) equal monthly installments.

- 5.2 **Expenses.** The School shall reimburse CSSCI for expenses only if such expenses are specified and estimated in a Statement of Work.
- 5.3 **Invoices.** Unless otherwise set forth in a Statement of Work, CSSCI shall prepare and submit invoices to the School on a monthly basis covering those Services performed during the month. If a Statement of Work provides that the School will reimburse CSSCI for expenses, then such monthly invoice shall also include expenses. Each invoice shall have the form and content as required by the Statement of Work.
- 5.4 **Payment.** Payment of each invoice is due within thirty (30) days of receipt of such invoice. All fees, costs, expenses and payment amounts expressed or referenced in this Agreement, a Statement of Work or invoice, and all payments made by the School to CSSCI, shall be in U.S. dollars. Interest will be assessed at the rate of 1.5% per month on all balances outstanding for longer than 45 days.

## 6. REPRESENTATIONS, WARRANTIES AND COVENANTS

- 6.1 **Authority; No Conflict.** Each party to this Agreement represents, warrants and covenants to the other party that (i) it has the requisite power and authority to execute and deliver this Agreement and to perform all of its obligations hereunder; and (ii) the execution, delivery and performance of this Agreement does not and shall not result in a breach or constitute a default under any other agreement to which it is a party or by which it is bound.
- 6.2 **Compliance with Laws.** Each party to this Agreement represents, warrants and covenants to the other party that it shall comply with all applicable federal and state laws and DISTRICT rules and regulations in its performance of this Agreement, including but not limited to, all privacy and protection laws, rules and regulations which are or which may in the future be applicable to the Services or Deliverables.

## 7. CONFIDENTIALITY

7.1 **Student Records.** CSSCI hereby acknowledges that in the course of the Services for the School it will or may come into contact with Student Records and that no disclosures shall be made by CSSCI of any information contained in any Student Records, except as allowed by law. Each party to this Agreement shall at all times comply with applicable federal and state law, regulation, DISTRICT policy, and professional standards with respect to School Student Records.

7.2 **Proprietary Information.** A party to this Agreement may disclose to the other party to this Agreement either orally or in writing, and/or such party's files may contain, information that the disclosing party considers proprietary and confidential which relates to its business and financial operations, services and/or technical knowledge (the "Proprietary Information"). All such Proprietary Information accessed or obtained by the receiving party shall be (i) received in confidence, (ii) used only for purposes contemplated in this Agreement, and (iii) protected in the same manner as the receiving party protects its own confidential information of like kind (which shall be at least a reasonable manner). Neither party to this Agreement will use in any way, for its own account or the account of any third party, except as expressly permitted by this Agreement, nor disclose to any third party (except as required by law), any of the other party's Proprietary Information and each party will take reasonable precautions to protect the confidentiality of such information. If a party to this Agreement receives a subpoena or other valid administrative or judicial demand requiring it to disclose the other party's Proprietary Information, such party shall provide the other party prompt notice of such demand. The term Proprietary Information does not include, and the parties' confidentiality obligations do not apply to, information that: (i) is or becomes generally available to the public without breach by a party of its confidentiality obligations, (ii) is received by a party from a third party without restriction against disclosure, (iii) was known to a party without restriction prior to disclosure, or (iv) is independently developed by a party without use of the other party's Proprietary Information.

7.2 **Breach of Confidentiality.** CSSCI and the School each indemnify, defend, and hold harmless the other party and their officers, directors, agents, directors, customers, employees,

representatives, affiliates, and subcontractors from and against any claim, loss, damage, cost, expense (including reasonable attorney's fees and disbursements) or liability arising out of or relating to any claim which is based upon, or is the result of, any breach by a party to this Agreement of any confidentiality provisions under this Agreement.

## **8. RETURN OF PROPERTY**

Upon the termination of this Agreement or upon the request of the School, CSSCI agrees to end all further use and utilization of, to immediately return to the School the most recent version of, and to delete or destroy all copies of any and all Deliverables and equipment, tools or facilities furnished by the School.

## **9. INDEMNIFICATION/RELEASE**

9.1 **General; Personal Injury; Damage to Personal Property.** Both parties agree to take all necessary precautions to prevent injury to any persons (including employees of either Party) or damage to any property (including property of both Parties) during the term of this Agreement. Each Party shall indemnify, defend and hold harmless the other Party and its Affiliates and each of their respective officers, directors, and employees from and against any claim, loss, damage, cost, expense (including reasonable attorney's fees and disbursements) or liability, including but not limited to liability as a result of injury to or death of any person or damage to or loss or destruction of any property, resulting in any way from or arising out of any act or omission, or in connection with the performance of or failure to perform this Agreement or a Statement of Work by either party, regardless of the negligence of either Party, except only where such claim, loss, damage, cost, expense or liability results solely and directly from the gross negligence or willful misconduct of the other Party. Neither Party shall settle or compromise any demands, claims, actions, suits or proceedings for which the other has sought indemnification from the indemnifying Party unless the indemnified Party has given its prior written consent to the indemnifying Party regarding such settlement or compromise, which consent shall not be unreasonably withheld. Further, the indemnifying Party assumes the entire responsibility and liability for losses, expenses, and damages to property of indemnified

Party caused by the act(s) or omission(s) of the indemnifying Party, its officers, directors, agents, employees, personnel and subcontractors performing under this Agreement or a Statement of Work.

- 9.2 **Non-Infringement.** CSSCI shall indemnify, defend, and hold harmless the School, its officers, directors, employees, agents, personnel or subcontractors from and against any claim, loss, damage, cost, expense (including reasonable attorney's fees and disbursements) or liability arising out of or relating to any claim alleging that the work done in performing Services, or any part thereof, infringes, misappropriates or violates any patent, copyright, trademark, trade secret, know-how, moral rights or any other intellectual property rights of a third party.

## 10. TERM

The term of this Agreement shall be five (5) years (the "Term") beginning on March 1, 2010 and ending on February 28, 2016, unless terminated earlier in accordance with the provisions of this Agreement or extended by the parties hereto in writing.

## 11. ANNUAL REVIEW

On or about each May 1 during the Term of this Agreement the School agrees to review and evaluate the Services and Deliverables of CSSCI and communicate the results of said review to CSSCI.

## 12. TERMINATION

- 12.1 **Termination.** This Agreement may be terminated by either party, with or without cause, upon receipt by the other party of thirty (30) business days advance written notice. Upon termination, the School shall pay CSSCI all costs reasonably incurred hereunder by CSSCI up to the time of termination. Upon termination of this Services Agreement CSSCI shall deliver to the School all Deliverables in CSSCI's possession and delete from CSSCI's physical and electronic files all data and information relating to the School.
- 12.2 **Hand Over.** Upon any termination of this Agreement CSSCI shall have a continuing duty to assist in the hand over and smooth

transition to a new firm or the School of all Student Records and Deliverables. If within thirty (30) days of turnover, the School finds discrepancies and/or errors in the Services or Deliverables in the performance of any Services, the School shall notify CSSCI of these issues in writing and provide CSSCI with two (2) business days in which to rectify the discrepancy and/or error(s). If CSSCI fails within that time frame to correct the Deliverables and complete the assignment, the School shall be entitled to reimbursement by CSSCI for the School's costs and expenses in resolving or correcting the discrepancy and/or error.

12.3 **Survival.** The terms and conditions of this Agreement that, by their nature, would survive the expiration or termination of this Agreement (including without limitation, Articles 6 through 9 and Sections 4.1, 4.2, 12.1, and 12.2 herein) shall so survive the expiration or termination of this Agreement for any reason.

### **13. INDEPENDENT CONTRACTOR/INSURANCE**

13.1 **Independent Contractor.** Each party to this Agreement is an independent contractor, is not an agent or employee of the other, and is not authorized to act on behalf of the other. While the School may make suggestions, requests, or seek to coordinate the performance of the services by CSSCI, CSSCI's officers, directors, agents, employees personnel and subcontractors shall be under CSSCI's direct control. CSSCI will maintain supervisory responsibility for its employees, agents, personnel and subcontractors and may inquire of the School as to the performance of CSSCI's employees, agents, personnel and subcontractors; but at all times CSSCI will handle complaints, administer discipline, evaluate performance, and provide supervision and counseling as needed. CSSCI agrees that in CSSCI's dealing with the public, CSSCI will not represent or hold itself out as an employee, personnel, agent, or servant of the School.

### **14. JESSICA LUNSFORD ACT**

Section 1012.465, Florida Statutes (hereinafter the "JLA") imposes screening requirements on non-instructional school district employees or contractual personnel. Prior to commencing any activities under a Statement of Work CSSCI

shall ensure that any and all CSSCI officers, directors, employees, agents, staff, personnel, representatives, or subcontractors who will be engaged in activities pursuant to the Statement of Work shall have completed at CSSCI's sole expense all steps necessary to obtain a Level 2 screening, as defined by the JLA. In addition any CSSCI officer, director, employee, staff, personnel, representative, agent, or subcontractor who seeks access to School property when students are present, must enter the School property only through the School's Office. CSSCI agrees to comply with all screening requirements and procedures now and hereafter imposed by federal or state law, rule, regulation or DISTRICT policy at its sole cost and expense.

## **15. GENERAL**

- 15.1 **Entire Agreement.** This Agreement and associated Statements of Work constitute the entire agreement between the parties and supersede any and all prior agreements and understandings between the parties, written or oral, not incorporated herein with respect to the subject matter of this Agreement. This Agreement and any associated Statements of Work may not be changed unless mutually agreed upon in writing signed by authorized representatives of both parties.
- 15.2 **Notice.** Any notice required or permitted by this Agreement must be in writing and shall be deemed to have been given if sent by certified mail, return receipt requested, or overnight carrier addressed: (i) if to CSSCI, to the attention of Joe Bruno, (ii) if to the School, to the attention of the President of the Board of Directors of the School at the addresses listed above (iii) at such other addresses the party to be notified has designated in writing.
- 15.3 **Severability.** In the event any provision of this Agreement is found to be legally unenforceable, such unenforceability shall not prevent enforcement of any other provision of this Agreement.
- 15.4 **Governing Law.** This Agreement shall be governed by the laws of the State of Florida without giving effect to conflict of law provisions. Any dispute relating to the terms, interpretation or performance of this Agreement will be resolved at the request of either party through binding arbitration. Arbitration will be conducted in the State of Florida, under the rules and procedures of the American Arbitration Association ("AAA"). The parties will

request that AAA appoint a single arbitrator.

- 15.5 **Assignment.** This Services Agreement is not assignable by either party. Neither party shall be required to act reasonably in connection with an assignment or request for consent.
- 15.6 **Waiver.** Waiver by any party of strict performance of any provision of this Agreement must be in writing and signed by the party adversely affected thereby. Such waiver shall not be a waiver, or prejudice the party's right to require strict performance, of the same provision in the future, or any other provision.
- 15.7 **Counterparts.** This Agreement and any Statement of Work may be executed in any number of counterparts, each of which will be deemed an original, but all such counterparts together constitute one and the same instrument.
- 15.8 **Publicity; Use of Trademarks.** Neither Party shall make any public statements or announcements relating to this Agreement without the prior written consent of the other Party. Neither Party shall display or use, in advertising or otherwise, any of the other Parties' trade names, logos, trademarks, service marks or other indicia of origin without the other Party's prior written consent, provided that such consent may be revoked at any time.
- 15.9 **Attorney Review.** The parties hereto represent that each has retained counsel who review this Agreement.
- 15.10 **Approval.** Whenever this Agreement calls for, permits, or requires that the other party approve or consent then, unless otherwise stated, the party of whom the approval or consent is requested shall respond in a commercially reasonable manner. The response may include, among other things, a request for appropriate additional information, an approval subject to conditions or modifications, or a denial; but in each case other than approval should include some explanation of the reasons or basis for the decision. The approving party shall be deemed to respond in a commercially reasonable manner if it has considered the value of its properties and assets, exposure to risk, the effect on its operations, and such other matters as a reasonable person would consider. In the event of a dispute, a rejection or disapproval shall not be deemed unreasonable due to the reasons or

basis for the decision having been poorly explained so long as the explanation was given in good faith.

15.11 **Attorney Fees.** In the event that a dispute under this Agreement results in the filing of litigation over arbitration proceedings, then the prevailing party shall be entitled to an award of its reasonable attorney's fees.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective authorized representatives as of the date first written above.

## **STATEMENT OF WORK**

The following provisions entered into this \_\_\_\_\_ day of \_\_\_\_\_ are designated in accordance with the Services Agreement dated \_\_\_\_\_, which is incorporated herein by reference. CSSCI agrees to provide Pivot Education, Inc. (the "School") with the following marked business services.

### **I. OPTIONS FOR SERVICES:**

#### **A. ACCOUNTING AND FINANCE SERVICES**

##### **1. General Accounting.**

- a. Establish and maintain an accounts payable system in accordance with best practices, including but not limited to:
  - 1) Set up accruals for expenses, account for expenses in accord with the School's written policy attached (which shall control as to any conflict with this Statement of Work) and reconcile them on month closing.
  - 2) Process accounts payable information on a biweekly basis, paying all bills received by the 1st of the month (and at any time during business hours for items requiring immediate payment), based on invoices, signed purchase orders, and any other supporting documentation properly coded with general ledger account numbers and approved for payment by the School's management.
  - 3) Notify School of any repetitive payment (including rent to landlords, utility bills, etc.) as to which School has not timely requested payment.
  - 4) Prepare checks for payments requested and forward checks with related information to the School's management for signature. Pre-numbered checks shall be maintained on site at all times in a locked, controlled manner and any MICR encoding machines kept on site must be secured in a locked cabinet, and software controlling such machines shall be secure.
  - 5) Prepare analysis of expense and expense trends as requested.
  - 6) Research and respond to billing and payment questions.
- b. Set up accruals for receivables and maintain an accounts receivable system in accordance with best practices, including but not limited to:

- 1) Establish accounts receivable and accrue for the same, including Parent accounts.
  - 2) Process cash and other receipts based on copies of checks received copies of receipts, deposit slips and any other supporting documents properly coded with general ledger account numbers by the School's management. The School will be responsible for depositing cash and checks to the School-designated bank. CSSCI will provide receivables reports, but will have no collection obligations.
  - 3) Provide by the 10th day of each month the Aging Accounts Receivables Report for the prior month.
- c. Reconcile bank accounts to ensure all activity has been recorded in the general ledger completely and accurately. Provide by the 20th day of each month a Bank Reconciliation Report.
  - d. Provide by the 10th day of each month a Cash Flow Report as to receipts and payments from the previous month.
  - e. Attend all meetings of the School's Board of Directors to explain the financials.
  - f. By the 20th of each month, provide monthly reports as required by The School Board ("DISTRICT").
  - g. Prepare all required journal entries, including recording bank and investment activities, expense prepaid items, fixed asset entries, recording depreciation, recognizing deferred revenue and other accruals, record payroll entries and payroll allocations in the general ledger, etc.
  - h. Prepare significant account reconciliations and summaries to ensure that transactions have been recorded accurately and completely. These will include accounts such as contributions receivable, prepaid expenses, fixed assets, accounts payable, accrued expenses, deferred revenue, temporarily restricted net assets and net assets released, etc.
  - i. Perform necessary monthly closing procedures after all adjustments have been made. This will include ensuring that all journals and reports are printed and available to the School (i.e., a general ledger, aged accounts payable, cash disbursement journal, etc.).
  - j. Prepare the monthly financial statements, including a statement of position, statements of activities (cash flow), budget vs. actual, as well

as any other custom designed reports necessary for the School's management and the Board, at both the business unit level and consolidated level.

**2. Quarterly Services.**

Prepare and submit the quarterly financial reports required by DISTRICT. Such reports will be designed to be generated automatically from the accounting system.

**3. Annual Audit-Related Services.**

- a. Perform the year-end close and prepare for an annual audit.
- b. Meet with the independent auditor to plan the audit.
- c. Prepare audit schedules.
- d. Provide support to audit fieldwork staff, including production of documents, preparation of work papers ordinarily done by management, and advise the School staff during the audit process.
- e. Review the draft audited financial statements on behalf of the School.

**4. Annual Budget.**

Assist with the preparation of the annual budget, including meeting with department heads and providing templates (including historic expense and income) as a tool for the budget preparation, gathering completed templates, compiling into a complete budget, discussing the proposed budget with management, finalizing the budget for presentation to DISTRICT, assisting School leadership with budget implementation oversight, input of the budget, and undertaking any budget modification.

**5. Meetings.**

Be available for financial and accounting consultation and meeting upon request and to respond to technical issues as they arise.

**B. PAYROLL SERVICES**

**1. Processing Payroll Data.**

- a. Manage and transmit payroll on a semi-monthly basis by:
  - 1) Collecting time, attendance and leave use information from

employees for the appropriate pay periods.

- 2) Performing any file maintenance to the payroll information to include setting up new employees, terminating departing employees, making changes to employee payroll data such as number of exemptions, changes to personal information, pay rate changes, changes in deductions, etc.
- 3) Transmitting payroll data to the payroll service bureau.
- 4) Managing and tracking employee leave accruals through the payroll service bureau, if applicable.
- 5) Processing necessary benefit remittances from payroll, i.e., retirement plan contributions.
- 6) Processing garnishment checks as necessary.
- 7) Reviewing payroll reports upon arrival and providing a copy of the payroll reports to the accounting outsourcing team for the proper allocation of payroll.
- 8) At year end, ensuring the accuracy of all employee information for W2's, and addressing special tax items such as group term life, third party sick pay, taxable fringe benefits, etc.
- 9) Managing the retirement plan by recording the School's employer contribution and coordinate the remittance and any allocation of payments on a per pay period basis.
- 10) Coordinating the processing and repayment of any employee retirement plan loans.

## **C. HUMAN RESOURCES**

1. Maintain the employee handbook to ensure its compliance with employment laws and update the employee handbook as necessary when policies are added or changed.
2. Maintain a complete fringe benefit program for the School by helping employees resolve benefits related questions that pertain to group health, life and disability insurance, retirement plans and flexible spending accounts.
3. Evaluate and consider entertaining bids on all benefit plans on an annual basis to ensure the most appropriate plans are being offered by the School.

4. Coordinate annual or semi-annual meetings with employees and benefits representatives to ensure employees understand their benefits.
5. Provide all benefits administration to include processing new hire and terminated employee paperwork, ensuring compliance with COBRA and HIPPA, managing COBRA elections, and tracking the use of family and medical leave.
6. Work with the managers of the School and the employees to address and handle any employee relations issues that arise.

The services above do not include the implementation of a leave system. Should such a system be desired, a separate fee quote for this process will be provided.

## **II. CSSCI'S RESPONSIBILITIES:**

CSSCI is responsible for performance of the Services described in this Statement of Work in accordance with the Services Agreement dated \_\_\_\_\_, which shall control over this Statement of Work, except as to provisions having a specific statement that this Statement of Work shall control. Services shall be in accordance with the School's policies.

Furthermore, CSSCI is responsible for complying with professional standards and performing the above Services in accordance with Statements on Standards for Accounting and Review Services (SSARS) as established by the American Institute of Certified Public Accountants (AICPA). However, the School is subject to the Charter Requirements as stated in 4.1 of the Services Agreement, and CSSCI will also perform its Services in accordance therewith.

CSSCI will provide advice and recommendations to assist the School's management in performing its functions and making decisions. All work shall be performed on site or at CSSCI's office at 1225 S.E. 2<sup>nd</sup> Avenue, Fort Lauderdale, Florida unless otherwise agreed to in advance and memorialized by the parties in writing.

## **III. THE SCHOOL'S RESPONSIBILITIES:**

The School shall make all management decisions and performing all management functions, including determining account coding of transactions. The School shall notify CSSCI of service requirement changes, communicate the content of this Agreement and related new policies and procedures to the School staff and provide CSSCI with accurate and complete underlying information required for the monthly Services in a timely manner.

The School will also notify CSSCI if it becomes aware that CSSCI's Services are inadequate or contain errors. However, it is understood the School does not and will not

employ accounting experts to evaluate the adequacy of the Services and shall not be responsible for the results of these Services. The School's management will assist CSSCI in implementing reasonable recommendations to improve the consistency and efficiency of procedures throughout the organization as necessary.

**I select the following options:**

- A. **Accounting and Finance Services**                      \$ 100.00 per student (annual)
- B. **Payroll Services**    \$ 0.0 per student (annual)
- C. **Human Resources**    \$ 0.0 per student (annual)

| <b>Fluency</b>                             |   |  |   |  |                 |           |
| LA.910.1.5                                 | The student demonstrates the ability to read grade level text orally with accuracy, appropriate rate, and expression. | The student will:  |   |  |                 |           |
| LA.910.1.5.1                               |   | The student will adjust reading rate based on purpose, text difficulty, form, and style. |   |  |                 |           |
| LA.910.1.6                                 | The student uses multiple strategies to develop grade appropriate vocabulary.   | The student will:  |   |  |                 |           |
| LA.910.1.6.1                               |   | use new vocabulary that is introduced and taught directly.                               |   |  |                 |           |
| LA.910.1.6.2                               |   | listen to, read, and discuss familiar and conceptually challenging text.                 |   |  |                 |           |
| LA.910.1.6.3                               |   | use context clues to determine meanings of unfamiliar words.                             | <b>All Close Plus Levels A-H For Vocabulary Levels 1-8</b><br><br>The Close Plus program develops comprehension competency and vocabulary power through structured context analysis activities. Close Plus™ employs a dual approach that combines structured close instruction with vocabulary-in-context activities. This combination provides students with a broad perspective regarding the role of context in the comprehension process. These structured close activities require students to use context to complete syntax, thus enhancing comprehension. The vocabulary-in-context activities require students to derive the meaning of a difficult or unfamiliar word by analyzing the information in the surrounding context, thus enhancing vocabulary. There are 20 lessons per level for a total of 160 lessons.<br><br><b>Reading Around Words Levels D-L (For Vocabulary Levels 4th-12th Grade) SAT Contextual Vocabulary</b><br><br>The Reading Around Words™ program assists students in developing vocabulary knowledge through structured context analysis activities. The lessons contain SAT contextual vocabulary words geared toward each appropriate grade level. Each level is divided into 16 lessons that contain 15 words each, for a total of 240 word lessons per level. | <b>Reading Placement Appraisal</b><br><br>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.<br><br><b>Close Plus Assessment</b><br>Each Close Plus lesson is graded and teachers may access a detailed skills report by class or by student.  |                 |           |
| LA.910.1.6.4                               |   | categorize key vocabulary and identify salient features.                                 | <b>Word Memory Sight Words, Reading Levels 1-3</b><br><br>The Word Memory™ program develops automaticity in word recognition as well as visual/functional proficiency. Both of these basic proficiencies are prerequisites for fluent and efficient silent reading. The Word Memory™ program also provides extensive reinforcement for the development of phonemic awareness, a basic prerequisite for decoding competence. Level A consists of 60 lessons, Level B consists of 40 lessons and Level C consists of 40 lessons.  | <b>Reading Placement Appraisal</b><br><br>As students take the placement tests, they will be tested over the basic abilities to recognize letters and words. If the student does not master the two basic skills, in their test results, it will say the student is not ready to read.<br><br><b>Word Memory Assessment</b><br><br>Word Memory presents a series of eight words and students count the number of times they see the word. When students master the word, the word moves to the My Words. |                 |           |
| LA.910.1.6.5                               |   | relate new vocabulary to familiar words.   | <b>All Close Plus Levels A-H For Vocabulary Levels 1-8</b><br><br>The Close Plus program develops comprehension competency and vocabulary power through structured context analysis activities. Close Plus™ employs a dual approach that combines structured close instruction with vocabulary-in-context activities. | LA.950.1.7.6 | analyze and evaluate similar themes or topics by different authors across a variety of fiction and nonfiction selections.  | <p><b>Guided Reading (Reading Levels Pre-Primer-College)</b></p> <p>Guided Reading - Level D Lessons, 2,4,12 and 19.</p> <p>Guided Reading - Level E Lessons, 2,6,10,15,17,22 and 26.</p> <p>Guided Reading - Level F Lessons, 5,7,9,11,17,24,26, and 27.</p> <p>Guided Reading - Level G Lessons, 4,7,14,16,18,20,25,27 and 28.</p> <p>Guided Reading - Level H Lessons, 2,4,11,13,14,18 and 27.</p> <p>Guided Reading - Level I Lessons, 1-4,6,7,10,13,16,20, and 26.</p> <p>Guided Reading - Level J Lessons, 1,2,4,5,11,17,21 and 25-27.</p> <p>Guided Reading - Level K Lessons, 5,17,22,24,25.</p> <p>Guided Reading - Level L Lessons 1-11,14,17,24 and 25.</p> <p>Guided Reading - Level M Lessons 2,9,10,12,18 and 21-22.</p>   | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p>   |
| LA.950.1.7.7 | compare and contrast elements in multiple texts.   | <p><b>Guided Reading</b></p> <p>Guided Reading - Level B Lessons, 6,16,18 and 19.</p> <p>Guided Reading - Level C Lessons, 17 and 18.</p> <p>Guided Reading - Level D Lessons, 1,4,7,11,13,14,15,16,18,21,22,24,27,34,37,39 and 40.</p> <p>Guided Reading - Level E Lessons, 1,2,4,6,9,11,13,14,16,17, and 19-25.</p> <p>Guided Reading - Level F Lessons, 2,6,10,14,15,17,20,25 and 28.</p> <p>Guided Reading - Level G Lessons, 2,6,8,10,13,14,16,17,21,22,24,27 and 28.</p> <p>Guided Reading - Level H Lessons, 1,1,5,9,11,13,16,18,19,23 and 28.</p> <p>Guided Reading - Level I Lessons, 1,2,4,6,11,17,19,20,23,24,26 and 28.</p> <p>Guided Reading - Level J Lessons, 2,12,15,16,21,24,26 and 27.</p> <p>Guided Reading - Level K Lessons, 1,4,8,10,17,23,21 and 22.</p> <p>Guided Reading - Level L Lessons, 1,3,10,11,13,15,16,18,20,22 and 25.</p> <p>Guided Reading - Level M Lessons, 1,1,6,16,18,23 and 22.</p>   | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p><b>Guided Reading Assessment</b></p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p> <p><b>Reading Placement Appraisal</b></p> |
| LA.950.1.7.8 | use strategies to repair comprehension of grade-appropriate text when self-monitoring indicates confusion, including but not limited to rereading, checking context clues, predicting, note-making, summarizing, using graphic and semantic organizers, questioning, and clarifying by checking other sources. | <p><b>Guided Reading</b></p> <p>Guided Reading Lessons: Level A Lessons, 7,13,14,17,23 and 25.</p> <p>Guided Reading Lessons: Level B Lessons, 1,7,12,15,20,30,35 and 38.</p> <p>Guided Reading Lessons: Level C Lessons, 9,14,24 and 35.</p> <p>Guided Reading Lessons: Level D Lessons, 5,6,8,11,13,15,21,23,28,30,33,35,40 and 41.</p> <p>Guided Reading Lessons: Level E Lessons, 3,6,7,9,15,15 and 26.</p> <p>Guided Reading Lessons: Level F Lessons, 3,7,9,11,15,18,20,21 and 28.</p> <p>Guided Reading Lessons: Level G Lessons, 2,5,7,9,11,15,17,18,20 and 28.</p> <p>Guided Reading Lessons: Level H Lessons, 1,3,4,7,8,12,21 and 23-28.</p> <p>Guided Reading Lessons: Level I Lessons, 1,5,8,10,12,15,17,20,21,26 and 28.</p> <p>Guided Reading Lessons: Level J Lessons, 2,3,4,6,7,9,11,15,16,24 and 26.</p> <p>Guided Reading Lessons: Level K Lessons, 3,11,14,13,23 and 27.</p> <p>Guided Reading Lessons: Level L Lessons, 2,4,11,18 and 22.</p> <p>Guided Reading Lessons: Level M Lessons, 1,12,15-18 and 21.</p> | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p><b>Guided Reading Assessment</b></p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p>   |

|                |  |                   |  |
|----------------|--|-------------------|--|
| <b>Fiction</b> |  |                   |  |
| LA.950.2.1     | The student identifies, analyzes, and applies knowledge of the elements of a variety of fiction and literary texts to develop a thoughtful response. | The student will: |  |

|               |   |   |  |
|---------------|---|---|--|
| LA.950.2.1.6  | create a complex, multi-genre response to the reading of two or more literary works, describing and analyzing an author's use of literary elements (e.g., theme, point of view, characterization, setting, plot), figurative language (e.g., simile, metaphor, personification, hyperbole, symbolism, allusion, imagery), and analyzing an author's development of tone and sequence through the use of complex literary devices such as foreshadowing and flashback. | <p><b>Guided Reading (Reading Levels Pre-Primer-College)</b></p> <p>Guided Reading - Level A Lesson 10.</p> <p>Guided Reading - Level B Lesson 24.</p> <p>Guided Reading - Level C Lessons, 1 and 3.</p> <p>Guided Reading - Level D Lessons, 1,3-5,8,10,12,15,18,21,23,24,26,28,32,34,38,40 and 42.</p> <p>Guided Reading - Level E Lessons, 1,3,6,8,11,13,14,15,18,19,23,27 and 27.</p> <p>Guided Reading - Level F Lessons, 1,2,4,6,11,17,20, and 24-27.</p> <p>Guided Reading - Level G Lessons, 1,5,7,11,13,17,20,25 and 28.</p> <p>Guided Reading - Level H Lessons, 2,7,12,17,20, and 28.</p> <p>Guided Reading - Level I Lessons, 2,4,8,9,11,17,19,23 and 27.</p> <p>Guided Reading - Level J Lessons, 1,3,5,7,9,11,13,14,16,18,21 and 25.</p> <p>Guided Reading - Level K Lessons, 1,2,5,10,13,14,16,18,21,22 and 25.</p> <p>Guided Reading - Level L Lessons, 1,5,11,12,16,18,19,21 and 22.</p>   | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p><b>Guided Reading Assessment</b></p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p> |
| LA.950.2.1.7  | analyze, interpret, and evaluate an author's use of descriptive language (e.g., tone, irony, mood, imagery, pun, alliteration, onomatopoeia, allusion), figurative language (e.g., symbolism, metaphor, personification, hyperbole), common idioms, and mythological and literary allusions, and explain how they impact meaning in a variety of texts.   | <p><b>Guided Reading (Reading Levels Pre-Primer-College)</b></p> <p><b>Figurative Language</b></p> <p>Guided Reading - Level C Lessons, 1 and 40.</p> <p>Guided Reading - Level D Lessons, 8,12,21,24,36,40 and 42.</p> <p>Guided Reading - Level E Lessons, 2,4,10,14,17,19,22,25 and 27.</p> <p>Guided Reading - Level F Lessons, 3,7,9,10,16,19,23,26 and 28.</p> <p>Guided Reading - Level G Lessons, 1,7,10,12,14,16,19,21,22 and 34-37.</p> <p>Guided Reading - Level H Lessons, 2,7,10,13,16,18,19 and 21-26.</p> <p>Guided Reading - Level I Lessons, 1,3,7,10,12,15,17,19,23,24,25 and 27.</p> <p>Guided Reading - Level J Lessons, 2,5,7,11,16,19 and 27.</p> <p>Guided Reading - Level K Lessons, 3,6,8,11,13,18,20 and 23-25.</p> <p>Guided Reading - Level L Lessons, 3,6,7,11,18 and 22.</p> <p><b>Mood and Tone</b></p> <p>Guided Reading - Level I Lessons, 16, 18 and 21.</p> <p>Guided Reading - Level F Lessons, 2,7, 18 and 28.</p> <p>Guided Reading - Level G Lessons, 2, 11, 19 and 20.</p> <p>Guided Reading - Level H Lessons, 3,4,16,24 and 28.</p> <p>Guided Reading - Level I Lessons, 4,7,27 and 28.</p> <p>Guided Reading - Level J Lessons, 9,16 and 27.</p> <p>Guided Reading - Level K Lessons, 15,20,25 and 26.</p> <p>Guided Reading - Level L Lessons, 4,7,8,10,13,17 and 24.</p> <p>Guided Reading - Level M Lessons, 1,5,9,14,18,19 and 22.</p> | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p><b>Guided Reading Assessment</b></p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p> |
| LA.950.2.1.9  | identify, analyze, and compare the differences in English language patterns and vocabulary choices of contemporary and historical texts.  | <p><b>Students will read fiction and non-fiction stories at their individualized reading level and then answer questions about the author's use of figurative language and how the use of descriptive language helps set the tone and mood of the stories. There</b></p>  |  |
| LA.950.2.1.10 | select a variety of age and ability appropriate fiction materials to read based on knowledge of author's style, themes, and genres to expand the core foundation of knowledge necessary to connect topics and function as a fully literate member of a shared culture.  | <p><b>Guided Reading</b></p> <p>When students work in the Guided Reading program, all of the levels from pre-primer to college level give students an opportunity to select different types of fictional stories from their menu. There are a variety of different styles and themes in their story selections. There are a total of 450 reading selections in the Guided Reading™ library in levels ranging from 1 - 12 (PreA - I). When students work in the Guided Reading program, they will read leveled stories and then answer comprehension questions.</p>  | <p><b>Reading Placement Appraisal</b></p> <p>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.</p> <p><b>Guided Reading Assessment</b></p> <p>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.</p> |

|                   |   |                   |  |
|-------------------|---|-------------------|--|
| <b>Nonfiction</b> |   |                   |  |
| LA.950.2.2        | The student identifies, analyzes, and applies knowledge of the elements of a variety of nonfiction, informational, and expository texts to demonstrate an understanding of the information presented.   | The student will: |  |
| LA.950.2.2.1      | analyze and evaluate information from text features (e.g., transitional devices, table of contents, glossary, index, bold or italicized text, headings, charts and graphs, illustrations, subheadings). |                   |  |

|                                  |  |                   |   |  |
|----------------------------------|--|-------------------|---|--|
| LA.910.2.2                       | use information from the text to answer questions or to state the main idea or provide relevant details.   |                   | <b>Guided Reading (Reading Levels Pre-Primer-College)</b><br>All of the Guided Reading Lessons in Levels Pre-Primer through College level have main idea questions. Students read stories within their pre-identified level. The stories are broken into segments and after students read each part they answer comprehension questions. The last question in every story is a main idea question. Students will have multiple opportunities to practice identifying the main idea in both fiction and non-fiction. There are a total of 450 reading selections in the Guided Reading™ library in levels ranging from 1 - 12 (PWA - 1). | <b>Reading Placement Appraisal</b><br>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels.<br><b>Guided Reading Assessment</b><br>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.  |
| LA.910.2.3                       | organize information to show understanding or relationships among facts, ideas, and events (e.g., representing key points within text through charting, mapping, paraphrasing, summarizing, comparing, contrasting, or outlining).   |                   | <b>Offline Comprehension Skill-Building Lessons</b><br>Lessons. Teacher have access to free offline skill-building worksheets an graphic organizers to target specific comprehension skill practice to help students understand more when they read.  | <b>Offline Comprehension Grading Key</b><br>Students will complete the offline comprehension skill building lessons for targeted skills and then they will use the grading key found in the help area to grade student assignments.  |
| LA.910.2.4                       | identify and analyze the characteristics of a variety of types of text (e.g., references, reports, technical manuals, articles, editorials, primary source historical documents, periodicals, job-related materials, practical/functional text).   |                   |   |  |
| LA.910.2.5                       | select a variety of age and ability appropriate nonfiction materials (e.g., biographies and topical areas, such as science, music, art, history, sports, current events) to expand the core knowledge necessary to connect topics and function as a fully literate member of a shared culture. |                   | <b>Guided Reading (Reading Levels Pre-Primer-College)</b><br>Reading Plus has both fiction and non-fiction stories. Students who start in the lower levels of Guided Reading will begin by reading fictional stories. As their levels advance, they will be presented with non-fictional stories about history, and biographies of famous people. There are a total of 450 reading selections in the Guided Reading™ library in levels ranging from 1 - 12 (PWA - 1).   | <b>Reading Placement Appraisal</b><br>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels Reading Placement Appraisal.<br><b>Guided Reading Assessment</b><br>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills.  |
| <b>Prewriting</b><br>LA.910.3.1  | The student will use prewriting strategies to generate ideas   | The student will: |   |  |
| LA.910.3.3                       | prewrite by using organizational strategies and tools (e.g., technology, spreadsheet, outline, chart, table, graph, Venn Diagram, web, story map, plot pyramid) to develop a personal organizational style.  |                   | <b>Offline Comprehension Skill-Building Lessons</b><br>Teachers have access to free offline skill-building worksheets an graphic organizers to target specific comprehension skill practice to help students understand more when they read. The offline writing materials have several different types of graphic organizers to help students develop organizational strategies for writing.   | <b>Offline Comprehension Grading Key</b><br>Students will complete the offline comprehension skill building lessons for targeted skills and then they will use the grading key found in the help area to grade student assignments.  |
| <b>Creative</b><br>LA.910.4.1    | The student develops and demonstrates creative writing.  | The student will: |   |  |
| LA.910.4.1                       | write in a variety of expressive and reflective forms that use a range of appropriate strategies and specific narrative techniques, employ literary devices, and sensory description.  |                   | <b>Offline Writing Guidelines for Teachers and Students</b><br>Reading Plus provides free writing guidelines and resources to help provide writing practice opportunities. Teachers can download the graphic organizers and writing prompts to use with individual students or with the whole class. In addition to the offline writing activities, after students finish their Guided Reading story, the program will generate a writing prompt under the My Writing Tab. Student can access the writing prompt question and do a short writing exercise in a journal.   | <b>Offline Teacher Writing Guidelines</b><br>The Reading Plus system provides fluency-building activities that include intensive practice with the 25 comprehension skills. The system track student performance and automatically assigns Offline Comprehension Skills worksheets for any skills that the student does not master. Skill worksheets provide explicit instruction and practice and each successive level progressively introduces more complex skills application and practice. Teachers may select appropriate weekly activities and skill focus areas from the list of writing activities target specific skills. The writing activities are aligned to the 25 comprehension skills so teachers may choose writing activities based on the individual needs of each student. |
| LA.910.4.2                       | incorporate figurative language, emotions, gestures, rhythm, dialogue, characterization, plot, and appropriate format.   |                   | <b>Offline Writing Guidelines for Teachers and Students</b><br>Reading Plus provides free writing guidelines and resources to help provide writing practice opportunities. The writing activities are aligned to the 25 comprehension skills so teachers may choose writing activities based on the individual needs of each student. |
| <b>Listening and Speaking</b><br>LA.910.5.2 | The student effectively applies listening and speaking strategies.  | The student will: |   |  |
| LA.910.5.1                                  | select and use appropriate listening strategies according to the intended purpose (e.g., solving problems, interpreting and evaluating the techniques and intent of a presentation).  |                   |   |  |
| LA.910.5.2                                  | research and organize information for oral communication appropriate for the occasion, audience and purpose (e.g., class discussion, entertaining, informative, persuasive, or technical presentations).  |                   |   |  |
| LA.910.5.5                                  | Research and organize information that integrates appropriate media into presentations for oral communication (e.g., digital presentations, charts, photos, primary sources, websites).   |                   |   |  |
| <b>Informational Text</b><br>LA.910.6.1     | The student comprehends the wide array of informational text that is part of our day to day experiences.  | The student will: |   |  |
| LA.910.6.1                                  | explain how text features (e.g., charts, maps, diagrams, sub-headings, captions, illustrations, graphs) aid the reader's understanding.   |                   |   |  |
| LA.910.6.2                                  | analyze the structure and format (e.g., diagrams, graphics, fonts) of functional workplace, consumer, or technical documents.   |                   |   |  |
| <b>Research Process</b><br>LA.910.6.2       | The student uses a systematic process for the collection, processing, and presentation of information.  | The student will: |   |  |

|                                      |   |  |  |  |  |
|--------------------------------------|---|--|--|--|--|
| LA.910.6.2.1                         |   | select a topic and develop a comprehensive flexible search plan, and analyze and apply evaluative criteria (e.g., objectivity, freedom from bias, topic format) to assess appropriateness of resources.  |  |  |  |
| LA.910.6.2.2                         |   | organize, synthesize, analyze, and evaluate the validity and reliability of information from multiple sources (including primary and secondary sources) to draw conclusions using a variety of techniques, and correctly use standardized citations. |  |  |  |
| <b>Media Literacy</b>                |   |  |  |  |  |
| LA.910.6.3                           | The student develops and demonstrates an understanding of media literacy as a life skill that is integral to informed decision making.    | The student will:  |  |  |  |
| LA.910.6.3.1                         |   | distinguish between propaganda and critical reasoning strategies in print and nonprint media.  | <b>Guided Reading (Reading Levels Pre-Primer-College)</b><br>Guided Reading - Level D Lesson 4.<br>Guided Reading - Level E Lessons, 11, 22, 25 and 27.<br>Guided Reading - Level G Lessons, 13 and 18.<br>Guided Reading - Level H Lessons, 3, 5, 17 and 20.<br>Guided Reading - Level I Lessons, 5, 12, 15, 18, 21 and 27.<br>Guided Reading - Level J Lesson 9.<br>Guided Reading - Level K Lessons, 5, 8, 11 and 24.<br>Guided Reading - Level L Lessons, 1, 8, 10 and 22.<br>Guided Reading - Level M Lessons, 12 and 13.<br><br>Students will read fiction and non-fiction stories at their appropriate reading level and then answer questions about different ways author can manipulate the story to fit their own point of view and force the general public's opinion. There are a total of 450 reading selections in the Guided Reading™ library in levels ranging from 1 - 12 (PreA - 1). | <b>Reading Placement Appraisal</b><br><br>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels. Reading Placement Appraisal.<br><br><b>Guided Reading Assessment</b><br><br>Each Guided Reading lesson is graded and the information is sent to a database where teachers can view a report to show student mastery over specific comprehension skills. |  |
| <b>Technology</b>                    |   |  |  |  |  |
| LA.910.6.4                           | The student develops the essential technology skills for using and understanding conventional and current tools, materials and processes. | The student will:  |  |  |  |
| LA.910.6.4.2                         |   | routinely use digital tools for justification, communication and productivity.   |  |  |  |
| <b>Fluency</b>                       |   |  |  |  |  |
| <b>Grades 11-12: Reading Process</b> |   |  |  |  |  |
| <b>Fluency</b>                       |   |  |  |  |  |
| LA.1112.1.5                          | The student demonstrates the ability to read grade level text orally with accuracy, appropriate rate, and expression.                     | The student will:  |  |  |  |
| LA.1112.1.5.1                        |   | The student will adjust reading rate based on purpose, text difficulty, form, and style.   |  |  |  |
| <b>Vocabulary Development</b>        |   |  |  |  |  |
| LA.1112.1.6                          | The student uses multiple strategies to develop grade appropriate vocabulary.   | The student will:  |  |  |  |
| LA.1112.1.6.2                        |   | listen to, read, and discuss familiar and conceptually challenging text.   |  |  |  |

|                |  |   |   |  |  |
|----------------|--|---|---|--|--|
| LA.1112.1.6.3  |  | use context clues to determine meanings of unfamiliar words.  | <b>All Close Plus Levels A-H. For Vocabulary Levels 1-8</b><br><br>The Close Plus program develops comprehension competency and vocabulary power through structured context analysis activities. Close Plus™ employs a dual approach that combines structured close instruction with vocabulary-in-context activities. This combination provides students with a broad perspective regarding the role of context in the comprehension process. These structured close activities require students to use context to complete syntax, thus enhancing comprehension. The vocabulary-in-context activities require students to derive the meaning of a difficult or unfamiliar word by analyzing the information in the surrounding context, thus enhancing vocabulary. There are 20 lessons per level for a total of 160 lessons.<br><br><b>Reading Around Words D-L (For Vocabulary Levels 4th-12th Grade) SAT Contextual Vocabulary</b><br><br>The Reading Around Words™ program assists students in developing vocabulary knowledge through structured context analysis activities. The lessons contain SAT contextual vocabulary words geared toward each appropriate grade level. Each level is divided into 16 lessons that contain 15 words each, for a total of 240 word lessons per level.   | <b>Reading Placement Appraisal</b><br><br>Before students begin using Reading Plus, they take a placement test to determine their appropriate reading and vocabulary levels. The placement test provides detailed information about student's reading rate, vocabulary skills, comprehension skills and perceptual memory ability.<br><br><b>Close Plus Assessment</b><br><br>Each Close Plus lesson is graded and teachers may access a detailed skills report by class or by student.  |  |
| LA.1112.1.6.4  |  | categorize key vocabulary and identify silent features.   | <b>Word Memory Sight Words. Reading Levels 5-3</b><br>The Word Memory™ program develops automaticity in word recognition as well as visual/functional proficiency. Both of these basic proficiencies are prerequisites for fluent and efficient silent reading. The Word Memory™ program also provides extensive reinforcement for the development of phonemic awareness, a basic prerequisite for decoding competence. Level A consists of 60 lessons. Level B consists of 40 lessons and Level C consists of 40 lessons.  | <b>Reading Placement Appraisal</b><br><br>As students take the placement tests, they will be tested over the basic abilities to recognize letters and words. If the student does not master the two basic skills, in their test results, it will say the student is not ready to read.<br><br><b>Word Memory Assessment</b><br><br>Word Memory presents a series of eight words and student count the number of times they see the word. When students master the word, the word moves to the My Words list. Words they need to work on will appear in the Hard Words list.  |  |
| LA.1112.1.6.5  |  | relate new vocabulary to familiar words.  | <b>All Close Plus Levels A-H.
